Small business men and women remain at the cutting edge in America's economy through the creation of jobs, community investment, and opportunities for many people who may not have been touched by our Nation's economic recovery. Small business entrepreneurs have worked arduously, often expending their own resources to achieve their enterprising goals. The small business community in America has overcome seemingly insurmountable odds to compete in the international business community with the major multinational conglomerates.

Mr. Speaker, I am very proud that our Nation's small businesses have been able to assert themselves as successfully as they have. During much of this decade, the Presidential administration was not always sensitive to the needs of the small business community. It is my hope that the present administration will go a few steps further than its predecessor by making a sustained and substantive commitment to the critical issues facing minorities, women, and other small business persons.

The small business community continues to expand its base within the economic fiber of our country and without their diligence in the face of adversity we would certainly be in a much graver economic predicament than we are now. Mr. Speaker, the small business persons in my district of Baltimore City readily assist both the State and local government with a wide variety of services and cooperation that many officials have come to accept as a necessary and crucial supplement.

In closing, I hope that each and every Member of the House of Representatives will take the time to honor our Nation's small businesses and follow up on the issues that affect this community.

Mr. CONTE. Mr. Speaker, upon the occasion of Small Business Week 1989, I rise to pay tribute to America's small businesses. This is the 25th year we have so honored small business and it can be truly said that America's 19 million small businesses are indeed America's future. Over the years, much has been said and printed about small business: how small businesses employ 55 percent of all workers, create 66 percent of all new jobs, provide 50 percent of all major innovations, and produce 40 percent of the gross national product. It has been said that American small business produces so many goods and services that it can claim to be the world's fourth greatest economic power. Indeed small business is indispensable to a healthy economy and full employment in this country.

I firmly believe that strong, sustained small business activity is the keystone to a healthy economy, which is why I serve with pride on the Small Business Committee. I first joined the committee in 1965. From 1969 to 1978, I was the ranking minority member during which the committee was upgraded from a select committee to a permanent select committee in 1971 to a standing committee in 1975. It has been my great honor to serve with and lead my distinguished colleagues on a committee rich with history and accomplishments.

Mr. Speaker, in reviewing the statistics for fiscal year 1987, I note that small business firms accounted for $35 billion of the $198 billion in all Federal purchases, or 18 percent of total procurement. Further, small business subcontractors won about $26 billion in awards from prime contractors on Federal projects. The combined total of small business participation in Government contract awards is $61 billion or 31 percent of the total value. Impressive as that figure is, I believe we need to renew our efforts to increase small business participation in Federal procurement. Two ways to accomplish that is to increase small business contracting opportunities and to increase competition in Federal procurement.

In the historic 100th Congress, I authored legislation intended to do just that. I introduced H.R. 3921, a bill to enhance the powers of the SBA's breakout procurement center representatives, which ultimately became section 110 of Public Law 100-590, the Small Business Administration Reauthorization and Amendment Act of 1988. BPCR's are advocates of competition in the procurement process. Their main function is to identify items being procured on a sole source basis and to "breakout" the item for competition. BPCR's also counsel and encourage small businesses to compete for the breakout. As a direct result of this legislation, small business will receive a greater portion of Government contracts and the enhanced small business competition will generate substantial cost savings to the taxpayers.

Mr. Speaker, I also co-authored H.R. 1807, the SBA section 8(a) reform bill, which ultimately became Public Law 100-656, the Business Opportunity Development Reform Act of 1988. This comprehensive reform bill introduced competition into a sole source contracts program that had heretofore only made minority firms permanent supplicants of Feder-

al largess. Now, at my initiative, minority firms will have to compete for contracts above a certain dollar threshold and the SBA is given the authority to compete for contracts below those thresholds on a discretionary basis, which I hope is all the time. While the number of contracts above the threshold is not great, the dollar amount is considerable, averaging about 35 percent. As firms grow larger, competition will increase so that in the future competitive contracts both above and below the thresholds should account for 50 percent or more of all 8(a) contract dollars. Only through sheltered competition will minority firms become competitive in the marketplace.

In order to continue the drive for increased opportunity and competition I will introduce two bills this week: the Small Business Protection Act and the Women's Business Equity Act. The Small Business Protection Act will amend the Small Business Act to provide for a small business impact statement whenever an agency proposes to combine several small contracts into one large multifunction contract. This practice of contract aggregation, also known as consolidation, bundling, or umbrella contracts is inimical to small business participation in Federal contracting in that it effectively eliminates small business as prime contractors. The GAO has done several reports on the adverse impact of this practice on small business and last year, Congress adopted language in the Fiscal Year 1988 Military Appropriations Act expressing concern over the problem. Small business needs the opportunity to compete for all types of Federal contracts, particularly prime contracts. Just as we now have environmental impact statements on Government-funded projects—so shall we have a small business impact statement on any contract action designed to avoid small business set-asides—if my bill is adopted. The Women's Business Equity Act is a three-point approach to promoting, encouraging, and safeguarding women's business enterprises. It amends the Small Business Act to create a preemptive and uniform certification process to be used by all Federal agencies in identifying women-owned businesses for contracting opportunities. It enhances Federal procurement opportunities for women-owned businesses through goal setting, and subcontracting requirements. It would further direct all agencies to include at least one bid from a women-owned small business for all small purchase orders under $25,000. Finally, my bill would make permanent the Office of Women Business Enterprises in the SBA with appropriate staffing and functions. Women now own about 30 percent of all American businesses. Increasingly, more and more women are finding that small business self-employment is the major pathway to full economic participation in our free enterprise system. We must eliminate now any barriers denying women the opportunity to compete on an equal basis for Federal contracting opportunities.

Mr. Speaker, in the President's annual report on the State of Small Business is a table illustrating "Procurement Dollars and Actions by Size of Action, Fiscal Year 1987." More than 98 percent of all contract actions in fiscal year 1987 were for purchases less than $25,000 and small business won 46 percent of the dollar volume. In contract actions above $25,000, small business garnered only 15 percent of the dollar volume. Those actions under $25,000 accounted for less than 10 percent of the dollar volume for fiscal year 1987 with 91 percent of the dollar volume transacted over $25,000. In other words, the 2 percent of contract actions over $25,000 is where the money is and where the next battlefield will be for small business. It is my belief that small business is the ultimate competitor and that our goal, as small business champions, is to ensure that small business participation in Federal procurement achieves parity with their contribution to the gross national product, which is now 40 percent. That parity or 9-percent increase should come from prime contracting actions. I believe that the two bills I am introducing this week is a step in that direction. Opportunity and competition will ensure increased Federal procurement participation for small business today and in the future.

One final note, Mr. Speaker. Since the first of this year, I have been fighting for small business on several other important fronts. I have strongly advocated for the repeal of Internal Revenue Code section 89 which I believe is fundamentally flawed, both in its underlying assumptions of discrimination in the marketplace and in its legislative mandate which is clearly unworkable. This repeal legislation now has over 300 cosponsors. In addition, my good friend, DAN ROSTENKOWSKI, has just introduced legislation that would greatly simplify section 89 and has already held a hearing on it. I think the message to American employers is clear—section 89, as we now know it, is not long for this world. I am also sponsoring legislation that would allow unincorporated business owners to deduct the full amount of their health insurance costs. This bill would end the unfair tax treatment of health premium costs between incorporated and unincorporated businesses and would, if adopted, replace the 25-percent deduction due to expire at year's end. I am also pushing with my good friend and esteemed colleague, ANDY IRELAND, to include the Internal Revenue Service under the Regulatory Flexibility Act, to raise the status of the Administrator of the Small Business Administration to Cabinet level and for permanent authorization of the White House Conference on Small Business. Finally, I am examining the issue of rural small business development and the problem of the estate tax on the family-held business or farm. It is clear that the needs of small business are never ending. But their potential is unlimited. They are indeed America's future and those of us fortunate enough to serve on the Small Business Committee must be their protector and advocate. Small business is the ultimate competitor in the ultimate economic system and it will confidentially power America into the 21st century if it is not burdened with unproductive regulations and is given the opportunity to do what it does best—compete. Today's legislative victories will be the foundation for insuring tomorrow's small business success. I urge all my colleagues to catch the spirit of small business and make the 101st Congress the Small Business Congress.

Mr. MAZZOLI. Mr. Speaker, it is a privilege to have this opportunity during Small Business Week to commend our Nation's small businessmen and women.

As a member of the House Small Business Committee, I have worked with America's entrepreneurs as well as with my colleagues and public officials to help small businesses get started and to succeed.

I have seen, first hand, the men and women who have taken the risks and who have persevered to nurture their ideas and dreams into prosperous businesses. And, the sight is beautiful.

Currently, the 19 million small businesses operating in the United States employ 6 out of every 10 people and provide Americans with goods and services which otherwise would not be available or, at least, not affordable.

Appropriately, then, the theme this week is: Small Business is America's Future.

Small businesses are able to keep pace with everchanging consumer demands and the rapid changes in our country's economic and technological needs because of their ability to be flexible yet be focused. They can capitalize on a trend much more swiftly than their Fortune 500 competitors, and they can turn away to a new phase without all the bureaucracy and red tape which can, at times, virtually paralyze larger companies.

While successful in the domestic arena, small businesses are now turning their energies increasingly toward foreign and overseas markets. Some small businesses—acting with this foresight—have already penetrated these markets, and this expansion has made a noticeable, positive impact on our trade deficit. With the United States-Canada Free-Trade Agreement, and in anticipation of a unified European market in 1992, there are many more opportunities and markets awaiting small businessmen and women if they get the help and support they need from the Federal Government.

I find this an exciting time for small business. It is the backbone of our Nation's economy. It is the future for U.S. economic growth, and it is the provider of all the employment, technology, and the goods and services which result from this growth.

However, this tribute to small businesses would not be complete without taking a moment to recognize the U.S. Small Business Administration [SBA] and the services it provides to the small businesses of America. The SBA was created in 1953 to assist America's small businesses, and as we can see from the statistics and examples we've heard today, it has been successful in its mission.

One of the many facets of the SBA is the Service Corps of Retired Executives [SCORE]. The corps is made up of retired executives who volunteer their time to counsel men and women who wish to start their own businesses. I was pleased to kick off Small Business Week at a breakfast Monday morning, sponsored by SCORE.

I was particularly proud to attend because the SCORE chapter in my congressional district of Louisville and Jefferson County, KY, was selected as the SCORE Chapter of the Year. Particular thanks go to Mr. and Mrs. Ben Crume and Henry Feingold who were in at-

tendance to accept this award. Their devotion, time and commitment—and that of the other SCORE volunteers in Louisville—have helped many men and women start successful businesses in our area, and they are truly deserving of this award.

Mr. HANSEN. Mr. Speaker, it is U.S. Small Business Week and I believe it is fitting the contributions of small business be recognized and applauded. Small businesses are the driving force of the U.S. economy. The economic vitality and growth of this Nation is tied more directly to small businesses than any other sector. Their number has grown from 13.6 million in 1981 to 19.8 million thus far in 1989. Historically, these enterprises have prospered because the policies of the United States have fostered innovation, flexibility, and the opportunity to compete.

Americans love competition. Presently many Americans are caught in the fervor of the NBA playoffs. The excellence of the players and coaches of both sides peaks as the best teams give all they have in hopes of winning the championship. The excitement generated from a fair, hard-fought contest is intense; whether it be an athletic event, an auction, or a business deal.

It is within this competitive atmosphere that small businesses have flourished in the U.S. economy. Competition produces a continually better product, person, or skill. This country is made up of individuals who will take risks, grab opportunities, and compete. As a result, 1 million new businesses are started each year. This pioneering spirit and relentless drive creates two out of every three new jobs in the United States. This trend must not be discouraged nor denied for small business has outpaced and outproduced the more traditional spheres of financial communities.

I am gravely concerned about the increasing tendency for Members of this body to fasten ties that bind the hands of small business owners all over this country. President Reagan stated: "Small business progress * * * whether in terms of new business starts, creation of new jobs, efficient sales to the Government, or new innovations, cannot be sustained without continued, favorable Federal policies toward small business." We must work to develop such policies.

Many have lauded the critical role that small businesses have played in employment growth and America's prosperity. Yet often, these same people support legislation that is the equivalent of tying together the shoelaces of Michael Jordan, one of America's finest athletes, and telling him to compete.

It is imperative for us to closely examine any initiatives which require small businesses to pay for social programs even the Government can't afford to implement. Mandating expensive social programs by small, emerging companies is hardly the way to build American competitiveness. Our economy is constantly changing, and businesses need the flexibility to adapt. There is already an onset of a labor shortage which will hit small businesses the hardest. Therefore, they must be responsive to the demands of the labor force and tailor to the needs of individual employees. The role of government is to create incentives for employers to offer benefits, not dictate those benefits.

The spirit of competition in this country has placed America in a position where other countries strive to be. Foreign lands are emulating this system which has brought unequaled economic success to the United States. Yet, at the same time, the tendency of Congress is to implement more and more burdensome laws and regulations. Mr. Speaker, if small business is America's future, we must provide a favorable climate for this vital sector of our economy.

Mr. MAVROULES. Mr. Speaker, this is U.S. Small Business Week.

The theme of this year's Small Business Week is "Small Business is America's Future." As you are aware, most new jobs are created by small businesses. With society's rapid changes and the global market competition which U.S. businesses face, it is becoming increasingly difficult for small businesses to remain viable. They also have the greatest local economic impact in our communities. Thus, it is imperative that our national policy preserve and encourage the growth and development of this segment of our business community.

Mr. Speaker, I would like to take this opportunity to recognize some distinguished small businesses that are being recognized in my District, Sixth District of Massachusetts, this week by the Cape Ann Chamber of Commerce in Gloucester, MA. They have all been involved not only in the activities of their businesses but have actively involved themselves in projects and programs to benefit their communities as well. However, these persons have prevailed, and very successfully, over the years. Each has set a fine example of excellence in public service and economic development.

First there is Mr. Benjamin and Mrs. Marlene Greenbaum, owners of Benjamin's card, gift, and office supplies shop. They have been very actively involved in various downtown committee projects including those overseeing the revitalization of the mainstreet area of Gloucester, MA.

Second, Ms. Ann Fisk, director of the Rockport Art Association is being recognized for her dedication to displaying art and promoting the work of local artists. She is a former selectman and active in many chamber of commerce and town committees in the Town of Rockport, MA.

Then we have Ms. Sue Noble of S.E. Noble Real Estate in Manchester, MA. Ms. Noble is currently a selectwoman in Manchester, serves on the board of selectmen, is involved with affordable housing projects, the Council on Aging, and works with basically a variety of community type projects.

Finally, I wish to note that Mr. Harold Addison of Harold Addison Photography in Essex, MA is being acknowledged during this Small Business Week. He is a former member of the board of selectmen, is involved with the Lion's Club, various chamber of commerce projects, and a variety of youth programs in the town of Essex.

These are just a few of the examples of the contributions that small businesses are making to the economic and social health of our communities.

GENERAL LEAVE

Mr. IRELAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. MCCLOSKEY). Is there objection to the request of the gentleman from Florida?

There was no objection.

THE FSX AIRPLANE DEAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. GEPHARDT] is recognized for 60 minutes.

Mr. GEPHARDT. Mr. Speaker, I rise tonight to talk about the issue of the FSX airplane deal that the Bush administration has offered to the Congress and has asked us to approve. I appreciate very much this opportunity tonight to speak about this important issue because I think it goes way beyond the simple sale of an airplane or the simple coproduction or redevelopment of an airplane.

Mr. Speaker, this is an issue that impacts greatly on America's future economic and national security. I think this deal worries Members on both sides of the aisle as much as it frightens the American public, and I would like to say very briefly tonight why I think the deal should not go through.

First, I want to talk about trade. The United States now has a cumulative trade deficit between the years 1970 and 1989 of about $1 trillion.

□ 1930

That means that we have bought a trillion dollars' worth more of goods than we have sold to other countries. About a third of that debt is owed to Japan, to investors, to businesses, to people in Japan.

What I cannot understand or reconcile is why 3 years ago when the Japanese said they wanted to build an FSX airplane, a new airplane, we did not simply ask them to buy our F-16.

I think the question we have got to start asking about our debt with Japan is what are we going to sell Japan in the next few years to run a trillion dollar surplus? We cannot sell them F-16's. What are we going to sell them? How are we going to get this surplus down so that we can get back to equilibrium?

I simply suggest that for trade purposes, if for no other purpose, we should be asking Japan, should have been asking them 3 years ago, should be asking them now, to buy F-16's off the shelf.

The Japanese themselves have been saying they need to buy our products where they are the best products in order to bring the trade deficit down.

In 1987, the Mikawa report, which was issued by their own Government, encouraged Japan's private sector to purchase products from countries where they have products which have a comparative advantage. We have a comparative advantage with the FSX.

I find it ironic that the very officials who have been writing these reports to their own private sector do not see fit to take that advice themselves when it comes to Government purchases of American products.

So for the trade issue alone, they should buy the F-16 off the shelf.

The second issue, which is probably the more important, is what we are giving the Japanese in terms of the aerospace industry? I think the specific question we have got to ask and answer is whether or not the selling of this technology to the Japanese will shorten the time in which they can achieve equity with us in the aerospace industry. In other words, will we hasten the day 5 or 10 years from now that Japan will have its own McDonnell Douglas or its own General Dynamics?

My conclusion from reviewing the evidence of this deal is that we will be giving them important technology in terms of integrating all the technological systems that go into a modern aircraft, that will hasten the day that they will have their version of our Boeing or our General Dynamics or our Lockheed.

For that reason, I do not think this deal makes sense. We are in a tough worldwide competition. We have lost a great market share and a lot of emerging technologies, semiconductors, computers, HDTV, and supercomputers. We could go down the list.

The question we have to ask is, Do we want to give up another one? Do we want to shorten the time in which they can be competitive? I do not think we do and I think the FSX is wrong for that reason as well.

The third issue that always comes up is whether or not if we do not go along with the Japanese on this deal, they will go to the Europeans or they will develop their own fighter on their own. People say they will. Therefore, we ought to make the deal with them to keep them in cooperation with us, because they will go do it on their own.

My answer to that issue is that I would rather have them go it alone or go it with the Europeans, because again it will take them that much longer to develop this airline airplane technology than if they do it with us.

The research that goes into this technology is worth about $7 billion to American taxpayers and the American industry. For the life of me I cannot understand why we would want to give up that $7 billion of technology in return for a simple coproduction arrangement.

I think the final point that I would like to make is that this whole FSX arrangement really brings up I think the whole question of the way we have structured our relationship with Japan and other countries through the years. The other day I was talking with some of our Defense Department people about the FSX deal and I asked the question, "If this were just a trade matter, had nothing to do with defense and national security, would it be a good deal for the United States?"

And the answer was that this was not a trade matter, it is simply a defense and security issue.

I think that really and truly is the way that our Defense officials have looked at these questions.

I had a briefing today with the General Accounting Office. I asked them what was the reason that our Defense Department wanted to do this deal. Their answer was that it had nothing to do with trade. It was simply for defense and security and it was designed to keep Japan on our side.

Those kinds of reasons may have been good in 1949 or 1959 or even 1969, maybe even 1979. It is not good enough in 1989. The world has changed and we have changed. We are no longer dominant in the world marketplace. We can no longer simply say that it is good for defense and security, but it is not so good for trade and economics. Trade and economics have to be equal in consideration with defense and security matters.

So I would urge the Members of the House as we consider this deal, as we come to vote on it in the next few days, that we will look at it through the eyes and the eyeglasses and viewpoint and the prism of trade and economics, as well as defense and security. I think if Members will do that, they will decide as I have that this deal is not good for the interests of the United States.

I would further say it is not good for the interests of Japan as well.

I hope that Members will join with me and many others who oppose this deal in seeing that it is defeated so that our airline aerospace industry will be able to continue its dominant role in the days ahead.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. SCHUMER] is recognized for 60 minutes.

[Mr. SCHUMER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

[Mrs. BENTLEY addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.]

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

[Mr. OWENS of New York addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

[Mr. GONZALEZ addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

SCIENCE, ENGINEERING, AND MATHEMATICS EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. BROWN] is recognized for 10 minutes.

Mr. BROWN of California. Mr. Speaker, along with 17 cosponsors from the Committee on Science, Space, and Technology, I am today introducing a bill called Science, Engineering, and Mathematics Educator Award Act. This legislation would help increase the science literacy of our citizens by enhancing the quality of undergraduate science and engineering education at our colleges and universities.

As my colleagues in this Chamber well know, our Nation faces a crisis in education generally and science education in particular. Numerous studies and a variety of declining test scores demonstrate the stark reality of this crisis: We are rapidly becoming a nation of science illiterates.

Science illiteracy poses a clear danger to our country, for our competitiveness as a nation is intimately linked to our pursuit of science and technology. For many years this pursuit has flourished, in large measure, because of support for basic research in our colleges and universities by the Federal Government. That research effort has produced a wealth of new knowledge and a variety of technological benefits for society.

While I do not mean to disparage those benefits, society has paid a high price for them. It is clear that the financial and prestige rewards of research have become the major driving incentives for the careers of many academic scientists and engineers. This has led to a devaluation of teaching, especially for undergraduate science students.

This conclusion has been reached by many observers. For example, the National Science Board studied the impact, on undergraduate science education, of Federal support for academic research which expanded during and after World War II. A major conclusion of the report is:

Faculty members in those areas to which research money was easily available became, in time, less citizens of their academic campuses and more citizens of their disciplinary communities. Their priorities shifted from the task of imparting knowledge to the young to the creation of new knowledge—not simply to maintain their skills as profes-

sionals by exercise of that important faculty, but as an end in itself. A revision of the professional value system followed inevitably.

In his recent testimony before the Science, Space, and Technology Committee, my good friend, Rustum Roy, professor of materials sciences at Pennsylvania State University, observed that research funding at American universities has "radically degraded all aspects of education, including science education of the majority of the population, including the Nation's lawyers, business, and political leaders."

The consequences of this shift in priorities harm our country for two reasons. First, our next generation of scientists and engineers comes from this pool of undergraduate science students. If we do not provide quality science education at the undergraduate level, we will potentially reduce the number of scientists and engineers required to continue the research effort essential for the future competitiveness of our country. Second, because so much of our national culture is grounded in science and technology, it is crucial that all our citizens receive a quality education in science. Much of that education occurs at the undergraduate level. If we are to have an educated citizenry, we must have educators interested in and committed to quality undergraduate science education.

The magnitude of this problem is immense, and the Science, Engineering, and Mathematics Educator Award Act would provide but one small step toward addressing the imbalance between research and undergraduate education priorities in our universities. The legislation would encourage faculty members to make a commitment to teaching equivalent to their commitment to research. It would do this by providing awards to approximately 100 faculty members who wish to break from their present routines of intensive research and grant writing and focus instead on teaching and curriculum development. These awards would help increase the prestige associated with science and engineering teaching at the undergraduate level in the following ways. The financial support accompanying these awards would enable faculty members to explore and develop new courses and curricula for undergraduate education. The awards would also provide support for the intellectual and professional growth of the recipient. Finally, the awards would provide funds to the academic institution to support these activities of the faculty member.

Mr. Speaker, it is not sufficient for us to encourage new students to pursue careers in science unless we have teachers willing and interested in instructing these students. If we desire a population with the literacy necessary to function in our modern technically based culture, it is vital that we have educators with the skills and enthusiasms necessary to teach those people. Excellent undergraduate science education is essential for the continued economic and cultural growth of our Nation. It is imperative that we do everything possible to foster and enhance the quality of that education. I urge my colleagues to cosponsor this important legislation which would provide additional stature for scientists, engineers, and mathematicians who want to concentrate on helping improve the science literacy of American citizens.

Mr. Speaker, in closing, I would like to briefly summarize the salient features of this bill:

SECTION 2. PURPOSES

The purposes of this bill are to increase the level of scientific literacy in our Nation by enhancing the quality and prestige of undergraduate science teaching. The bill seeks to recognize individuals who can strengthen science education within their institution, in the region, or the Nation, as well as encourage facility members to devote a portion of their careers to improving the quality of undergraduate science education.

SECTION 4. ESTABLISHMENT OF PROGRAM

This bill calls upon the Director of the National Science Foundation to establish a Science, Engineering, and Mathematics Educator Award Program. Awards made under this program shall be made on the basis of nominations submitted by academic institutions on behalf of science faculty members who commit a significant part of their careers to undergraduate science education. Each award will provide funds for curriculum development, scholarly activity to enhance professional growth, salary support, travel, and university indirect costs.

SECTION 5. SELECTION CRITERIA

Recipients of these awards would be selected based on a merit review process. This process would consider this potential and intent of the nominee to contribute significantly to undergraduate science education and the potential and intent of the nominee to continue his or her professional growth through research or other scholarly activity. While most of these awards will be made in the traditional scientific disciplines, it is the intent of this legislation to encourage proposals that focus on providing science education for those individuals who choose not to become professional scientists, proposals that provide science education for individuals who have traditionally been underrepresented in science, interdisciplinary projects that combine science and the humanities, projects that combine the resources of several institutions, and projects that utilize the resources of industry.

SECTION 6. CURRICULUM DEVELOPMENT

Recipients of these awards are encouraged to develop curricular materials that reach beyond their local institution to have a broad impact on science education in the region and the Nation.

SECTION 7. AUTHORIZATION OF APPROPRIATIONS

This bill calls for an appropriation of $10 million for fiscal year 1990. It is my intent that this will provide for approximately 100 awards.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ENGEL (at the request of Mr. FOLEY), until 2 p.m. today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SAWYER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PAYNE of New Jersey, for 5 minutes, today.

Mr. GEPHARDT, for 60 minutes, today.

Mr. SCHUMER, for 60 minutes, on May 11.

Mr. GAYDOS, for 60 minutes, on May 16.

(The following Members (at the request of Mr. MACHTLEY) to revise and extend their remarks and include extraneous material:)

Mr. MCEWEN, for 5 minutes, today.

Mr. MICHEL, for 5 minutes, today.

Mr. MACHTLEY, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MACHTLEY) and to include extraneous matter:)

Mr. SMITH of New Hampshire.
Mrs. VUCANOVICH.
Mrs. SAIKI.
Mr. PORTER.
Mr. WEBER.
Mr. BROOMFIELD.
Mr. MCCANDLESS.
Mr. GILMAN.
Mr. ROWLAND of Connecticut.
Mrs. MORELLA.
Mr. BILIRAKIS.
Mr. BLILEY.
Ms. SCHNEIDER.
Mr. DAVIS.
Mr. CONTE in four instances.
Mr. FIELDS.
Mr. HEFLEY.
Mr. CLINGER.
Mr. WOLF.
Mr. HILER.
Mr. SENSENBRENNER.

(The following Members (at the request of Mr. SAWYER) and to include extraneous matter:)

Mr. MATSUI in three instances.
Mr. BERMAN.
Mr. COELHO.
Mr. ECKART.
Mr. RAY.
Mr. CARDIN.
Mr. LEHMAN of Florida.
Mr. ROWLAND of Georgia.
Mr. ROYBAL.
Mr. PEPPER.
Mr. BONIOR.
Mr. MCHUGH.
Mr. ROE.
Mrs. BOXER.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1385. An act to make permanent the Martin Luther King, Jr., Federal Holiday Commission.

ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 38 minutes p.m., the House adjourned until tomorrow, Wednesday, May 10, 1989, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1136. A letter from the Secretary of Agriculture, transmitting to amend section 353 of the Consolidated Farm and Rural Development Act to limit delinquent farmer program borrowers to one write-down of loan principal and interest and to prevent fraud and abuse by extending to borrowers who do not qualify for loan restructuring the 10 year recapture provision applicable to borrowers who do qualify; to the Committee on Agriculture.

1137. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 533(b) of the Housing Act of 1949 to require that housing preservation grant funds be matched dollar-for-dollar by State, local, or other non-Federal funds; to the Committee on Banking, Finance and Urban Affairs.

1138. A letter from the Secretary of Education, transmitting a copy of final regulation—Magnet Schools Assistance Program, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1139. A letter from the Secretary of Education, transmitting a copy of notice of final funding priorities under the National Institute on Disability and Rehabilitation Research for research and demonstration, rehabilitation engineering centers, and research and demonstration knowledge dissemination, and utilization, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1140. A letter from the Secretary of Education, transmitting a copy of Indian education—formula grants—local educational agencies, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1141. A letter from the Director, Defense Security Assistance Agency, transmitting the price and availability report for the quarter ending March 31, 1989, pursuant to 22 U.S.C. 2768; to the Committee on Foreign Affairs.

1142. A letter from the Director, Defense Security Assistance Agency, transmitting a copy of transmittal No. 17-89 which concerns the Department of the Army's proposed lease of defense articles to Canada, pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

1143. A letter from the Chairman, National Labor Relations Board, transmitting the Board's annual report of its compliance with the Government in the Sunshine Act during calendar year 1988, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1144. A letter from the Executive Director, Administration and Human Resources, Federal Home Loan Bank Board, transmitting the Board's annual report of its activities under the Freedom of Information Act, calendar year 1988, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1145. A letter from the Chairman, Board of Governors, Federal Reserve System, transmitting the annual report of the Federal Open Market Committee covering its activities under the Freedom of Information Act, calendar year 1988, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1146. A letter from the Secretary of Education, transmitting the Department's annual report of its activities under the Freedom of Information Act, calendar year 1988, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1147. A letter from the Chairman, Federal Election Commission, transmitting the second biennial report detailing the progress made on the accessibility of polling places to the elderly and handicapped population in the 1988 general elections, pursuant to 42 U.S.C. 1973ee-1(c)(2); to the Committee on House Administration.

1148. A letter from the Acting Assistant Secretary for Importation Administration, Department of Commerce, transmitting the annual report on the activities of the Foreign Trade Zones Board for fiscal year 1986, pursuant to 19 U.S.C. 81p(c); to the Committee on Ways and Means.

1149. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to provide for funding of the wildfire protection, wildfire suppression, and emergency burn rehabilitation activities of the Department of the Interior and the Department of Agriculture, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Agriculture.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAMILTON: Joint Economic Committee. Report of the Joint Economic Committee on the 1989 Economic Report of the President. (Rept. 101-48). Referred to the Committee of the Whole House on the State of the Union.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 876: Mr. QUILLEN.

PETITIONS, ETC.

Under clause 1 of rule XXII,

38. The Speaker presented a petition of the Arkansas Legislative Council, Little Rock, AR, relative to the 10th amendment to the U.S. Constitution; which was referred to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

THE AMERICANS WITH DISABILITIES ACT

HON. TONY COELHO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. COELHO. Mr. Speaker, today I and over 60 of our colleagues, are introducing the Americans with Disabilities Act [ADA]. This historic piece of legislation will prohibit discrimination against America's largest minority, people with disabilities, in employment, transportation, public accommodations, and the activities of State and local governments. It will provide disabled Americans comparable civil rights protections to those afforded on the bases of race, sex, national origin, age, and religion.

Most people do not regard disabled people as a large group, or as an unfairly treated group, or as an economically disadvantaged group. Yet disabled people constitute a major portion of our society. The last U.S. census numbered the disabled at 36 million. Estimates indicate that figure has risen to 43 million since then. And every day, many of those 43 million persons suffer some form of discrimination for no other reasons than the fact that they are disabled.

A nationwide poll conducted in 1986 by Louis Harris and Associates entitled "Bringing Disabled Americans into the Mainstream," determined that discrimination is frequently experienced by the disabled. The survey identified a variety of types of discrimination including lack of access to public buildings and public bathrooms, and the absence of accessible transportation. Clearly one-fourth of those interviewed said they personally had encountered job discrimination because of their disabilities. In a subsequent Harris poll of employers in 1987, three-fourths of business managers revealed that people with disabilities often encounter job discrimination from employers.

It is the responsibility of Congress as Federal policymakers to ensure that this discrimination comes to an end and our society is accessible to all: that wheelchair-users can travel and enter a building to carry on normal economic and social lives; that crucial daily telephone communications are available to those with a hearing impairment; that jobs are not denied people with blindness and epilepsy and other disabling conditions; that people with mental retardation or other mental disabilities are accepted into their communities.

One of the major goals of the ADA bill is to eliminate discrimination against the disabled in employment. Statistics show that disabled persons experience staggering levels of unemployment and poverty. The percentage of disabled persons' families earning less than $5,000 is almost triple the national average. Some two-thirds of disabled people are unemployed, and when employed, they are consistently underpaid.

Colossal unemployment and poverty among the disabled often goes unchallenged because the public has the general impression that these are the inevitable results of disabling conditions. The absence of disabled coworkers by our side is taken as confirmation that disabled people can't work. Discriminatory attitudes hold that a person using a wheelchair, or a deaf or blind person can't perform a job. Quite often, minor adjustments in schedule or work distribution among employees or office structure and equipment is all that is needed to make a job perfectly doable by qualified disabled applicants. Sometimes, no adjustments are necessary at all, all the person needs is a chance.

Similar discriminatory attitudes hold that you can't employ someone with epilepsy because they may have a seizure on the job, when today the overwhelming majority of people with epilepsy have their physical conditions under control through medication. The same discriminatory attitudes hold that a person with a facial disfigurement or spastic condition is so repellant that they shouldn't be employed around others. Can we really go on accepting the fact that some persons are denied jobs simply because they don't look right?

Findings from the 1986 Harris poll indicated that not working is perhaps the truest definition of what it means to be disabled. Two-thirds of all disabled Americans between the ages of 16 and 64 are not working. Only 1 in 4 works full time, and another 10 percent work part-time. Furthermore, unemployment among persons with disabilities as a group is a bigger problem than among any other demographic group of working-age Americans.

Another significant finding was that 66 percent of working age persons with disabilities, who are not working, want to have a job. This overwhelming absence from the labor force of people with a strong desire to work is a tragic failure of the American dream and a waste of labor resources.

The majority of unemployed disabled people, if given the chance, are quite capable of taking their places in the job market. Numerous studies indicate that disabled workers perform as well as or better than their nondisabled coworkers. In 1983 the U.S. Commission on Civil Rights published a report on hiring the disabled entitled Accommodating the Spectrum of Individuals' Abilities. This report quoted an earlier Government study of appointments of severely disabled workers to Federal jobs over a 10-year period. The study concluded those employees' "work record is excellent." The 1987 Harris poll of employers rated the performance of disabled workers as "good to excellent."

Unemployment and underemployment of disabled persons cannot be explained by any differential in productivity. Studies dating back to a massive 1948 Department of Labor study have consistently concluded that disabled and nondisabled workers are equally productive. A survey of such research studies concluded: "* * * the existing literature appears to show both that the disabled who are working are as productive in their jobs as their coworkers and that employers perceived the handicapped as being comparably productive."

Another significant finding from the Harris poll dispels a common myth about the cost of hiring disabled persons. "Seventy-five percent of managers said that the cost of employing persons with disabilities is not greater than the cost of hiring nondisabled workers." Similarly, studies show that accommodating disabled workers is viewed as inexpensive and on-burdensome to companies which have tried it.

Unfortunately, data from the Harris poll indicated that without some new stimulus, the employment of disabled people is unlikely to increase much. Most managers thought their company was already doing enough to employ disabled people and shouldn't make greater efforts to do so. Employers gave the hiring of disabled people a lower priority than the hiring of people from other minority groups and elderly persons. Furthermore, disabled people are the least likely to be viewed as an excellent source of employees.

A ban on employment discrimination will be necessary if the obvious potential of disabled Americans to work is to become a reality. Thus, the need is great for a strong national mandate such as the Americans with Disabilities Act.

Another pervasive form of disability discrimination is architectural and communication barriers in public accommodations. These facilities, including restaurants, stores, hotels, auditoriums, theaters, professional offices, parks, et cetera, have generally been designed for an ideal user with average physical proficiency. As such, they are inaccessible to many individuals with disabilities.

Though progress has been made in developing architectural standards to eliminate barriers in the construction of buildings, and despite the fact that nearly every State has a statute prohibiting architectural barriers, such barriers continue to be a serious problem. The extent of inaccessibility was illustrated by a 1980 study of State-owned buildings which house services and programs available to the general public. The study found 76 percent of the buildings physically inaccessible and unusable for serving handicapped persons.

This situation exists even though eliminating architectural barriers does not have to be expensive. Study after study has shown that making new buildings accessible to disabled people adds less than one-half of 1 percent to the cost. Many corporations which have made it their policy to construct all new facilities to be barrier-free have found that the costs are virtually absent and cannot even be found in a normal analysis of building costs.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Another problem area for the disabled is transportation. This most common service in our very mobile society is frequently denied to disabled people. The Congressional Budget Office described the extent of the problem this way: "More than 1 million physically disabled, blind, or deaf persons who live within a short walk of transit service cannot physically use it * * *. An additional 4 million handicapped persons live near transit but find it difficult to use."

As interpreted by the National Council on the Handicapped in their 1988 report, On the Threshold of Independence, the 1986 Harris poll underscores the fact that transportation is a major problem for persons with disabilities. A clear majority of disabled persons state that their disability prevents them from getting around, socializing, or going to cultural events as much as they'd like. Forty-nine percent of the respondents believe that their mobility is limited because they "are not able to use public transportation or because [they] can't get special transportation * * *."

Transportation barriers not only limit social and community life, they also severely restrict employment options, and may explain a portion of the 66 percent of disabled persons who are without jobs. According to the Harris survey, approximately 3 out of 10 people say that a lack of accessible or affordable transportation is an important reason why they are not working. As reported in the January 1984 issue of Paraplegia News:

Public transportation is something most Americans take for granted.

Say what you will about your local transit authority—the buses may be dirty and crowded, the drivers may be rude, and the fare may have doubled since last year—but most people can be assured that there will be a bus going their way at 8:15 in the morning and 5:15 in the evening and most likely at decent intervals throughout the day as well.

The picture changes dramatically if one . . . is physically unable to climb the stairs into a bus or train.

Many transit operators have become enamored with "dial-a-ride" paratransit services. They point out that many disabled persons would rather be picked up and delivered door-to-door. I ask, what rational persons would choose a bus rather than a taxi if the price were the same?

The truth is that van service cannot be operated with the same frequency and convenience as the existing bus or rail service. In many cities, disabled citizens must reserve rides days in advance, and waiting periods of several months (or even years) for enrollment into these programs are not uncommon. To provide even resembling mainline services would be prohibitively expensive.

Another edition of Paraplegia News looked at the issue in another way:

Perhaps the best way to consider the appropriateness of paratransit as a substitute for mass transit accessibility is to think of the operation of the taxicab, the most common form of paratransit in U.S. cities. The fare for a taxi is relatively inexpensive for a short trip. The taxi fare rises substantially for longer trips. The time and distance traveled simply add to the operating cost of the taxi for long trips, so the fare increases.

The same is true of paratransit services for the disabled. This is precisely why limits are placed on the operation of paratransit services. If paratransit was open to all disabled persons, to travel any time of the day or evening to any destination in the transit service area, its operating costs would skyrocket. The only cost-effective use of paratransit as a substitute would possiblly be for a limited number of short trips. For most transit uses, paratransit is simply too expensive.

For example, in one U.S. city, $4 million was available to provide some form of transit service for the disabled. The city planners estimated that, if a paratransit service was established for weekday trips only, approximately 1200 one-way trips per weekday could be provided. No evening and weekend travel would be allowed, and the $4 million would be exhausted at the end of one year's time.

For the same $4 million, it was estimated by city planners that approximately 250 lifts could be purchases for fixed-route buses. Accessible bus service would be available on about 20 routes, seven days per week, 17 hours per day. And the lift equipment would last as long as the bus—about 12 years. A decision was made to purchase the 250 lifts, because for the $4 million outlay, a more lasting and frequent accessible service could be provided.

Paratransit's limitations are pervasive and extreme. In some cities, you must reserve your ride 2 weeks in advance. In other cities, you must wait several hours for your ride, or you can only go to the doctor, or you must travel between 9 and 5 or you're only allowed five rides a month. In many cities a nondisabled friend or family member cannot ride in a paratransit vehicle with a disabled person.

But these limitations are not inevitable. A number of cities, including New York, Denver, Seattle, San Francisco, Johnstown, Tacoma, and Champagne/Urbana, have found that purchasing new buses with lifts, as well as providing supplementary paratransit, is a more effective and nonburdensome approach to providing mass transit to people with disabilities. This is true despite great differences between these cities in size and climate.

Discrimination also occurs in the area of communications, and involves the lack of access to telephone services by people with hearing impairments. Technology is readily available for relay services to be established which connect regular telephone users and hearing-impaired users of telecommunication devices for the deal [known as TDDs]. Several states have or are planning to begin such services, and they are often financed by very small (such as 10 cent) surcharges on telephone bills. But without a national mandate for such services, the vast majority of deaf Americans are without access to the normal channels of communications in our society which are available only through the telephone.

The Americans with Disabilities Act will go a great distance toward eliminating the various kinds of discrimination I have described in employment, public accommodations, transportation and communications, and in other areas as well. In The ADA is comprehensive and far-reaching, but prudent. In brief, title I of the bill sets forth findings that too many disabled American are victims of discrimination.

Title II prohibits employment discrimination by employers with 15 or more employees. Prohibitions include discrimination in application procedures, hiring and discharge, compensation, advancement, and training. Employers must provide reasonable accommodations for known physical or mental disabilities unless doing so would impose an undue hardship. Qualification standards must be substantially related to an applicant's ability to perform the job in question. Many of these provisions parallel existing nondiscrimination rules for employers covered by section 504 of the Rehabilitation Act of 1973.

Title III of the bill prohibits discrimination in public services by States or political subdivisions of States, and also addresses nondiscrimination requirements for public transportation services. The bill would make it illegal to purchase or lease new bus or rail vehicles later than 30 days after enactment, if the vehicles are not accessible to people with disabilities. If a covered entity purchases or leases used vehicles, they must make demonstrated good faith efforts to obtain vehicles that are accessible, and if they remanufacture vehicles such that the vehicle's life is extended for at least 5 years, the vehicles shall be accessible to the maximum extent feasible.

Paratransit service for elderly and disabled people which is supplementary to fixed route service would have to provide comparable service levels to those provided nondisabled people according to service criteria already promulgated by the Department of Transportation. These include comparable eligibility criteria, response time, fares, hours, and service areas.

For paratransit which provides regular transit service to the general public, such as airport shuttles, newly purchased or leased vehicles must be accessible unless the transit operator can demonstrate that the system, when viewed in its entirety, provides a level of service to disabled people that is equivalent to that provided the general public.

New public transit facilities must be accessible to people with disabilities. In facilities altered later than 1 year after enactment, the area of alteration must be accessible to the maximum extent feasible, including the path of travel to the altered area and the key facilities, such as restrooms, serving the altered area.

Public transit programs operating in existing facilities must be operated in such a way that, when viewed in their entirety, they are accessible to people with disabilities. In existing rail systems, it shall be considered discriminatory to fail to have at least 1 car per train that is accessible, as soon as practicable but in no less than 5 years after enactment. For stations in intercity rail systems, and key stations in rapid rail, commuter rail, and light rail systems, it shall be considered discriminatory if these stations are not accessible as soon as practicable, but in no more than 3 years after enactment.

An exemption is provided for extraordinarily expensive structural changes to replace existing facilities necessary to achieve accessibility, for which the Secretary of Transportation may extend the time limit up to 20 years. In this way, the bill allows for situations in which providing accessibility would be extraordinarily burdensome to public transit authorities.

Title IV of the ADA addresses public accommodations and services operated by private entities. Public accommodations are defined to include auditoriums, convention centers, stadiums, theaters, restaurants, shopping centers, hotels, transportation terminals, passenger vehicle service stations, professional offices of health care providers, office buildings, sales establishments, public services businesses, parks, private schools, and recreation facilities.

Discrimination is prohibited by public accommodations against people with disabilities in any of the following ways: the imposition of eligibility criteria that tend to identify or limit the opportunities of disabled people; the failure to make reasonable modifications of rules or procedures if necessary to afford services to disabled—unless such modifications would fundamentally alter the nature of services provided; or the failure to provide auxiliary aids and services necessary to ensure a disabled person isn't excluded.

In existing facilities, architectural and communication barriers must be removed when such removal is readily achievable. If removal of barriers is not readily achievable, the covered entity must provide alternative methods of making goods and services available to people with disabilities.

In facilities that are altered later than 1 year after enactment, alterations must be made in such a manner that the altered area, a path of travel to the altered area, and the key facilities, such as restrooms, serving the altered area must be accessible to the maximum extent feasible.

New facilities constructed later than 30 months after enactment, must be accessible unless it is structurally impracticable.

Private entities providing public transportation services must comply with nondiscrimination provisions similar to public entities, in that they may not pose restrictive eligibility criteria, and they must purchase or lease only accessible vehicles.

Title VI of the bill requires that telecommunications relay services, enabling simultaneous communication to take place between individuals using telecommunication devices for the deaf and those using regular telephones, must be provided by common carriers of telephone service, within 1 year of enactment.

In summary, the Americans with Disabilities Act provides a clear, comprehensive national mandate for the elimination of discrimination against individuals with disabilities. This mandate is urgently needed by our Nation's 43 million disabled citizens. I urge your support of its passage.

TRIBUTE TO STAN GILLIAM

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay honor to a very special man. His name is Stan Gilliam, and I, sir, am proud to call him a hometown friend to thousands of residents in my congressional district.

After nearly 25 years of dedicated service, Stan retired last week from his work at the Sacramento Bee where his assignments wore many hats and his words captured many lives.

Mr. Speaker, in a society that has turned impersonal through its fax dependency, silent through its VDT obsession and aloof through its Walkman love affair, Stan demonstrated a special gift for bringing all of us home again day after day.

Stan wrote a column for the past 10 years appropriately called "Stan's Sacramento." It was a column that had the personal touch of a backyard chat * * * a column where concerned ears listened * * * and life itself was as loud and genuine as the sound of the real typewriter he used to write it.

Stan represents everything good about being the quintessential hometowner. During a stint as a restaurant reviewer, he was once quoted as telling his editor, "I have to be honest with you * * * about the only thing I know about food is that I'm hungry most of the time." He has also said that he "tried to write to the 95 percent of the people who were hungry, not the 5 percent who were gourmets."

Mr. Speaker, as one of the 95 percent who were hungry, I will miss Stan's column and wish him all the best in his retirement.

IN MEMORY OF INDONESIAN HUMAN RIGHTS LEADER YAP THIAM HIEN

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. PORTER. Mr. Speaker, I wish to convey my sadness over the death of a great human rights leader, Yap Thiam Hien, who died of natural causes on April 23, 1989 at the age of 76. Through his extraordinary commitment and work, Mr. Yap brought honor to his country and to the cause of human rights.

Yap Thiam Hien was one of Indonesia's most respected lawyers, and a founder of the Indonesian Legal Aid Institute Foundation. He helped form the Indonesian Association of Advocates in the mid-1960's, and was long associated with the widely respected human rights organization, the International Commission of Jurists. In the mid-1970's, Mr. Yap was detained without trial for nearly a year for speaking out against Government corruption and repression. Immediately upon his release, Mr. Yap resumed his human rights activities.

I urge my colleagues to read the following statement made by Prof. Daniel Lev, a specialist on Indonesia from the University of Washington, immediately following Mr. Yap's death:

On Sunday, 23 April at 11:00 p.m. in Belgium, Pak Yap Thiam Hien died among friends devoted to human rights and in a setting, where human rights would be discussed, in which he felt at home. The news spread quickly around the world, and so did the grief. Is there anyone who knows him who does not feel a terrible loss, not only in Indonesia but wherever there is still admiration and respect for courage, ethics, morality, commitment, and human decency?

Pak Yap was no ordinary man. It is difficult to explain him, not because he was complicated but because he was not. Pak Yap was simple in his courage, which seldom failed him, and simple in his ethical choices, and simple in his beliefs in human dignity, fairness equality, and justice. To many he seemed hopelessly uncompromising, quixotic, and rigid—and all this is true, for on issues of principle Pak Yap was stubborn and ungiving. But his devotion to justice and his willingness to sacrifice himself for it affected anyone nearby. In all this he was in fact uncomplicated. He may be hard to understand only because we have forgotten the virtues of simplicity.

CONGRATULATIONS TO ARLENE MORRIS-VERSAW AS SBA ADVOCATE OF THE YEAR

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. LEHMAN of California. Mr. Speaker, small business is widely regarded as a mainstay of the economic health of our Nation. As we enter the 1990's and beyond, small businesses will continue to grow and are likely to make up an even larger share of the economy. An important aspect is the perception of small business where that growth occurs. If there is solid community involvement and support for small businesses, the more likely they are to succeed.

Ms. Arlene Morris-Versaw is one of those professionals who contribute to the understanding and promotion of small business. Arlene Morris-Versaw was recently named as the National Media Advocate of the Year. As a business reporter for the Fresno Bee, Ms. Morris-Versaw's list of journalistic accomplishments includes several feature stories on small business advocacy and a special series on legislative proposals. It is clear that Ms. Morris-Versaw's writing has had a positive impact on the businesses of our community by contributing to the understanding of the actions that affect them.

What sets Ms. Morris-Versaw apart from her colleagues and makes her uniquely qualified for this special honor is her understanding of the importance of small business. She recently completed another series that illustrated the importance of small business to the San Joaquin Valley. The success of small business everywhere depends on the ability for the community it serves to view it in a positive manner. Through her writing, Arlene continues to enhance the understanding of the role that small business, indeed all business, plays in our community. Her concern for this aspect of business reporting has earned her this honor.

Mr. Speaker, I think it is important that we in this body recognize the importance of this distinguished award. I hope that all of my colleagues will join me in congratulating Ms. Arlene Morris-Versaw, the National Small Business Mediate Advocate of the Year.

NAVAL TRAGEDIES SPUR HOPE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mrs. SCHROEDER. Mr. Speaker, in the wake of several naval tragedies, two U.S. Navy veterans in Colorado have proposed a most suitable memorial—that President Bush and Secretary General Gorbachev personally lead a new disarmament effort.

The idea is worthy of serious attention and I am pleased to share it with my colleagues.

DENVER, CO,
April 25, 1989.

Representative PATRICIA SCHROEDER,
U.S. House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE SCHROEDER: This week 47 American families and indeed, all of us as a nation, will lay to rest 47 sailors who have made the ultimate sacrifice, who have laid down their lives in defense of their country and in search of a peaceful world. Tragically and ironically, 62 families and the entire Soviet nation are grieving the loss of their finest young sailors also lost at sea in the sinking of a nuclear submarine in the icy waters of the North Atlantic. This loss was put into clear perspective by a Norwegian naval officer when he said "we are all saddened by the loss of our fellow seamen whomever they may be".

No flag-drapped casket, no volley of shots, no cemetery plaque can truly honor these 109 fine and valuable men. I would suggest that a fitting memorial would be a private meeting between President Bush and Secretary General Gorbachev to discuss world peace and disarmament, starting with our two countries and hopefully spreading to all nations of the globe. Then truly these, and thousands of other young men killed in the line of duty in peace and in war, will not have died in vain.

Let us make a special and living memorial to our soldiers, sailors, airmen and marines. Let us, both the Soviet Union, and the United States, dismantle our forces—one ship, one plane, one tank, one missile, one M-16 and one AK-47 at a time. We could use the steel to make tractors, pumps and medical instruments. Our youth, skill and brain power could research the environment, the stars, housing health and education. We should take to heart the words of President Dwight D. Eisenhower in a speech given at the end of his eight years as President:

"Every gun that is made, every warship launched, every rocket fired signifies, in the final sense, a theft from those who hunger and are not fed, those who are cold and are not clothed. This world in arms is not spending money alone. It is spending the sweat of its laborers, the genius of its scientists, the hopes of its children * * *. This is not a way of life at all in any true sense. Under the cloud of threatening war, it is humanity hanging from a cross of iron."

Hopefully as global leaders, both our nations can heed the words of President Eisenhower and honor the memory of these fine young men by embarking on negotiations for true peace and progress in our troubled world.

Sincerely,

RAYMOND P. FINNEY,
U.S. Naval Academy,
Class of 1963.

LEO DIRNBERGER,
USNR 1944-46,
U.S.S. Mississippi, BB-41.

TRIBUTE TO MEL WILSON

HON. HOWARD L. BERMAN

OF CALIFORNIA

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. BERMAN. Mr. Speaker, it is with admiration and respect that we ask our colleagues to join us in saluting an outstanding leader and popular member of the community, Mr. Mel Wilson, who is being honored by the United Chambers of Commerce for his dedicated service as president.

Mel Wilson has been one of the most involved, persistent, and effective leaders of the United Chambers of Commerce. A man of tremendous talent and dedication, Mel has positively affected the lives of many during his tenure as president, and has diligently worked to improve and expand the chambers' services to the community. His efforts and exemplary leadership have been characterized by a deep commitment and strong sense of idealism.

Mel Wilson has served the San Fernando Valley community for many years. His pleasant personality and ready willingness to be helpful has endeared him to both his colleagues and to the public he has served so well. As a result of his leadership and excellent performance, he enjoys respect and support throughout the San Fernando Valley.

In 1988, Mayor Tom Bradley appointed Mel to the Citizens Advisory Panel on Transportation in the San Fernando Valley. During that time he chaired the San Fernando Valley Board of Realtors Governmental Affairs Committee and was elected to the Board of California State University, Northridge, Athletic Association. Mel is also past president of L.A. Countywide Citizens Planning Council and served on the board's of L.A. Countywide Citizens Planning Council, Mayor's Advisory for the Office of Small Business Assistance, Vitalize Van Nuys and was member and elected chair to the Pacoima Enterprise Zone Business Advisory Council. Mel has built a record of commitment and excellence that is an inspiration to us all.

Mel received his bachelor of science in business administration from California State University, Northridge, in 1977. He is a realtor-owner of a real estate sales and land use consulting company.

It is our distinct pleasure, along with the United Chambers of Commerce, to ask our collegues to join us in honoring Mr. Mel Wilson, an extraordinary individual.

LONG-TERM CARE: IT'S TIME TO KEEP OUR PROMISES

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. PEPPER. Mr. Speaker, on Thursday May 4, 1989, I reintroduced, along with my distinguished coauthor, the chairman of the House Select Committee on Aging, the Honorable EDWARD ROYBAL, and my good friend and great leader, Majority Whip TONY COEHLO, my bill to provide long-term care in the home to chronically ill and disabled Americans of all ages. H.R. 2263, the Long-Term Home Care Act of 1989, is virtually identical to H.R. 3436, the Pepper/Roybal bill, which was the subject of much attention and debate last session.

H.R. 2263 meets the most glaring gap in our health-care system. Neither public or private insurance provides protection against the cost of long-term illness or disability. A million Americans a year, two-thirds of them elderly, go bankrupt trying to meet the costs of long-term care left uncovered by insurance. Only the most wealthy of Americans are insulated from the potential financial devastation. The rest of us can have our lifetime savings wiped out in a matter of months paying for long-term care.

The U.S. Bipartisan Commission on Comprehensive Health Care, which I have the privilege to chair, is charged with making recommendations to the Congress by November 9, 1989, on how to best finance and administer a program of long-term care and a program of comprehensive health care for all Americans. The Commission, modeled after the successful Social Security Reform Commission of 1983, is hard at work toward meeting its formidable goals. I am most confident that those goals will be met.

Mr. Speaker, we have a commitment to assure that every American, regardless of age or income, receives the health care that he or she needs. The elderly, the disabled, the children, the working family—all are counting on us to provide the leadership and fortitude necessary to provide such a system. There is no excuse for the 101st Congress not to be the one to get the job done.

The following is a brief fact sheet on H.R. 2263, the Long-Term Home Care Act of 1989:

FACTSHEET ON H.R. 2263: THE LONG-TERM HOME CARE ACT OF 1989

A. Background.—Eighty percent of catastrophic health care expenses are for long-term care. Long-term care is the primary health-related cause of financial ruin among the elderly and the young because current public and private insurance does not provide protection against these costs. H.R. 2263, The "Long-Term Home Care Act of 1989" (formerly H.R. 3436), introduced by Congressmen Claude Pepper and Edward Roybal, addresses this huge gap by providing long-term care assistance to chronically ill Americans of all ages in their own homes.

B. Benefits and Individuals Eligible.—Long-term home care benefits would be provided as prescribed by an independent professional case management team and the individual's attending physician. Services have

to be carefully managed and be designed so as to complement, not replace, informal family help. Services could include: nursing care, homemaker/home health aide services, personal care services, respite for family caregivers, medical social services, rehabilitative services, medical supplies and equipment, and patient and family education, training and counseling.

The new benefit would be available to chronically ill elderly, disabled and children who have been certified to be unable to perform two or more normal activities of daily living (eating, bathing, dressing, transferring or toileting). Technology-dependent children would also be eligible for assistance.

Today the only option for many of these Americans is to exhaust all of their resources to become eligible for welfare assistance in a costly nursing home. Examples of individuals who should benefit from long-term home care are elderly persons with advanced Alzheimer's disease or Parkinson's disease, children born with chronic lung impairments, elderly stroke victims, working-age Americans left paralyzed or otherwise disabled by accident injury or disease, and children and elderly with long-term cancer.

Because H.R. 2263 would provide protection against the catastrophic costs of chronic illness for people of all ages, it is really a family protection proposal. It recognizes that catastrophic health care costs are not simply a problem for the elderly, but that many young families face destitution as well as caring for their ill children.

C. Quality Assurance.—The bill establishes a very strong system of quality assurance for home care, including mandatory training and regular review of all caregivers, a home care consumer bill of rights, community review boards and effective enforcement mechanisms to ensure compliance with quality of care standards.

D. Cost Control.—The cost of long-term home care services would be tightly controlled by a number of devices, including case management of benefits, a program of utilization review and limiting monthly payments to 50 percent of the monthly Medicare rate for nursing home services for individuals with a moderate impairment and 65 percent of that rate for those with severe impairments. Payments for technology-dependent children could not exceed the cost of providing similar services in a hospital or nursing home.

Numerous national and State studies have demonstrated the feasibility of providing tightly controlled case-managed home care services at a fraction of the cost of institutional care.

E. Financing.—H.R. 2263 is progressively financed and completely self-funding. It would be paid for by eliminating the cap on income which is exposed to the Medicare payroll tax of 1.45 percent. This change would impact only those 5 percent of American workers who earn more than $48,000 (individual income, not family income). Currently nearly 95 percent of all American workers contribute 1.45 percent of their entire income to fund Medicare. However, the 5 percent of American workers who make over $48,000 a year do not contribute on any of their income above $48,000, no matter how much more they make.

F. CBO Cost Estimate.—Last year, the non-partisan Congressional Budget Office (CBO), which by law the Congress relies upon for estimating the costs of all legislation, determined that H.R. 3436 was completely self-financing, generating $6.9 billion more in revenues than costs. H.R. 2263 will generate even additional surpluses. The CBO's estimate of the costs of the final version of H.R. 3436 was:

[In billions of dollars]

	1989	1990	1991	1992	1993	Total
Cost	0.1	4.5	6.8	7.7	8.9	28.0
Revenue	2.5	7.1	7.9	8.4	9.0	34.9

In addition, to absolutely ensure H.R. 2263's self-financing into the future, the bill contains language that strictly prohibits the use of any general revenue funds or other Medicare trust fund monies to pay for the new long-term home care program. The bill requires that in the event of any unanticipated shortfall in revenues, a copayment be imposed, payments for services be reduced and previously accumulated surpluses tapped to the extent necessary to make up the difference.

G. Support.—H.R. 2263 enjoys widespread public support. A recent independent poll conducted by Louis Harris and Associates found overwhelming support among Americans of all ages, incomes, regions and political allegiances for H.R. 2263. Over 8 of 10 Americans support such a federal plan, including over 80 percent of those who voted for Ronald Reagan in 1984. Over 7 of 10 Americans favor the specific financing mechanism contained in H.R. 2263, including 73 percent of Americans earning more than $50,000 a year and 78 percent of business executives.

Mr. Speaker, I urge all of my colleagues to join me in support of this most important and timely legislation. It's time that we kept our promises.

A SOLID GUN COMPROMISE

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. STARK. Mr. Speaker, once you get outside the beltway, it's always refreshing to hear how open-minded, rational, and progressive our citizens are toward effective law enforcement policies.

This year, the major national police organizations, representing thousands of law enforcement personnel, have urged Congress and the administration to pass Federal legislation on semiautomatic assault weapons. The National Association of Police Organizations, the International Association of Chiefs of Police, the National Sheriff's Association, and the Fraternal Order of Police are just a few of the major national police organizations which have issued statements and testified before the House and the Senate on behalf of Federal legislation in this area.

One of the most recent newspaper editorials on the subject came from one of the best newspapers in the Rocky Mountain region, the Missoulian, of Missoula, MT. In a bold, courageous statement, the Missoulian editorial provided an insightful, thorough analysis of the need for new Federal legislation on semiautomatic assault weapons. I am pleased to include it for my colleagues to consider:

A SOLID GUN COMPROMISE: LEGISLATION WOULD LIMIT ACCESS OF ASSAULT GUNS TO LAWFUL CITIZENS

Polls show that most Americans—including many firearm owners—favor banning semiautomatic assault weapons like that used by Patrick Purdy in last year's school yard massacre in Stockton, Calif. In the wrong hands, the weapons unleash an awesome and deadly force that Americans want controlled.

The trouble is, many sporting arms used by honest, law-abiding citizens for hunting and target shooting have self-loading actions similar to assault weapons. To outlaw all semiautomatic rifles is to outlaw a large percentage of sporting arms.

Fortunately, California Congressman Pete Stark has proposed a workable solution.

Stark, a Democrat, has introduced legislation that would regulate 11 specific types of semiautomatic assault weapons just the same way fully automatic machine guns would be unaffected.

Stark's bill is aimed at AK-47s, Colt AR-15s, UZIs, MAC-10/11s and seven similar weapons—all guns designed for warfare, not sport—as well as ammunition clips and magazines capable of holding more than 10 rounds.

The measure would ban the manufacture and importation of the specified assault weapons, but it would allow the existing, plentiful supply of such guns to remain on the market.

If passed and signed into law, Stark's HR 1190 would require someone wishing to buy an assault weapon to do several things. First, the buyer would submit to a background check by local law enforcement agencies; the weapon would have to be registered; and a $200 transfer tax would be assessed.

People who already own assault weapons wouldn't have to obtain police approval or pay the tax. They would have to register the weapons, however.

That's the same system that's used to make machine guns available to law-abiding citizens who have an odd desire to collect and safely shoot them. None of the nearly 120,000 machine guns legally owned by collectors who abide by the current restrictions have ever been misused criminally, according to the National Rifle Association, which advocates such regulation of machine guns as an alternative to banning them.

Stark's proposed law is more restrictive than the NRA might like. But considering the danger assault weapons pose to society, the restrictions aren't the least bit unreasonable.

HR 1190 has another attractive feature: It would require tougher penalties for criminals who use assault weapons and truly eye-opening penalties for possession of restricted assault weapons during violent or drug-related crimes. The bill would tack on 30 years behind bars for first-time offenders and impose mandatory life in prison for criminals convicted twice of possessing or using assault weapons.

Stark's bill aims to provide reasonable access to assault weapons for law-abiding citizens while discouraging criminals from using them. It's a good compromise that protects the interests of sporting-arms owners. Considering public sentiment and the political beating the hard-liners at the NRA are taking on this issue, HR 1190 may be the best gun aficionados could realistically hope for.

CONGRESSIONAL SALUTE TO HIRE A VETERAN WEEK

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to our Nation's veterans and to salute the significant contributions that these individuals have made both in service to their country and in the workplace. To recognize these individuals for their outstanding contributions and to highlight the special skills that they offer to the workplace, the State of California has declared May 7–13, 1989, as "Hire a Vet Week".

Veterans bring a wealth of experience to the work environment and serve as a venerable example to all through their strong desire to participate fully in the life and activities of their community. These individuals invariably perform exceedingly well, consistently offering high standards of performance to meet the productivity expectations of their employers. Unfortunately, however, their work experience and on the job training is often overshadowed when attempting to translate those skills in the civilian workplace.

In an effort to ensure greater access to employment opportunities, the State of California's Employment Development Department has established special programs and veteran employment representatives in each local office. These programs and representatives work to ensure that veterans receive the services to which they are entitled and more importantly, promote employer interest in hiring veterans.

I salute the State of California and the Employment Development Department for their leadership in this important arena and I encourage my colleagues to adopt similar programs in their States and in the communities they represent. All citizens should recognize and appreciate the vital contributions veterans make to our workplace and to all aspects of society.

Mr. Speaker, I ask my colleagues and all firms and businesses to join me in renewing our determination to provide an abundance of vocational opportunities for veterans and to promote hiring a vet as a sound principle of good management.

HOPE FOR PUBLIC HOUSING

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. PORTER. Mr. Speaker, when most people think of public housing, they think of drugs, rape, and murder. But in Chicago, people are thinking about tenant management, safe neighborhoods, and hope.

Several years ago, LeClaire Courts tenants decided that they were tired of living in fear. Irene Johnson set out to beat the crime, the drugs, and the helplessness in her neighborhood.

Her task required a kind of courage and determination that most of us can only imagine. But she beat the gangs, the drug dealers, and even the bureaucrats.

Today, LeClaire Courts is a model. The neighborhood is cleaner, crime is down, and residents are hopeful. Tenant management provides services like job counseling and day care that gives residents a chance to succeed.

This morning, Chicago Housing Authority Director Vince Lane is turning over full managment responsibilities to the residents of LeClaire Courts.

Mr. Speaker, we should help residents like Irene Johnson. We should support administrators like Vince Lane. And we should stick with programs that work. I encourage this Congress to support tenant management nationwide.

A TRIBUTE TO RUDY DIAZ

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. LEHMAN of California. Mr. Speaker, I rise before my colleagues today to congratulate my good, personal friend Rudy Diaz for being selected as Labor Leader of the Year by the Central Labor Council, AFL–CIO Committee On Political Education. This is truly an honor for a man so committed to the principles embodied by the Teamsters Union.

Rudy Diaz has been a key leader in the Teamster's Union Local 616 for the past 12 years. His dedication, energy, and leadership are widely recognized. He has served as an organizer, negotiator, business agent, member of the cannery council, trustee of the Central Labor Council Executive Board, and health and welfare plan, and he is currently the secretary-treasurer of the Teamster's Union Local 616. He was also appointed to the policy committee of the food processing and produce division of the Western Conference of Teamsters by the late Jesse L. Carr, international director of the western conference and vice president of the International Brotherhood of Teamsters.

Rudy is a native of Fresno. His loyalty to the area is reflected in his deep commitment to his family, the community, and the church. Rudy graduated from Roosevelt High School and attended Fresno City College. After graduating from high school he served in the Marine Corps for 5 years. In addition to his union activities, Rudy finds time to coach little league soccer and participate in the Knights of Columbus as a fourth degree knight. He and his wife of 30 years, Ramona, are parishioners of St. Helens Catholic Church.

Rudy is the product of a generation that values hard work, the family, the church, and the union. His dedication, energy, good humor, and hard work are an inspiration to us all. I can think of no other person who is more deserved of this award than Rudy Diaz. I truly commend him today for being selected as Labor Leader of the Year for the Fresno and Madera Counties.

THE PLO MUST END ITS EQUIVOCATIONS

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. FRANK. Mr. Speaker, I submit this statement on behalf of myself, the gentleman from Michigan [Mr. WOLPE], and the gentleman from Connecticut [Mr. GEJDENSON].

When the Palestine Liberation Organization and its Chairman, Yasir Arafat, indicated late last year that they were willing to change their long history of absolute opposition to the existence of Israel, many people in the United States and elsewhere welcomed this as a step forward. But there has been a good deal of debate about just how significant a step it was.

One of the most important contributions to this debate has been made by the study on this subject of the Palestine National Council's Algiers Resolutions by Phil Baum and Raphael Danziger under the auspices of the Commission on International Affairs of the American Jewish Congress. We believe that this study ought to be read by serious students of this question for its implications for the prospects of peace in the Middle East, especially with reference to the questions of PLO recognition of Israel. For this reason, we are asking that the sections of that study dealing with the PLO position on recognition of Israel be printed here.

THE PALESTINE NATIONAL COUNCIL ALGIERS RESOLUTIONS: A REEXAMINATION IN LIGHT OF STOCKHOLM, GENEVA, AND SUBSEQUENT PLO STATEMENTS

"In Algiers tonight, the Palestine National Council voted to reject terrorism, declare an independent Palestinian state, and for the first time, to recognize Israel's right to exist."—ABC World News Tonight, Nov. 14, 1988.

"If you read the [PNC's] political statement carefuly, you will find that what some term recognition of the Security Council's resolutions and consequently recognition of the Zionist entity is untrue."—PNC Speaker Abd al-Hamid al-Sa'ih, January 13, 1989.

One day after his December 13, 1988 address to the UN General Assembly, PLO leader Yasir Arafat issued a statement at a news conference in Geneva which the U.S. Administration immediately and formally construed as signifying PLO acceptance of Resolutions 242 and 338, recognition of Israel's right to exist, and renunciation of terrorism. Since those had long been the U.S. conditions for a dialogue with the PLO. President Reagan authorized the State Department to enter into such dialogue forthwith.

PLO spokesmen have insisted that Arafat's pledges in Geneva are no more than an accurate interpretation of the resolutions adopted by the Palestine National Council—the PLO's "parliament-in-exile"—in Algiers on November 15. And, indeed, in most cases, an official clarification by a person authorized to represent his organization's views would constitute a valid interpretation of a document previously adopted by that body. But in this case, the seeming disparity between Arafat's statement in Geneva and the

text of the Algiers resolutions is so jarring as to warrant further examination.

We recognize that the existential political perception of an event or document (which indeed may be controlling in assessing its political impact) is different from the strict or juridical meaning of its text. But while the two may be separate, they cannot and should not be entirely divorced. In this case, the need for close analysis of the Algiers text is given further impetus by Arafat's continuing and strenuous efforts to ensure that his remarks are understood as conforming closely to the original Algiers resolutions. Thus, on the key issue of PLO renunciation of terrorism—one of the three basic American conditions for a dialogue—he said in an interview with Vienna Television Service on December 19, 1988: "I did not mean renounce. Our [PNC] resolution condemned all forms of terrorism—individual terrorism and state terrorism. Actually, I only repeated what our Palestine National Council had accepted."

Moreover, Arafat's interpretation has been openly challenged by at least one faction that voted to approve the Algiers resolutions. On December 25, Nayef Hawatmeh's Democratic Front for the Liberation of Palestine—the second most important PLO faction to sign on to the Algiers "Political Statement" after Arafat's own Fatah—issued a joint communique with George Habash's Popular Front for the Liberation of Palestine which had voted against that statement. The two factions declared that Arafat's statements in Geneva "contradicted the decisions approved by the PNC" and that they "do not commit the PLO to anything and do not represent official policy."

Given these problems, a detailed examination of the Algiers resolutions would seem appropriate and relevant. It is to be assumed that Arafat's Geneva statement represents his organization's views. At the same time it is unmistakably clear the PNC's decisions are binding on all PLO factions. It is in the tensions and contradictions between these two factors that the problems arise. We offer the following analysis of the PNC resolutions in the hope that it will help locate the PLO's current posture and intentions.

THE ALGIERS SESSION

On November 12-15, 1988, after several postponements, the PNC—the PLO's "parliament-in-exile"—held its 19th session in Algiers. On November 15, the PNC adopted two documents: First, a "Declaration of Independence," written by the Palestinian poet and member of the PLO's Executive Committee Mahmud Darwish and read by Arafat, was approved by acclamation; and second, a "Political Statement," which discusses major political issues such as the intifada, the international conference, Resolutions 242 and 338, terrorism, relations with the superpowers, and more, was approved by a vote of 253 to 46 with 10 abstentions.

In addition to Arafat's own Fatah group and the independents, the PNC members of the following PLO factions voted in favor of the resolutions: DFLP; Arab Liberation Front (ALF); Palestine Liberation Front (PLF); and Palestine Communist Party (PCP). The negative votes were cast by supporters of George Habash's PFLP—but Habash pledged to abide by the majority's decision; Popular Struggle Front (PSF) also voted against the resolutions. The Syrian-backed factions PFLP-General Command, Saiqa, and Abu Musa's rebel Fatah group, as well as Abu Nidal's group, boycotted the session (as they had done at the PNC's 18th session).

Not since its opening session in Jerusalem in 1964 has a PNC meeting generated as high expectations and hopes as has its latest session in Algiers. Following King Hussein's announcement on July 31 of his intention to sever Jordan's legal and administrative ties with the West Bank, the PLO came under intense pressure to fill the perceived vacuum created by Jordan's disengagement from the area. The session in Algiers was built up as the PLO's answer to Hussein's move. It was specifically designed to induce the United States—widely regarded in the Middle East as the sole world power capable of "delivering" an Israeli withdrawal from the territories—to accept the PLO as a legitimate negotiating partner and thus achieve a momentous strategic breakthrough for the Palestinian organization. To accomplish that goal, the PNC was expected to meet the long-established, frequently reiterated, and well-known American conditions for lifting the ban on negotiations with the PLO: recognition of Israel's right to exist; acceptance of Security Council Resolutions 242 and 338; and renunciation of terrorism. Supporters of the PLO have maintained that the PNC indeed met all these conditions: Arafat himself declared at the end of the PNC session: "The ball is in the American court." To determine whether—in light of the Algiers resolutions and their interpretation by Arafat in Stockholm and Geneva and in subsequent pronouncements by PLO leaders—this is indeed the case, our report addresses the following questions:

Did the PNC recognize Israel's right to exist?

Did it accept Resolutions 242 and 338?

Did it renounce terrorism?

What position did the PNC take vis-a-vis the intifada?

What is the nature of the Palestinian state declared by the PNC in Algiers?

What stance did the PNC adopt toward the superpowers?

To facilitate the examination of the PNC's resolutions which form the basis for answering these questions, extensive summaries of their lenghty texts (including key excerpts) are provided in Appendices 1 and 2.

RECOGNITION

The most daunting challenge facing the PNC in Algiers was to reverse the PLO's rejectionist position as enshrined in its Palestine National Covenant of 1968 by recognizing Israel's right to exist. It could do so explicitly or implicitly, directly or indirectly, with or without qualifications, conditionally or unconditionally; but everyone concerned was well aware that the closer the PNC resolutions came to explicit, direct, unqualified, and unconditional recognition of Israel, the more likely they were to engender U.S. legitimation of the PLO. The ways in which the PNC chose to deal with this challenge will be examined below.

Explicit Recognition: Supporters of the PLO and even some in the Western media have stated flatly: "The PNC has recognized Israel's right to exist." At a press conference in Stockholm on December 7, following two days of discussions with five American Jews, Arafat himself claimed that the PNC had accepted the existence of Israel as a state in the region. And at his statement to the press in Geneva on December 14, he declared: "In my speech also yesterday [at the General Assembly], it was clear that we [the PNC] mean . . . the right of all parties concerned in the Middle East conflict to exist in peace and security . . . including the state of Palestine, Israel, and other neighbors . . . "But no matter how long and how carefully one studies the lengthy, dense, and complex texts of the PNC's "Declaration of Independence" and "Political Statement," the simple phrase "The PNC recognizes Israel's right to exist"—or even the less demanding formulation "The PNC accepts Israel's existence"—is nowhere to be found.

Resolutions 242 and 338: Acceptance of Security Council Resolutions 242 of November 22, 1967, and 338 of October 22, 1973, is the second U.S. condition and has often been equated with recognition of Israel's right to exist. Resolution 242 states (Article 1(ii)): . . . "respect for and acknowledgement of the sovereignty, territorial integrity and political independence of every state in the area and their [*sic*] right to live in peace within secure and recognized boundaries free from threats or acts of force." The less essential Resolution 338 calls for the implementation of Resolution 242 (Article 2) and for negotiations between the parties concerned aimed at establishing a just and durable peace in the Middle East (Article 3).

Since Israel is not mentioned specifically in 242 as one of the states whose right to live in peace is upheld, acceptance of that resolution only *implies* recognition of Israel. And as Israel's enemies have always refused to consider Israel a legitimate state, preferring to describe it as a "Zionist entity," a "colonialist-racist outpost," etc., it is entirely consistent with their position to regard recognition of all "states" in the area as not even implying recognition of Israel. For example, the present regime in Syria—Israel's most dangerous and implacable foe—in 1974 accepted Resolution 338 (which entails acceptance of 242) while adhering to this day to its profound rejection of Israel's right to exist.

Nonetheless, if the PNC had accepted 242/338 explicitly, directly, and without qualifications or conditions, it would have taken an important step forward by endorsing the basic framework underlying all peace negotiations between Israel and its Arab neighbors since 1967. It failed, however, to do so.

No mention is made of 242/338 in the PNC's "Declaration of Independence." Its "Political Statement" makes one reference to these resolutions in the following paragraph:

"The Palestine National Council affirms:

"1. The necessity of holding an effective international conference concerning the Middle East issue and its essence, the Palestinian cause, under the auspices of the United Nations and with the participation of the parmanent member states of the United Nations Security Council and all parties to the struggle in the region, including the Palestine Liberation Organization, the sole legitimate representative of the Palestinian people, on an equal footing, and by considering that the *international conference will be held on the basis of United Nations Security Council Resolutions 242 and 338* and the assurance of the legitimate national rights of the Palestinian people, and first and foremost, their *right to self-determination* in application of the principles and provisions of the United Nations Charter concerning the right of peoples to self-determination and the inadmissibility of seizing the lands of others by force or military invasion, *and in accordance with the*

resolutions of the United Nations regarding the Palestinian cause" [italics added].

STUDY ON PLO POSITION ON ISRAEL

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. GEJDENSON. Mr. Speaker, I am submitting the second part of a three-part statement on behalf of myself, the gentleman from Massachusetts [Mr. FRANK], and the gentleman from Michigan [Mr. WOLPE].

This analysis of the Palestine National Council Algiers resolutions offers a detailed examination of the PLO's recognition of the State of Israel in relation to the other positions announced by other members of the PNC. This reexamination of the PNC pronouncements ought to be reviewed in interpreting what many believe to be contradictory statements and actions taken by the PLO in recent months.

The PNC's acceptance of 242/338, then, is indirect and tangential: not necessarily as such but as a basis for an international conference which the PLO would agree to attend; and even then, 242/338 is not the sole basis of the conference: The other preconditions for the international conference required by the PNC are prior acceptance of the Palestinians' "right to self-determination" and of "the resolutions of the United Nations regarding the Palestinian cause." This conclusion is backed by no less an authority than Arafat's deputy Abu Iyad, who stated in an extraordinarily candid interview with the Kuwaiti newspaper *Al-Siyasa* (November 22, 1988):

"The Palestine National Council did not vote for the Resolution, and it is not a matter of rejection or acceptance. Rather, the vote was on whether or not 242 and 338 could be considered a basis for an international conference as was demanded of us by the international community, and to this we added the right of self-determination and the other UN resolutions."

These added conditions seriously dilute the effects of the reference to 242/338: The Palestinians' "right to self-determination" has always meant the right to determine the establishment of a Palestinian state. In his Stockholm Statement, Arafat explicitly includes the "right to an independent state" in the "right of the Palestinian people to self-determination." Insistence on this alleged right, which was not mentioned in 242/338 and has firmly opposed by the United States and Israel, destroys the delicate balance maintained by 242/338 which enabled both Israel and the Arab states to accept it.

Predicating the international conference on acceptance of "the resolutions of the United Nations regarding the Palestinian cause" is an even more onerous precondition. Absent the restraining hand of the American veto which has successfully prevented the adoption of egregiously one-sided decisions at the Security Council, the General Assembly has passed innumerable blatantly anti-Israel resolutions "regarding the Palestinian cause" through the automatic majority of Soviet-bloc and third-world countries over the Western democracies. To name just a few: The infamous Resolution 3379 of 1975 equated Zionism with racism. Resolution 3236 of 1974 (Article 5) recognized the right of the Palestinian people to regain its rights *by all means* [Italics added]. And Resolution ES-7/2 of 1980 undermined the carefully crafted reference in 242 to Israeli withdrawal from *"territories . . ."* by insisting (Article 2) on "the withdrawal of Israel from *all* the occupied Palestinian and other Arab territories, including Jerusalem" [italics added]; pre-empted the political process by endorsing the Palestinian people's "right to establish its own independent state" (Article 4(b)); and in effect breached Israel's sovereignty by affirming "the inalienable right of the Palestinians to return to their homes and property in Palestine, from which they had been displaced and uprooted," and calling for their "return" (Article 3). Clearly, making acceptance of 242/338 conditional on the endorsement of any of these General Assembly resolutions (or of Palestinian self-determination) amounts to implicit rejection of 242/338's main thrust.

At his Geneva press conference, Arafat for the first time deleted the other conditions for an international conference when he stated: "yesterday in my speech I made reference . . . to our acceptance of Resolutions 242 and 338 as the basis for negotiations with Israel within the framework of the international conference. These . . . resolutions were endorsed by our Palestine National Council session in Algiers." But at a subsequent speech at a meeting with Palestinians residing in the United Arab Emirates, Arafat not only retracted his seemingly unconditional acceptance of 242/338 in Geneva by reiterating the two conditions stipulated by the PNC in Algiers, but added a tough new condition: The PLO's acceptance of 242/338, he said, was also conditional upon the "right of return" to Palestine (*Middle East News Agency.* Jan. 5).

It may, however, be said in favor of the PNC's statement in this context that although not really accepted, 242 and 338 were mentioned by name in positive manner. Was this a new development? Not entirely, and certainly not as far as the private assertions by certain PLO leaders are concerned. For several years, Arafat had make numerous statements to the media that his organization had accepted 242/338 along with the other UN resolutions relevant to the Palestinian issue. Even more significantly, in February 1986 the PLO presented a formal proposal to the Jordanian government that an international conference should be convened "on the basis of the United Nations and Security Council resolutions relevant to the Palestinian question including Resolutions 242 and 338" (*Congressional Record,* June 5, 1986, p. E1968).

Yet in one sense the PNC's positive reference to 242/338 represents an advance. The PNC itself had never before made any favorable mention of those resolutions, and, moreover, explicitly rejected 242 at its previous session held in Algiers in April 1987. If that is the extent of the PNC's movement toward acceptance of 242 in more than two decades, its pace seems minimal indeed.

The 1947 UN Partition Resolution: It has been argued that by partially basing its "Declaration of Independence" on UN Resolution 181 of 1947, which, as explicitly mentioned in the declaration, partitioned Palestine into an Arab state and a Jewish state, the PNC implicitly accepted Israel's right to exist. At first glance, this argument has much merit. When *it* accepted 181 as a partial basis for the Jewish state, the Israeli Declaration of Independence of May 14, 1948, indeed extended implicit recognition to the UN stipulated Arab state in Palestine (which, of course, was made defunct soon afterward by the 1948 war and the 1949 Armistice agreements).

A comparative reading of both documents leaves no doubt that the Palestinian declaration was influenced by the basic document of Israeli's independence. There are parallelisms between the two texts, especially in their references to Resolution 181 as a basis for their claims of sovereignty: according to the Palestinian document, ". . . yet it is this Resolution that still provides those conditions of international legitimacy that ensure the right of the Palestinian Arab people to sovereignty and national independence;" the Israeli declaration states. "The recognition by the United Nations of the right of the Jewish people to establish their state is irrevocable."

But here the similarity ends. The PNC declaration denounces 181 as a resolution following upon which "historical injustice" was "inflicted on the Palestinian Arab people resulting in their dispersion and depriving them of their right to self-determination"; by contrast, all references to 181 in the Israeli declaration are positive. More important, while nothing in the Israeli declaration in any way contradicts 181, the PNC's determination that Jerusalem is the capital of the Palestinian state directly contradicts 181's internationalization of Jerusalem.

Although naturally desirous of acquiring of Palestine, Israel in its 1948 Declaration of Independence fully accepted the UN Partition Resolution and even expressed a willingness to "cooperate with the agencies and representatives of the United Nations in implementing the resolution of the General Assembly of November 29, 1947." Conversely, the PNC in 1988, equally desirous to acquire all of Palestine, referred to 181 exclusively as a source of "international legitimacy" for the Palestinian state while denouncing the Resolution's consequences and contradicting one of its main provisions: 181 as such was not endorsed and recognition of Israel was not implied—and at his press statement in Geneva Arafat as well merely referred to Resolution 181 as "the basis for Palestinian independence."

Yet similarly to its favorable mention of 242/338, the PNC's partially positive reference to 181 was new. Its 1968 Palestine National Covenant, most recently reaffirmed at its 16th session held in Amman in November 1984, stated that the "partition of Palestine, which took place in 1947, is fundamentally invalid, however long [it] last[s]" (Article 19). While several PLO spokesmen had earlier made positive references to 181, the PNC had never done so before. (This raises the question as to which of these two basic PLO documents is paramount, a matter which is discussed later in this report.)

Definition of Borders: Had the PNC defined the borders of the Palestinian state it declared in Algiers and had these borders encompassed less than the whole territory of Palestine, a sound case could have been made that by implication, the PNC had recognized Israel's right to exist in the area of Palestine falling outside those borders. As implied in 242 and explicitly acknowledged not only by the Western democracies but also by the Soviet bloc, by many third-world countries, and by Egypt, the area of uncontested Israeli sovereignty falls within the 1949 Armistice lines (popularly but inaccurately known as the "pre-1967 borders")

agreed upon by Israel, Egypt, Syria, Jordan, and Lebanon nearly four decades ago. An unambiguous PNC acceptance of those lines in the form of explicitly limiting the declared Palestinian state to the West Bank and Gaza would have constituted an impressive indication that the PLO at last had come around to accepting the reality of a Jewish state within the "Green Line".

Yet nowhere in the PNC's "Declaration of Independence"—nor, for that matter, in its "Political Statement"—is there any explicit mention of borders. The favorable reference to 242/338 has been described as implied acceptance of the Armistice lines, but that construction requires so many layers of inference as to become virtually meaningless. A degree of meaning somewhat closer to the surface may be detected in the "Political Statement's" call for "Israeli withdrawal from all the Palestinian and Arab territories that it has occupied since 1967, including Arab Jerusalem." The implication has been claimed that by specifically demanding an Israeli withdrawal to the Armistice lines, the PNC in effect accepted Israel's permanent presence within those lines. Since, however, the PNC gives no indication in its resolutions that the declared Palestinian state is limited to the West Bank and Gaza, nothing in these texts suggests that such Israeli withdrawal would satisfy its demands. What, then, is there to prevent the PLO from demanding further withdrawal as soon as what has often been described in the PLO literature as the "first stage"—i.e., evacuation by Israel of all the territories it captured in 1967—has been completed?

This question is particularly pertinent since it is equally valid to infer from the "Declaration of Independence's" claimed derivation of "international legitimacy" from 181 the suggestion that the declared Palestinian state comprises not only the West Bank and Gaza but also the other parts of Palestine allocated by the United Nations to the Arab state (which was voided by the 1948 war and the 1949 Armistice agreements). On that basis, an Israeli withdrawal from the West Bank and Gaza would have to be followed by the evacuation of the Galilee, all of Jerusalem, large chunks of the Negev, and more. Such evacuation has been termed in Palestinian writings "the second stage" and is unacceptable not only to Israel and the United State but to most nations of the world.

Yet even that would not necessarily satisfy the PLO. The PNC's "Declaration of Independence" states: The PNC "hereby proclaims the reestablishment of the State of Palestine on our Palestinian territory with its capital Jerusalem;" "Palestinian territory" is consistently employed by the PLO as encompassing all of Palestine. And with the possible exception of the two ambiguous and self-contradictory references to Resolution 181, the entire "Declaration of Independence" reads like an unabashed claim to the whole country. It affirms the "undying connection" between Palestine and the Palestinians; it exhumes the 1919 Covenant of the League of Nations and 1923 Treaty of Lausanne to buttress its claim that "all of the Arab territories, including Palestine," were promised their freedom six decades ago; and its speaks of the "expulsion from their ancestral homes of the majority of Palestine's inhabitants"—that could only mean all of Palestine, as does the repeated and unqualified affirmation of the Palestinians' "right of return" to Palestine.

Hence, the inference that the PNC's declared Palestinian state encompasses all of Palestine—the "third stage" in PLO parlance (the three-stage doctrine is described by Farouk Kaddoumi, head of the PLO's Political Department, in an interview with *Newsweek*, March 14, 1977, p. 37)—is at least as valid as are those indicating that the PNC restricted the declared Palestinian state to the West Bank and Gaza or to the 1947 UN Partition borders. Arafat himself semed to corroborate that troubling thought. In answer to the reporter Walter Ruby's question why, if as the declaration implied, the PNC was ready for a two-state solution, it did not explicitly mention locating Palestine in the West Bank and Gaza, Arafat explained that he was still bound by the PNC decision of 1974, which approved the establishment of a Palestinian state on any part of Palestinian territory that is liberated (*Village Voice*, December 6, 1988). Similarly, Arafat's deputy Abu Iyad described the PNC's decisions as a "refinement" of its 1974 "phase program" meant to "revitalize" it and to "create for it a mechanism in order to get it moving" (*Al-Yawm al Sabah*, Paris, Nov. 28, 1988).

That PNC decision, adopted in Cairo in June 1974, is very explicit on the implementation of the third stage: after asserting that the Palestinians have the "right to return to and determine their fate on all their national soil," it states that "the PLO will struggle by all means, foremost of which is armed struggle, to liberate Palestinian land and to establish the people's national, independent and fighting authority on every part of Palestine to be liberated. That authority will struggle for . . . completing the liberation of all Palestinian soil."

As if to leave no doubt that this is indeed what the PNC had in mind, the PLO's official newspaper, *Filastin al Thawra* (Nov. 27, 1988), printed an exceedingly troubling statement by its editor, PLO spokesman Ahmad Abd al-Rahman:

"On the morning of November 15 Palestine entered into its land and its history while Israel exited the land which does not belong to it and the history which is did not create . . . The initial signs show that the Zionist cancer in Palestine is consuming itself or has chosen to make Palestine its last 'Massada.' . . . Palestine, which is shaped like a dagger, does not recognize the concept of partition, and what is now occurring with the declaration of our independence is not the partition of the dagger, but rather the entry into the homeland."

All this provides precious little comfort for proponents of peace who regard the unambiguous acceptance of Israel within defined borders as a *sine qua non* for the begining of peace negotiations.

STUDY ON PLO POSITION ON ISRAEL

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. WOLPE. Mr. Speaker, I thank the gentleman from Massachusetts [Mr. FRANK] and the gentleman from Connecticut [Mr. GEJDENSON] for submitting the majority of this crucial study. I would just reaffirm the importance of this debate and ask that the following section be read and given serious consideration:

DIRECT NEGOTIATIONS

Another way the PNC might have expressed implicit readiness to recognize Israel would have been through an offer to enter direct negotiations with its government. No such offer was made. The negotiating framework proposed by the PNC is one of an "effective international conference" under UN auspices and with the participation of the Security Council's permanent members as well as of "all other parties to the struggle in the region, including the Palestine Liberation Organization." But the PNC-conceived international conference bears little resemblance to the conference envisaged in the April 1987 London agreement between Israeli Foreign Minister Shimon Peres and Jordan's King Hussein and endorsed by Secretary of State George Shultz last March. Whereas the Israelis, Jordanians, and Americans perceived of a non-binding conference that would largely serve as a legitimating "umbrella" for direct, face-to-face negotiations among the parties concerned, the PNC baldly stipulated that "the Security Council will draw up and guarantee the arrangements for security and peace among all the affected states in the region, including the Palestinian state." The PNC thus relegated the "parties to the struggle in the region" to a rubber stamp for an imposed solution by the Security Council's permanent members—the United States, the Soviet Union, China, Britain, and France: that on top of saddling the conference with rigid preconditions as described earlier.

Clearly, even the PLO's most ardent supporters would be hard put to distill any reassuring readiness to recognize Israel from this formula.

RESPECT FOR SOVEREIGNTY

A subtle yet unmistakable indication of an intention to reverse its longstanding rejection of Israel's right to exist would have been an omission by the PNC of past demands that plainly contravened Israel's sovereignty within the 1949 Armistice lines. Among those demands, none was as intrusive as the claim of a "right" of Palestinian "return" (haqq al-awda) to the territory that has been under Israel's jurisdiction for four decades, including Haifa, Jaffa. Acre and the other Israeli towns and villages: While national immigration policies are a legitimate issue for international negotiations, no sovereign state has ever conceded the right to determine admission and exclusion of would-be immigrants.

Yet the "Right of the Return" is asserted both in the "Declaration of Independence" and in the "Political Statement." And to leave no doubt that this "right" applies to the entire country and not just to the West Bank and Gaza, the "Political Statement" affirms the settlement of the issue of the Palestinian refugees in accordance with the resolution of the United Nations regarding this matter. Most General Assembly resolutions on the Palestinian refugees have reaffirmed, in tougher language. Resolution 194(III) of 1948 (Article 11), which stipulated that refugees wishing to return to their homes in Palestine "should be permitted to do so" and that "compensation should be paid to those choosing not to return."

REFERENCES TO ISRAEL

It has been argued that the mention of Israel by name in the "Declaration of Independence" and "Political Statement" implies PNC recognition of Israel's legitimacy. There is no doubt that substituting this

word for the usual perjorative appellations displays a welcome measure of realism. But it is not new: The PNC had called Israel by name in previous sessions as well. Furthermore, despite the explicit references to Israel the PNC apparently could not resist inserting into the "Political Statement" the ostensibly discarded term "Zionist entity."

Most important, the only case in which the PNC not only mentions Israel but also describes its nature reflects anything but readiness to recognize its right to exist. Israel is depicted in the "Political Statement" as a "fascist, racist, colonialist state based on the usurpation of the Palestinian land and on the annihilation of the Palestinian people." Portraying a state in a manner suggesting that it is a combination of Nazi Germany, South Africa, and French Algeria is hardly an indication of acceptance and recognition. The same is true of the expunging of Israel from the huge map of Palestine at the hall where the PNC session was held or from the PLO publications distributed during the session.

REVISION OF THE NATIONAL COVENANT

Despite all these shortcomings in the resolutions it adopted, the PNC might have taken the one courageous step that would have dramatically changed its image in the West, and, indeed, fulfilled an informal fourth American condition for PLO legitimation (it was urged by President-elect George Bush and in the Republican party platform but not stipulated in the binding U.S. Administration commitments of 1975 or in the U.S. law signed by President Reagan in 1985); abrogation or amendment of those clauses in the Palestine National Covenant that called for the elimination of the State of Israel.

That covenant, adopted by the PNC in Cairo in 1968 and most recently reaffirmed at the council's 1984 session in Amman, is an extraordinarily hard-line document. Among other things, it asserts a Palestinian right to sovereignty in all of Palestine (Articles 2, 3 and 9); declares that Israel's establishment is "fundamentally invalid" (Article 19); and asserts the "duty" to "liquidate the Zionist presence in Palestine" through "armed struggle" (Articles 9 and 15).

There is no question that the PNC took no steps formally to amend—let alone repeal—this document. According to Article 33 of the covenant, it "may only be amended with a majority of two thirds of the total number of the members of the National Council of the PLO at a special meeting called for that purpose." No motion was made in Algiers to reconvene the PNC at a special session to amend the covenant; no vote on the covenant was taken—or requested—at the Algiers session; and as stated by Arafat's deputy Abu Iyad, "the PLO has no intention of amending the covenant" and the issue "was not even raised" in the Algiers session (Al-Hawadith, Beirut, Dec. 2, 1988).

It has been argued, however, that although not formally repealed or amended in Algiers, the Palestine National Covenant was in effect superseded by the provisions of the PNC's "Declaration of Independence" and "Political Statement." Had the PNC adopted new provisions that clearly altered the terms of the covenant, advocates of its position might have claimed some merit for this argument. But a careful examination of the Algiers resolutions against the text of the Palestine National Covenant establishes that despite the less strident language adopted in Algiers, none of the covenant's main provisions—including all those mentioned above—were in any way altered, revised, or contravened.

There is only one point on which the Algiers resolutions directly contradict the covenant: The "Declaration of Independence's" assertion that the 1947 UN Partition Resolution provides international legitimacy to Palestinian independence is clearly incompatible with the covenant's affirmation that "the partition of Palestine, which took place in 1947," is "fundamentally invalid" (Article 19). But as shown earlier, this ostensibly new departure fell short of indicating—or even implying—recognition of Israel. The Palestine National Covenant, then, was not contradicted by the PNC resolutions. As Ahmad Sidqi al-Dajani, member of the PLO's Educational and Cultural Council and a former member of its Executive Committee, wrote in a Saudi Arabian newspaper after the Algiers session, "We in the PLO draw a clear distinction between the Covenant and political programs, since the Covenant contains the permanent strategic policy, while the political programs contain the phased policy." (Okaz, November 22, 1988).

At his subsequent statement to the press in Geneva, Arafat's interpretation certainly did contradict the Palestine National Covenant when he said, "We mean . . . the right of all parties . . . to exist in peace and security . . . , including Israel." That was a gratifying move indeed. For the first time an authoritative PLO leader publicly broke the taboo enshrined by the Covenant against uttering words indicating recognition of Israel's right to exist. Unfortunately, however, that one-time interpretation was never repeated by Arafat himself or by other PLO leaders. Instead, several weeks after Arafat's declaration a senior PLO official, Fatah Central Committee member and Palestinian ambassador to Saudi Arabia Rafiq al-Natshah, made the following unchallenged statement to a Kuwaiti newspaper (Al-Watan, Jan. 8, 1989):

The PLO Charter [i.e., Covenant] is still the foundation of the PLO's political and militant action. An incremental program is the base of the current political move. Discussion must concentrate the extent of harmony established between various political decisions on the one hand and the charter and the incremental program on the other.

The covenant then, is supplemented but not supplanted by the "Declaration of Independence" and the "Political Statement"—and, according to Arafat and Abu Iyad, by the 1974 "phased program" of the PNC as well.

PLO INTERPRETATIONS

There is one effective way in which the PLO leadership might have somewhat mitigated the negative effects of the PNC resolutions' shortcomings and ambiguities: Had it publicly and straightforwardly told the Palestinians that the real meaning of those resolutions was recognition of Israel's right to exist, or, at the very least, unqualified acceptance of 242 in a manner in which such recognition might clearly be inferred. Palestinian opinion might have begun to shift in that direction and perhaps led to genuine change in the next PNC session. This, however, has not happened. With the exception of Arafat's statements in Stockholm and Geneva, Palestinian leaders have made clear in their public pronouncements, particularly in the Arab media, that no recognition of Israel or acceptance of 242 was decided in Algiers, or at best have left this issue unanswered.

Immediately after the adoption of the "Political Statement," Arafat was asked whether he believed that acceptance of 242 represented acceptance of Israel. The PLO leader declined to give an explicit answer. PFLP leader George Habash stated candidly: "In my opinion, there's a great difference between recognizing Israel firmly and officially, and accepting 242 and 338. I do not regard that the PNC recognized Israel" (New York Times, November 16, 1988). Similarly, Arafat's deputy Abu Iyad stated to the largest-circulation daily newspaper in Kuwait, country of residence of hundreds of thousands of Palestinians: "Acceptance of 242 and 338 does not mean recognition of Israel" (Al-Qabas, November 15, 1988). In an interview with another major Kuwait daily, the head of the PLO's Political Department Farouk Kaddoumi went even further. He stated that "the entire Palestine National Council is opposed to 242, which cannot be the basis for an international conference" (Al-Siyasa, November 19, 1988). There is compelling evidence that the PLO has indeed sought to conceal the PNC's positive reference to 242/338 from its own Palestinian constituency: Broadcasting from Baghdad the full text of the "Political Statement," the PLO's official radio station omitted the one reference to 242/338 included in the official text distributed to reporters in Algiers (text of the PLO radio broadcast in the U.S. Foreign Broadcast Information Service, November 16, 1988).

Even after Arafat's conciliatory statement in Geneva on December 14, 1988, PLO leaders continued to indicate their refusal to recognize Israel's existence—let alone its right to exist. Thus, the term "Zionist entity" was used (e.g., Farouk Kaddoumi in an interview with the Gulf News Agency, Manama, Dec. 29, 1988, and PLO Executive Committee member Mustafa al-Zibri in a statement quoted by the Kuwaiti newspaper Al-Qabas, Dec. 19, 1988). PNC speaker Abd al-Hamid al-Sai'h declared: The Islamic fundamentalist movement Hamas "has issued a statement explicitly saying that its aim is all Palestine. We also aspire for the same objective. However, in light of the current international political state of affairs, we are working within the available possibilities. After this, we can speak about the other matters" (Al-Siyasa, Kuwait, Dec. 23, 1988). And PLO representative in Saudi Arabia Rafik al-Natshe said at an event attended by Arafat: "Our return to Palestine and our victory will be possible only with Allah's help and with our return to Faluja, Jaffa, and Haifa" (Saudi News Agency, Jan. 2, 1989).

Unfortunately, then, the PLO leadership's post-PNC handling of the Algiers resolutions has only served to aggravate the doubts that it intends in any way to move towards recognition of Israel. Unless disseminated in Arabic as well, positive statements about the Algiers resolutions by PLO spokesmen or supporters to Western media have virtually no impact on the Palestinians living in the Middle East—the PLO's natural constituency—and may be regarded primarily as attempts to persuade Western public opinion that the PLO has at least earned Western support.

BALANCE SHEET OF MARTIN AND VALERIE FROST

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. FROST. Mr. Speaker, as I have done each year since being elected to Congress in 1979, I am inserting in the RECORD at this point personal financial information that goes beyond what is required under Rules of the House.

Balance sheet: Martin and Valerie Frost as of December 31, 1988

Assets:	
Condominium, Dallas, Texas	$47,500.00
House and Lot, Arlington, Virginia	292,100.00
Home furnishings and other personal effects	35,000.00
Savings, Wright Patman Federal Credit Union	49.15
Checking Account, Wright Patman Federal Credit Union	10,544.81
Retirement, U.S. Congress	34,494.06
Thrift Savings Plan	6,694.18
IRA's (Martin and Valerie)	18,726.37
Washington Fringe Benefit Investment Club	5,362.07
Subtotal	450,480.64
Automobiles:	
1979 Chevrolet Chevette	1,000.00
1984 Toyota Van	4,550.00
1984 Starcraft Pop-up Trailer	2,090.00
1985 Pontiac 6000	5,575.00
Subtotal	13,215.00
Stocks and Bonds:	
553 Shares Central and Southwest	17,143.00
772 Shares Exxon	34,740.00
99 Shares General Motors	8,452.00
273 Shares Houston Industries	7,507.00
137 Shares Eli Lilly	11,936.00
54 Shares Mobil	2,470.00
179 Shares Westinghouse	9,352.00
929 Shares Fundamental Investors	13,492.00
U.S. Savings Bonds	300.00
300 Shares Wal-Mart	9,225.00
8 Shares General Motors (E)	349.00
8 Shares General Motors (H)	223.00
100 Shares Anheuser Busch	3,137.00
60 Shares Waste Management	2,490.00
160 Shares Blockbuster Entertainment	3,080.00
120 Shares Merck	6,780.00
75 Shares Schering Plough	4,312.00
Subtotal	134,988.00
Total assets	598,683.64
Liabilities:	
Mortgages:	
Star States Mortgage Corporation (Dallas Condomiunium)	37,225.76
Paine-Webber (Arlington Residence)	171,185.25
Century National Bank (Arlington Resience)	37,446.80
Subtotal	245,857.81
Installment Loans:	
Open Charge Accounts (Balance)	1,000.00
GMAC (Automobile)	3,355.44
Subtotal	4,355.44
Total liabilities	250,213.25
Net worth:	
Total Assets	598,683.64
Total Liabilities	250,213.25
Total net worth	348,470.39

A TRIBUTE IN MEMORY OF JANICE JOHNSON

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MATSUI. Mr. Speaker, I rise today to honor the memory of Ms. Janice Johnson. Janice was a teacher for 11 years at the Curtis Park School, a special education program at the Sacramento, CA Children's Home. Janice taught elementary and junior high school students and during her tenure she worked with approximately 600 youngsters.

According to Janice's colleagues at the school:

Janice will be remembered most for her sincere commitment to her students. She challenged their academic knowledge and worked to build their self-confidence. Always available to listen to their concerns, Janice had the intuitive gift of knowing when a student was ready to return to the mainstream of public school. Her dedication was endless.

Janice will be deeply missed by her students, her colleagues, and the community of Sacramento. Those who knew her will keep endearing memories of her with the knowledge that she was an exceptional person.

I applaud Janice's commitment to the education of the youth of Sacramento, and commend her for making the kids that she taught and knew a part of her life.

A CATASTROPHIC MISTAKE

HON. ALFRED A. (AL) McCANDLESS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. McCANDLESS. Mr. Speaker, a great number of people in my congressional district in California are up in arms about the Medicare Catastrophic Coverage Act passed last year. On March 28, 1989, I met with a group of at least 300 seniors who had complaints about the new law, and who had some hard questions to answer. I gave them the facts about the catastrophic Medicare law, but they were definitely not pleased with it, and I was glad I could say I voted against the bill.

We cannot escape the fact that the catastrophic law does more harm than good. The following article by Joan Beck outlines clearly the many hardships imposed on seniors by the Medicare Catastrophic Coverage Act. It appeared in the Chicago Tribune on February 16, 1989. I urge my colleagues to read it, and join me in my efforts to repeal the new Medicare law:

A MEAN MISTAKE THAT IS COLD, COSTLY COMFORT FOR ELDERLY

(By Joan Beck)

All those new Medicare benefits for which the middle-income elderly are being forced to pay the highest income tax rates in the nation don't add up to much.

Just ask the insurance companies.

Members of Congress who pushed the Medicare Catastrophic Coverage Act have been trying to assure the outraged elderly that their new benefits are well worth the huge new surtax on their federal income tax and the extra payment on Part B of Medicare. You won't need "medigap" insurance to cover what Medicare doesn't, the bill's supporters told the elderly. Or at least it won't have to cover as many benefits and it won't cost you so much.

But insurers have taken a hard-headed look at the benefits the new law provides and instead of cutting the premiums on their medigap policies, most of them are raising their rates. Middle-income elderly people must now pay up to $848 extra in new Medicare charges—and most of them must still lay out 10 to 75 percent more for medigap insurance.

About 70 percent of Medicare beneficiaries have medigap coverage, according to financial analysts. Policies cost an average of about $420 to $600 a year, but can range from about $190 to about $1,300, depending on the extent of benefits and such factors as area. New benefits or not, Medicare recipients who want adequate protection against overwhelming medical bills still have to have medigap coverage, financial advisers say.

Even the American Association of Retired Persons, many of whose members are bitter about AARP's support of the hated new legislation, has raised premiums on the medigap policies it sells with the Prudential Insurance Co. by an average of 40 percent.

The AARP is making what has become a standard defense of the cruelly misnamed bill: Without the new law, the jump in medigap rates would have been even bigger.

That's probably so. But it's estimated that the new law is holding down increases in

medigap premiums by only 10 to 15 percent this year—a saving far less than the cost of the double tax blow in the new law. (A few provisions in the act won't kick in for a year or two, but because of catches, copayments and deductibles, most of the elderly won't benefit much then either, if at all.)

Despite its deceptive "catastrophic coverage" title, the new law does not pay for most nursing home care—the long-term expense most likely to be a financial disaster for most people.

Another cold indication of how little help the new law will be in covering medical costs for the elderly comes from the Financial Accounting Standards Board. Last week it said it intends to order companies to put aside billions of dollars in profits to pay the medical and insurance bills of their retirees. Some employees fear the standards board ruling will give employers another incentive to drop medigap insurance for future retirees. The new Medicare coverage will take care of you, some employees are inaccurately being told.

It's the income tax surtax that infuriates and frightens the elderly most. The tax hits everyone eligible for Medicare who pays $150 or more in federal income taxes, in effect increasing their taxes by 15 percent until they have paid an extra $800 each. The rate goes up each year until by 1993 the surtax will add 28 percent to the tax liability of the elderly, with a cap of $1,050; both the rate and the cap can be adjusted upward after that to cover costs.

The new law also slaps an extra $4 a month on Part B of Medicare. That charge will increase each year until it hits $10.20 a month in 1993, with no limits in sight after that.

But as tens of thousands of the elderly have written to members of Congress, the new income tax hits primarily middle-income retirees, not the rich, as propaganda from supporters of the bill and AARP apologists have insisted. Most of these people have saved for a adult lifetime so they will not be dependent on government or their children. They have no way to replace the money to be taxed away and worry about what will happen to their carefully planned retirement budgets.

Many of them are particularly bitter because their protests are being shrugged off by members of Congress, especially by House Ways and Means Chairman Dan Rostenkowski and Senate Finance Chairman Lloyd Bentsen. In infuriating contrast, protests over the proposed fee for insurance protection for savings-and-loan customers persuaded politicians to kill that idea quickly. The tax on the elderly is much worse, objectors argue; it is many times higher, discriminates by age, can't be avoided and hurts more vulnerable people.

Congress passed this unfair income tax on the elderly without giving them a chance to read the fine print about the coverage they get in exchange. Now they've seen it, they know they've been snookered. Members of Congress made a mean mistake with this law (many are telling protesting constituents they didn't really read it before voting for it), and the gray-power anger it has set off is going to grow every time the elderly have to pay their taxes.

THE ENVIRONMENTAL CONSEQUENCES OF RAPID POPULATION GROWTH

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. McHUGH. Mr. Speaker, President Bush has indicated clearly that the protection of the environment will be an important concern of his administration.

Given the growing awareness of the international scope of environmental problems, the President's commitment is a timely one. Almost daily we read headlines about the greenhouse effect, acid rain, drought, and other calamities. These global problems cut across national boundaries and human societies, and they affect all of us who share this small planet.

Because it clearly exacerbates many global environmental problems, one of the most fundamental challenges we face is rapid population growth. As we look to the future and consider ways in which Congress and the new administration can work together to confront these challenges. I would like to share with our colleagues a recent article that appeared in the Ithaca Journal.

Entitled "Danger Signals from a Polluted Earth" it was written by Werner Fornos, who is president of the Population Institute. It highlights the relationship between rapid population growth and global pollution, and I commend it to our colleagues.

The article follows:

[From the Ithaca Journal, Apr. 10, 1989]

DANGER SIGNALS, FROM A POLLUTED EARTH

(By Werner Fornos)

Pollution, once thought to be primarily a problem of the industrialized world, is today a crisis for the developing world.

To a greater or lesser degree, industrialized nations are implementing efforts to control or mitigate the pollution associated with factories and cities. Meanwhile, the Third World presses hard for rapid development but cannot afford the often costly technology of procedures to minimize the resulting pollution.

Partially responsible is the swift urbanization of the poorer nations, where 18 of the world's 209 largest metropolitan areas will be located by the end of the century.

Densely crowded slums, snarled traffic, faulty or nonexistent sewage and waste disposal systems, and sprawling, inefficient industrial operations will contribute to polluted, smog-ridden cities, whose populations will double roughly every 20 years.

Some aspects of pollution associated with urbanization are especially insidious. Some scientists believe that at least 2 percent of the earth's ozone layer has been destroyed, double the amount previously believed.

For each 1 percent loss of the ozone layer, approximatly 2 percent more ultraviolate light reaches the earth's surface, increasing skin cancer among humans by 3 to 6 percent. This could mean 2 million new cases of skin cancer directly related to each 1 percent loss of the protective ozone layer.

Scientists have further concluded that the giant "hole" in the ozone layer discovered over the South Pole is not the result of natural causes, as first suspected. It is related to manmade pollution of the atmosphere.

Chlorofluorocarbons (CFCs), the chief culprit in the depletion of the ozone layer, are a common element found in refrigerators, air conditioners and in many chemical solvents. The CFCs released into the atmosphere today may not reach the earth's stratosphere for 15 years, where they will proceed to destroy ozone molecules for 75 to 130 years before dissipating.

Thus, even if the 31-nation treaty negotiated last year and recently ratified by the United States and Mexico achieves its goal of cutting CFC emissions in half by the year 1994, the CFCs released over the past decade and a half will only be starting their century-long havoc in the stratosphere.

Meanwhile, a buildup in the atmosphere of carbon dioxide—along with CFCs, methane, and nitrous oxides—is dramatically altering the environment.

The buildup is driven by two trends: Our propensity for burning fuels, as evidenced by the growth in emissions related to the swiftly increasing demands for automobiles and industry, and the simultaneous destruction of forests, plant life, and ocean organisms that would normally consume some of the carbon dioxide.

Both trends are directly related to the rapid growth of world population. And as our human numbers surpass the 6 billion mark by the end of this century, we will witness a carbon dioxide buildup fully one-third larger than we are now experiencing.

When sunlight meets the carbon dioxide in the atmosphere, it generates heat, much like sunlight passing through a windshield heats the interior of a parked car. This "greenhouse effect" is leading to a general warming of the earth's climate and to a growing disruption in normal moisture cycles.

By the beginning of the 21st century, normal high and low temperatures will likely be between 1.5 and 4.5 degrees Centigrade warmer than they are today.

Climatic changes are also leading to a significant rise in the world's sea levels. The United States already is losing an average of one foot of shoreline a year.

Some scientists contend that sea levels could rise up to a foot or two, as oceans expand, flooding low-lying areas such as America's East Coast and Bangladesh. Should the Western Antarctic ice cap melt, the sea would rise 20 feet, inundating New York, London and Beijing.

In addition to the deterioration of the ozone layer, rising temperatures and sea levels, more environmental crises such as deforestation, soil erosion, faltering agriculture, desertification and accelerated pollution of the world's rivers and oceans are tied directly to rapid population growth.

In nations where population growth is stabilized, economic development is possible and funds are available to plan for and protect the environment. Where populations are doubling every 20 or 30 years, however, there is rarely sufficient economic vitality to feed and clothe people, much less implement farsighted environmental strategies.

To promote population stabilization in the Third World and economic development efforts more compatible with local ecologies, these proposals should be considered:

The U.S. and other industrialized countries might allow debt-forgiveness for countries implementing sound and farsighted policies to reverse and halt needless destruction of the environment.

Similarly creative foreign debt programs could be instituted to encourage Third World governments to step up the expan-

sion of educational and employment opportunities for women. Studies have repeatedly documented the relationship between rising economic and social opportunities for women and declining birth rates.

Industrialized countries could provide finanical assistance to developing nations committed to alleviating the flow of migrants into the Third World's megacities.

The industrialized world could accelerate researched efforts to develop alternative sources to "burning" fuels such as coal and oil. Third World governments could work toward shifting their peoples' reliance away from wood and toward the new sources.

During this week alone, another 1.7 million people will be added to the world. Another 750,000 acres of Brazilian rainforest will be bulldozed. Pollution of Third World waterways and the buildup of atmospheric gases will have accelerated just a little from the week before.

The dangers inherent when a world's population outgrows its environmental resources demand a new commitment to reshaping our future.

CATHERINE DEBORAH ARIAS WINNER, VOICE OF DEMOCRACY CONTEST

HON. BARBARA F. VUCANOVICH

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mrs. VUCANOVICH. Mr. Speaker, each year the Veterans of Foreign Wars of the United States and its ladies auxiliary conduct the Voice of Democracy Broadcast Scriptwriting Contest. This year more than 250,000 secondary school students participated in the contest competing for the nine scholarships totaling $42,500, which was distributed among the top nine winners. The contest theme this year was "Preparing for America's Future." I am submitting a copy of the winning script from my State of Nevada as delivered by Catherine Deborah Arias of Elko, NV.

PREPARING FOR AMERICA'S FUTURE

As a teen-ager in America, I see people looking to my generation in preparation for the nation's future. Any country's future rests in the hearts and minds of its youth. That is precisely the reason that preparing for America's future must start now.

Every generation holds a certain responsibility—from senior citizens to newborn children. Certainly, all generations aren't expected to carry equal responsibility for our nation, but every citizen of this country can contribute something. John F. Kennedy told the people of America, "Ask not what your country can do for you, but what you can do for your country." President Kennedy knew that it is the people making up a nation who determine its success.

Perhaps the first thing Americans must do is appreciate the freedoms we may take for granted. Brave men fought and died to obtain and retain those freedoms. Women throughout history did their own part during wartime to keep the nation running smoothly on the homefront. In the future, we as a nation must hold sacred in our homes and in our hearts the freedoms these people have secured. The United States Constitution clearly outlines these freedoms and stands as an example to the world. Because of the Constitution, and because of the people who fought to keep it, our country is extraordinarily great. We must continue fighting for these freedoms, even in ways completely different from battles or uprisings. America must recognize that we are our own biggest threat if we fail to use our voices in government decisions.

The reason our Constitution works amazingly well, even 200 years after its drafting, is because it is amendable. Our forefathers were wise in realizing that they could not predict future situations. This in itself was insightful. It is our turn to carry the torch of hope that was ignited at America's independence. We can't predict the future now, but we must continue to build on our nation's promise.

There are things that need to be done by our generation. We must work as a unified nation to achieve peace and justice. We must encourage everyone to do his part to solve problems locally as well as nationally. We must work together by setting examples for younger generations, and by acknowledging the support of older generations. As long as the people of this nation care enough about their land to vote and be informed about their government's policies, america's future is bright. We must begin now to teach the generations of tomorrow the significance of our government by the people. Too many nations, even in the world today, have such strong government control that it is pointless; indeed, even dangerous, to speak out against the government.

Here it is more criminal for the American people not to control the government. Our system of checks and balances in the three branches of federal government is only one example of what makes this nation strong. Our government truly is by and for the people, and things like voting, a free press, and even a two party system, demonstrate this concept. With freedom comes a certain amount of responsibility.

Freedoms are more than just a reward for historic battles against oppression. Freedom must be earned every day. In all that Americans do, it is important to bear in mind that if the people don't use their voices to form the government, someone else's voice will speak for them. To prepare for America's future, all citizens must stay informed. The more we know about an issue, the better we are at making crucial decisions that may affect the entire country. Differences of opinions are healthy, and result in revealing more about each side of an issue. The people of the United States need to become informed so that their opinions are those which shape our government. Those who are eligible should vote and cast informed votes on every election day. Voting in America is a right, and each citizen should take it upon himself as a duty to his country. The future isn't a hazy far-off time we can't comprehend. The future is tomorrow. What we do now will determine what happens next. Like our Constitution's framers, we must make decisions that will affect future generations. Like today's leaders, we must make choices that will affect how we live now. We have already begun preparing for America's future. Through educating and informing every generation, we can anticipate America's future with great pride and confidence.

FSX AGREEMENT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. DYMALLY. Mr. Speaker, enclosed are my remarks during the May 3, 1989, Committee on Foreign Affairs hearing on the proposed United States-Japan agreement to co-develop the FSX aircraft.

I would appreciate sharing it with the rest of the Members of the House of Representatives.

REMARKS BY MERVYN M. DYMALLY ON THE FSX AGREEMENT

Mr. Chairman, unlike some of my colleagues I am not as concerned about the technology transfer, as I am concerned about some other aspects of U.S.-Japan relations.

I speak specifically about Japan's relations with America's minorities, or shall I say lack thereof. I shall have more to say about this later.

It is my feeling that if the Japanese really want a unique jet fighter they have the genius to build one without this agreement. I am sure they know more about the F-16 than we think they do, or want them to.

Surely, we could have and should have sold them the F-20. This aircraft was built to meet the needs of countries like Japan.

However, despite my lack of fear about the technology transfer, I am going to ask the Members of the Congressional Black Caucus (CBC) to vote in support of Mr. Levine's resolution to disapprove the agreement. I do so because it's a national disgrace that the Japanese government and private sector have arrogantly failed to heed the conciliatory efforts of the CBC to comply with our affirmative action laws and practices in the Private sector in the United States.

After approximately 2½ years of negotiations only one auto firm has responded to persistent request to provide opportunities for America's minorities. So far, I regret to say that the Japanese government has also not been forthcoming in their responses to our representation both in the United States and Japan.

It is bad enough that Japanese firms indulge in unfair trade practices. However, we find it intolerable that they continue to ignore our requests to meet, confer and implement some of our recommendations.

This may not be the appropriate forum or piece of legislation to vent our unhappiness, but at this time, we have no other alternatives; we have no other options. We need to send a strong message to the Japanese. What is more troubling domestically is that the previous administration never lifted a finger to inform the Japanese about their discriminatory practices in the United States. I could say the same for the private sector also.

Therefore, Mr. Chairman I ask the members of this Committee to send a strong message to the Japanese government and corporations and vote with Mr. Levine to disapprove the FSX Agreement.

REMEMBRANCE OF LESLIE PANTIN, SR.

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. LEHMAN of Florida. Mr. Speaker, last Sunday, Miami lost a leading citizen.

Leslie Pantin was a total Cuban patriot and, without any conflict of commitment, a devoted American patriot.

The highest praise that my mother could say about any person was that he "did so much good in a quiet way." Leslie was well qualified for this designation.

Mark Antony's words in Shakespeare's Julius Caesar apply to Leslie Pantin:

His life was gentle, and the elements so
mixed in him that nature stand up
And say to all the world, "This was a man."

Mr. Speaker, I would like to share with my colleagues the following editorial and article on Leslie Pantin that appeared in the Miami Herald:

LESLIE PANTIN, LINKED CULTURES

(By Sandra Dibble)

From Little Havana shopkeepers to Dade's power brokers, hundreds crammed a Miami church Monday to mourn Leslie Pantin, Sr., an exile businessman who cleared a path into the boardrooms of Anglo Miami while staying true to his Cuban roots.

"He will be remembered as a bridge builder," said the Rev. Jose Nickse in a eulogy at St. Raymond Catholic Church, 3475 SW 17th St. "He built bridges among people, among groups. That is his final gift and his final challenge."

Pantin, an insurance executive who developed a thriving family company in Miami after fleeing Cuba in 1960, was the first Cuban on the board of the Greater Miami Chamber of Commerce and the first Cuban on the Orange Bowl Committee. Most recently, he was chairman of Miami's Off-Street Parking Authority.

Pantin died of a heart attack Sunday, three days before his 67th birthday.

On Monday, the crowd crammed the wooden pews of St. Raymond, spilling from the central aisle out of the church's front door for the noon Mass. His death brought together a wide range of the Miami community. There were developers, bankers, insurance executives, newspaper executives and elected officials—leaders from every sector—who joined Pantin family members and friends from Cuba in paying their last respects. Scattered throughout the crowd were Orange Bowl Committee members clad in orange blazers.

"He joined the mainstream without losing his identity," said former Miami Mayor Maurice Ferre. "He always remained a Cuban."

In the front rows, facing Pantin's shrouded coffin, were Pantin's closest relatives," wife Maria Elena Torano, brother Victor, sons Leslie Jr. and Victor, and daughter Rosario, who wept quietly while clutching a white rose.

"His legacy is such that the footprints will be difficult to see," said community relations consultant Robert Simms. "He was not a man that boasted publicly of his accomplishments. His joy was in seeing a job get done, not who got the credit."

Appropriately for a man who moved with grace in two cultures, the Mass was bilingual. Nickse deftly alternated English and Spanish, repeating the same refrain.

Pantin was not simply a gentleman, Nickse said but a gentle man.

"He made you feel good if you were Hispanic, he made you feel good if you were black, he made you feel good if you were Anglo, if you were young or old, if you were rich, if you were poor.

"He had that beautiful talent . . . that God had given him to make you realize the beauty that lies in each and everyone of us. That was God's gift to him, and that was his gift to all of us."

A MAN FOR ALL SEASONS

In any language, in any cultural context, Leslie Pantin, Sr., was a gentleman, a man who knew how to treat people and who insisted that others also should show respect without regard for race or national origin. From his first years in Miami in the 1960s until his death on Sunday at age 66, Mr. Pantin was the model on which a bicultural community could be built. His gentle influence will be sorely missed.

Whether he was building his own insurance business, opening Democratic Party circles to Cuban Americans, breaking the ethnic barrier at the Orange Bowl Committee, or protecting the independence and efficiency of the Off-Street Parking Authority from a predatory Miami City Hall, Mr. Pantin projected strength and dignity. These traits brought him admiration throughout South Florida's diverse social environment. Few ever questioned either his integrity or his commitment to help Greater Miami turn its fractious diversity into a pillar of prosperity for all its residents.

Mr. Pantin's leadership was of a quiet type, more the Do-as-I-do, not-as-I-say school than of the bombast for which Miami is noted. His courage in forging early into downtown circles was the spark plug for the speed with which Cuban Americans moved into Miami's power structure. Mr. Pantin early had shattered any suspicion that Cubans wouldn't be able to function in the mainstream environment. And just as he showed the Establishment that Cubans needn't be feared and yet couldn't be ignored, he proved to younger Cuban Americans that the open American system really would reward their hard work and talent.

Someday, when the history of the New World Center Miami is written from the vantage point of the 21st Century, the life of Leslie Pantin, Sr., will be cited as one of the earliest and truest signposts of the direction that the community would take toward cohesion and prosperity. By rights he should have been here to greet the turn of the millenium 11 years hence, but that was not to be. Taken in what now is considered late middle age, Mr. Pantin nevertheless contributed more to his adopted home in 25 years than most men could in a century.

May he rest in peace.

TRIBUTE TO SACRAMENTO URBAN LEAGUE AND GEORGE H. DEAN

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to the Sacramento Urban League and its president George H. Dean, along with the recipients of the Whitney M. Young Jr. Award, the Sacramento Urban League's highest award. It is an honor and a privilege to salute those who have put so much time and effort into making our community a better place to live.

The Urban League, an organization committed to solving social, racial and economic problems, presented its prestigious awards at the group's ninth annual banquet. The awards are named for the civil rights leader and former executive director of the National Urban League. Recipients of the Whitney M. Young Jr. Award include T/Sgt. Mary A. Royal-Highsmith and the Reverend Ephraim Williams of St. Paul Baptist Church for their leadership roles and involvement in a variety of community groups. A third award was presented to Kaiser Permanente Medical Center of south Sacramento for providing health education classes for the public and for its affirmative action programs.

Mr. Speaker, in a society that has become very impersonal, it is indeed a pleasure to note such selfless dedication not only from the individual, but from the corporation. I commend the recipients of the Whitney M. Young Jr. Award and I hope that they will continue giving to the community. I would also like to express my sincere gratitude to George Dean and the Sacramento Urban League for striving to achieve social, racial and economic equality.

COMMEMORATING THE 100TH ANNIVERSARY OF THE BIRTH OF A. PHILIP RANDOLPH

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. STOKES. Mr. Speaker, I would like to bring to the attention of my colleagues the tremendous contributions and influence of a great American—A. Philip Randolph. This year marks the 100th anniversary of the birth of Asa Philip Randolph, the son of a Methodist preacher, the first national labor leader among black Americans, and a great warrior for economic parity and social justice.

I am pleased to pay tribute to this champion of equality and justice. A. Philip Randolph was the chief founder of the Brotherhood of Sleeping Car Porters and its president for over 40 years. As a leader within the labor movement, he devoted his life to the principles of equity for all people. We recognize Randolph for leading the fight against discrimination in industry, in organized labor, and in the armed

services. Randolph's critics maligned his hard-nosed, no nonsense approach to social obstacles by labeling him "the most dangerous Negro in America." However, these critics could not stop Randolph from becoming foremost in the struggle to insure that the common man received a decent wage for a day's work.

Randolph's commitment began in 1917 when he launched the Messenger, a monthly magazine and a prolific instrument of protest. His involvement with the Messenger gave Randolph the opportunity to express his grave concern over World War I, the economic disparity between Americans, and racial injustices. However, his involvement antagonized the Wilson administration, which branded Randolph a Communist for spreading socialistic rhetoric among Blacks.

Although Randolph was not a porter by profession, he was concerned about the plight of Pullman car porters, who represented a large segment of black labor which had not been organized. Randolph was outraged by the porters' inability to obtain equitable wages and basic concessions from the Pullman Co. When a small group of porters approached Randolph for help, he saw a chance to change this inequity. In August 1925, Randolph was elected president and general organizer of a proposed union of black pullman car porters, and the Messenger became "The official organ of the Brotherhood of Sleeping Car Porters." For several years, the union struggled to build its membership, and earn recognition and support from other unions. Porters were fired or harassed by the Pullman Co. for joining the Brotherhood. In confrontations between the Pullman Co. and the Brotherhood, other unions refused to give their support. Despite the Pullman Co.'s attempt to crush the union, the Brotherhood survived and became the Nation's first predominantly black labor union.

In convention after convention of the American Federation of Labor, Randolph continued to speak out against racial injustice. Randolph followed John L. Lewis, president of the United Mine Workers, when Lewis left the American Federation of Labor and formed the Congress of Industrial Organizations [CIO]. When the two unions merged in 1955, Randolph earned another first; he became the only black representative on the AFL–CIO executive council.

Randolph disliked the contradictions and hypocrisy that American democracy afforded black Americans. When blacks were barred from working in defense plants during World War II, Randolph and other black leaders threatened to lead a massive march through the Nation's Capital. After negotiating with President Franklin Roosevelt, Executive Order 8802 was signed, calling for fair employment practices in war industries. In addition, Roosevelt named a Fair Employment Practices Committee to enforce it. During both World War I and II, Randolph vehemently protested the draft of young, black men, who fought for a country which denied them basic freedoms at home. In 1948, he led a civil disobedience campaign that was so effective it forced then President Truman to sign an Executive order, banning segregation in the Armed Forces.

A. Philip Randolph was an organizer of five marches on Washington, including the massive demonstration led by the late Dr. Martin Luther King in August of 1963. That march will long be remembered for aiding the passage of the 1964 Civil Rights Act, outlawing discrimination in public places of accommodation, employment, and unions.

During his lifetime, A. Philip Randolph accomplished great tasks and left a lasting mark that has affected the lives of all Americans. He established the A. Philip Randolph Institute in 1965 to accomplish the task of enlisting community leaders in a broad study of conditions of economic inequality. He hoped that such a study would determine how our society can someday find a way of ending the perpetual cycle of poverty. The legacy of activism lives on in the institute.

Throughout his life, Randolph remained a man of integrity, whose humanity enabled him to work within the framework of the American system and remain unshaken. He wanted most of all to make a difference in the lives of people whose plight he both understood and lived. He lived through the oppression, the prejudice, the injustices, adversity which would have hardened most men. Instead, Randolph remained generous to his friends, dedicated to his causes, and modest in his success.

That is A. Philip Randolph. Moral leader, organizer, a man of principle and vision.

ENERGY CONSERVATION, DEFICIT REDUCTION AND THE GASOLINE TAX

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MOODY. Mr. Speaker, I am today introducing legislation to increase the Federal excise tax on gasoline and gasohol by 9 cents-per-gallon. Proceeds from the tax—about $9 billion a year—would be earmarked to a special deficit reduction trust fund established at the Treasury. Revenues in the trust fund could be used only to buy back the outstanding obligations of the Federal Government, and would thus be earmarked directly for deficit reduction and only for deficit reduction, not for increased Federal spending.

There would be, however, major benefits in the areas of the environment, national energy independence, long-term investment and productivity, international competitiveness, and trade deficit reduction.

ENVIRONMENTAL AND ENERGY INDEPENDENCE

The environmental disaster of the *Exxon Valdez,* spill, and the subsequent action by some oil companies to exploit it by raising gasoline prices, underscores the need for a renewed commitment to a serious energy conservation policy in this country—on grounds of both environmental protection and petroleum self-sufficiency.

We continue to be extraordinarily lax about petroleum conservation. While U.S. consumption of petroleum is up—now at 6.1 billion barrels per year, by far the highest in the world—domestic production of oil is down. Sixty-four percent of our petroleum consumption goes for transportation, hence any serious energy conservation strategy must focus on transportation fuel. Right now the inflation adjusted price of gas is 36 percent cheaper than in 1979. We are temporarily feeding—gorging—on cheap foreign oil, and hence increasing the risk of another 1973-style price shock and resulting economic recession. As of this January over 40 percent of U.S. petroleum consumption was imported—almost half from OPEC—compared to 34.8 percent just prior to the oil shock of 1973.

In response to cheaper gasoline American auto manufacturers have reduced the production of high mileage compact cars, thereby reducing our ability to compete with foreign autos when an oil and gasoline price shock finally hits. Since 1985 the National Highway Traffic Safety Administration has repeatedly waived CAFE standards to require American cars to steadily raise mileage-per-gallon to an average of 27.5 by 1989.

In this period of low gas prices and cheap foreign oil there is little economic incentive to emphasize conservation. But we're literally playing Russian roulette—or rather OPEC roulette—with not only our energy future but also our vulnerability to future recession and inflation. The *Exxon Valdez* disaster and upward spurt in recent gasoline prices indicates just how vulnerable we are to price effects of future disruption of our oil supply.

THE ECONOMY

We are also engaging in deficit policies that weaken our long-term economic strength. By spending more than it raises in tax revenues the Federal Government soaks up vast amounts of private capital, raises private borrowing costs, and makes it more difficult and expensive to invest, which only further reduces national productivity. Our net national savings rate has been down about 2 percent of disposable income for the last several years while comparable savings rate of our economic competitors remains far higher: Japan at over 16 percent; Germany at over 12 percent.

Large deficits not only raise interest rates above what they would otherwise be, and reduce domestic capital investment and economic growth for America, they also increase U.S. dependence on foreign capital, both as borrowing and as direct investment in the U.S. industry and real estate. This in turn causes the future benefits of those foreign capital investments to go to overseas investors as well as weaken America's control over its own economic future. For the first time in history the United States dollar value is now determined not in Washington or New York, but in Bonn and Tokyo—directly caused by our massive foreign borrowing.

Petroleum imports also enlarge our foreign trade deficit, and hence themselves increase still further our dependence on foreign capital. They are now the largest negative factor in our foreign trade deficit. Petroleum imports also directly destroy American jobs. In general, one U.S. job is eliminated for every $40,000 worth of imports.

No one wants to feel the pinch of higher taxes today, including gas taxes. But we can pay a little today, or we can pay far, far more tomorrow. The Federal budget deficit is itself

an insidious tax on virtually every American which steadily reduced their future purchasing power while it reduces the Government's ability to meet the important needs of our country.

By moving toward a pay-as-you-go—zero deficit—budget strategy, which combines real spending reductions with increased revenues, we will simultaneously bring down interest rates, stimulate investment in both physical and human capital, and promote long-term growth—all of which will directly benefit those who pay gas taxes.

REGRESSIVITY

Some argue that taxes on gasoline are regressive. But how regressive really are they? Assuming automobile mileage of 30 miles-per-gallon, the net cost of 9 additional cents-per-gallon increase in the gasoline excise tax is only three-tenths of 1 cent per mile. At a commuting distance of 10 miles per day, the net cost of the tax would be only 3 cents per day, or $7 per year increased cost of commuting to work, assuming 230 work days per year. At a work commuting distance of as much as 100 miles, which can occur in certain regions, the net cost of the tax would rise to only $70 per year.

But careful study by the Congressional Budget Office [CBO], shows that when gas taxes are compared to family expenditures they are not regressive. (Comparing tax burdens with expenditures is far sounder than comparing them with nominal income, since annual income fluctuates far more than annual expenditures. Expenditures more accurately reflect multiyear income. For example, college students and business owners may have low current incomes but substantial longer term, or "lifetime" incomes.)

The following table shows that burden of gas taxes is almost constant per $100 of family expenditures at all income levels.

DISTRIBUTION OF GASOLINE EXCISE TAX BURDEN

Family income class ($1,000)	Average family income	Average total family expenditures	Average family gasoline expenditures	Burden of 1 cent/gallon increase in gasoline excise tax [1]	
				Per $100 income	Per $100 expenditures
0 to 5	$2,311	$9,690	$394	$0.19	$0.04
5 to 10	7,401	10,838	453	0.07	0.05
10 to 20	14,764	16,195	801	0.06	0.05
20 to 30	24,750	22,514	1,111	0.05	0.05
30 to 40	34,630	27,892	1,309	0.04	0.05
40 to 50	44,539	34,007	1,459	0.04	0.05
50 and up	72,016	47,382	1,639	0.03	0.04
Total	26,502	22,828	995	0.04	0.05

[1] Burden of gasoline excise tax assuming that the price of gasoline increases by the amount of the tax.

Source: CBO, "The Distributional Effects of an Increase in Selected Excise Taxes" (January 1987).

Hence the total annual cost—for work and recreational driving—of a 9-cent increase in the price of gasoline would average 45 cents per $100 in expenditures of only $135 for a family with annual expenditures of $30,000. It would be still less at $90 for a family spending $20,000.

Compare this cost with the effects of increases in household interest expenses caused by a failure to reach national deficit reduction targets through a decisive deficit reduction package that includes taxes. Each 1 percent, or 100 basis point, increase would cost an additional $10 per $1,000 of debt. A middle income family with, say, a total of $40,000 in mortgage and consumer debts—reasonable for a family living on $30,000—would thus spend about $400 extra in annual increased interest costs (once interest rates are adjusted). If interest rates went up 2 percent, or 200 basis points, it would cost $800 per year.

So, many—probably most—families would be better off economically by the 9 cents per gallon tax as part of a serious deficit and interest rate reducing package than they would be if gas taxes were not raised as part of a serious deficit reduction.

Furthermore, whatever mild regressive effects on low income families that might be caused by an increase in the tax on gasoline could be more than adequately offset by an adjustment in the Earned Income Tax Credit [EITC] which provides relief to the working poor from the payroll tax, our most regressive tax. I have cosponsored legislation to adjust the EITC as one measure of offsetting any potentially regressive effects of a gasoline tax increase.

REGIONAL DIFFERENCES

A great deal has been made of alleged regional differences in the impact of the gas tax. A careful study by the U.S. Department of Energy shows that there is amazingly little variation in the state-by-state differences in per capita tax burdens of increasing fuel taxes, as shown by the table for the four highest-burden and four lowest-burden States.

BURDEN OF 10 CENTS PER GALLON GASOLINE TAX [1]

[4 lowest and 4 highest]

State	Per capita tax	
	Amount per year	Percent of U.S. average
Hawaii	$30.60	70
New York	31.60	72
Pennsylvania	36.20	83
Alaska	38.00	87
Tennessee	51.90	119
Georgia	51.90	119
Nevada	52.30	120
Wyoming	54.10	124
U.S. average	43.70	100

[1] Analysis assumes no change in State fuel consumption in response to tax (or equivalently, equal responses in every State). The full tax burden is assumed to fall in the State in which gasoline is consumed.

Source: U.S. Department of Energy, "State Energy Data Report: 1960-1986."

Surprisingly the lowest percentage burden State, Hawaii, is only $13.10 per year lower than the national average, and the highest burden, Wyoming, is only $10.40 higher—burden differences that are hardly in the "hardship" range frequently asserted. Furthermore, the high-density, short-commute States like New York and Pennsylvania tend to receive less than 100 cents per dollar of Federal gasoline taxes paid while the long-commute, low-density States like Nevada and Wyoming tend to recline more than 100 cents per dollar of Federal fuel tax. Therefore, even the mild cross-subsidization effects of gas taxes are somewhat mitigated by the current distribution formulas for gasoline taxes.

SUMMARY

This 9-cent-per-gallon tax proposed here as part of a deficit reduction effort is not a painless proposal. But no realistic deficit reduction proposal can be painless. Those who seek deficit reduction with little or no sacrifice are bound to produce deficit reduction with little or no results. This year's budget summit agreement shows that. America's economic future is at stake.

The major benefit of this bill aside from deficit reduction would be energy conservation and petroleum independence. If we fail to renew our national commitment to energy conservation, we leave ourselves at the mercy of inflation or recession caused by rising world oil prices. It is ironic that a relative minor event in terms of the world's oil supply, the *Valdez* spill, has already caused an increase in gasoline prices roughly equal to this tax as proposed.

A modest earmarked increase in the gasoline tax now is a realistic method of addressing the national priorities of energy conservation, international energy independence and budget deficit reduction. I urge my colleagues to support this legislation.

A NEW OPENING FOR WORKER RIGHTS IN THE SOVIET UNION

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. PEASE. Mr. Speaker, last week we opened our newspapers to another startling, but encouraging, report from the Soviet Union, to the effect that a new labor law will be submitted for enactment before the end of this year. The draft new law would allow strikes for the first time and its holds out the promise of greater independence for trade unions to serve the interests of Soviet workers. It seems the Soviets, along with much of the rest of the Communist world, are discovering the importance of fundamental worker rights and their relevance to greater productivity and real economic growth in any national economy. I am submitting for reproduction the articles in last Thursday's New York Times and Washington Post about the anticipated changes in Soviet labor law.

These developments underscore the timeliness of legislation that I will be introducing this week, the East-West Trade and Human Rights Enhancement Act of 1989. My bill will provide a tangible way for our country to encourage the Soviets and other nonmarket economies to show greater respect for fundamental worker rights and to expand our trade with cooperatives in nonmarket economies at the same time. I invite each of my colleagues to join me in sponsoring legislation that represents both good trade policy and good human rights policy with Communist countries.

[From the New York Times, May 4, 1989]

RUSSIANS TO GET RIGHT TO STRIKE AFTER RASH OF WILDCAT ACTIONS

(By Bill Keller)

Moscow, May 3.—After a wave of wildcat strikes, the Soviet Government has decided

to give labor unions the legal right to strike for the first time under a new law on union rights, the chief of Soviet trade unions said in an interview published today.

The provision legalizing strikes is part of a new draft law that purports to increase the independence and power of Soviet unions, which have traditionally been kept under the strict control of industrial management.

The proposed new law, which is to be enacted later this year, was published after a spate of independent strikes and walkouts by coal miners, librarians, bus drivers, auto workers and others. The new law appears to be intended to limit outbreaks of labor unrest by bringing them under control of the Government-sanctioned unions instead of letting people independent of the unions organize labor actions—in effect, giving unions and not workers the right to strike.

According to one Soviet lawyer, the draft law excludes politically motivated strikes, like the work stoppages that have paralyzed industry in parts of Armenia, Azerbaijan and Georgia in recent periods of nationalist unrest.

Stepan A. Shalayev, head of Soviet trade unions, said in an interview published today in the union newspaper Trud, "The right is being considered as a means to press management to speed up the resolution of labor disputes."

Soviet law contains nothing banning strikes, but authorities have prohibited work stoppages in the past by saying they violate the constitutional obligation of every citizen to work. Moreover, strikes were considered harmful to fulfilling the economic plan, and therefore a challenge to the authority of the state.

STRIKES FOLLOW PAY CUTS

Under Communist Party doctrine, as the party newspaper Pravda put it recently, "We have a working people's state here, and who would ever dream of striking against himself?"

The subject of strikes has caused strenuous debate in recent months, as workers in several industries have walked off the job, usually for short periods of time.

Most of the strikes were called to protest pay cuts resulting from new economic laws that require factories to be more cost conscious and tie a worker's pay to output.

Other walkouts, including a recent strike by miners in the Donbass coal region, have been organized because of what employees call unsafe working conditions.

One of the most novel job actions was staged by air-traffic controllers in Moscow, who stayed on the job but refused to collect their pay.

At a meeting of the Communist Party's policy-making Central Committee last week, one member cited the spread of worker protest as cause for pessimism about the future of Mr. Gorbachev's economic revival program.

"Mass refusals to work, hunger strikes, unsanctioned meetings and demonstrations and even strikes have become realities of our life," said the committee member, Vladimir I. Melnikov, the party chief in the Komi region.

He said calls for strikes and protests "find fertile soil among the population only because the people today do not have confidence in tomorrow."

STRIKES AS "EXTREME MEASURE"

The new draft law, published last week and subject to approval by the Legislature, says that a trade-union committee "has the right to stop work at an enterprise in an organization when the procedure established by law for considering a labor dispute is being violated, or when management does not live up to an agreement that has been reached."

Mr. Shalayev said strikes should be considered an extreme measure to be applied only in exceptional cases. "We cannot look upon them as a normal phenomenon in our society," he said.

It is not clear whether the new law would, in practice, break the official domination of Soviet trade unions.

HARASSMENT OF WORKERS

The draft gives unions some enhanced powers, like a provision that no workplace can be closed without the assent of the unions. It also assures that unions do not have to be registered with the Government, which seems to assure greater freedom.

But it makes no explicit provision for the creation of genuinely free trade unions that might compete for members with the existing unions.

In the past, workers have been arrested, harassed or committed to psychiatric hospitals for trying to form independent trade unions.

Last year, however, the official press agency Tass published a sympathetic report of bus drivers in Lipetsk, a central Russian city, who rejected their official trade union and organized their own informal group to bargain with management over working conditions and fringe benefits.

NO CHANGE IN UNION STRUCTURE

The new law also envisions no change in the traditional organization of trade unions along industrial lines rather than by specific crafts, which tends to dilute workers' interests and make the unions easier to dominate.

Workers in the Soviet Union generally embrace all the workers in a specific branch of industry, skilled craftsmen and unskilled workers alike.

Thus, while Soviet unions often defend individual workers threatened with layoff or punishment, they rarely oppose management on issues like pay or working conditions.

[From the Washington Post, May 4, 1989]

SOVIETS DRAFT NEW LAWS LETTING UNIONS STRIKE—LABOR CHIDED FOR NEGLECTING WORKERS' RIGHTS

(By David Remnick)

Moscow, May 3.—In an ideological break with the past, the Soviet Union has drafted new laws permitting labor unions greater independence from the government and the right to strike in some instances, according to a leading official.

Stepan Shalayev, an authoritative figure in the Soviet union establishment, said in an interview published today in the daily labor newspaper Trud that unions would also take on a more independent character in the near future as part of President Mikhail Gorbachev's overall plan of economic reform.

Unlike the often adversarial relation between management and labor in the West, Soviet unions have been primarily an arm of the state. Strikes have long been deemed unnecessary in a "workers' state."

While Shalayev said that strikes "should not be considered a normal phenomenon in our society," unions will be permitted to stop work in "exceptional cases." The draft law stipulates that union committees can declare a strike when "management does not live up to an agreement that has been reached."

A variety of strikes and labor protests have swept the country since Gorbachev took power in 1985. In Leningrad last month, militia officers staged a demonstration and collected signatures on a petition demanding the formation of an independent police union, better pay and housing, higher salaries and freedom from the control of local Communist Party officials.

In Chekhov, bus drivers walked off their jobs a year ago to protest their salary levels. Miners, librarians, factory workers and various laborers have also staged strikes. Moscow taxi drivers were planning to strike May 1 but reached a last-minute settlement.

Nationalist in Armenia and Azerbaijan have used citywide work stoppages as a means of putting pressure on local and central authories to meet their demands. At various points this year and last, strikes nearly shut down all work in the Armenian capital, Yerevan, and elsewhere.

Until now, Soviet ideologists have tended to view strikes as a manifestation of capitalism. But now sharp criticism is appearing in the official press about the role of unions since the 1917 Bolshevik revolution.

On May Day, the holiday celebrating the "solidarity of socialist labor," the newspaper Sotsialesticheskaya Industria published an article charging that Soviet labor unions had become "servants of the state" whose main concern was to ensure "tranquillity" rather than "to protect the interest of working people."

The author criticized union leaders for failing to mediate strikes and conduct salary negotiations on behalf of workers, and said that the union leaders have played only a minor role so far in economic change, acting "like grandmothers who make a lot of fuss but whom the family ignores."

In his Trud interview, Shalayev said that in the future "the state should abstain from interference in the activities [of unions] and should assure them legal rights. Unions should not be accountable to state organs in their financial activities and should not operate under their control."

In an article headlined "Strike, Strike, Strike" published recently in the weekly newspaper Ekonomicheskaia Gazeta, two economists argued that new laws must "guarantee that the claims of workers will be considered rather than thrown away scornfully right from the start."

Nevertheless, the article revealed a typically deep anxiety about the "open antagonism" and "unpredictability" of labor strikes.

Strikes, the authors argued, "may slip out of the control not only of the strikers themselves, but also of the authorities. At this point, acts of vandalism, violence and direct violation of civil rights are added to the strike, as well as direct confrontation with the authorities."

Representing a distinctly conservative point of view, the Ekonomicheskaia Gazeta article said, "At the moment, an aura of social challenge is being created around strikes, as if they were the highest manifestation of democracy. And if a strike is condemned, it is treated by its supporters as nothing less than an attack on reform."

TRIBUTE TO JACQUELYN LIEN SMITH

HON. PATRICIA F. SAIKI

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mrs. SAIKI. Mr. Speaker, I rise today to pay tribute to a young woman from my district, Jacquelyn Lien Smith, Jacquelyn was the Hawaii winner in the Veterans of Foreign Wars "Voice of Democracy Essay Contest."

Jacquelyn was born in Saigon, Vietnam and was adopted at age 3 weeks by an American military officer and his wife. She moved to America when she was 7 months old and is now a U.S. citizen. In high school she served as senior class president and hopes to pursue a career in print journalism.

It is with great pleasure that I present her essay on "Preparing for America's Future" to the U.S. House of Representatives.

PREPARING FOR AMERICA'S FUTURE

The United States of America has witnessed a glorious past, and despite the current ethical, social, and economic problems has enjoyed a present filled with unbelievable achievement. Now we must look ahead and being preparing for America's limitless future. We can begin by building bridges of understanding, practicing brotherhood, and spreading goodwill throughout our nation and the world. Restoring ethics and encouraging patriotism while moving towards an interdependent world promises a future worthy of our American heritage.

As we prepare for our future we must remember that much of the success of this nation can be attributed to the moral values of its people. The quality of life we enjoy is intimately tied to the values we hold. If we plan to conquer the ills of our society such as promiscuity and drug abuse, strong morals and high values need to be a guiding force. They need to be taught in America's homes and encouraged in business and government. Our schools need to provide value-teaching along with an education of excellence in academics. The students of today and leaders of tomorrow must have academic and ethical strength to keep our country moving forward. America is producing great masterminds of tomorrow but in order for their leadership to benefit our country, integrity must accompany their intelligence. High values teach respect, honesty, self-discipline, and hard work. Integrity needs to override dishonesty, morality must rise above greed, and self-control must dominate self-indulgence.

It is also of great importance that we install patriotism in the youth of today. Fidelity to the flag in times of war, as well as in peace, and participation in elections, even when it's inconvenient, are all vital to our present and future. We must exercise our right to be involved.

The United States of America is not a country built by men who relied on rulers to care for them but a nation built by people working together and caring for each other. That is the essence of our past and the key to our future. We must continued to care for our fellow man beginning within the family, among friends, and gradually extending our open arms to the community and beyond. It's going the extra mile and reaching out just a little more. It's following that essential rule, and one need not be a Christian to follow it . . . the Golden Rule: "Do unto others as you would have them to do unto you."

A key work to our future is interdependence. The United States of America is still the hope of mankind. The liberty, freedom, and justice inherent in our country is envied the world over. Communist countries are opening their iron curtains and economic interdependence is permitting the exposure of democracy throughout the world. We have already proven that the more we become intertwined economically with other countries, including communist and third world, the less inclined we will be to bomb each other and the more inclined to help each other. So as we approach our future we must embrace interdependence because it is, and will continue to be, the key to world peace and unification. But remember, as peace continues to spread throughout the world, we must keep in mind the immortal words of Theodore Roosevelt, "Speak softly but carry a big stick. . . ." It is of prime importance that we maintain and support a strong defense.

The power of our future lies in the voice of democracy strong leadership, and the American citizen. It is the values of our forefathers that need to be instilled in the youth of today to help maintain the peace, tranquility, and security that we are presently experiencing. With these ideas in mind we can create a future that will allow us to remain the envy of the world. We have learned to meet its challenge; however, we must believe in the resilience of the American dream and embrace the future with confidence. The genius of the United States lies in the fact that we, the people, choose our future. It is not dictated to us, or forced upon us. Our future lies in the hands of the people, and if we choose to create strong, patriotic, and moral families, and if we choose to put value-teaching back into the schools, and if we choose to work towards interdependence, America will continue to be a place we can be proud of, for centuries and centuries to come.

ALASKA SPILL ENERGIZES VIGILANCE IN CALIFORNIA

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. EDWARDS of California. Mr. Speaker, today several members of the California congressional delegation had the opportunity to meet with Secretary of the Interior Manuel Lujan, and the President's Task Force for Offshore Oil Drilling, to discuss the impact of future oil drilling off the California coastline.

The following article, "Alaska Spill Energizes Vigilance in California"—the Los Angeles Times, May 8, 1989, written by our distinguished colleague, Congressman MEL LEVINE, lays out many of the important issues we raised related to increased off-shore oil leasing along the California coastline. I certainly hope the administration's task force will seriously consider these points.

Congressman LEVINE is certainly correct when he asserts, "Those of us who represent California will not stand by quietly. We will not ignore the risks for our coast as the Government did for Alaska." We are dedicated to seeing that an environmental tragedy such as the *Valdez* oilspill does not occur again, and we hope the President's task force will join us in this mission.

The article follows:

[From the Los Angeles Times, May 8, 1989]

ALASKA SPILL ENERGIZES VIGILANCE IN CALIFORNIA

(By Mel Levine)

The oil spill in Prince William Sound, Alaska, is the result of a national energy policy founded on the oil industry's plan to drill everywhere, at any cost. Looking back at history we see that the spill was an inevitable outcome—the worst-case scenario that for two decades the federal government refused to face.

The year was 1973, and despite the resounding opposition of environmental experts, the Secretary of the Interior, Rogers C.B. Morton, dismissed the risk of serious spills.

In a statement supporting construction of a pipeline to bring oil from northern Alaska to the port of Valdez in the south, Morton concluded: "I have carefully reviewed the potential damage to the marine environment that might be caused by tanker activity in Prince William Sound . . . two kinds of potential marine pollution exist: (1) small chronic discharges and (2) accidental dischages of large volumes. Strict regulations are being developed to minimize the pollution threat from both these sources."

We move to the late '70s, and find the federal government unable to heed the lessons of experience. There are two major spills—7 million gallons off the coast of Massachusetts and 10 million gallons in the Gulf of Mexico. The Massachusetts spill results in losses for our fishing industry. In both cases, experts find it virtually impossible to control or clean up the oil slick. Only weather and circumstances specific to each spill spare the nation from catastrophic losses.

Now we've learned that the oil industry failed to fulfill the responsibilities it assumed in its Alaskan operations. The oil companies involved in the Valdez spill neglected to make even a good-faith effort to plan for a spill of the magnitude they now face.

Sadly for the nation, the result of this federal disregard and industrial recklessness is now one of the worst environmental catastrophes in America's history.

In light of this, it was shocking for the American public to learn last month that Ronald Reagan's Administration tried deliberately to cover up information about the risk of spills off California, leaving that coastline in jeopardy as well.

Internal documents obtained through the Freedom of Information Act brought to light the serious risks of a major oil spill, the ineffectiveness of cleanup technology and the danger of other environmental damage that the proposed lease sale off Northern California poses.

More disturbing, these documents revealed a deliberate attempt by the Reagan Administration to whitewash this information.

After it was discovered last year that a devastating report on the environmental impacts of the Northern California sale had been sanitized, an inquiry was launched to find out why. Documents were obtained from four federal agencies, including the Minerals Management Service, which plans, approves and conducts all lease sales for offshore drilling.

Through the inquiry, it was learned that alarming concerns about spills were also deleted from another environmental report on the sale. And a third, previously unreleased report on environmental impacts also was uncovered. It, like the other two, specifically stated that the Minerals Management Service had "downplayed" the likelihood and impacts of a spill. These reports amounted to a damning indictment of the sale's impact on the environment and the probability of a major spill.

Then the smoking gun of the agency whitewash was uncovered. A memo from J. Stevens Griles, the assistant secretary for offshore development, addressed the substantive comments in one of the reports with a barrage of allegations.

His message came through loud and clear: Agency professionals were not to voice their honest opinion if it interfered with his lease sale. Shortly thereafter the most damaging comments in the report were removed.

These revelations have sweeping implications for plans to drill off California.

The agency professionals know about spills, they know about cleanup and they know about probabilities. It happened in Valdez. It could happen off California, perhaps not in the same astronomical size, but certainly in catastrophic impact.

The reports are striking because they appeared to be a premonition of, if not the scope, at least the precise nature of what was to come off the coast of Alaska—the worst oil spill in this nation's history.

Those of us who represent California will not stand by quietly. We will not ignore the risks for our coast, as the government did for Alaska. And we will not allow any agency to whitewash the potential for another ecological disaster.

These documents must serve as the nail in the coffin for the four sales the Minerals Management Service has planned for our coast.

Therefore, a bipartisan coalition of 29 members of Congress is calling on the President to cancel the northern lease sale; cancel or indefinitely postpone the other sales planned for the rest of California's coast, pending complete reevaluation, and overhaul his task force on offshoring drilling to ensure real scientific review.

Now is the time for President Bush to fulfill the promises he made during the campaign to protect California's coast. We look forward to hearing back from him.

CINCO DE MAYO CELEBRATES FREEDOM THAT KNOWS NO NATIONAL BOUNDARIES

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. COLEMAN of Texas. Mr. Speaker, every year millions of people in the United States and Mexico celebrate Cinco de Mayo, which commemorates the victory of less than 5,000 Mexican teenage soldiers over nearly twice as many troops commanded by French invaders.

The Battle of Puebla on May 5, 1862, played an important role in our own history, as the enclosed article by Raoul Lowery Contreras points out. Mexican President Benito Juarez was being supported by President Abraham Lincoln, who feared a Mexico dominated by France, which would in turn provide crucial support and arms shipments through Confederate Texas and the rest of the Southern States. By defeating the French in 1862, Lincoln had a year's delay in French aid to the Confederacy. By the time the French won the second battle of Puebla a year later, it was too late.

Contreras correctly observes that the struggle for freedom knows no border. I would like to place this article in the CONGRESSIONAL RECORD, and I urge my collegues to read it and reflect upon the meaning of Cinco de Mayo and the entertwined destinies of Mexico and the United States.

The article is as follows:

[From the Dallas Morning News, May 5, 1989]

CINCO DE MAYO CELEBRATES FREEDOM

(By Raoul Lowery Contreras)

On the 5th of May 1862, from dawn until dark, 4,850 ill-equipped, untrained teen-age Mexican soldiers thrashed 6,000 invading French soldiers and 2,000 battle-tested Mexican reactionary allies. Only 250 casualties were suffered by the Mexicans, in contrast to one-eighth of French forces killed or wounded. French conquest of Mexico was stopped cold in the mountains east of Mexico City. French dreams of empire would have to wait.

This Battle of Puebal on the fifth of May, Cinco de Mayo, 1862, is a tiny footnote in world history: nevertheless, it is commemorated by 90 million Mexicans, 12½ million Mexican-Americans and millions of our friends and neighbors throughout the United States. Why? It is not Mexican Independence Day.

There are a number of reasons, most of them symbolic Napoleon III's invasion of Mexico was a direct violation of United States policy, the anti-European Monroe Doctrine. Busy with Civil War, President Abraham Lincoln pledged his support to Mexico's first Indian president, Benito Juarez; imposed and arms embargo on Mexico; then allowed President Juarez's agents to buy guns. Buoyed by President Lincoln's support and help, the Mexicans fought with every resource available.

President Lincoln needed a Mexico free of French domination, fearing unlimited arms shipments through a Royal Mexico into Texas to the Confederacy from a sympathetic Napoleon III.

By defeating the French, Mexico handed President Lincoln a year's delay in French aid to the Confederacy through Mexico. During that year (May 1862-April 1863) most of the key Civil War battles were fought, with Union victories in most of them. The Confederacy was effectively defeated during this year. The United States, therefore, owes a debt of gratitude to the 4,850 Mexican soldiers at Puebla.

The French won the second battle of Puebla in 1863, then occupied Mexico City. But the year was lost. And U.S. residents noticed the war and Mexican victory on Cinco de Mayo and headed south to join the fight.

Taking advantage of U.S. sympathies, President Juarez's decree of Aug. 11, 1864, offered foreign volunteers regular Mexican Army pay (10 pesos a month) and land, with no necessity of Mexican citizenship. Thousands of Americans responded and went to Mexico—a few to the French, but most to Juarez. The American Legion of Honor was formed by Americans with their own officers and colors.

U.S. involvement accelerated with the Confederate defeat and Abraham Lincoln's assassination. His successor, President Andrew Johnson, sent Gen. William Sheridan and 100,000 troops to the Texas border, "to protect American interests."

Dashing back and forth across the Rio Grande under the watchful eyes of battle-hardened U.S. soldiers, Mexican guerrillas harassed French and reactionary troops. Openly, Gen. Sheridan "condemned" rifles, artillery and military supplies and ordered them left unguarded in wagons on the border.

Many Frenchmen died, killed with "condemned" rifles and bullets.

Side by side with Mexicans, thousands of Americans fought the French and earned the right to be—and were—present at the final defeat of the French puppet, Emperor Maximilian. As a unit, they marched in President Juarez's Mexico City victory parade on July 8, 1867. The long bloody war was over. The memory of Cinco de Mayo lives.

Thousands of Americans fought in the Mexican Army against the French; to pay us back, Mexicans walked across the border after Pearl Harbor to join in the fight against Japan and Germany.

Recently, a prominent Mexican businessman died peacefully in his sleep in Tijuana. Among his effects, his son found a locked trunk in which was carefully packed a United States Army paratrooper uniform (101st Airborne) and several medals for bravery, including a Silver Star heroically earned in 1944's Battle of the Bulge, Adolf Hitler's final frenzy.

What was a Mexican teen-age volunteer doing in Belgium's Ardennes Forest, fighting in an U.S. uniform in one of the most glorious battles in American history?

The struggle for freedom by Americans and Mexicans knows no border, and that is why we celebrate Cinco. Next time someone asks, what's a Cinco de Mayo parade for, tell them.

A toast. Viva Cinco de Mayo!

TO HONOR JOHN ZANDONELLA ON HIS 60TH BIRTHDAY

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. MILLER of California. Mr. Speaker, I rise today to salute John A. Zandonella of Concord, CA, on the occasion of his 60th birthday.

John Zandonella is one of my district's truly outstanding citizens. His participation in community, as well as professional, organizations has earned him the admiration of his peers and a position of prominence in our community. His many achievements are indicative of his love for hard work and of his personal motto, "Yes we can, no problem." John's tireless commitment and service to his community are an inspiration to all of us who know him.

John's activities are far from limited to the political arena where he has given countless volunteer hours on behalf of local candidates. The Concord American Little League, of which John was president for 5 years, recognized his contributions to our youth by dedicating the junior field to him. Contra Costa County

has also benefited greatly from his leadership and participation in the Elks Lodge, the Veterans of Foreign Wars, the Chamber of Commerce, the Rotary Club, the Sons of Italy, the Italian Catholic Federation and the Knights of Columbus.

Aside from his civic involvement, John has achieved an impressive degree of professional success. After serving his country during the Korean conflict, John attended the School of Stenographic Arts in San Francisco and became a certified shorthand reporter. While working as a court reporter for the Contra Costa Municipal Court, and eventually establishing a successful reporting service in Concord, John was active in the California Court Reporter's Association, serving as an officer for 9 years, and the National Shorthand Reporter's Association.

John's life, however, is not all work. In between his work and his many meetings, he and Fosca, his wife of over 37 years, have raised four children and are now enjoying seven grandchildren.

A hardworking, dedicated man like John Zandonella is truly an asset to any community, and we in Contra Costa County count ourselves fortunate to have him as a member of ours.

DAVIS BACON REFORM

HON. TIM VALENTINE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. VALENTINE. Mr. Speaker, I would like to take this opportunity to offer my support of the Davis-Bacon Reform Act, which was introduced on May 4 by my colleagues CHARLES STENHOLM and ARLAN STANGELAND.

This measure accomplishes three major goals. It restores the original intent to an outdated law. It eliminates the antismall business bias of the present law. And it saves the Federal Government close to $6 billion over a 5-year period.

The law was enacted during the Depression to prevent unscrupulous contractors from hiring gangs of cheap labor and traveling around the country to undercut local workers from getting Federal construction projects.

But the intent of the law has been twisted today. Originally set to maintain local labor standards, prevailing rates are now often set far above local averages, which discourages small and minority-owned firms from competing for Federal projects. The reform bill offered today would codify 1982 Department of Labor regulations improving the accuracy of prevailing wage determinations.

Another deterrent for small and minority-owned businesses is the mountain of paper that Davis-Bacon requires. Employers are required to submit complete, certified payroll records to the Department of Labor every week. Paperwork requirements have cost contractors, and taxpayers, $100 million a year, according to the Department of Labor, and $50 million a year, according to the Congressional Budget Office.

The reform proposal would reduce the paperwork requirement from weekly to quarterly. It is important to note that this change would not prevent contractor from keeping accurate payroll records, nor would it prevent the Government from inspecting them. However, it would allow smaller firms, which did not have the ability to complete this paperwork requirement, to compete for Government work.

The reform also exempts businesses from complying with Davis-Bacon standards when contracts are under $250,000, about 7 percent of the current dollar volume. This would save the Federal Government about $1.3 billion a year in budget authority, according to CBO estimates. The measure also prohibits the splitting up of large contracts when the intent is to avoid compliance with the act.

I urge my colleagues to support this measure to restore Davis-Bacon to its original intent, to allow small businesses a chance to compete for Government contracts, and to help reduce the Federal deficit.

TRIBUTE TO THE BEREAN INSTITUTE, 90 YEARS OF SERVICE TO THE ECONOMICALLY DISADVANTAGED

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. GRAY. Mr. Speaker, I rise today to commemorate the Berean Institute, an institution that, for 90 years has contributed immeasurably to the Philadelphia community by providing education and training to disadvantaged people.

Since 1899, the Institute has been a community leader in the effort to help those individuals deprived of advantages most people take for granted. Just before the turn of the century, Dr. Matthew Anderson's innovative idea of creating a school to help former slaves became a reality. The freed slaves inundating the Philadelphia area now had a place to which they could turn to help make better lives for themselves. The Berean Manual Training and Industrial School, as the Institute was first called, gave them an opportunity to learn to learn, to develop skills and enter a trade.

Ninety years later, the Berean Institute still carries out the goals of its founder. Millinery apprenticeships may have been replaced by computer programming courses, but the function and the result are still the same; the Institute is training those who have not found the right niche in our educational system and do not have the economic means to make their own. Today, students graduate from Berean with a Business or Technical Associate Specialized Degree in such areas as business science, secretarial training, and computer science. Thousands of graduates are active members of society, contributing to all sectors of the community. Supported by prominent area businesses, the community recognizes the invaluable role of the Berean Institute.

Mr. Speaker, the problems of the underprivileged in our country are still great. Thankfully, the Berean Institute has been addressing the need for vocational education in the Philadelphia area since before the turn of the century. I am proud to stand today in recognition of their past achievements and their continued efforts to train those whose skills have not been recognized.

COMMENDING THE YOUNG MEN AND WOMEN OF EXETER AREA HIGH SCHOOL

HON. ROBERT C. SMITH

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. SMITH of New Hampshire. Mr. Speaker. This week, in our Nation's Capital, over 950 young people from 44 States have gathered to participate in the National Bicentennial Competition on the Constitution and Bill of Rights. I am proud to announce that a team from Exeter Area High School in my congressional district is representing New Hampshire. These young scholars have worked hard to reach the national finals by winning the district and the State competitions and I would like to wish them the best as they compete for the national title.

The members of the New Hampshire team are: Sandra Burbank, Nicole Clement, Jennifer Dion, Kristen Dobson, Paul Galli, Margaretta Gillis, Eric Gregoire, Steve Hitzrot, Ramona Johnson, Aaron Kennedy, Fiona Kenny, Amy Palmer, Tammy Pesik, Katherine Pierce, Keith Plaster, Karrie Rinder, Katrin Schneck, Stephanie Sera, Scott Sinclair, Alexander Sutherland, Diana Swart, Anna Marie Van der Kwakk, Christopher Wight, and Melinda Zych.

Along with the students, their teacher, Christine M. St. Jean, deserves much of the credit for the success of the team to date. As well, Albert Britton, the district coordinator, and Carter B. Hart, Jr., the State coordinator, have worked hard to help their team reach the finals.

The National Bicentennial Competition on the Constitution and Bill of Rights is the most extensive educational program in the country developed to educate young people about the Constitution and Bill of Rights. With the support of Congress, the active involvement of Representatives and Senators, and the efforts of thousands of civic and education leaders, the program achievements over the past two years have been dramatic: 1,022,320 students have studied the curriculum; 14,381 teachers are teaching the course; 420 congressional districts and the 5 territories have fully functioning programs; 393 U.S. Representatives are participating in their districts; and 92 U.S. Senators are supporting the program in their States.

The program provides students with a specially designed 6-week course of study designed to provide upper elementary, middle and high school students with a fundamental understanding of the Constitution and Bill of Rights and the principles and values they embody. Students complete the instructional portion of the program with a test designed to measure their "constitutional literacy" and receive a certificate of achievement signed by their U.S. Representative.

High School participants then enter a nationwide series of competitions at the con-

gressional district, State and national levels. Students testify before a panel of experts at a simulated congressional hearing designed to measure understanding and capacity to apply principles being learned to historical and contemporary events. Each year, the National Bicentennial Competition culminates in 3 days of intensive competition among classes from almost every State in the Union.

Mr. Speaker, the need to educate our young people about the Constitution and Bill of Rights is well documented. Studies have found that only slightly more than half of the students surveyed were able to identify the original purpose of the Constitution. Nearly half thought the President could appoint Members of Congress and one-third thought he could adjourn Congress when he saw fit. Indeed, another survey conducted on behalf of the Hearst Corp. suggested that over half of Americans thought that the Marxist credo "from each according to his ability, to each according to his need" can be found in the Constitution. Most alarming was the finding that a greater proportion of today's students display antidemocratic attitudes than did students in 1952.

The benefits of this educational program are clear and it is making a difference among the over 1 million students who have studied the program. A recent study has shown that the National Bicentennial Competition Program has increased the constitutional literacy of our young citizens. Students in classrooms all over the country are debating the issues that concerned the Founding Fathers and demonstrating how the Constitution's basic principles apply to them today with an extraordinary level of understanding.

The preservation of our freedom and our Nation depends upon our young people, the decisionmakers of tomorrow. We have much to gain from educating them about the Constitution, the Congress, and the continuing responsibilities of citizenship. I am proud to have students from my congressional district in the national finals and I commend each of them and their teacher for their hard work.

URANIUM ENRICHMENT REORGANIZATION AND TAXPAYER PROTECTION ACT

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ECKART. Mr. Speaker, the civilian uranium enrichment program, administered by the U.S. Department of Energy, has run into a host of problems. As originally envisioned, the program was supposed to operate without any direct or indirect taxpayer subsidy. Under section 161v. of the Atomic Energy Act, and congressionally approved criteria adopted thereunder, it was supposed to recover all its costs, including depreciation expenses, and a return on investment.

Unfortunately, the enrichment program has failed to recover even its costs. According to the General Accounting Office, as of 2 years ago, the total amount of unrecovered costs totaled $8.8 billion. While some persist in disputing this amount, the methodology under which it is calculated has been publicly accepted by the Office of Management and Budget and by DOE itself, and the amount in question is clearly very substantial. The $8.8 billion in unrecovered costs to date, almost all of which DOE now seeks to write off, is a measure of the taxpayer subsidy for the program thus far, notwithstanding the express requirement of section 161v. that these costs be recovered.

In addition, although DOE admits that the costs of decomissioning and remedial action are a legitimate expense of the uranium enrichment program, no money has yet been recovered from civilian customers for these purposes. This multibillion-dollar unfunded liability is another taxpayer subsidy of the program. In the meantime, DOE has issued new enrichment contracts purporting to guarantee a very low ceiling price for uranium enrichment services. DOE says that it must take such actions to meet competition, but it would appear that the agency instead is pursuing a monopolistic goal of maximizing market share regardless of the drain on taxpayers, rather than the lawfully stated goal of cost recovery. The GAO has indicated that these new contracts are inconsistent with section 161v.

All now seems to agree that the DOE program should be operated on a more business-like basis and in recognition of the competitive nature of the market, and that DOE's civilian customers should bear their fair share of decomissioning costs.

I am therefore pleased to introduce, in conjunction with Congressman GEORGE MILLER of California, the Uranium Enrichment Reorganization and Taxpayer Protection Act. This bill, when enacted into law, will reorganize the enrichment program with a clear direction both to protect taxpayer interests and to stop reliance on continued and unnecessary taxpayer subsidization of the DOE civilian uranium enrichment program. Adoption of our bill will prevent further taxpayer losses and further deterioration in the ability of the DOE enrichment program to function as a true competitive business. I urge my colleagues' support.

THE CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWS

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mrs. BOXER. Mr. Speaker, first, let me commend my colleagues Congressman KOSTMAYER and Congressman JOHN MILLER for organizing this very important effort to focus on the plight of prisoners of conscience and other persons who are seeking freedom and emigration from the Soviet Union. There is no human right more precious than freedom and we in Congress have an obligation to speak out on behalf of those who are oppressed by their governments.

Soviet emigration policies have long been a sore point in United States-Soviet relations. Despite our calls for the contrary, the emigration of Soviet Jews has always been erratic and permission to leave the Soviet Union has been awarded on a seemingly arbitrary basis.

More than 2,000 Soviet Jews, including family members, are currently being denied exit visas because they are in possession of state secrets. Medical emergencies among Soviet Jews are not cause for a more swift application and visa allocation process. And tragically, families who apply to emigrate are sometimes not allowed to leave the country together. There are now 20 family reunification cases pending in the Soviet Union involving 48 separate individuals.

In addition, Soviet Jews who apply for exit visas face incredible obstacles and severe penalties. It is unconscionable that Jews who wish to leave the Soviet Union should lose their jobs and their standing with the community, should be harrassed by Soviet agents, and should face the possibility of incarceration on trumped-up charges.

For these reasons, I think we must view current emigration levels with skepticism. While the overall numbers have increased, from 896 Soviet Jews in 1984 to 18,965 in 1988, thousands of refuseniks remain, and many of them are long-term refuseniks.

The Union of Councils for Soviet Jews estimates that there are at least 3,000 refuseniks and we can only guess how many Soviet Jews are considering departure under the present favorable climate. It is our responsibility to ensure that these Jews secure their freedom.

As part of that effort, I would like to bring just one of these refusenik cases to the attention of the House today.

Boris Kelman, his wife Alla, and their two sons Efim and Maxim, are residents of Leningrad. They first applied to emigrate from the Soviet Union in 1979 and were refused that same year for state security reasons.

A structural design engineer by trade, Boris Kelman quit his job with a research institute 2 years prior to his first application for an exit visa. Thus, he has not been privy to state secrets for over 10 years. However, since applying for permission to leave the Soviet Union, Boris has been unable to work in his chosen profession. Boris currently does unskilled maintenance work on heating and ventilation systems.

Alla Kelman has also suffered as a result of declaring her wish to leave the Soviet Union. Alla, a pediatrician, was out of work for 3 years after their first refusal. She now has a job in a state clinic but is forced to make house calls and do other odd jobs shunned by her coworkers.

Despite these hardships, the Kelman family continues to hope and plan for the day when they will receive permission to emigrate. In the meantime, they have found great strength and solace within the study and practice of Judaism.

Boris acts as a spokesman for a large circle of Leningrad refuseniks and Alla coordinates medical services for much of this community. The entire Kelman family maintains a kosher home, studies Hebrew and Judaica, and celebrates major Jewish holidays and events. It should be noted that there is a great deal of risk involved in the Kelman family's active participation in Jewish culture.

It is now 10 years since the Kelman family first applied for permission to emigrate. They

have recently endured another setback. In December, they were once again refused an exit visa. How long will the Kelman's have to wait?

Please join me in appealing to the Soviet government for a successful and prompt resolution to the Kelman family's case. In addition, please also join me in calling for the reform of the Soviet emigration process so that the fundamental human right of any individual to leave any country, including their own, is respected and upheld.

NATIONAL SCHOOL SAFETY PATROL DAY

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. KANJORSKI. Mr. Speaker, each school day more than 1 million young volunteers across the Nation faithfully serve on the school safety patrol and assist their fellow classmates in route to and from school. They are unnamed, unsung, and infrequently acknowledged heroes, who are chosen for their leadership and dependability as models of good conduct.

We affectionately refer to them as crossing guards and count on them in fair and foul weather to direct traffic and to help other students develop sound and safe habits in traveling to school. They work closely with school administrators, local police departments, the American Automobile Association (AAA), and their teachers.

To honor this army of distinguished and caring young adults, I am introducing today a resolution to designate September 14, 1989 as National School Safety Patrol Day. As a former safety patrol guard myself, I feel especially privileged to rise today with this resolution as a tribute to my fellow patrol members and a salute to their excellence. And as a parent, I have watched with great admiration as many fine young adults perform the duties of this job.

Mr. Speaker, over the past several months, we have frequently heard President Bush speak of a thousand points of light, and I am pleased to report that my resolution pays tribute to the fine citizenship and exemplary service of a million points of light.

Since the inception of the School Safety Patrol Program in 1920, members have supervised traffic, provided timely information to police officers, and assisted school bus drivers by educating student passengers about appropriate safety rules. Patrol members serve daily as guardian, as friend, and as substitute parent.

My resolution honors both divisions of the school safety patrol. The AAA administers the student program, in which outstanding students are selected by their teachers to assist schoolmates in traveling between home and school. In addition, local police departments oversee the adult program in which concerned parents and neighbors promote safety.

Many legislative initiatives we pursue in this body, Mr. Speaker, result from an idea or a suggestion offered by one of our constituents. My resolution to proclaim National School Safety Patrol Day is no exception. A member of the Wyoming Area School Board for 4 years, and the father of three daughters, first approached me with this idea some time ago. With his tenure on the local school board, he has seen firsthand the importance and value of our safety patrol.

Mr. Speaker, I share the conviction that these volunteers deserve recognition and honor, both as an expression of support for their individual and collective efforts and as a means of raising public awareness about the program.

CONGRESSIONAL SALUTE TO THE BOROUGH OF WEST PATERSON, NJ, ON ITS 75TH ANNIVERSARY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ROE. Mr. Speaker, it is with the greatest pride that I rise today to salute an outstanding community in my Eighth Congressional District of New Jersey which, in 1989, is celebrating a truly historic occasion. I am speaking of the Borough of West Paterson, NJ, which in 1989 is celebrating the 75th anniversary parade.

This observance, which is a testament to the strength and perseverance of the fine people who established this outstanding municipality three-quarters of a century ago, and who have made West Paterson a thriving community at the hub of the bustling metropolitan northern New Jersey area, will be celebrated with a gala parade on Saturday, May 13, 1989.

I would like to take this opportunity to send an especially warm greeting of congratulations to West Paterson's distinguished town fathers who have done so much to make West Paterson the great community it is today—Mayor Frank Gambatese and borough council members Albert Kahwaty, James D'Errico, Maria E. LoRe, Frank Zaccaria, Aldo Napoli, and James R. DeSantis. I would also like to extend congratulations to Michael J. Muccio, parade chairman, for his vigorous efforts in putting this grand celebration together.

Mr. Speaker, the history of West Paterson is a rich and varied one. In order to best convey the spirit of this multifaceted, closely knit community, I would like to quote from the official history as written in the West Paterson 75th anniversary booklet:

The name of the borough, of course, comes from its location near the City of Paterson. The City of Paterson, however, was named for William Paterson, who had an illustrious record of service for the state and nation.

Taxation without representation and services, a battle cry of the American colonists in their struggle with Great Britain, was the battle cry of the residents of the West Park Section of Little Falls Township.

West Park residents felt they were 'assessed to the limit' and were receiving 'no benefits' while their township neighbors 'received all the cream' and 'West Park paid for it.'

On November 19, 1912, a small group of West Park residents met to form an organization to fight for the creation of a borough. These men elected Morris Kammelhor chairman and on January 7, 1913, formally moved that the proposed borough be named the Borough of West Paterson.

The fight for creation of the borough received considerable support from State Senator Peter J. McGinnis, who in March 1914 introduced legislation providing for creation of the borough and on March 25, 1914, 'An Act to incorporate the Borough of West Paterson' received final approval and was signed by Governor Fielder.

The election for the creation of the borough was held on May 1, 1914. Newspaper reports of the time predicted a one-sided victory and it was taken for granted that the borough would be voted for. When the polls closed at 9 p.m. on May 1, 1914, the voters of the district had voted 194 to 20 to approve the new borough.

Mr. Speaker, at the same time that the Borough of West Paterson was being established, so too was a vital part of that fledgling municipality—the West Paterson Fire Department. Today, recognized as one of the finest departments of its kind, the West Paterson Fire Department is comprised of West Paterson Volunteer Fire Co. No. 1, established in 1909; the Passaic Valley Volunteer Hose Co., first organized in 1912, and the Rifle Camp Volunteer Fire Co. No. 3, established in 1922.

From humble beginnings with equipment such as two-wheel hose carts drawn by hand, these units have combined to provide West Paterson and its neighbors with a tested and effective modern firefighting force that would be a credit to any municipality. I know that the West Paterson Fire Department is a great credit to its dedicated fire chief, Frank Lijoi, and an enormous source of pride to him, as it is to all West Paterson residents.

Mr. Speaker, West Paterson is, indeed, a great American community in every sense of the word, exemplifying the cohesiveness and the strong family and community values that serve as the fabric that keeps the American people and our Nation woven together.

Mr. Speaker, I invite you and your colleagues to join me in saluting a truly outstanding American community celebrating its 75th anniversary, the great Borough of West Paterson, NJ.

THE 100TH ANNIVERSARY OF THE JOURNAL-NEWS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. GILMAN. Mr. Speaker, we are celebrating a number of important anniversaries this year. Recently, we marked the 200th anniversary of the First Congress. Just a few weeks ago, President Bush headed the ceremonies commemorating the 200th anniversary of the inauguration of George Washington as our first President.

This month, residents of Rockland County, NY, will be commemorating yet another anniversary, one significant to the residents of the mid-Hudson region.

One hundred years ago, Gannett's daily newspaper, the Journal-News began publish-

ing. Even in those formative days, the Journal-News early became the premier newspaper of Rockland County, a position it holds until this very day.

Mr. Speaker, we in Congress are fully aware that a newspaper is more than just a conduit of the news. It is a vital, active part of any community and part of the glue that binds the community together. It is a font of services.

On May 6, 1889, Adam C. Haesselbarth began publishing what was then called the Evening Journal on a 5-day-a-week basis. The world of which Haesselbarth reported to his Rockland County readers was quite different than the world today. Those early readers may well have read of the opening of Oklahoma to white settlers for the first time. The frontier was still a part of American life in 1889, and those early readers may well have read lurid tales of Indian attacks and cattle stampedes.

During its first decade, the Evening Journal reported the growth of our Nation. Immigration to our shores hit an all time peak during that era, and America first became a world power as a result of the Spanish-American War. The Evening Journal was right there recording all the developments of the "gay nineties", and in 1895 began publishing a Saturday edition.

The news from Europe concerned tales of Kings, Queens and Princes, for the United States was still one of the few nations with a republican form of government. With the turn of the century came new developments in the field of journalism—the first comic strips, the first crossword puzzles, and extensive sports reporting. The Journal was there, in the forefront of it all.

Early readers of the Journal may have read of early experiments with gasoline-powered vehicles, but any stories of flight through the air or the transmission of voices and pictures over great distances would have been dismissed as pure fantasy during the first 10 years of the Evening Journal.

As our Nation and our region have grown over the past 100 years, so too has the Evening Journal. In 1932, the newspaper merged with the 17-year-old Nyack Daily News, and became the Journal-News, which we read and enjoy to this day.

For the past quarter century, since 1964, the Journal-News has been an integral part of the Gannett group of newspapers. As a part of the Nation's largest—and most respected—newspaper chain, Rockland readers have come to expect the finest in world and national coverage, as well as being kept abreast in a fair, accurate, and in-depth manner, of happenings at home.

On a personal level, I can refer to the fact that the Journal-News regularly sponsored "candidates nights" open to the public during campaign season, and in many other ways strives to bring our Government closer to the people of Rockland County.

Since 1972, the Journal-News has published 7 days a week. The circulation for the weekday paper is about 40,000; circulation on Sundays reaches 50,000.

In 100 years, the Journal-News has grown side-by-side with Rockland County. From a sleepy farmland to bustling suburbia, Rockland County has grown by leaps and bounds during the past 100 years.

And the Journal-News was there recording it all.

Mr. Speaker, I invite our colleagues to join with me in wishing Paul Janensch, the editor and general manager of the Journal-News, our heartiest congratulations on this milestone occasion and to extend our best wishes to the many reporters, printers, editors, delivery persons, advertising staff, and many others who toil to make the Journal-News the finest newspaper possible.

FARM CROP ACREAGE BASE FLEXIBILITY ACT OF 1989

HON. PAT ROBERTS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ROBERTS. Mr. Speaker, today I am introducing the Farm Crop Acreage Base Flexibility Act of 1989 with my colleague Mr. STENHOLM of Texas.

The current program's acreage base system virtually prohibits producers from making rational marketing decisions, locking them into management decisions made 5 to 10 years old. In addition, the lack of program crop flexibility prevents use of soil husbandry techniques such as crop rotation, integrated pest control and crop diversification—all recognized as valuable conservation, environmental and economic management tools.

This bill would require the Secretary of Agriculture to use the authority granted in the 1985 Food Security Act to permit producers to make adjustments in their program crop bases in an offsetting manner, and would raise the act's 10 percent to 20 percent of the farm acreage base.

In addition, I would encourage those interested in other crops, such as sunflowers, soybeans, alfalfa, etc., to study their farmers flexibility needs. A viable, stable agriculture economy depends on Farm Country's ability to use common sense management and marketing strategies independent of program benefits. The net result would be a true market oriented agriculture at less long-term cost to taxpayers.

GOLDEN ANNIVERSARY OF PIEDMONT NATIONAL WILDLIFE REFUGE

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ROWLAND of Georgia. Mr. Speaker, the Piedmont National Wildlife Refuge in Jones and Jasper Counties, GA, is celebrating its golden anniversary this year.

President Franklin D. Roosevelt signed the executive order creating this beautiful preserve for wildlife resources in middle Georgia 50 years ago. To commemorate the event, an open house is scheduled at the refuge on Saturday, May 13, featuring a variety of exhibits, demonstrations and programs of interest for young people and adults alike.

The people of Jones and Jasper Counties are proud of the Piedmont Wildlife Refuge and, for the most part, are supportive of the National Wildlife Refuge System.

This continues to be true even though the taxpayers of Jones and Jasper Counties have been compeled to subsidize the operation of the Piedmont Refuge in recent years. Although I do not wish to put a damper on an otherwise happy occasion, it's a fact that local jurisdictions where wildlife refuges are located have financially suffered from the shortfall in the National Wildlife Refuge Revenue Sharing Fund.

The fund is fed from refuge earnings. Shortfalls are supposed to be covered with appropriations from the general treasury. The purpose is to compensate counties for the property tax revenue they lose on the tax-exempt national wildlife refuges. Due to budget cuts, however, the affected counties have been receiving substantially less than the amount of tax revenue they have been losing. Based on current estimates, they expect to experience a 40 percent shortfall during the next fiscal year.

This violates an historic Federal commitment to provide compensation in full. Congress appropriated a $1 million increase to the fund last year, which helps. But $16.9 million is needed to bring it up to 100 percent.

I recognize the full amount may be difficult to obtain this year. But in the interest of fair play, it's time for the administration and Congress to approve much more substantial increases to the fund so the Federal Government can live up to its commitment as soon as possible.

In the meantime, I congratulate everyone connected with the Piedmont Wildlife Refuge for the outstanding job they are doing in managing our wildlife and conserving our natural resources. The work they are doing is becoming increasingly important for our future.

HUMAN RIGHTS VIOLATIONS IN IRAN

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. BLILEY. Mr. Speaker, I would like to bring to the attention of my colleagues the human rights violations that are taking place in Iran. The cease-fire between Iran and Iraq ending the Gulf war was agreed to almost 1 year ago. Since that time, the people of Iran have not faced peace and the rebuilding of their lives and society, but growing human rights violations as their friends and family members have been imprisoned, tortured, and executed. The current surge of executions began soon after the cease-fire was agreed upon. Since the end of July 1988, there have been reportedly, over 1,000 executions of political prisoners. Relatives have heard only rumors about the fate of their loved ones. Many of those who have been put to death were held in prison longer than the sentence mandated or were re-arrested after having been released, then forced to death. These man and woman who have been executed range from secondary school students, arrested in 1981 and 1982, to doctors and social scientists. Many of these prisoners have been

held since the early 1980's though the sentences were only 6 months long. It has further been confirmed that beatings are used extensively as a judicial punishment and that there have been 21 cases of amputation used judicially for repeated theft. Prisoners are often held without charge or trial and young people are targeted by revolutionary guards who perform arbitrary searches for those under suspicion for political unrest.

There is further evidence that trials are both unfair and brief, allowing the accused no defense counsel, no witnesses and no rights of appeal against conviction or sentence. Beyond this, the Iranian authorities have denied any mass shootings, hangings, and burials though even President Sayed Ali Khamenei has countered these denials with public statements confirming such reports.

We must not permit violations of the fundamental rights for human beings in any country to persist. The loss of freedoms replaced by persecution and oppression are among the most tragic and heinous crimes the international community faces today. Though political ideals may conflict from one country to the next, we must strive to fight any violations of the fundamental human rights. Mr. Speaker, it is our responsibility as the leader of the free world to lead the battle for human rights in all nations.

HONORING LOUIS AND DOROTHY FOX

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. CARDIN. Mr. Speaker, I would like to bring to the attention of my colleagues two very special people. Louis and Dorothy Fox have dedicated themselves to the State of Israel and the Jewish community.

Louis Fox has been a first in many positions. He was the first Israel bond chairman for communal resources, the first chairman of the Baltimore Committee for Soviet Jewry, first president of the Jewish Community Center, and founder of the Jewish Historical Society of Maryland.

Dorothy Fox has supported Lou in all of these and many other activities in the Baltimore Jewish community. Dorothy, a member of ORT, has given generously of her time, money and energy.

Louis and Dorothy Fox will be honored on Wednesday, May 9. That night they will be presented with the Shield of Israel Leadership Award by the State of Israel Bonds. I join with many in the Baltimore Jewish community in offering my congratulations to Dorothy and Louis Fox, and offer my thanks and appreciation for all that they have done.

ALTERNATIVE FUELS USE AN ENVIRONMENTAL IMPERATIVE

HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ANDREWS. Mr. Speaker, when we think of issues of importance to us today several areas come to mind: the budget deficit, the trade deficit, the savings and loans situation. There is one issue, though, that eclipses all others in its long-term significance to all of us. It is the concern about our environment. The air we breath is becoming increasingly contaminated, the greenhouse effect endangers our global climate, and the acid rain problem is not being adequately addressed. We are literally destroying the planet on which we live for our children and our grandchildren. It is imperative that we do a better job of addressing our environmental problems.

To this end today I am introducing along with Congressman DOWNEY the Alternative Fuels Incentive Act of 1989. We are glad to be joined by many of our colleagues among whom are members of both parties from many different regions of the country.

The Alternative Fuels Incentive Act of 1989 will provide for tax incentives to encourage the use of clean burning alternative fuels in vehicles. The switch to such fuels is absolutely essential.

A look at the urban smog problem provides a graphic example. Ozone is the main ingredient in the haze that settles on most of our cities. The Clean Air Act provides for ozone attainment standards, and almost without exception, our major urban areas do not meet these standards.

The list of these nonattainment areas brings the problem home: New York, Chicago, Los Angeles, Houston, Boston, Washington, DC, Denver, Miami, Dallas, San Francisco, Cleveland, and on and on.

Nearly half of the ozone pollution problem in many areas can be attributed to vehicle emissions from the transportation sector. Reactive hydrocarbons and nitrogen oxides [NO_x] are the two primary ingredients leading to ozone pollution, and the transportation sector accounts for about 40 percent of reactive hydrocarbons and 48 percent of NO_x in urban areas. In this way reducing vehicle emissions can be a giant step in addressing the urban smog problem.

One very effective way to accomplish this goal is to move toward greater use of vehicle fuels which burn cleaner than traditional diesel and gasoline. This is the aim of the Alternative Fuels Incentive Act of 1989. This bill was introduced last in draft form and we have since had a chance to work with environmental, transportation, and energy groups and State and local officials to effect improvements.

The bill provides the needed push to start a large scale clean-burning alternative fuels movement in this country; "clean burning" is defined as natural gas, liquified petroleum gas, or a fuel which is at least 85 percent methanol, ethanol, other alcohol, or ether.

Specifically it would provide:

A 20-percent tax credit for equipment to convert a vehicle so that it may run on a clean-burning fuel;

A 20-percent credit for refueling station equipment directly related to delivering a clean-burning fuel into the fuel tank of a vehicle—including tanks for liquid fuels and compressor stations for natural gas;

A 20-percent credit for the fuel system of a new vehicle produced to run only on a clean-burning fuel; and

Credit equivalent payments to State and local agencies so that they may take advantage of the credit.

The initial effect of this legislation will be to encourage private and public fleet owners to convert their vehicles to run on an alternative fuel, and it would also encourage the development of a badly needed alternative fuels infrastructure in this country.

The benefits of using alternative fuels to combat ozone pollution are clear. Running a vehicle on natural gas, for example, can reduce reactive hydrocarbon emissions by up to 85 percent and NO_x emissions by 65 percent. Similarly, methanol powered vehicles have shown significantly reduced emission levels of these compounds.

Alternative fuels have other environmental benefits as well. They can be an effective tool against acid rain. Many of the above agents which cause ozone pollution and which are reduced by clean-burning fuels also contribute to the acid rain problem.

In addition, alternative fuels can help in addressing the global warming problem. Increased levels of carbon dioxide [CO_2] are a primary cause of the greenhouse effect and vehicles which run on cleaner burning fuels emit significantly less CO_2.

We have the technology to make alternative fuels a reality today. Only the initial cost of converting to a system of alternative fuels and natural inertia are holding us back.

For example, the cost of converting a vehicle to run on natural gas can be over $1,000. The cost of installing a compressor station for the refueling of natural gas vehicles can run into the hundreds of thousands of dollars. These costs are enormous hurdles to the development of an alternative fuels system.

It is time the Federal Government acknowledges the value of alternative fuels and encourages their use. They are an effective tool in fighting urban smog, acid rain, and global warming—some of the most serious environmental problems we face. The Alternative Fuels Incentive Act of 1989 will provide the initial support needed to start a large scale alternative vehicle fuels movement in the United States.

PEPPER-ROYBAL LONG-TERM HOME CARE BILL

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ROYBAL. Mr. Speaker, less than 1 year ago, the House of Representatives was poised on the edge of an historic opportunity. On the floor of the House was the Pepper-

Roybal long-term home care bill, H.R. 3436. Sadly, the opportunity was lost as the House chose not to take an historic first step into long-term care protection and rejected the bill by rejecting the rule. Senator PEPPER and I have again introduced the Long Term Home Care Act (H.R. 2263) in an effort to once again help spur the debate over long-term care.

Though the long-term home care bill is clearly not the full answer to providing full long-term care protection for Americans of all ages and incomes, it is an important step in the right direction. Both Senator PEPPER and I will be making further proposals with respect to addressing the full long-term care problem, including nursing home and other types of care, in the near future.

The signals which we want to send with the long-term home care bill are very straightforward. First, whatever we do with respect to long-term care must include home care. People needing long-term care and the families that care for them want to make the home the cornerstone of our long-term care policy. Second, the families in need of long-term care are not just elderly but can be Americans of any age and, as a result, any long-term care bill must protect both the elderly and the non-elderly. Third, these families want to be assured that the services they receive, at a time at which they are most vulnerable, are of high quality. This bill's quality assurance provisions, as did the nursing home and home health provision of OBRA 1987, send a clear signal that strong quality assurance protections must be part of any long-term care bill.

Fourth, the Long-Term Home Care Act's financing mechanism, removing the wage cap on the Medicare payroll tax, must be used for long-term care. One result of last year's debate and subsequent introduction of a large number of long-term care bills was an acceptance that this financing mechanism ought to be reserved for long-term care. Finally, we must face the issue of cost—both short and long term—in whatever long-term care legislation we enact. The Pepper-Roybal long-term home care bill controls costs explicitly and provides complete assurance that the bill will not add to the federal deficit and will not spend regular Medicare funds.

Even if we were fortunate enough to have passed this bill last year or were to pass H.R. 2263 this year, a large amount of the long-term care solution remains to be found. On this point, the Members can be assured that Senator PEPPER and I will continue our fight for long-term care protection as we continue our battle to ensure that all Americans have affordable access to quality health and long-term care.

INTRODUCTION OF THE RAPE PREVENTION ACT OF 1989

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. LEWIS of Georgia. Mr. Speaker, today, I am reintroducing legislation to provide funds for the purpose of establishing and operating community-based projects to combat rape and other forms of sexual assualt. I feel compelled to introduce this legislation as an immediate response to the crisis in my district. The city of Atlanta is one of the leading cities in the number of reported incidences of rape.

The most recent FBI crime statistics indicate that 77,700 incidences of rape were reported to police officials in 1987. Unfortunately, this figure does not indicate the true number of rapes committed. Rather, the number of incidences in 1987 was closer to 148,440—twice the number of those reported—according to a survey conducted by the Bureau of Justice Statistics.

Experts disagree on methods of research, statistics, and definitions in determining the incidence of rape in the United States, but one point is indisputable: The epidemic is real and must be countered with real measures.

This legislation calls for the authorization of $5 million per year for 5 years. Federal funds would pay for 50 percent of the grant amount requested by the applicant.

The need for this legislation is clear. Rape is largely invisible and misunderstood. Misinformation and misunderstanding perpetuate myths that incorrectly place the blame on the victim and incorrectly depict the offender. Knowledge reduces fear and vulnerability; education increases power and control.

Mr. Speaker, I urge my colleagues to support this legislation.

THE 75TH ANNIVERSARY OF THE SMITH-LEVER ACT

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. RAY. Mr. Speaker, today is the 75th anniversary of the Smith-Lever Act of May 8, 1914. This legislation provided for the cooperative administration of extension work in local communities through a formal relationship between State agricultural colleges and the U.S. Department of Agriculture. The Department of Agriculture allotted monetary grants to each State in proportion to its rural population.

Each State has at least one land-grant institution. Enrollments vary from less than 1,000 to over 10,000 students. These institutions follow broad policies set by Federal law but are managed and largely supported by the individual State. About 40 percent of their funding comes from State appropriations, while the Federal Government supplies about 30 percent.

Land-grant institutions administer programs in most major fields of study, but place an emphasis on agriculture and home economics. They help local citizens by demonstrating scientific advances in agriculture and nutrition, and organize local farm groups through extension services.

Land-grant institutions and the Extension Service has encouraged elementary and secondary schools to teach agriculture. They sponsor 4-H clubs and home economics projects—4-H clubs are located in rural areas, small towns, and even large city suburbs. They focus on developing leadership and career skills, and show the application of science to daily life. Home economics projects focus on nutrition, care of household equipment, and management of money.

The Smith-Lever Act has done much to keep the American farmer the most productive and efficient manager of agricultural resources in the world. I am proud to recognize the significant impact the Smith-Lever Act has had on this country and its educational institutions.

A TRIBUTE TO DR. ROBERT KINDRED, M.D.

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mrs. MORELLA. Mr. Speaker, I would like to call to the attention of my colleagues the untimely death of Dr. Robert Kindred of Rockville on April 27, 1989. Dr. Kindred, who was 64 years old, died of leukemia at the University of Maryland Hospital in Baltimore. A highly respected physician and a teacher, he served his country in time of war and in time of peace. His death is a great loss to the people of my district and to the entire Washington medical community.

Dr. Kindred was a native of Charlottesville, VA, and a graduate of the University of Virginia and its medical school, where he also served on the medical school facility. He saw active service in the U.S. Navy during World War II and in the Korean conflict and remained in the Navy Reserve until 1988, when he retired as a commander. Dr. Kindred was chief of orthopedic surgery at D.C. General Hospital before establishing his practice in Montgomery County in 1966.

Those whose lives were touched by this fine man share the grief and sorrow of his family.

A DEDICATED PUBLIC SERVANT

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. SKELTON. Mr. Speaker, last week we learned that Alan Kranowitz, assistant to the President for legislative affairs in the last 2 years of the recent administration retired after 25 years of Government service. While at the White House, Alan worked tirelessly on many occasions for various programs. On some we were able to work together; on others we weren't. Yet Alan always showed himself to be gracious, straightforward, and honest. He will be missed by those of us who had the opportunity to work with him.

Alan has taken up new duties with the National Association of Wholesaler-Distributors as senior vice president, Government relations. I want to wish him all the best as he assumes his new responsibilities in the private sector.

INTRODUCTION OF LEGISLATION ON THE UNRELATED BUSINESS INCOME TAX

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. DONNELLY. Mr. Speaker, I am introducing legislation today to clarify that certain items of income received by tax-exempt organizations are unrelated business income and subject to tax.

Mr. Speaker, the latest rage in fundraising gimmicks by organizations which are exempt from tax under section 501(c) of the Internal Revenue Code are so-called affinity credit cards. Typically, a tax-exempt organization—such as a college or university—will participate in a solicitation of its members by a bank for credit card applications. For every member who applies for a credit card, the exempt organization will receive a flat dollar amount, plus a percentage of the total charge made to the card by the member, plus a flat amount for each renewal of the card. The Wall Street Journal reported a prediction in September of 1987 that "within the next few years there won't be any nonaffinity group cards."

My bill clarifies the tax treatment of the amounts which these organizations receive from affinity card transactions. Section 511 of the Internal Revenue Code imposes a tax on the unrelated business income of charitable and other organizations. Under the income tax regulations, income is unrelated business income if it is derived from a trade or business which is regularly carried on, and not substantially related to the organization's exempt purpose.

Under present law, several items of passive income—such as royalities, rents, dividends, interest, and other items—are excluded from the calculation of unrelated business income under Internal Revenue Code section 512. Income derived from the exchange of mailing lists between tax-exempt organizations is not subject to the unrelated business income tax under Code section 513.

Obviously, objective tests such as "not substantially related" are extremely difficult for the Internal Revenue Service to enforce. Nonetheless, in Revenue Ruling 72-431, 1972-2 CB 281, the Service held that a regular sale of membership mailing lists by an exempt educational organization constituted an unrelated trade or business. This revenue ruling seemed dispositive of this question—and would seem to clearly apply the unrelated business income tax to organizations engaging in affinity card transactions—until the announcement of a private letter ruling by the Internal Revenue Service in 1987 which has further confused the issue.

In private letter ruling 8747066, the Service reasoned that the income derived from an affinity card transaction entered into between a tax-exempt fraternal organization and a bank would be unrelated business income. Nonetheless, the private letter ruling indicated that the amounts received from the transaction would be royalty income and therefore excludable from the calculation of unrelated business income.

Although the term royalty is not defined in code section 512, the term has been defined as "amounts received not only for the use of patents and copyrights, but for secret processes and formulas, good will, trademarks, trade brands, franchises, and other like property." *Commissioner* v. *Affiliated Enterprises,* 123 F. 2d 665, at 668 (1941). The payment "must relate to the use of a valuable right." Rev. Rul. 81-178, 1981-2 CB 135. Apparently, the preliminary assessment by the Internal Revenue Service had been that the income received from an affinity card transaction can be excluded from the computation of unrelated business income as a payment for "the use of a valuable right."

In April 1988, however, the Internal Revenue Service revoked its earlier private letter ruling. In General Counsel Memorandum 39727, the Service noted that the transaction is not an exchange of membership lists, and thus not subject to the general exclusion in section 513(h)(1). In addition, the Service concluded that the royalty exclusion is not applicable to these transactions. Thus, the position of the Internal Revenue Service at the present time appears to be that income from affinity credit card transactions is subject to the unrelated business income tax, and not royalty income subject to exclusion.

My bill would codify the result reached in GCM 39727 and provide that income received in connection with the sale, rental, or grant of a right to use lists of members, customers, or contributors to tax-exempt organizations would be unrelated business income. In addition, the bill is intended to codify so much of Rev. Rul. 72-431 that applies to the sale of membership lists to taxable business or other entities. Code section 513(h)(1) is not disturbed by this legislation. Additionally, my bill clarifies that the income received is not to be treated as one of the modifications—or exclusions—listed in code section 512(b). The provision would be effective for amounts received or accrued after April 28, 1988, the date of publication of the General Counsel Memorandum, although no inference should be drawn from this date as to the proper treatment of amounts received before April 28, 1988.

I am also troubled by reports which I have seen which suggest that individual States may be contemplating issuing affinity-type credit cards. The unrelated business income tax does not apply to States, and section 115 of the Internal Revenue Code excludes from gross income the "income derived from . . . the exercise of any essential governmental function and accruing to a State or political subdivision thereof, or the District of Columbia." It is my belief that income which States receive from affinity credit cards is not excludable under section 115 because it is not an essential governmental function to put residents of a State further in debt. If legislation is necessary to further clarify this point, I intend to amend my legislation in this regard as it moves through the legislative process.

Mr. Speaker, let me stress that my intent is not to stop these transactions. I just want to ensure that the amounts received are treated for what they are: Unrelated business income. As a member of the Committee on Ways and Means, I will push for speedy action on this measure either separately or in the context of a larger review of the tax treatment of unrelated business income.

TRIBUTE TO LOUIS CURCIO

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ENGEL. Mr. Speaker, on June 30, 1989, a devoted community leader Louis M. Curcio will be completing 9 years of service to community school board No. 8 in the Bronx, the last 4 years as its president.

Louis Curcio is one of those types of individuals that has shown dedication and devotion to his community that is rarely matched. Louis Curcio is a lifelong resident of the Pelham Bay area of my congressional district and currently serves as president of the Pelham Bay Taxpayers and Civic Association.

But, the most outstanding attribute of Lou Curcio has been his devotion to children. In addition to being a teacher at Lehman High School in the Bronx, Lou's work with school board No. 8 is something we are most proud of. He has been an outstanding example of what commitment to quality education is all about.

While he will be missed from the school board, he leaves behind a solid foundation on which to build.

POUND FOR POUND, SUGAR RAY ROBINSON WAS SWEETEST

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. STOKES. Mr. Speaker, I rise today to eulogize an American legend—Sugar Ray Robinson, who died April 12, 1989, leaving a legacy of sportsmanship and colossal athletic achievements for future generations to admire. The world has lost a remarkable athlete, who has been the standard upon which many have emulated throughout the world of boxing. He devoted his life to a sport which he loved, a sport which was greatly influenced by his skill and expertise in the boxing ring.

In his prime, Robinson was the best prizefighter pound for pound, anywhere. During a career that spanned a quarter-of-a-century, Robinson won 175 fights of which 110 were knockouts. He earned the distinction of being a 5-time world middleweight and welterweight champion. He was never knocked out, and he was relentless in the ring. Only once in his career was he stopped, when he collapsed from the sweltering heat in the ring during a 1952 light-heavyweight title bout against Joey Maxim. Sugar Ray Robinson's awesome abilities have prompted boxing experts and enthusiasts to rank him as the best fighter who has ever lived.

The boxing world was enriched by having Sugar Ray Robinson in its midst. Robinson contributed a great deal to the advancement of the sport through his innovative techniques and unique style. Many great champion fight-

ers have imitated the grace and poise with which Sugar Ray Robinson controlled the right. Muhammad Ali incorporated Sugar Ray's litheness into his own unique style. Likewise, Sugar Ray Leonard, the middleweight and welterweight champion of recent years, has had his sprynes in the ring compared to his namesake, Sugar Ray Robinson.,

During his lifetime, Robinson provided inspiration to aspiring young boxers everywhere. His style and technique have been copied over and over again by fighters. Speed, agility, stamina and raw energy where the key ingredients to Robinson's winning form in the boxing ring. This form, which combined superior footwork with powerful and quick hand motion, was lethal to opponents during Robinson's prime.

Despite his successes, Robinson experienced set-backs in his boxing career, but he came back again and again, even when the odds were against him. He would lose his title four times and regain it each time in spectacular comeback matches. After losing his title to Paul Pender and also losing the rematch, Sugar Ray Robinson announced his retirement from boxing for good. Two years later, in 1967, he was elected to the Boxing Hall of Fame.

Sugar Ray Robinson's retirement from the boxing ring did not end his popularity among his many fans nor the young boxers who sought his expertise. Boxing champions of recent years consistently name Sugar Ray Robinson as a source of their inspiration. This influence on young people meant a great deal to Robinson, even more than the professional accolades he acquired.

Robinson was committed to the goal of keeping youth off the streets and giving them meaningful and constructive alternatives. In 1969, Robinson established the Sugar Ray Robinson Youth Foundation, a nonprofit organization based in Los Angeles that helps over 2,000 young people each year to reach their personal goals. The foundation has been instrumental in developing role models for young people, namely Florence Griffith Joyner, a three-time gold medal winner in the 1988 Summer Olympic Games and a graduate of the foundation.

Mr. Speaker, I am sure that my colleagues will join me in extending condolences to Sugar Ray Robinson's widow, Mrs. Millie Bruce Robinson, and other surviving members of his family. In memoriam to an outstanding athlete, I would like to bring to my colleagues' attention the following article which appeared in the Washington Post the day after Sugar Ray Robinson's death. The writer, Shirley Povich, captures the spirit of Sugar Ray Robinson at his best, boxing with his heart and soul.

POUND FOR POUND, SUGAR RAY ROBINSON WAS SWEETEST

(By Shirley Povich)

There was a sadness in the news that came out of that hospital room in Los Angeles yesterday. They said Sugar Ray Robinson had died. He was 67 years old, beset by many illnesses. But for those with the memories, there still is a temptation to muse that had they laced a pair of boxing gloves to his fists Sugar Ray would not have lost that last decision.

It is fair to say that until he came on the scene as a street kid in 1940, winning his first pro fight with a two-round technical knockout, the likes of Sugar Ray Robinson had never been known to boxing in its two centuries of history. He still defied comparison to the day of his death. To suggest that another of his kind had come along was fatuous. None would dare, so supreme was Sugar Ray as the complete artist in the prize ring, the five-time middleweight champion.

It was never extravagant to say of Sugar Ray that he was "pound for pound, the world's greatest fighter." He was, by general agreement, and he has given that phrase to the language. When Robinson stepped into the ring, his black hair pomaded to a bright sheen, the impression always was that Sugar Ray was in control when the opening gong sounded.

In his 17th year in the ring, in 1957, he reclaimed the middleweight title he lost to Gene Fullmer. The ending of that bout brought from one ringsider the exclamation that, "Jeez, he's always knocking out middleweight champs." Before Fullmer it was Bobo Olson, the Englishman Randy Turpin and Jake La Motta. Also throw in Rocky Graziano (the ex-champion, by knockout) and Carmen Basilio, the champion, by decision. They all felt his sting, all were outboxed. He was the boxer-puncher, assessing, reconnoitering, his hands in classic position, feet moving in easy glides that masked his purpose: was he intent on administering a boxing lesson, or setting the guy up for a knockout? In the 175 bouts he won, he stopped 110 opponents. Often, his hair was unmussed.

He was 36 years old, some say 37, when he got his title back in 1957 from Fullmer, who had licked him by a decision five months earlier. The extent of the speculation was that Robinson might win this one by a decision. Never was it suspected that Robinson on any night would be a 3½-to-1 underdog.

Going into the fifth round, the signs were there. Things weren't going well for him. Sugar Ray had slowed, badly, and in all of his moves he seemed to be a bummer. Or was he setting a trap? Halfway through the fifth, the fastest hands in boxing took care of everything Sugar Ray lacked in his legs. He uncorked a flashing left hook and his worries were over for the night. Fullmer, the rugged one who had never been knocked down, was now knocked out. Critics agreed that after that last punch Chicago would be known as the Louvre of left hooks.

There would have been another title for Sugar Ray in 1952, the world's light heavyweight title that Joey Maxim took into the ring against him that night. Maxim didn't beat him, the climate did. Sugar Ray had stepped out of his class to fight light heavy and was in command against Maxim for 13 rounds, outboxing that boxer. But now the ringside heat was registering 130 degrees. The original referee already had been relieved as a heat victim in mid-fight. And now those 130 degrees saved Maxim his title. At round's end, Sugar Ray staggered into the arms of a corner man, wilted.

It had not been a fair test for Sugar Ray a year earlier when he lost his title to Turpin by a decision in London. He swept into England after touring all Europe with a huge entourage that included ladies of his choice, as was his style. After he lost the fight, it was written that "Sugar Ray fought in London but left his legs in Paris."

For their return fight in New York, Sugar Ray was guaranteed what was then hailed as "the fabulous sum of $75,000," which in this age would be equal to a payday of one of Sugar Ray Leonard's deputy assistant associate trainers. Robinson was in trouble in their return match, a loser until the 10th round when the time came to risk a right hand with everything he could summon. It won him the fight instantly.

For Sugar Ray Robinson, the finish was not a pretty story. He retired and unretired many times. Went into show business as a dancer, found the paydays meager, and missed the big money in boxing. During this period, he was constantly asked for guidance by Muhammad Ali when his own big fights came up, so high was his esteem for Sugar Ray as a ring master.

Unhappily, Sugar Ray fought long beyond his time into his 25th year in the prize ring, and he was now a spectacle of tattered skills and ring rust and a pawing relic of what had been his glorious wars. He was reduced to meager paydays and took numerous lickings from such nondescripts as Denny Moyer, Mick Leahy, Stan Harrington and Memo Ayon in seedy rings in Tijuana and other low rent arenas. We prefer the other memories of the super champion of all times.

CAREER MILESTONES

May 3, 1921. Born in Detroit as Walker Smith Robinson Jr.

Oct. 4, 1940. Wins first pro fight with second-round TKO of Joe Echevarria in New York.

Dec. 20, 1946. Wins the vacant world welterweight title with a 15-round decision over Tommy Bell in New York.

Feb. 14, 1951. Stops Jake LaMotta with a 13th-round TKO to win the world middleweight title. It is the last of his six fights against LaMotta and the only one not to go to a decision.

July 10, 1951. Loses middleweight title to Randy Turpin in London on a 15-round decision.

Sept. 12, 1951. Regains middleweight title with 10-round TKO of Randy Turpin in New York.

March 13, 1952. Retains middleweight title with 15-round decision over Bobo Olson.

April 16, 1952. Retains middleweight title with third-round knockout of Rocky Graziano.

June 25, 1952. Loses bid for world light heavyweight title in 14th-round TKO by Joey Maxim in New York. It is the only time he fails to go the distance.

Dec. 18, 1952. Announces retirement.

Oct. 20, 1954. Announces return to the ring.

Dec. 9, 1955. Regains world middleweight title with second-round knockout of Bobo Olson.

May 18, 1956. Retains middleweight title with fourth-round knockout of Bobo Olson.

Jan. 2, 1957. Loses the middleweight title in a 15-round decision to Gene Fullmer in New York.

May 1, 1957. Regains middleweight title with a fifth-round knockout of Gene Fullmer in Chicago.

Sept. 23, 1957. Loses middleweight title in a 15-round decision to Carmen Basilio in New York.

March 25, 1958. Regains middleweight title with 15-round decision over Carmen Basilio in Chicago.

Jan 22, 1960. Loses middleweight title to Paul Pender in 15-round decision in Boston.

June 10, 1960. Loses bid for middleweight title in 15-round decision to Paul Pender.

Dec. 3, 1960. Draws with Gene Fullmer in bid to win NBA middleweight title.

March 4, 1961. Loses 15-round decision to Gene Fullmer in bid for NBA middleweight title. It's the last of four classic fights with Fullmer in which Robinson wins just once, loses twice and draws one.

Nov. 10, 1965. Loses to Joey Archer in 10-round decision at Pittsburgh.

Dec. 10, 1965. Announces retirement with record of 175 victories (110 by knockout), 19 losses (one by TKO) and six draws. Two fights were stopped for technical reasons with no winner declared.

April 12, 1989. Dies in Culver City, Calif.

A TRIBUTE TO FRANCOIS N. PALMATIER

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. PORTER. Mr. Speaker, I take this opportunity to pay tribute to Francois N. Palmatier, one of the most respected and dedicated citizens of Arlington Heights, IL. Mr. Palmatier is retiring after 32 years of public service, and the residents of Arlington Heights will miss his leadership.

Frank's legacy of public service began with his involvement in the Arlington Heights Caucus, a homeowners group active in screening potential candidates for local office. In 1957, Frank was appointed to the zoning board of appeals of Arlington Heights, and served as chairman from 1961 until 1965. In addition, Frank has been an elected village trustee for an unprecedented six terms.

His enduring legacy is seen all over the village of Arlington Heights. Perhaps Frank's most notable contribution came as chairman of the Citizens Action Committee Against Flooding. In the late 1960's and early 1970's parts of Arlington Heights were subject to horrendous flooding and thousands of the basements were submerged every year. Frank took it upon himself to spearhead improvements. Under his supervision, Arlington Heights constructed a new sewer system, and a detention pond as well as a second basin for overflow rainwater. Frank also worked with developers to revitalize the downtown area and participated in the talks that brought Lake Michigan water to Arlington Heights via a new pipeline.

Despite his outstanding role in public service in Arlington Heights, Frank and his wife, Celia, raised six children and were actively involved in the First United Methodist church Choir. In addition, Frank built a thriving patent law practice in Chicago.

Frank Palmatier is a model citizen who has dedicated his life to bettering the lives of those around him. His hard work and dedication to the residents of Arlington Heights will be missed, but his legacy of civic improvement and hard work are enduring and will serve as a model for those who seek to follow in his footsteps. I wish Frank all the best and join the residents of Arlington Heights in thanking him for his selfless contributions to the community.

THE IMPORTANCE OF SCORE

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. RAY. Mr. Speaker, since earliest times, Americans have helped one another get ahead. There is a noble trait in the American ethic that says we get our biggest thrill from seeing and helping somebody else succeed. No organization personifies this trait better than the Service Corps of Retired Executives.

Made up of 13,000 volunteers who provide their services at 750 locations, SCORE counseled, trained, and disseminated information to over 300,000 people last year. Since 1964, SCORE has counseled well over 2,000,000 individuals.

SCORE is an example of the type of government/private sector partnership we need to encourage and support. Support for SCORE is vital to our economy because business failures are costly in terms of personal loss as well as tax revenues.

For each 100 people SCORE counsels, they usually recommend less than 5 proceed. Some have to do more homework and some would just be wasting their personal savings and making a tragic mistake. Regrettably, many people never get any counseling and a large part of that problem is that SCORE has not had sufficient funds.

Since fiscal year 1981, when SCORE received $2,120,000, inflation has reduced the buying power of the dollar by at least one-third. The workload for SCORE chapters has increased by at least that amount since fiscal year 1981. They are now a much larger organization than they were then—some 15 percent to 25 percent more members, chapters, and satellites.

Although SCORE obtained an increase in appropriations to $2,500,000 in fiscal year 1989, part of that had to be used to pay expenses incurred in fiscal year 1988 for clerical support no longer provided by SBA and for the operation of the National SCORE Office.

Increasingly, SCORE has had to bear costs formerly absorbed by SBA as, for example, SBA/BD publications for client counseling ($100,000), the SBA Management Information System ($75,000), and SCORE insurance premiums ($25,000).

Some chapters have had to curtail counseling activities for lack of travel funds as well as on-site visits which, in many cases, are essential for effective counseling.

Many of our members have had to forego reimbursement for travel expenses to counsel clients, an unfair penalty for a conscientious volunteer counselor.

Between 1981 and 1987, SCORE achieved an increase of 24 percent in new counseling cases and an increase of 36 percent in follow-up visits or counseling actions. Workshops conducted by SCORE for present and prospective small business owners/operators grew by 10 percent in numbers and attendance over the previous year. Growth in 1988 continues at a similar rate.

SCORE needs an increase to $3,000,000 in fiscal year 1990 just to avoid a forced curtailment of its operations.

Of that amount, $300,000 will be used for reimbursement of travel expenses to our members, $100,000 will be used to pursue the new initiatives dictated by new legislation, or by Small Business Administration—International Trade, Women's Business Ownership, Veterans' Business Counseling, Rural Development, and Youth Entrepreneurship. Additional training cost, overhead expenses for SBA/BD publications for counseling purposes, and clerical support at minimal levels account for the balance of $100,000.

SCORE celebrates the 25th anniversary of its founding this October. It would be ironic indeed if SCORE were forced to reduce its activities in the same year that it celebrates the continuing growth and expansion of those activities since its founding in 1964.

JON GOODMAN: A GOOD FRIEND TO HOUSTON AND SMALL BUSINESS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. FIELDS. Mr. Speaker, a good friend of Houston, TX, and a good friend of small business is about to leave Houston in order to begin a new and challenging assignment. I want to take this opportunity to salute this remarkable women who has given so generously of her time and talents to make Houston a better place to live—and a better place in which to do business.

Dr. Jon Goodman currently serves as regional director of the University of Houston Small Business Development Center. In June, she will become director of an entrepreneur program at the University of Southern California.

The University of Houston Small Business Development Center, which Dr. Goodman founded 5 years ago as the first in Texas, recently was named one of the most innovative programs in the Nation.

Through a variety of assistance programs, the SBDC has helped start more than 1,400 new businesses in the gulf coast region and assisted many existing businesses. Through that assistance, an estimated 8,500 jobs have been created or saved in the gulf coast area. In addition, the SBDC has helped Houston area companies obtain more than $120 million in Government contracts.

Today, the SBDC, which is financed by the University of Houston and the Small Business Administration, consists of 11 subcenters and 14 satellite centers throughout a 32-county area.

Since it was founded by Dr. Goodman 5 years ago, the Small Business Development Center has provided Houston area small business owners—and Houstonians wishing to begin small businesses—with the information and guidance necessary to help them succeed. And Dr. Goodman personally has provided the leadership and the knowledge to help Houston area business owners prosper in one of the toughest economic periods that our area has ever faced. Largely because of her leadership and her skill, Houston is coming

back in a big way—stronger, more prosperous, more diversified, and more ready than ever to meet the challenges which face it.

As someone who has had the opportunity to work closely with Dr. Goodman during the last 5 years, I commend this outstanding woman for her commitment to helping the small business community and the entire Houston area. We deeply appreciate her efforts on behalf of the Houston area; we will miss her intellect and dedication; and we wish her the very best as she embarks on her new career in California.

INTRODUCTION OF LEGISLATION CONCERNING MEDICARE REIMBURSEMENT FOR SEAT-LIFT CHAIRS

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. DONNELLY. Mr. Speaker, I am introducing legislation today to crack down on an abuse of the Medicare Program. This abuse is being investigated by the overworked and dedicated inspector general's office at the Department of Health and Human Services and concerns reimbursement under the Medicare Program for national seat-lift chairs.

The outrageous marketing practices by seat-lift chair manufacturers and distributors leave Medicare beneficiaries vulnerable to high-pressure sales tactics, often on television, but also by telephone, and mail. These solicitations suggest that beneficiaries can obtain the chairs at little or no cost, while Medicare picks up the tab. At a time when the Committee on Ways and Means is faced with the prospect of cutting over $2.3 billion from the Medicare Program, I fail to see why the taxpayers and senior citizens of America should be subsidizing the advertising costs of seat-lift chair manufacturers.

I am not suggesting that there is not a need for Medicare coverage of seat-lift chairs; certainly, a segment of Medicare beneficiaries need the benefit. But chairs for which the program has paid up to $1,200 when in fact the inspector general recommends paying about half that amount suggests that the good part of the markup comes from advertising costs. The Medicare Program should not pay the advertising costs of high-pressure salespersons.

Thus, while my bill does not deny coverage for seat-lift chairs, it reduces reimbursement for it. In addition, the bill makes other payment changes to ensure that beneficiaries are not disadvantaged. Finally, it makes administrative changes which will put an end to abusive marketing practices and help ensure that chairs go only to those who need them.

A description of the legislation follows:

DESCRIPTION OF LEGISLATION

PRESENT LAW

Part B of the Medicare program treats payment for durable medical equipment as a covered service. Under Part B of the Medicare program, payment to the provider of a covered service is 80 percent of the reasonable charge after the beneficiary pays a $75 deductible. The beneficiary remains liable for the 20 percent copayment, as well as amounts beyond the reasonable charge which the provider "balance bills" the beneficiary.

The Medicare Catastrophic Coverage Act (P.L. 100-360) will, beginning in 1990, limit the liability of beneficiaries for the 20 percent copayment after the beneficiary has incurred more than $1,370 in covered Part B charges. To the extent that a beneficiary has exceeded the $1,370 limit, the Medicare program will pay 100 percent of the reasonable charge.

Under present law, durable medical equipment is defined as equipment which can withstand repeated use, is primarily and customarily used to serve a medical purpose, is generally not useful to a person in the absence of an illness or injury, and is appropriate for use in the home. If a particular piece of equipment is considered useful to persons who are not ill or injured as well, Medicare will cover the equipment if the item is clearly shown to be serving a therapeutic purpose in an individual case, the item is included in a physician's course of treatment, and a physician is supervising its use. Typically, these physician determinations are made on a "medical necessity" form.

Since 1978, the Medicare program has treated seat-lift chairs as durable medical equipment.

EXPLANATION OF PROVISION

Under the bill, reimbursement for seat-lift chairs is automatically reduced by 15 percent. Thus, for example, if the reasonable charge for a seat-lift chair in a region is $800, the bill would require that level be reduced to $680.

In addition, the bill prohibits suppliers of seat-lift chairs from balance billing Medicare beneficiaries, subject to civil penalties and exclusion from the Medicare program. Thus, suppliers would be unable to shift the reduction in reimbursement to beneficiaries.

Finally, the bill prohibits suppliers of durable medical equipment from providing medical necessity forms to beneficiaries. The forms must be provided by the beneficiaries' physician.

EFFECTIVE DATE

The provisions of the legislation are generally effective for seat-lift chairs provided on or after October 1, 1989.

MONIKA EDWARDS HARRISON

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. CONTE. Mr. Speaker, upon the occasion of Small Business Week 1989, I rise to pay tribute to the Small Business Administration's Associate Administrator for Procurement Assistance, Monika Edwards Harrison. Since Small Business Week 1986, Monika has been the guiding hand of Federal procurement policies for small business nationwide. We are all greatly indebted to her for her outstanding performance on behalf of America's small business.

Those of us who have had the distinct pleasure of working with her on small business issues know her to be a committed, caring, and capable administrator whose devotion to job made her a most effective advocate. Through her support and counsel, I was able to introduce H.R. 3921, a bill to enhance the powers of the SBA's breakout procurement center representatives, which ultimately became section 110 of Public Law 100-590, the Small Business Administration Reauthorization and Amendment Act of 1988. As a direct result of this legislation, small business will receive a greater portion of Government contracts and the enhanced small business competition will generate substantial cost savings to the taxpayers.

Before coming to the SBA, Monika had served with distinction in the State of Florida as a cabinet aide to the State treasurer and advisor to the president of the Florida Senate. She has the honor of being the first woman cabinet aide in Florida's history. In Washington, she has served with distinction at the Department of Agriculture as a legislative analyst, the Department of Education as Acting Assistant Secretary for Elementary and Secondary Education, and the Institute of Museum Services as Deputy Director and Acting Director. She was also named the Outstanding Young Woman in America in 1984.

The theme for Small Business Week 1989, is "Small Business Is America's Future." It is decidedly appropriate. Three years ago this week Monika came to the SBA and at week's end she will be leaving to pursue a career in the private sector. For those 3 years Monika has worked hard to give America's small businesses a secure future. Today, small business participation in Federal procurement opportunities has never been better. Tomorrow, America's small businesses will confidently power our country into the 21st century, in part, because people like Monika Edwards Harrison believe in small business and serve them so well. We wish her success in her new venture and salute her for her outstanding performance at the Small Business Administration.

FINANCIAL STATEMENT OF F. JAMES SENSENBRENNER, JR.

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. SENSENBRENNER. Mr. Speaker, through the following statement, I am making my financial net worth as of March 31, 1989, a matter of public record. I have filed similar statements for each of the 10 preceding years I have served in the Congress:

ASSETS

Real property	Value
Single family residence at 609 Fort Williams Parkway, City of Alexandria, VA, at assessed valuation. (Assessed at $626,100.00. Ratio of assessed to market value—100 percent.) (Encumbered)	$626,100.00
Condominium at N76 W14726 North Point Drive, Village of Menomonee Falls, Waukesha County, WI, at assessor's estimated market value. (Unencumbered)	68,900.00
Undivided 25/44ths interest in single family residence at N52 W32654 Maple Lane, Village of Chenequa, Waukesha County, WI, at 25/44ths of assessor's estimated market value of $239,300.00. (Unencumbered)	135,965.90
Total real property	830,965.90

PERSONAL PROPERTY

No. of shares	Common and preferred stocks	Value
338	Firstar Corp. at $29.00	$9,802.00
436.654	American Telephone & Telegraph at $31.50	13,754.60
558	Idaho Power Corp. at $23.375	13,043.25

Federal income tax	$41,041.00
Wisconsin income tax	12,453.00
Menomonee Falls, Wis. Property tax	1,944.00
Chenequa, Wis. property tax	6,465.00
Alexandria, VA property tax	6,423.00

I further declare that I am the direct beneficiary of two trusts. I have no control over the assets of these trusts. My wife, Cheryl Warren Sensenbrenner, and I are trustees of separate trusts established for the benefit of our minor sons, F. James Sensenbrenner III and Robert Alan Sensenbrenner and are also custodians of accounts established for the benefit of each son under the Uniform Gifts to Minors Act.

Also, I am neither an officer nor a director of any corporation organized under the laws of the State of Wisconsin or of any other State or foreign country.

IN HONOR OF MAY 10, 1989, THE DAY FOR THE TEACHER, LITTLE LAKE SCHOOL DISTRICT, SANTA FE SPRINGS, CA

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. TORRES. Mr. Speaker, I ask my colleagues in the House of Representatives to join me in honoring the teachers and employees of the Little Lake School District.

On May 10, 1989, the Little Lake School District will hold a celebration in honor of the "Day of the Teacher." This day has been set aside to pay tribute to the many current and retired teachers of the Little Lake School District who have committed their lives to the instruction and growth of our youth.

On this day, the school district will pay special recognition to the 1988–89 teacher of the year, Joyce Gordon. The Teacher of the Year Award is given to a teacher who has demonstrated outstanding teaching and has gone above and beyond the call of duty. Mrs. Gordon is such a person. She is a teacher who understands the complexities that go into the learning process. More importantly, she understands children. To quote Mrs. Gordon:

All children can learn. All need differing amount of time, repetition, or experience. It gives me great joy to hear a child say, "How come I understand it when you show me?" I believe that teaching is an art, mediated by science. Adults can see the science, tempered by the art, but children feel the art and respond with their hearts to the science.

On May 18, the school district will also host a celebration in honor of "Classified Employees Day." At this meeting instructional aides, secretaries, clerks, maintenance staff, and cafeteria workers will be honored for their commitment and dedication to education. They are to be commended for their contributions to the needs of the students in the school district. The welfare and safety of our young people in our schools is protected by these outstanding employees. It takes special people to care for and educate our Nation's students. I am proud that these people have chosen to work in my community.

Mr. Speaker, the Little Lake School District is one of the finest school districts in the State of California. The loyalty of the people being honored reflects the district's outstanding relationship with its employees. I ask my colleagues to join me in a salute to the teachers and employees of the Little Lake School District for adding something special to education.

LEVEL THE PLAYING FIELD FOR COMMUNITY DEVELOPMENT, EXPAND ENTERPRISE ZONES, AND RESTORE HOUSING REHABILITATION LOAN PROGRAM

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. WYDEN. Mr. Speaker, today I am introducing two bills which will increase local access to Federal community development programs.

These bills, which are part of a larger housing and community development bill to be introduced within the next few weeks, expand opportunities for communities to use existing programs. As such, these bills can provide communities with great benefits at little cost to the Federal Government.

The first bill expands the current Enterprise Zone Program by easing the eligibility criteria for zone designation. Current regulations limit eligibility to cities which are undergoing citywide economic decay.

There is no doubt that these cities deserve Federal assistance, but other cities still have large pockets of poverty and economic inactivity and should not be excluded from the advantages of enterprise zone designation. Excluding these cities unfairly limits the ability of enterprise zones to foster economic activity.

My legislation eases eligibility standards for enterprise zone designation by making a community eligible for enterprise zone designation if it meets one of four criteria:

It has an unemployment rate at least 1.5 times the national average;

At least 20 percent of its population is below the poverty rate;

At least 70 percent of the households in the proposed enterprise zone have incomes below 80 percent of the area median; or

The proposed zone has had a 20-percent decrease in population.

In addition, a community will be eligible for designation if it currently provides economic

incentives, such as tax abatements, to promote urban development in specified zones.

The expanded criteria will not affect the way in which the Secretary of Housing and Urban Development makes the final designations of enterprise zones. However, it will provide the Secretary with greater leeway in making those designations, and expands the potential advantages of the Enterprise Zone Program to a wider range of communities.

The second bill which I am introducing is intended to revitalize the Section 312 Rehabilitation Loan Program. Since its inception in 1965, over $1 billion in loans have been made to localities through this program. Historically, the funds have been used to assist rehabilitation housing for low- and moderate-income families, although in recent years they have been used to finance rehabilitation of commercial buildings as well.

One great advantage of section 312 is that it operates at no cost to the Federal Government. It has not received any appropriations since 1981, yet has continued to make funds available to support local development efforts. The types of projects funded by section 312 would be unlikely to receive funding from other Federal or private sources. One would think that such a program would have earned Congress's appreciation. Instead, Congress last year virtually disabled the program by transferring $200 million from the fund.

Again, these funds did not represent a transfer of appropriations, but of accumulated balances from loan repayments which were to be recirculated to assist other local rehabilitation efforts. This action gutted the effectiveness of the section 312 program in supporting rehabilitation efforts.

Local community development agencies have cited the loss of section 312 funds as a hindrance to their economic development plans. They have found the section 312 program to be an efficient method to spur local development efforts. Last year alone, over $100 million in loans were made from this self-financing fund. We should preserve this program, which is not a Federal give-away program, but one in which communities have been able to borrow capital which they could not otherwise acquire, except at excessively high costs.

My legislation will preserve section 312 in two ways. First, it will replenish the fund by authorizing the appropriation of $200 million to replace the funds which were transferred out of it last fiscal year. Second, it reaffirms the purpose of the fund, and states that moneys will not be transferred from it again.

Together with the amendments to the Enterprise Zone Program, this measure will expand the opportunities available for local communities to help themselves in addressing local problems of economic development. These are the kinds of programs that the Federal Governnr.ent should be promoting, because they encourage self-help solutions at the community level. In addition, these programs have the potential to be of great benefit to our communities at little cost to the Federal Government. I urge my colleagues to support these community development measures.

SMALL BUSINESS PROTECTION ACT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. CONTE. Mr. Speaker, upon the occasion of Small Business Week, 1989, I rise to introduce the Small Business Protection Act of 1989. This bill amends section 15(a) of the Small Business Act to provide for a small business impact statement whenever a proposed procurement would exceed economical ordering and quantities conducive to small business participation or whenever a proposed procurement for construction seeks to consolidate discreet projects.

Federal acquisition regulation subpart 19.201 establishes as general policy of the Federal Government placement of a fair proportion of its acquisitions, including contracts and subcontracts for subsystems, assemblies, components and related services for major systems, with small business concerns. Subpart 19.202-1 requires, when applicable, the contracting officer take the following actions to afford small business concerns an equitable opportunity to compete for all contracts they can perform:

First, divide proposed acquisitions into reasonably small lots.

Second, plan acquisitions such that more than one small business may perform the work.

Third, provide a realistic basis for delivery schedules that will encourage small business participation.

Fourth, encourage prime contractors to subcontract with small business concerns.

My legislation simply rewords FAR subsection 19.202-1 as statute to provide for protection against umbrella contracts—an agency practice that combines several small contracts into one large multifunction contract. This practice of aggregation, also known as "consolidation" or "bundling," is inimical to small business participation in Federal contracting. Whenever an agency promotes umbrella contracts it violates the spirit and intent of FAR 19.202-1, because they are unduly restricting competition by effectively eliminating small business as prime contractors.

In a 1983 report entitled "How Selected DOD Consolidations Efforts Affected Small Business Opportunities," the GAO concluded that "consolidated procurements have the potential for limiting prime contract awards to small business firms and may not always result in the lowest cost to the Government."

Further, GAO was concerned that:

Decisions to consolidate procurements are made without performing adequate economic analysis.

During the procurement planning stage, when major commands decide on a consolidation or regional approach, a local procurement activity's small and disadvantaged business utilization specialists will find it difficult to carry out his function of identifying procurements for a small business to perform.

Procurement activities may be placing an overreliance on subcontracting opportunities for small business to compensate for loss of opportunity on prime awards.

In a 1987 procurement report entitled "Opportunities to Use More Preferred Practices for Base Support Contracts" the GAO found that "we believe that umbrella base support contracts based on the less preferred contracting practices should not be permitted unless their use is justified as more advantageous to the Government." In supporting tables, the GAO documented a steady increase in umbrella contract awards, and that for the period 1977-83, a total of $3.5 billion in base support contracts were awarded, of which over $2.5 billion was awarded to big business, $934 million to big business outside the United States and only $56 million to small business. This contrasts sharply with data on single function contract dollars awarded by type of business in 1983—big business—$97 million, big business outside the United States—$317 million, small business—$1 billion and nonprofits—$12 million, totaling $1.4 billion. Frequently agencies state that small business participation in umbrella contracts is great yet the GAO report surveyed the amount of subcontracted work on selected umbrella contracts and showed that small business percent of total prime amount was only 21.5 percent.

Some of the following subheadings in the report are illustrative of the problem:

Cost effectiveness of umbrella contract decisions not demonstrated.

Most umbrella contracts are not firmly priced contracts.

Contract type decisions need better documentation and support.

Price is not the dominant criterion for awarding many umbrella contracts.

Considerable dollar impact of not awarding contracts to low offerors.

Work statements in umbrella contracts are often too broad for awarding firmly priced contracts.

Frequently agencies will argue that umbrella contracts are more cost effective than smaller contracts because of administrative and overhead savings. Yet this report cites an instance where 22 umbrella contracts were awarded to other than the low offerors, though low offerors were judged to be qualified. The 22 contracts totaled $1,112 million. If low offers were accepted this cost would have been $1,039 million—a difference of $81 million!

Finally, and most importantly, the report indicated that the use of umbrella contracts for base support services has increased greatly. In 1983 DOD funded about 6,000 base support contracts totaling $2.4 billion. Of those over $1 billion were umbrella contracts which is up from $20 million in fiscal year 1977.

In the Senate report on the Fiscal year 1988 Military Construction Appropriations Act language was inserted indicating that "the committee strongly discourages the packaging or consolidation of multiple military construction projects, appropriated for construction within the United States, into single contracts which deny American small business the maximum practicable opportunity to participate in military construction projects." The committee then directed the DOD to notify it whenever it sought to consolidate and to include in its no-

tification statement a certification from the SBA that the project award is in the best interest of small business.

Final language adopted by the conferees supports "packaging of projects where appropriate and advantageous, and where the potential for cost savings exists." But then adds "at no time should projects be packaged in order to restrict competition or to prevent small business from competing. The conferees continue to support the excellent participation of small business contractors and small business set asides in the Military Construction Program. The conferees direct the Department to notify the committees 21 days prior to advertising in the Commerce Business Daily for the design or construction of military construction projects which the Department seeks to package or consolidate during fiscal year 1988."

Mr. Speaker, my bill seeks to protect small business from the adverse impact of agency contract consolidation efforts. It simply requires that whenever an agency seeks to consolidate a contract currently being performed by a small business, or seeks to consolidate discreet construction projects, the agency shall provide to the SBA at least 30 days prior to solicitation, a copy of the proposed procurement and a statement why it cannot be reasonably divided into small lots and delivery schedules cannot be established on a realistic basis that would encourage/permit small business participation or why the construction project cannot be procured as separate discreet projects. If the SBA believes reasonable alternatives do exist it shall have the right to appeal it now on set asides.

In short, Mr. Speaker, just as we now have environmental impact statements on Government funded projects—so shall we have a small business impact statement on any contract action designed to avoid small business set-asides, if my bill is adopted.

The theme this year for Small Business Week is "Small Business is America's Future." I want to insure the future for small business participation in Government procurement opportunities. That is why I have introduced the Small Business Protection Act. I urge all my colleagues to join me in this effort and cosponsor the Small Business Protection Act.

IN HONOR OF FATHER ANTHONY M. D'ANTONIO

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ENGEL. Mr. Speaker, I rise today to honor Father Anthony M. D'Antonio who will be celebarting his 50th Ordination Anniversary Mass on May 21, 1989.

Father D'Antonio has devoted his life to the church and community. A large portion of the years that he has been a member of the clergy has been spend serving the people of New York City.

Born on August 6, 1915, in St. Arpino, Naples, Italy, he was the third of 11 children of Vincenzo and Filomena D'Antonio. He attended high school and studied philosophy in his native diocese, the diocesan seminary of Aversa. Upon completing high school, he went on to study theology in the Interregional Pontifical Seminary "Pius XI" of Salerno. Ordained a priest in the Cathedral of Aversa on July 9, 1939, by Bishop Antonio Teutonico, Father D'Antonio began what would prove to be a long and eventful career in the clergy.

During the period from 1939 to 1949, working in the parish of St. Elpidio in St. Arpino, Father D'Antonio was a leader in "Axione Cattolica," a broad-based Catholic youth movement. He also taught in the public governmental school from 1944 to 1949. During the same period he continued his education by receiving his Doctorate in Canon Law from the Faculty of Donnaregina of Naples.

Father D'Antonio first arrived in New York on June 26, 1949. At the invitation of Cardinal Francis Spellman, he was summoned for a special mission concerning Italian-Americans. Six years later, he was incardinated in the Archdiocese of New York on June 16, 1954. Since then, as a member of the clergy of the Archdiocese of New York, he as served in the following parishes: Our Lady of Loretto, in Manhattan; St. Michael and St. Benedicata, both in Staten Island; and St. Clare in the Bronx. Since 1972, Father D'Antonio has been serving in Our Lady of Mt. Carmel, which is located in the Bronx.

Mr. Speaker, I ask my colleagues to join me in recognizing the great things that Father D'Antonio has done not only for the 19th District, but for all of New York City. I am honored and proud to have as a constitutent a man who has devoted his life to others and I am sure Father D'Antonio will continue to accomplish much more in the years to come. There will be an Ordination Anniversary Mass at Mt. Carmel in the Bronx on Sunday, May 21, 1989, at 4 p.m. in his honor. On July 9, Father D'Antonio will be with his family in Italy celebrating the actual date of his anniversary.

TRIBUTE TO PAUL HARCAR

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. KOLTER. Mr. Speaker, today I rise to recognize a gentleman in my 4th congressional district of Pennsylvania who has contributed a considerable amount of devotion and energy toward the making of better labor relations in the New Castle Area as well as the State of Pennsylvania. Mr. Paul Harcar, a native of New Castle, was able to contribute a good deal of expertise in the labor world in a variety of ways before his retirement in February of 1986.

In his 40 years as an active member of the International Association of Machinists, Paul represented this union in many ways. In serving as a business agent for district 109, Paul was able to negotiate many contracts for approximately 10 different locals in the district. He also handled all third-step grievance and arbitration cases in this position. For 18 years, Paul served as a board business representative for District Local 106. He also served as president for Labor Local 1671.

As a result of these many contributions, Paul was asked to serve as a trustee of both the Machinist Union 2178 and the AFL-CIO of Lawrence County.

Paul did not limit himself to the business concerning labor unions though, he was also very active in many community projects and organizations as well. In 1982 as Western Pennsylvania was experiencing some hard times Paul was on the steering committee and the board of the Labor Council Food Bank. He also served on the United Fund Board of Lawrence County during this period. Paul sincerely worked hard to help the unemployed members and the less fortunate in his community.

Politically, Paul served on many phone banks throughout the years in an effort to promote and elect strong leadership to government office.

Within his busy life, Paul also found time to serve his country as an active member of the Pennsylvania National Guard. After serving from July, 1947 to July, 1950, Paul received an honorable discharge.

When Paul Harcar retired from the union, he left behind a tradition of respect, admiration, and integrity. From his work with the unions, to his dedication to community service, Paul personifies human excellence. I take pride in calling Paul a friend and would like to take this opportunity to wish he and his family much health and happiness in years to come.

TRIBUTE TO KEVIN LINDAMOOD OF RICHMOND, MI

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. BONIOR. Mr. Speaker, I rise to pay tribute to Kevin Charles Lindamood, a young man from Richmond, MI, which is in the congressional district I represent. Earlier this year, Kevin was named the State winner of the Veterans of Foreign Wars' Voice of Democracy broadcast scriptwriting contest.

Kevin is a senior at Richmond High School and plans to pursue a career in broadcast journalism. His entry, entitled "Preparing for America's Future," follows:

PREPARING FOR AMERICA'S FUTURE

Time—a simple element that is precious to each and every one of us. Time—an element that can be wasted, or one that can be used. Time—something that can last forever, or something that can pass by too quickly. Time—America has had the time to grow in the past, and now it must take the time to prepare for growth in the future.

Come, take a journey with me, back through the withered years and trying days of time. Open your mind and travel back with me on a space shuttle, on an airplane, in an automobile, in a carriage, or on horseback. Travel back and still farther back with me to a time more that two hundred years ago, and witness a birth—the birth of our nation. Witness the birth of America, conceived in liberty, fathered by an endless number of great men and women, and delivered up by the earth. Hear the baby cry out for nourishment in order to grow. Watch it use events and people to build its foundation. Feel it growing stronger and stronger

as quill pens are pressed to paper as each signature is added to the Declaration of Independence. Watch it slowly develop as our forefathers carefully etch out the final copy of the U.S. Constitution. Now slowly, very slowly, travel back to today on horseback, carriage, automobile, airplane, and space shuttle. As you go, witness for yourself this "baby" of a nation begin to grow as more and more people pour in to nurture it. See the flag proudly symbolize thirteen states, twenty-five states, forty-eight, fifty states. Witness the wars, trials, and triumphs of this growing masterpiece.

Now, America, which is still but a child in need of growth and development, is left in our hands by past generations who prepared America for today. It is up to us to accept the responsibility to prepare America for tomorrow, and we must use every second of the valuable time that we have in order to do so.

You may be saying to yourself, "What can I possibly do to effect and mold the future of America?" Well, it is impossible to predict exactly what the future has in store, but as Americans, it is up to each and every one of us to give to America our very best for we all make up the overall "personality" of America which is seen by the rest of the world.

Each of us has responsibilities that we must take on in order to watch our country grow. Each of us must find out and become involved in the events of today which will soon become the events that will lead us into the future. I find it extremely frightening that so many people, young and old alike, simply don't care, and really couldn't tell you their opinions of the current events of the world if you asked them. It is caring and hard-working people who will push America into the future.

Just think about it, if this wave of total lack of interest should continue to grow, our precious system of democracy could be taken away from us little by little until we, the American people, would not even know what hit us. In order for America to grow, the American people too must grow. Whereas knowing and hard work are powerful vitamins which are needed to make this country grow, lack of knowledge could be this country's downfall.

In the body, a blood cell is just as important as an eye. In much the same way, in America, a poor man is just as important as a rich man. Each person is needed to help this country grow regardless of color, wealth, physical appearance, or social acceptance. Also, in order to push America into the future, all Americans, and I do mean all, must learn to help and work with all other Americans no matter how different they are from one another. We, as Americans, must learn to be less selfish. We must learn to look out for others instead of just looking out for ourselves. You will soon discover that you and your group of friends or "acceptable" people do not make up all of America, but that all of us, from the coast of California, to the tip of Cape Cod, from Alaska to Hawaii, make up America.

The Challenge is set before us. Just as a couple makes plans for the education and unknown future of their child, we must prepare ourselves to prepare America for the future. Hopefully one day two hundred years from now, America will look back on us with pride and respect for taking the time to make this country ready to face that future. Yes, America was prepared for us. Now, in turn, we must prepare it and ourselves for the future.

A TRIBUTE TO A FALLEN POLISH LEADER—STEFAN KORBONSKI

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. HOYER. Mr. Speaker, on April 23 the Polish people lost one of its heroes of World War II. Stefan Korbonski, who was a leader of the Polish underground movement during the war, died at the age of 88. While serving in the Polish Army at the time of the German and Soviet invasion of Poland in 1939, Korbonski was captured and taken prisoner by the Soviet Red Army. He later escaped and became a leading force in the Polish underground war movement against the occupying forces.

Mr. Speaker, I would like to commend to my colleagues the Washington Post tribute to Stefan Korbonski, who is survived by his wife of 50 years, the former Zofia Ristau. I hope my colleagues join me in saluting this fallen Polish hero, who saved many lives during the occupation of Poland during World War II.

S. KORBONSKI DIES; LED POLISH UNDERGROUND

(By Bart Barnes)

Stefan Korbonski, 88, a leader of Polish underground forces during World War II, an author and former chairman of the Assembly of Captive European Nations, died of an aneurysm April 23 at George Washington University Hospital.

Mr. Korbonski was chief of civil resistance in Poland during the war, and in that capacity organized underground courts that passed death sentences on about 200 Gestapo agents and Nazi collaborators. He also helped establish radio communications with the Polish government in exile in London, and directed sabotage activities in production, transportation and agriculture.

He was serving in the Polish Army when the country was invaded by Germany and the Soviet Union in 1939, and he was taken prisoner by the Red Army. He later escaped and returned to Warsaw, which by then had been overrun by the Nazis. There Mr. Korbonski helped organize the Polish underground movement, and he became a member of the Political Coordinating Committee, which directed all underground activities against the Germans.

He was a leader in the 1944 Warsaw uprising against the Nazis. Ten years later in testimony before a committee of the United States House of Representatives, he would accuse the Soviets of betraying the uprising. The Soviets, he said, encouraged the Polish underground forces to revolt, then halted the advance of the Red Army until the Nazis had crushed the rebellion.

He was arrested by Soviet police after the war, then released. In early 1947, he was elected chairman of the Warsaw district of the Polish Peasant Party. Later that year, fearing a second arrest, he fled to a hiding spot on the Baltic Coast. In November 1947, he fled to Sweden and then went to New York. He had lived in Washington since the mid-1950s.

In this country, Mr. Korbonski had written extensively on issues affecting Poland and Soviet domination of Eastern Europe.

Mr. Korbonski was born in Praszka, Poland. As a young man, he served in Polish Army units fighting Russians, Ukraninians and Germans after World War I.

He received a law degree from Poznan University, and in 1929 opened a law practice in Warsaw. He also was active in the Polish Peasant Party.

He was author of five books, "Fighting Warsaw," "Warsaw in Chains," "Warsaw in Exile," "Between the Hammer and the Anvil" and "Polish Underground State: A Guide to the Underground, 1939–1945."

Between 1958 and 1977, Mr. Korbonski served eight one-year terms as chairman of the assembly of Captive European Nations. He also served as chairman of the Polish delegation to that organization and as chairman of the Polish Council of Unity in the United States.

In 1980, he received the Yad Vashem Medal of the Righteous from Israeli Ambassador Ephraim Evron for saving Jewish lives during the war.

He was a member of the Polish Institute for Arts and Sciences and the International Pen Club in Exile.

Survivors include his wife of 50 years, the former Zofia Ristau of Washington.

THE ADVANCED TELEVISION COMPETITIVENESS ACT OF 1989

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. LEVINE of California. Mr. Speaker, today my colleague DON RITTER and I are introducing the Advanced Television Competitiveness Act of 1989. My bill is designed to help create an American high definition television industry.

The United States, which once dominated the home electronics industry, is no longer a major player in the field. Today the most significant technologies, such as the compact audio and video disk have been developed and commercialized in Europe and Japan. While our competitors are flourishing in their ability to commercialize technology, our technology base, especially in manufacturing, has withered away.

The Europeans view ATV technology as their answer to SDI, and are investing hundreds of millions of dollars annually on its development. The Japanese, having already spent at least three-quarter of a billion dollars, have indicated that they are going to double their already immense commitment to HDTV. If we have any hope of being able to compete with the Europeans and the Japanese, we must act now to provide financial assistance to American companies interested in HDTV.

I am introducing my bill on the same day that the American Electronics Association is unveiling its ATV Task Force findings and strategy for U.S. participation in the development of advanced television technologies. The AEA has been at the forefront of recognizing the importance of a domestic HDTV industry to our overall competitiveness in high technology. Their report urges the adoption of an industry-led strategy to facilitate the creation of an American HDTV industry.

My legislation would do precisely that. It was created in large measure in response to industry's call for government help in the de-

velopment of an American HDTV industry. The approach embodied in my legislation is modeled after Europe's Eureka '95 HDTV joint venture. My bill, if enacted, would:

Establish an industry consortium known as TV TECH to be funded and staffed by industry with finance assistance—loans and grants—from the Federal Government;

Encourage pilot projects and State incentives to attract the development of advanced television industries;

Provide protection for patents, royalty rights and license fees. Use royalties and licensing fees to repay government loans and support future research, restrict licensing to partnership with U.S firms and require component manufacturing in the United States; additional licensing fee of 25 percent for non-participants; and approval by TV TECH directorate for licensing permission. Directorate determines whether applicant would help or harm U.S. economy through licensing rights.

TV TECH would be managed by a directorate composed of selected chief executive officers of participating firms. TV TECH's commercial advisory panel and technical advisory panel would work in conjunction with project leaders of multiple advanced television project subgroups. An advisory council on federal participation would channel Federal moneys, provide expeditious access to cutting edge technologies, and help set appropriate research agenda.

Participation would be limited to U.S.-owned firms. The directorate and advisory council are given flexibility to arrange for technology transfer from non U.S.-owned firms.

If the United States does not seize the initiative and develop an indigenous capability in HDTV, we may soon face a scenario where the U.S. share of the worldwide HDTV market is a screwdriver industry. This means that American workers would simply build high definition televisions designed in Europe or Asia for foreign-owned companies which control the technology and hold the patents. Such a scenario is unacceptable, and unnecessary. To avoid it however, will take a massive commitment of resources by industry and the government.

My legislation would create the mechanism necessary to respond to the challenge posed by our European and Asian competitors. It is vital that Congress act decisively to respond to this challenge and give American industry the tools it needs to get us back into the HDTV race.

AMERICANS WITH DISABILITIES ACT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. CONTE. Mr. Speaker, I am again joining my good friend from California [Mr. COELHO] in introducing the Americans With Disabilities Act. We introduced a similar piece of legislation last year, that received support from 124 cosponsors, but only had one hearing held by one of the four committees to which it was referred. I am hopeful that with the changes made in this year's bill, we will see some real progress made in providing basic civil rights to America's disabled.

Why? Because 36 million Americans still are waiting for the opportunities of freedom to come their way. Twenty-five years ago, we enacted the Civil Rights Act. That legislation provided that no person would, on the basis of race, color, or national origin be denied the opportunity to travel freely or to choose where to live, work, eat, and educate his or her children.

The Americans With Disabilities Act provides those opportunities to the disabled. It is an omnibus civil rights bill that prohibits discrimination on the basis of disability in private sector employment, in all public services, in all public accomodation, in transportation, and in telecommunications.

I said this bill is different from last year's version, in some very important ways, including:

This bill will not require any retrofitting on buses;

This bill will not require that existing building must be made accessible unless renovations are planned anyway;

This bill proposes a more reasonable standard to which covered entities must comply; and

This bill limits the definition of persons with disability, and is not open ended.

Mr. Speaker, this is a better bill, with support from the business community and from the disability community. I am encouraged that we can enact this legislation, and that the leadership is encouraging all members from impacted committees to be involved in developing a strong bipartisan bill.

This legislation is overdue, let's get on with enacting it.

SCHOLARSHIP FUND ESTABLISHED IN MEMORY OF THOMAS BROWN

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. ENGEL. Mr. Speaker, in December 1988, Tom Brown, a young, community leader and tireless worker in my community passed away. Tom Brown was district manager of Bronx Community Board No. 11 for 11 years. During that period he worked almost full time to improve the quality of life for our community.

He seemed to devote almost all his waking hours handling the concerns and problems of others. Tom earned a reputation for dedication, fairness, and knowledge of government possessed by few people his age.

Tom Brown was always devoted to people and their needs. After graduating from college in 1963, he served with the Peace Corps. When he returned to the United States, he worked for the New York City Community Development Agency on various antipoverty programs. He went on to work for the City University of New York, first with the College Discovery Program and then with the Seek Program, again using his skills to help the poor and disadvantaged.

And yet with all his devotion to others, he never forgot or neglected his family, his wife Joan and his three children.

A person like Tom Brown is rare. The recent establishment of the Tom Brown Memorial Scholarship Fund will go a long way in carrying on his work.

MINIMUM WAGE

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. CLINGER. Mr. Speaker, because we are scheduled to consider the conference report on H.R. 2 later this week, I would like to enter into the CONGRESSIONAL RECORD a recent editorial from my hometown newspaper, the Warren Times Observer.

The points made in this editorial cut to the heart of the debate on H.R. 2, and I strongly recommend this piece to my colleagues.

[From the Warren Times Observer, Apr. 20, 1989]

MINIMUM WAGE: BUSH IS RIGHT

"All government—indeed, every human benefit and enjoyment, every virtue and every prudent act—is founded on compromise and barter."—Edmund Burke, Second Speech on Conciliation with America, 1775.

Burke's concept remains valid today.

As a general rule.

But as is true of all maxims, Burke's becomes an absurdity if carried to extremes.

A case in point is the current flap over raising the federal minimum wage. Congressional Democrats are roasting President Bush for his alleged failure to compromise between Bush's insistence on a 90-cent hourly raise by 1992, and Democrats' insistence on a $1.20 raise by 1991.

Democratic Sen. Edward M. Kennedy, whose rhetoric is "bleeding heart" but whose rigidity and arrogance reflect a heart of stone, wants to know why Bush won't compromise on the minimum-wage issue, when the President has compromised on several issues recently, ranging from Contra aid to the savings and loan crisis.

Kennedy conveniently omits several facts:

Bush has compromised. He has agreed to support a minimum-wage hike in return for Democrats' agreement to support a subminimum training wage for newly-hired employees.

Democrats haven't compromised. Their initial proposal was for an increase to $4.65. They dropped that to $4.55—but moved its effective date up in a tradeoff that leaves the effects of their initial proposals virtually intact.

Bush's concept of a training wage meshes with what most Americans would consider the term to mean: a subminimum wage for someone hired in a new job. Democrats insist that the term be restricted to people with no work history, i.e., a handful of 16-year-olds just entering the job market. And their proposal requires the employer to prove a newly-hired person hasn't worked before. If the applicant lies, the burden of proof, and its expense, must be borne by the employer.

The Democrats want a Minimum Wage Review Board. We've had recent experience with so-called "non-partisan" review boards. The last one to make news was the group

that recommended a 50 percent pay hike for members of Congress.

We pay members of Congress to go to Washington and make tough decisions. Votes on minimum-wage levels, like votes on Congressional pay hikes, should be made, up or down, by those elected to do so—not sneaked into law through the back-door antics of a "review board."

We could continue to support it if the President decides to compromise a bit.

But before that can happen, Kennedy and Congressional Democrats should stop playing charades and offer a compromise of their own—a real compromise.

On this one, Bush is right and Kennedy, as usual, is in left field.

SIX BRAVE SAILORS GIVE LIVES IN TRADITION OF NAVAL GALLANTRY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. BROOMFIELD. Mr. Speaker, if the early reports are accurate, America has lost six of its brave sailors who were patrolling the South China seas on the U.S.S. *White Plains.*

It is a reminder that America bears much of the burden for maintaining peace and preserving Democratic institutions in the world.

A cynic might say that nothing is worth dying for. I disagree. The very name of the ship, is a reminder of the Americans who lost their lives in the battle of White Plains. One hundred and fifty Americans sacrificed their lives so that others might be free to live under Democratic institutions.

I'd like to think that the six Americans on the U.S.S. *White Plains* followed courageously in their footsteps—that they share every bit as much in America's tradition of selfless gallantry as the men who gave their lives in the town of White Plains 200 years ago.

IN HONOR OF LINCOLN SQUARE SYNAGOGUE

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. WEISS. Mr. Speaker, I rise today to pay tribute to the Lincoln Square Synagogue which will celebrate its 25th anniversary on June 24, 1989. Lincoln Square Synagogue, with over 3,000 members, is a major international institute at the forefront of centrist Orthodox Jewry in America. This world-reknowned institution was founded by Rabbi Shlomo Riskin, and is led today by Rabbi Saul Berman, and Morton Landown, president. It is located in the 17th Congressional District which I represent. The synagogue is known for the diversity and creativity of its programs which are designed to broaden the boundaries of Jewish thought, preserve Jewish tradition and values, and challenge its followers to deeper understanding of Jewish religion and culture.

Lincoln Square Synagogue sponsors lectures and educational programs on Jewish and Jewish-related topics in which thousands have participated. It has led thousands of assimilated Jews back to their roots and taught them to incorporate the tenets of Judaism into their professional and personal lives.

Lincoln Square Synagogue demonstrates its concern for those who are less fortunate—Jews and non-Jews—by offering exemplary social service programs for New York's poor and homeless. The synagogue is at the forefront of the Soviet Jewry movement and recently sent a delegation of teenagers to the Soviet Union to hold what is believed to be the largest model Passover seder ever held in post-revolutionary Russia. The programs of Lincoln Square Synagogue have served as models in Jewish communities around the world.

I would like to take this occasion to also pay tribute to the six past presidents of Lincoln Square Synagogue who will be honored by the synagogue on June 4: Messrs. Fred Ehrman, Stanley Getzler, Daniel Mars, Arthur Morgenstern, Maurice Spanbock, and Sidney Trompeter. These fine men and their families have given outstanding leadership and service to the synagogue, the community, and the Jewish people. It is appropriate that a synagogue that has stood for so much good would honor these excellent men.

I join with the congregation and the West Side community in honoring its past presidents and the Lincoln Square Synagogue and in wishing the synagogue many more years of exemplary service. Its good work has been felt both inside and outside the Jewish community, locally and throughout the world.

A RESOLUTION ON THE RELEASE AND EMIGRATION OF VIETNAMESE REEDUCATION CAMP PRISONERS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. WOLF. Mr. Speaker, today I am introducing a concurrent resolution which calls upon the Government of Vietnam to expedite the release of remaining reeducation camp prisoners and permit the emigration of current and former prisoners.

This bill sends an important and timely signal that we have not forgotten the thousands of Vietnamese who were imprisoned for their association with the former Republic of Vietnam or for their suspected opposition to the present Government of Vietnam. This resolution has more than 30 original cosponsors and similar legislation has been offered in the Senate by Senator RUDY BOSCHWITZ.

The Vietnamese government has been more forthcoming it its approach recently to some humanitarian issues. It is time for this attitude to translate into action to permit both former and current reeducation camp detainees who wish to leave Vietnam, and their families, to do so.

Many Vietnamese families remain divided and Vietnamese-Americans have watched their relatives languish in reeducation camps nearly 14 years since the end of the Vietnam War.

Vietnamese boat people continue to meet tragic deaths at sea because they feel they have no other hope. Many former reeducation camp prisoners are among those who attempt risky boat departures despite the long odds against their survival—first asylum countries in Indochina have made it clear that their refugee welcome mat is no longer out—or their eventual emigration by this means.

Today, we call on the Vietnamese government to cooperate in preventing further deaths at sea, permit the reunification of many families, and honor their previous commitments by extending the Orderly Departure Program [ODP] to current and former reeducation camp prisoners.

I urge my colleagues to join in support of this resolution.

H. CON. RES. —

Whereas 14 years have passed since the end of the Vietnam conflict;

Whereas thousands of opponents of the Government of the Socialist Republic of Vietnam, including officials of, and others associated with, the former Republic of Vietnam, were detained without trial in "reeducation" camps or prisons beginning in 1975;

Whereas a series of large-scale amnesties took place in the late 1980's resulting in the release of many detainees;

Whereas despite these welcome releases, many Vietnamese remain in long-term detention because of their suspected opposition to the Government of Vietnam, and many family members of detainees do not know their status;

Whereas the Government of Vietnam has continued in recent years to imprison individuals because of their political and religious expression or association or related nonviolent activity;

Whereas the Government of Vietnam has stated publicly that the remaining "reeducation" camp or prison detainees would be released and that former detainees would be allowed to emigrate;

Whereas the United States has repeatedly stated that the resettlement of "reeducation" camp or prison detainees is one of its highest priorities in its dealings with Vietnam on humanitarian issues and has made it clear to the Government of Vietnam that it is willing to allow former and current detainees to enter the United States;

Whereas at negotiations held in Hanoi in July 1988, the United States and Vietnam agreed in principle on the resettlement of those released from "reeducation" camps or prisons and Vietnam reaffirmed that released detainees and their families could emigrate from Vietnam;

Whereas the Government of Vietnam subsequently suspended negotiations on the issue of the resettlement of detainees and their families; and

Whereas the willingness of the Government of Vietnam to satisfactorily resolve this humanitarian issue will have an important bearing on the relationship between Vietnam and the United States: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress calls on the Government of Vietnam—

(1) to make public the names of all individuals who continue to be held in "reeducation" camps or prisons in connection with suspected opposition to the Government of Vietnam;

(2) to release immediately all remaining long-term "reeducation" camp or prison detainees, as well as all individuals imprisoned in Vietnam in recent years because of their political or religious expression or related nonviolent activites; and

(3) to resume negotiations, without preconditions, with the United States concerning the emigration from Vietnam of current and former detainees and their families, in accord with the commitment of the Government of Vietnam to allow their emigration.

TRIBUTE TO FAY BRISK

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. BROWN of California. Mr. Speaker, one of the responsibilities of the House Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture, which I chair, is oversight of the Animal Welfare Act. This subject area is a very contentious one marked by strongly held views on all sides of the issue. It is one of those very difficult legislative areas which test the stamina and creativity of government. It is also an area in which caring and reasonable points of view are especially valued, as we try to thread our way toward eventual solutions.

As we begin the process of considering legislation and regulations on animal welfare issues in this Congress, we will miss one of those caring and reasonable people who have contributed so much in the past. On January 13, one of this country's most important animal welfare advocates, Fay Brisk, passed away, leaving behind her an impressive legacy of achievement in animal welfare legislation and a warm memory of her personal dedication to the humane treatment of animals.

A native of Reading, PA, Fay Brisk began her career as a reporter for the Reading Eagle and the Philadelphia Record, and later joined the Women's Army Corps as a public information officer. In 1947, she moved to Washington, DC, and joined the Economic Cooperation Administration as a press officer. She joined the U.S. Information Agency in the early 1950's and became domestic news chief in 1959.

From 1962 until her retirement in 1971, Fay served with the Small Business Administration and, for 8 years, was detailed to the White House during the Kennedy and Johnson administrations. There, she worked on Medicare and consumer information projects.

But Fay was known and respected perhaps more for here achievements that came late in her career and after her retirement. Motivated solely by personal interest, she worked out of her home in Washington, DC, to improve animal care standards. She often made helpful suggestions and become known as the conscience for animal welfare. She was objective and understanding.

Fay was probably most noted for her efforts to improve laboratory and transport conditions for animals; she was not afraid of siding with the underdog. Her untiring investigations into animal abuses around the country were invaluable contributions toward the establishment of the Animal Welfare Act in 1966, which made it a crime to use stolen pets for medical research. That same year, she was named Humanitarian of the Year by the Humane Society of the United States. In 1972, Fay was instrumental in establishing a volunteer animal port at Washington's National Airport to ensure that animals waiting to travel on flights were properly housed and fed. She rallied support around the country for the humane treatment of animals and, in 1976, received the Albert Schweitzer medal from the Animal Welfare Institute.

Fay's work was respected not only because of her professional integrity, but because her loyalty to the issue always played a positive role in animal welfare concerns. She was supportive of the Department of Agriculture, made numerous constructive suggestions, and was proud to consider herself a team player with departmental and congressional cooperators.

The Department, the Congress, and the Nation's animals have indeed lost a good friend, and we will all miss her.

TRIBUTE TO KEN SCOTT

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. HEFLEY. Mr. Speaker, in Elbert County, CO, he is known as Mr. Republican, and for good reason. Kenneth Scott served as chairman of the Elbert County Republican Committee for 20 years—longer than any county chairman in Colorado's history.

Ken Scott first came to Elbert County in 1915 when his parents left his native Arkansas for Colorado. Due to a trade deal that went sour, the family headed back to Arkansas, then moved to Kansas, where Ken finished school—was captain of the football team and senior class president.

Ken's parents returned to Colorado for keeps in 1922. They settled in the Kiowa area.

Ken and his wife Lyndall, who passed away in 1983, raised four children. His oldest son, Ken, Jr., succumbed to a fatal illness in 1986 at the age of 56. His son, Larry and daughter, Mary Filson, both live in Fort Collins, and a third son, Jim, lives in Great Falls, MT.

Ken has an extensive background in agriculture. He owns 1,383 acres along Comanche Creek. Up until 2 years ago Ken was still doing the hay cutting and baling.

In addition to farming and ranching for 39 years, Ken also operated the Ken Scott and Co. trucking firm. His right hand man was his oldest son. Ken Scott and Co. would haul just about anything.

Ken served as division chairman and as board director of the Colorado Motor Carriers up until the time he quit trucking in 1975.

In 1964 Ken was elected committeeman for precinct No. 3. He attended his first State assembly in 1966. It was there that a long-time friend started calling him "Mr. Republican," and the nickname stuck.

Ken accepted the assignment of Elbert County Republican chairman in 1968. During his rein as chairman, Ken accomplished many things. In odd numbered years he arranged the county organizational meetings. In even numbered years he handled the precinct caucuses, where precinct committeemen are elected. He delivered precinct caucus signs to committeemen. He lined up worthy candidates for local offices, and spearheaded fundraising efforts to finance their campaigns. He rubbed shoulders with top officials when he attended a national convention and every State assembly since 1966. And last but certainly not least, Ken founded the Elbert County Lincoln Day Dinner, an annual event held each February in Kiowa.

Having been active in politics for so many years, Ken has a hard time understanding the apathy demonstrated by most citizens. Of particular concern to him is the large block of unaffiliated voters, which in Elbert County outnumbers both the Republicans and the Democrats. Ken also has no use for mudslinging and dishonest campaigning. He believes we need candidates we can have confidence in. Ken's philosophy is that if any public servant hopes to win any measure of confidence and respect, honesty and integrity are essentials.

Ken has been instrumental in the success of my campaigns over the years since the days when I represented Kiowa in the State senate. I couldn't think of running for a new office without first seeking Ken's wisdom and judgment.

The Elbert County Republicans recognized the virtues of honesty and integrity in Ken and recently bestowed on him a special honor. As a tribute to his many years of service, the Elbert County Republican Central Committee has modified its by-laws to establish a new voting position as chairman emeritus for a true man of character—Kenneth Scott.

TRIBUTE TO BARBARA BERTAGNOLI

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Mr. DAVIS. Mr. Speaker, I would like to take this time to extend congratulations to Mrs. Barbara Bertagnoli, a teacher in the Gaylord, Michigan public schools, who has recently been selected as the National Education Association's Midwest Regional Outstanding Elementary Student Teacher.

Mrs. Bertagnoli has been pursuing her degree and a teaching certificate through Central Michigan University. This semester she has been student teaching full time in the classroom. The National Education Association conducted a national competition in which Mrs. Bertagnoli prepared a lesson plan and submitted a video of one of her class lessons. She was one of only six regional winners across the Nation.

As a strong supporter of education, I am proud to represent a person who has decided to dedicate her life to educating others. Young people in the 11th Congressional District will benefit tremendously from Barbara's efforts and expertise for many years. With teachers like Barbara educating our young people, America's future is bright.

On behalf of the Congress, the students Barbara teaches, and the many others who

will be affected by her knowledge, concern, and skills, I extend to Barbara Bertagnoli congratulations, thanks, and wishes of much success in her future endeavors in the education field.

HUMAN NEEDS AND MOBILITY

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 9, 1989

Ms. SCHNEIDER. Mr. Speaker, today I am being joined by several of my colleagues in introducing a joint resolution on "Human Needs and Mobility," which addressed a subject virtually ignored by decisionmakers both in development agencies and lending institutions: the transportation needs of those who comprise a majority of the Earth's people, the Third World poor.

Lack of transport is one of the gravest problems facing the world's underdeveloped and debt-ridden countries. The virtual absence of this fundamental need adversely affects the health, well-being, and economic productivity of hundreds of millions of impoverished human beings.

For millions of families the daily reality requires hours of hand carrying heavy loads of water and firewood located miles from their dwellings. The respected international assistance organization, Save the Children, finds a lack of transport to critically undermine essential health services. For example, the absence of vehicles leave health posts without medicines, mobile vaccination campaigns are not carried out, the sick are not transferred to medical attention, and much disease prevention and health promotion goes untapped because people cannot visit health centers.

Although development agencies and lending institutions have engaged in expanding motorized transport services in developing countries, in practice this is an unrealistic possibility. Even bus fare, let alone simple motorbikes or cars, are beyond the reach of hundreds of millions of families. Lack of money for the purchase of motorized transport, plus problems with maintenance, repair and supply of fuel, lubricants and spare parts, makes it unlikely that in the short- and medium-term these will be a real answer to the transport problems of families, or workers in the health, welfare, education, and assistance community.

Save the Children, the Peace Corps, UNICEF and other private and public development agencies working at the village level have found a variety of nonmotorized vehicles to be quite in line with needs of cash-poor families and local agencies. Bicycles and tricycles, for example, are relatively cheap to buy, easy to assemble and maintain, require little in the way of lubrication and nothing in the way of fuel. Millions of families currently use them, often in conjunction with carts, to transport up to 400 pounds of cargo over even the most difficult terrain. There is a long tradition of using such human-powered vehicles to transport agriculture products, fuelwood, water, manufactured goods, clothes, drugs, and medical materials, and even for use as an ambulance in emergencies.

Unfortunately, development programs funded in part by the United States currently promote policies favoring capital-intensive highways and motorized vehicles, to the exclusion of nonmotorized options. All too frequently, the low-cost, nonpolluting, more broadly affordable, human-powered vehicles are marginalized or destroyed. A few stark examples make the point.

Jakarta, Indonesia has thrown 75,000 tricycles, the basis of a thriving system of microenterprises, into the sea, ostensibly to reduce traffic congestion. El Salvador spends over one-half of its export earnings on petroleum, yet only a tiny minority can afford cars.

One-quarter of the World Bank's portfolio is invested in transportation-related projects, yet almost nothing goes for vehicles people can afford or to encourage nonmotorized, low-cost forms of transportation. Similarly, the U.S. Agency for International Development [AID] has no projects related to reducing transport-related energy use or promoting sustainable substitutes. Humanitarian relief distribution in Mozambique and Ethiopia relegate women to pack animal status to head carry 100-pound sacks of grain from distribution centers to villages.

Sustainable and affordable transportation strategies are desperately needed to address the mobility needs of all without destroying the environmental resources that underpin sustainable economic development. The "Human Needs and Mobility" resolution builds upon language inserted in the fiscal year 1989 House foreign operations' appropriations bill. It recognizes the problems of too little transport for so many people, and emphasizes actions to be taken by AID and U.S. representatives to multilateral funding institutions to provide real and sustainable solutions for the mobility needs of the poor in developing countries.

If we are to encourage flourishing microenterprises as a means of helping people help themselves to overcome their impoverished conditions, and transform aid-dependent nations into thriving trade partners, then we need to assist in the development of sturdy, low-cost, sustainable transport options appropriate to local conditions.

SENATE—*Wednesday, May 10, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 1 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. The prayer will be offered by Dr. Richard C. Halverson, the Senate Chaplain.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Now faith is the substance of things hoped for, the evidence of things not seen.—Hebrews 11:1.

Almighty God, Creator, Sustainer and Consummator of history, thank Thee for the mighty giants of biblical record whose exploits by faith generated monumental progress in human history. Enoch, Noah, Abraham, Isaac, Moses, Gideon, Sampson, David, and unnumbered others who, in faith laid the foundation of Western civilization.

In light of the political wisdom of our Founding Fathers who conceived the unprecedented system by which we function here today, help us to experience their faith, fountainhead of their vision, by which we govern in this technological age. Deliver us from the secular spirit which denies deity and the genesis of human progress. Save us, Father God, from human pride which trusts only itself and follows a godless way.

In His name who is Lord of Heaven and Earth we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, under the existing order, following the time of the two leaders this afternoon, there will be a period for morning business not to extend beyond 2 p.m. with Senators permitted to speak therein for up to 5 minutes each.

I now ask unanimous consent that the period for morning business extend until 2:30 p.m.

The PRESIDENT pro tempore. Without objection, that is the order.

Mr. MITCHELL. Mr. President, at 2:30 the Senate will then proceed to Senate Joint Resolution 100, a resolution disapproving the Presidential certification with respect to the Bahamas.

Under a unanimous-consent agreement, time on this privileged resolution has been reduced to 2 hours from the statutory time limit of 10 hours. If all time is used, therefore, a rollcall vote will occur on the disapproval resolution at around 4:30 p.m. today. Senators should be on notice therefore that a rollcall vote will occur around 4:30 today.

Mr. President, I reserve the remainder of my leader time, and I yield to the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection, the majority leader reserves his remaining time.

RECOGNITION OF THE REPUBLICAN LEADER

The PRESIDENT pro tempore. The Republican leader is recognized.

RESERVATION OF LEADER TIME

Mr. DOLE. Mr. President, I reserve my time.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for the transaction of morning business to extend until the hour of 2:30 p.m. today with Senators being permitted to speak for not to exceed 5 minutes each therein.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Ohio is recognized for not to exceed 5 minutes.

INDEPENDENCE DAY IN ISRAEL

Mr. METZENBAUM. Mr. President, today, May 10, 1989, is Independence Day in Israel. Israelis are celebrating 41 years of statehood, and I join the millions of Jews and non-Jews around the world who are celebrating with them.

No matter what perspective you take, 41 years is a drop in the bucket when it comes to the course of history. Yet, Israel has lived through a greater number of mortal threats than have many other nations over centuries.

Israel has also contributed more to the intellectual, economic, and cultural welfare of mankind during its short 41 years than many, if not most other, longer lived nations.

Mr. President, I would hazard a guess that Israelis are thinking very hard about history today. As they celebrate independence, I am certain that they are also thinking about the cost of their sovereignty.

Israelis have paid a heavy price for self-determination over the years. For those of my colleagues who have never visited Israel over the Independence Day holiday, I want to describe a truly unique phenomenon.

Israel's Independence Day is preceded immediately by Memorial Day, and the transformation from sorrow to celebration is remarkable. Virtually every Israeli has lost a close relative and perhaps a close friend to war or terrorism. An underlying, if unspoken, fact is that more lives will probably be lost before Israel's borders are respected, and Israeli citizens are free from fear. The pain of Memorial Day in Israel is felt on a very personal level, and the Sun sets on a country immersed in mourning.

Yet, when the following day breaks—Independence Day—Israel has risen above the grief to begin its annual celebration of freedom.

Mr. President, Israelis are also paying an emotional price for their independence. Every day, we hear critics proclaim the demise of Israeli democracy. From what we read in the papers, one might think that Israel has become a police state gone wild. The uprising in the West Bank and Gaza Strip has strained Israeli democracy, to be sure. It has tested Israel's commitment to human rights, and some say it is even beginning to tear the very fabric of Israeli society.

Mr. President, what this means to me is that democracy is alive and well in Israel as 41 years of independence

are celebrated. Israel is not a country of only one mind. Israel has divergent points of view, and these can be expressed freely. I reject the suggestions that Israel is off on the road to repression. Repressive nations do not feel anguish about their policies; repressive nations do not openly debate government decisions and permit vocal public protests; and repressive nations do not indict and convict their own soldiers for abuses of power.

Mr. President, repressive nations just do not care.

Israel, on the other hand, is anguished over the situation in the occupied territories; many Israelis—including uniformed members of the armed forces—are engaging in loud, heated debate over Government policies; and Israel is taking to task those who abuse their powers in the name of national security.

Mr. President, Israelis do care. They have heart. They have a sense of human rights and decency, and they suffer along with the rest of the world when they see the problems and the conditions that affect West Bank and Gaza residents. Israelis read newspapers, they watch television: they have strong feelings like the rest of us after viewing confrontations between Israeli soldiers and the rock throwers. This fact, that those who are bent on dissension and violence in the territories still receive Israelis' sympathy, is another example of how deeply in Israel runs the current of democracy and human rights.

A democracy in Israel's precarious position must make very tough decisions about law and order. This is a fact that seems to be swept under the rug, along with coverage of the many public demonstrations and protests taking place on a regular basis in Israel. What we see in Israel is a vibrant democracy that is attempting to uphold normally high standards of human rights during a crisis of national security.

Mr. President, a remarkable fact about Israel at 41 is that it has survived as a democracy, through a virtually uninterrupted series of external threats. In the course history we have seen nation after nation fall under the influence of saviors when threats to life and limb arise. "So-called saviors," I might say. Israelis have had the strength of character, and the faith in political pluralism to reject and totalitarian alternative despite enormous pressure from enemies around the world.

Each Israeli Independence Day is a tribute to the character of Israel's people. Israelis have survived many crises in their short history, and they will survive many more in years to come.

Mr. President, it is an honor to wish a very determined nation a very happy birthday at age 41.

Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CONRAD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from North Dakota is recognized for not to exceed 5 minutes under the order.

Mr. CONRAD. Thank you, Mr. President.

(The remarks of Mr. CONRAD pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDENT pro tempore. The senior Senator from Nevada [Mr. REID] is recognized for not to exceed 5 minutes.

Mr. REID. I thank the Chair.

(The remarks of Mr. REID pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

COMMENDING THOSE WHO WERE OF ASSISTANCE FOLLOWING THE PEPCON EXPLOSION

Mr. REID. Mr. President, the PEPCON explosion in May 1988 was a tragedy and disaster that tested the will and resources of people all across Nevada.

Three explosions at the Henderson plant killed 2 workers and injured more than 350 others. The blasts left a ring of destruction 8 miles wide, knocking cars off roads, shattering windows and shaking buildings 10 miles away in downtown Las Vegas. A toxic cloud covering 5 square miles drifted over the Las Vegas Valley.

This disaster created outright havoc in many quarters. The roads into and out of Henderson were jammed for more than 4 hours. School children were quickly evacuated. More than 160 firefighters from departments all over the valley were called upon to help. Over 60 law enforcement officers directed traffic. Doctors and nurses worked through the day and night to care for the injured.

The PEPCON explosion helped bring out the best in the people of Nevada. We responded quickly. We cooperated. We worked together to get through the crisis.

Crises are like that. Nevada was lucky to have so many individuals who did their best, literally under fire, to save lives and keep the public informed of the crisis.

The Society of Professional Journalists—Sigma Delta Chi—recently chose KRRI-FM 105.5, in Boulder City, NV, to receive its national award for Best Radio Spot News Reporting in 1988. KRRI-FM received this award because of their news coverage of the tragic PEPCON explosion.

When tragedy struck, KRRI abandoned its rock'n'roll format for more than 4 hours. Its entire staff, including receptionists, sales personnel and station owners reported the story. The station became a center for community action and response.

KRRI's public service is now an object of respect well beyond Nevada and the West. Everyone who cares about public safety and civic responsibility can be proud of their accomplishment and national acclaim. The rest of the country can now acknowledge KRRI-FM for what we in Nevada have long valued and appreciated—a job well done.

On behalf of the people of Nevada, I commend them and all the other news organizations and citizens who did so much during that time of crisis. Keep up the good work.

Mr. PRESSLER addressed the Chair.

The PRESIDENT pro tempore. The Senator from South Dakota [Mr. PRESSLER] is recognized for not to exceed 5 minutes.

(The remarks of Mr. PRESSLER pertaining to the introduction of legislation is located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. PRESSLER. Mr. President, I yield back the remainder of my time and I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WIRTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Colorado is recognized for 5 minutes.

FAREWELL AND GOOD LUCK TO SCOTT BUNTON

Mr. WIRTH. Mr. President, I wish this afternoon, to say farewell and good luck to Scott Bunton, who served in two senior staff roles in my offices over the past 2 years.

Scott is joining the MCI Communications Corp., as senior policy adviser for corporate government affairs.

Scott, as many of my colleagues and veteran Senate staffers can attest, was a professional Senate staff member with few equals on Capitol Hill. During his tenure, Scott developed an exceptional knowledge of the rules and protocol, and demonstrated an un-

yielding commitment to the traditions and procedures of this great body.

A Texan by birth, Scott is a gentleman in every aspect of the word. He is both an orator and a wordsmith; his work shows a fine appreciation for both the spoken and written word. A conciliator by instinct who prefers to seek bipartisan harmony, Scott is also a good Democrat upon whom other good Democrats can rely.

Before joining my staff in May 1987, Scott Bunton served then-Majority Leader ROBERT C. BYRD as staff director of the Democratic Policy Committee. He brought with him from that experience strong diplomatic skills, a broad and deep knowledge of an impressive range of major legislative issues, and the high regard of Senators and senior staff from both sides of the aisle.

Scott joined my staff as legislative director, but after only a few months I asked him to take on the lead role of administrative assistant. His counsel on Senate matters, both political and policy-oriented, was consistently excellent. His policy strength—defense and national security issues—served me well in my work as a member of the Senate Armed Services Committee and during a recent tour of the North Atlantic Treaty Organization military bases. Scott is also well-versed in constitutional issues, and played a key role in drafting and shepherding the Campaign Finance Reform Act (S. 2) in the 100th Congress.

My staff and I will miss Scott's good humor, professionalism, wealth of knowledge and commitment, but we also wish him the best of luck in his new endeavor. The Senate is losing an extremely able statesman, but I suspect he will always be a friend of this institution regardless of where his career takes him. I wish to give Scott my heartfelt thanks for his service.

Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROCKEFELLER. Will the Senator withhold?

The PRESIDENT pro tempore. The request is granted. The Senator from West Virginia is recognized for not to exceed 5 minutes.

Mr. ROCKEFELLER. I thank the distinguished Chair. This is the first time the junior Senator from West Virginia has been recognized by his senior colleague to speak on the floor of the U.S. Senate. It is a moment I will long remember.

UNITED STATES-JAPAN TRADE REPORT

Mr. ROCKEFELLER. Mr. President, I would like to draw my colleagues' attention to a recent report on United States-Japan trade problems that was submitted to the United States Trade Representative by the Advisory Committee for Trade Policy and Negotiations, the ACTPN. This report has raised a number of very important issues and includes insightful recommendations that anyone interested in our trade and competitiveness problems should consider seriously.

The ACTPN was first established in the early 1970's to advise the President on the Tokyo Round of multilateral trade negotiations. The 1988 Trade Act provided for an expansion in the ACTPN's role to advise the President on all elements of American trade policy. In 1987, the ACTPN decided that a thorough study of our trade policy with Japan was needed, and it established a task force on Japan under the leadership of James Houghton, chairman of Corning Glass Works.

This report, entitled "Analysis of the US-Japan Trade Problem," provides a realistic and pragmatic analysis of the current economic and trade problems facing our two countries. It offers a broad set of macroeconomic recommendations to both the United States and Japan—we have to reduce our budget deficit; Japan must continue to stimulate domestic demand and implement fully the structural reform recommendations of the Maekawa Commission; and there must be improvement in the level of bilateral consultations on macroeconomic issues. These are all necessary measures, and I endorse them fully.

It is at the microeconomic level where the ACTPN report breaks new ground. It recommends that the United States:

Establish which sectors should receive priority in United States trade negotiations with Japan; determine how a successful outcome would be defined; negotiate to achieve that outcome, with particular use of the Super 301 provisions of the 1988 Omnibus Trade Act; monitor Japan's implementation of the agreements reached in these negotiations; and take decisive action should Japan not fully implement those agreements.

I think that all of us would prefer to negotiate open markets and then watch American companies either sink or swim, depending on whether or not they are truly competitive when confronted by a level playing field. But, over the past decade, we have found that such an approach just does not work in Japan. In our negotiations with most countries, breaking down visible barriers generally results in more exports. In Japan, however, the visible barriers represent only one level of obstacle, with many barriers still remaining. These include the distribution system, the "keiretsu" system of industrial groupings, totally inadequate enforcement of antitrust laws, and a patent system that Japanese industry can use to get our high technology on the cheap and to stymie American high-technology competition.

I am glad to see that the members of the ACTPN have come to share the belief held by many of us in the Congress that the traditional rules and procedures of trade negotiating and trade policy just do not work in Japan and that extraordinary measures are required. Although I do not necessarily endorse every single recommendation in the ACTPN report, I heartily welcome this fundamental shift in approach. It represents a breakthrough in questioning the assumptions on which our bilateral trade policy with Japan has been based. I hope those in the executive branch responsible for the formulation and implementation of our trade policy with Japan will heed the direction the ACTPN is trying to set.

Buttressing the ACTPN report is an issues paper recently released by ECAT, the Emergency Committee for American Trade, which is chaired by Allen Jacobson who is chairman and chief executive officer of 3M Corp. ECAT recommends that "the United States seek an agreement with Japan to ascertain and implement effective means to increase United States exports in order to reduce the United States-Japan bilateral trade deficit to an approximate target level—perhaps by one-half—over the course of the next 5 years."

Mr. President, we are in a crisis situation in our trading relationship with Japan, and that calls for imaginative and extraordinary measures. I hope that these two reports from the American business community will help us understand the need for such action.

Mr. GRASSLEY addressed the Chair.

The PRESIDENT pro tempore. The Senator from Iowa [Mr. GRASSLEY] is recognized for not to exceed 5 minutes.

REMEMBERING THE VICTIMS OF THE U.S.S. "IOWA"

Mr. GRASSLEY. Mr. President, in times of national tragedy, Americans seem to draw closer together as we share the common pain that comes from a sense of loss. One such event occurred on April 19 when an explosion in a gun turret No. 2 aboard the U.S.S. *Iowa* took the lives of 47 brave sailors.

Last week, I introduced Senate Joint Resolution 112 designating May 29, 1989, as the national day of remembrance for the victims of the U.S.S. *Iowa*. I urged last week, and I urge again, my colleagues to join me in sponsoring this resolution. It is my hope that both the House and Senate will act promptly so that we might honor these sailors and express our

sympathy to the loved ones they left behind.

We are certainly not alone in the search for a way to express our sorrow. So I would like to have printed in the RECORD a tribute that appeared in the New York Times on April 27. It was written by Edward Patterson. It is entitled "Forty-Seven American Sailors-Sons."

It seems that we all grasp for a way to express not only our grief and sympathy in a situation such as this, but also our thanks for and admiration and pride in these people. I found Mr. Patterson's tribute especially poignant, and I hope that we in Congress can soon join in honoring these brave men by passing Senate Joint Resolution 112.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FORTY-SEVEN AMERICAN SAILOR-SONS

She, among all the rest, had about her the consummate grace and style that won the coveted prize for surpassing beauty in America's lovely pageant of naval ships, each one named for the state she represented. Her sleek lines and adroitly architectured superstructure came together like a perfectly coordinated surfer riding the wind-swept white peaks of cresting waves then plunging, perfectly balanced, like a downhill skier into the valley of the sapphire blue and churning sea.

They called her Iowa. Of all the others in competition with her, her landlocked name alone somehow conjured up the soft-grey mystical image of sea gulls cavorting just a tarpon's leap above the surface of the sea or invoked the eerie sound of shredded wind sliced into long strips of mournful wailing, ripped to pieces, stampeding on its speeding course through a ship's cold, steel wire rigging.

With her crew at general quarters and her guns in turret two manned and ready, the fateful order to commence firing ricocheted off the steel bulkheads. Her rifles, elevated from inside her turret, with long fingers from a hand grasping for something out of reach. In a blinding flash, the lethal gun powder that propels her projectiles exploded, leaving forty-seven brave sailors dead yet obedient to orders and faithful to the perilous duty assigned them.

The injured beauty slowed to an agonizing limp. There was nothing young and vibrant and full of hope about her any more. It was as if her long, sleek lines and pleasing superstructure once, like a navigator's handsome extended telescope, was now stuffed back within itself, stunted, shabby, miserable. She seemed to take all the blame and bear all the grief.

Her ensign flies at half mast. She dreads each mile of tortured water on the way back along her personal Calvary passing through the woeful gates into her home port. But her ancient glory is not a passing thing, subject to the whimsy of some fickle spirit. God rests the anxious, worthy heart and refits it stronger than it ever was before.

So, now, do not think you have lost your sons. Their wounded ship is not one great coffin buried in the trackless, nameless cemetery of the sea. A favorable breeze from a watchful heaven yet cradles them, the children of God. Then, other sailors' sturdy, caring hands carry them to some sacred ground, a safe harbor, near home, a dwelling where each American is a family member. Their intermingling tears of pride and sorrow keep evergreen the mounds of emerald grass that covers your sons and preserves, eternally, the fresh memory of their patriotic sacrifice.

Twin truths adorn this otherwise melancholy action permanently branded on the consciousness of those who lived to see or will live to learn about the catastrophe aboard this famous American battleship. The noble name of Iowa will everlastingly be found in a state of sadness and becoming gratitude. Then, too, the same God who listens to our perplexing questions seems clearly to answer, "Who keeps the peace saves the lives and wins the war that is never fought."

Forty-seven United States sailor-sons have seen to it that it was not really them at all, but only death itself that died in vain.

DEBT RELIEF FOR FARMERS

Mr. GRASSLEY. Mr. President, today, I would like to raise an issue that is becoming a growing problem for our Nation's farmers who are attempting to pull themselves out of the recent farm economy crisis.

The problem revolves around an amendment of the 1988 Tax Technical Corrections Act that could detrimentally affect farmers' debt restructurings, including restructurings that were accomplished before the Technical Corrections Act became effective.

In the 1988 Tax Reform Act, I along with others, worked very hard in the Finance Committee to provide tax relief to farmers who needed to restructure a farm debt to continue farming, but wanted to avoid the catastrophic consequences of bankruptcy. Congress provided this relief in 1986—or so we thought—by not taxing gain on forgiven qualified farm indebtedness under Internal Revenue Code section 108(g). Before this 1986 modification, the Tax Code discriminated against farmers compared to other businesses, who could reduce the basis of their depreciable assets to avoid a tax liability. Because farmland is a nondepreciable asset, farmers were unable to take advantage of this option.

Unfortunately, a technical amendment slipped through last year that could allow the recognition of income if a farm restructuring ultimately exceeds a farmer's tax attributes and basis. Many agricultural restructurings do create a paper gain beyond a farmer's basis and tax attributes that would, in fact, create a disastrous tax liability. Therefore, a great deal of confusion and apprehension has surfaced in the business of restructured farm loans.

Mr. President, as a former member of the Finance Committee who was involved in initiating assistance under section 108(g), it is my belief that Congress did not intend to give debt relief to distressed farmers and then turn around and gouge them with a huge tax bill. True debt relief includes real tax relief. It just makes no sense to help farmers write down their debt in order to keep farming, and then slap them with a tax bill that will put them out of business as well as help disrupt the farm credit market.

Mr. President, under the leadership of Senators DOLE and KASSEBAUM, a number of us have brought this problem to the attention of Treasury Secretary Brady, and have asked the Secretary for assistance in resolving this growing problem.

It is my hope, Mr. President, that the onerous 1988 technical correction will be, at the very least, applied only prospectively. I hope to work with others in securing a recorrection of section 108(g) that will provide real debt relief to distressed American farmers.

Mr. President, I suggest the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SHELBY). Without objection, it is so ordered.

MONUMENTAL DECISION FOR VIETNAM VETERANS

Mr. DASCHLE. Mr. President, the veterans in this country owe the Vietnam veterans of America a real debt of gratitude. For the last 5 years that organization in particular has helped lead the way in arguing that the Federal Government has set a double standard with regard to the way we treat veterans exposed to agent orange. Agent orange victims have been put in a separate class, set apart from all other veterans in the way we determine eligibility for disability compensation.

For the most part, that organization's arguments have fallen on deaf ears. The courts, the administration, and even to a certain extent the Congress, have not been willing to listen.

Last week a Federal judge in California provided us with a landmark decision in a case initiated by VVA. That judge ruled for the first time that the VVA, the American Legion, the VFW, the DAV, and many Members of Congress were right, that indeed Vietnam veterans who were disabled as a result of their exposure to agent orange are being held to an unfair standard. Furthermore, he ruled that, indeed, within the unfair standard itself we are not giving the veterans the benefit of the doubt that the law in question—Public Law 98-542—guarantees them.

The significance of this decision could be monumental. Certainly it is going to require the Department of Veterans' Affairs to write new, far more generous, regulations, and, without question, it is going to require that the Department reopen each and every one of the over 30,000 agent orange-related claims filed by disabled veterans. Maybe now those veterans will get the fair and careful attention they deserved all along.

The only problem with that good news is that we have had to wait 5 years for it to come about, and that is wrong. Those disabled veterans have never asked for anything more than their due, anything more than what any other disabled veteran has asked the Government to provide them. In the cases of other presumptive disabilities, and there are now 54, we have given the benefit of the doubt to veterans. Now we are asking, once again that the Veterans' Administration realize the consequences of this decision in California and, recognizing those consequences, establish presumptive disability compensation for at least non-Hodgkin's lymphoma and soft-tissue sarcoma and open its eyes to information on the many other diseases that may also be associated with agent orange exposure.

The past administration tried—and succeeded in making this simple issue of fairness a more complicated one. There have been delays and there have been denials; there have been scientific and legal technicalities, such as the VA regulations in question—all used to thwart the agent orange victim's right to compensation. But somehow the judge was able to sift through all of this. He spoke with clarity and got the argument back to the real issue—that veterans disabled by agent orange have been cheated.

So now the question is, where do we go from here? Certainly with non-Hodgkin's lymphoma and soft-tissue sarcoma, there can be no question that the VA would be making a tragic mistake—and I indicated this to the Secretary just this morning—if they appeal this decision. They will be making a tragic mistake if, once again, they obfuscate this issue and go back to all the technicalities they have relied upon for 8 years to create a tragic and neglectful policy.

So I am hopeful that this landmark decision will require new, landmark decisionmaking within the Department of Veterans' Affairs. A new policy is long overdue.

It is raining outside, but I will bet if you were to go to the Vietnam veterans memorial right now, there would be people there. As I was walking over to the floor, I was reminded once again of my first visit to that memorial. In this city it is difficult to find a memorial that is unlike all the others. But there is one. It is the Vietnam veterans memorial. Every other memorial is white. That one is black. If you go to the memorial on any given day, you are inevitably struck by the number of people who kneel at that memorial, who place flowers, notes, flags, and gifts there, who put their fingers in the letters of the names inscribed in that black marble. I have not forgotten my first visit there. I have not forgotten it because of what was said to me as I and the Vietnam veterans with me turned away from it.

I saw mothers and wives, sisters and brothers look with awe at that monument. When I turned away, I might have missed its meaning were it not for the admonition I got from the veterans who were with me that day. They said, "Tom, the meaning of this memorial isn't what you've just seen because it is not what you carve in marble that ultimately is going to have an effect on me, it is what you write in law."

There is nothing more meaningful to me as I consider this court ruling and the legislation we wrote in 1984 as an answer to that admonition. It is not what we carved in marble in that black memorial. It is what we write in law that means something to the thousands of veterans and their survivors, who deserve justice and acknowledgment. Now is the time to speak clearly and forcefully about the need to ensure that victims of agent orange finally get a fair chance.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COATS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Indiana is recognized.

Mr. COATS. I thank the Chair.

(The remarks of Mr. COATS pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

DAVID B. PERINI ON COMPETITIVENESS IN THE U.S. CONSTRUCTION INDUSTRY

Mr. KERRY. Mr. President, U.S. economic competitiveness has been a topic often discussed in recent years. Increasingly, as we in the Senate and throughout Government address an issue, we examine its impact on U.S. economic competitiveness. And although I firmly believe that we in government must do everything we can to address the demands of an increasingly global, technological, and competitive marketplace, it is U.S. business leaders who are on the front lines of this struggle.

One such leader in my State of Massachusetts is a man who has taken concrete action to meet the challenge of global competition head on. David Perini is chairman and president of Perini Corp., a highly successful construction concern which, although based in Framingham, MA, operates throughout the United States and overseas.

Recently, in remarks to the Construction Innovation Forum, Mr. Perini suggested some ways in which the U.S. construction industry might meet the demands of foreign competition and aggressively pursue a larger share of the global marketplace. These ideas are applicable not only to the construction industry but to industry nationwide. Mr. Perini also addresses the role of government in facilitating increased research and development and fostering greater economic growth.

Mr. President, I ask unanimous consent that the text of David Perini's remarks to the Construction Innovation Forum be placed in the RECORD for the benefit of all Senators.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF DAVID B. PERINI

Thank you.

Ladies and gentlemen—I share your excitement as we inaugurate tonight the awards program of the Construction Innovation Forum; I share your pride in bringing the concept to this stage; and I share your confidence in its success. I believe all of the diverse elements of the construction industry will join together in embracing and supporting it.

There is a story told about the laboratory technician who was engaged in breeding innovations. He crossed a tiger and a parakeet. "What did you get?" he was asked. "Well, we don't really know," he said, "but when it sings, you'd better listen!"

A few years ago, the Business Roundtable created the Construction Industry Cost Effectiveness Project. At that time, we knew that construction users, our clients, who pay the bills, were telling us we'd better listen. By and large, I think we did—we took to heart the criticisms and suggestions contained in those thorough studies of construction operations and we learned from them. Regrettably, it appears we needed the push that those studies gave us. It just seems to be the nature of our great industry, the largest provider of services to the nation and so often called a "fragmented" industry, that we need a focus for our activities.

It isn't that we have not had or don't have innovation now. My father used to call it "ingenuity." He urged us to "observe, time and analyze" our every activity, "use ingenuity" to improve them, and to record the results daily in our diaries. Many companies can look back and cite examples of innovation. In the 1920's we brought the first gas-driven power shovel to New England; a few years later, we were setting records on the Boston to Worcester Turnpike with newly developed side-discharge concrete paving machines; we have resourceful mechanics who have frequently come up with creative

modifications for equipment to save time and money. We pioneered the use of critical path scheduling in Canada in the mid '50's. A few years ago we developed with the University of Alberta, a high powered laser for welding pipe in the field. It has always been the essence (and the fascination) of this business that every project has its particular problems. Many of these are solved through the original thinking of our people, or borrowed from what we may know of our competitors.

What, then, has been the difficulty? Partly it's cost constraints—insufficient margins, etc. However, in a sense this can be a cop out. And all too frequently we fail to capture and communicate our own innovations, even among our own projects or divisions.

We have been pursuing innovation in an unorganized way, in "fits and starts." We're like the two fellows who were hunting in the wilderness of Alaska. They shot an enormous moose. How to get it out of the bush? They decided, over the violent objections of their pilot, to lash the moose to the plane and fly it back to civilization. The plane roared down the crude runway and, predictably, crashed into the trees. Moments of silence, then a voice came from the wreckage: "How did we do?" His friend replied: "We got about fifty yards farther than we did last year!"

We can no longer afford to register losses, or "no gain" or just a few yards now and then in our efforts to innovate and cut costs. We need more spectacular plays and some touchdowns. It's fortuitous that the Construction Innovation Forum is providing us with a goal line to summon our best efforts.

There is a lot of peer pressure in our industry. When one company hears of another being honored and rewarded, the competitive element will prevail and this Awards Program should flourish in the years to come.

On a smaller scale, we are finding this to be true with our own company's nominations for an Annual Extraordinary Achievement Award, with trophies and cash bonuses offered the winners. We give these awards for major enhancement of our skills, technology, markets or industry reputation.

In a kind of long-range tandem with the CIF Awards Program, we know that we must do something as an industry about R&D. According to the 1988 study of the Committee on the International Construction Industry, other countries are devoting much more in resources and effort than the United States into construction R&D.

The most active nation, to no one's surprise, surely is Japan, where a Ministry of Construction has been established and is held responsible for setting national policy and encouraging private firms to pursue R&D. More than 20 of the largest firms in Japan invest one percent of sales in R&D and get a tax deduction for it. Each firm has its own elaborate Research Center. During the past few years, many billions of dollars worth of construction contracts have been won in the U.S. by the Japanese. Their dogged determination, thoroughness and long-range view of the future are well recognized in construction as well as in other industries. It is said that on one occasion an American businessman who was calling upon a Japanese businessman asked if the Japanese company did long range planning. "Of course," was the response. "Over 3-5 years?" "No, over 100 years."

As a group, U.S. contractors appear to be carrying out very little R&D. That which exists has usually been directed towards particular problems on particular projects. Once the problems are solved, they are too often forgotten.

On the other hand, industrial America, particularly the Hi-Tech industry, has for many years utilized such techniques as R&D partnerships to pool resources to develop new or improved products, processes, and techniques.

The advantages for the construction industry to utilize R&D partnerships are obvious. The dollars and brainpower of several companies could be pooled and directed toward the development of some new construction technique or application. The expenses would be tax deductible, and under certain circumstances the partnership could qualify for research tax credits if the research is undertaken to discover information which is technical in nature, and results from a process of experimentation.

This is a limiting aspect however. Our government could enhance our competitiveness by allowing for tax credits for productivity enhancement techniques both in systems and equipment and not just for lab research. Presently Japanese contractors receive a tax credit for research and development, including new and improved production techniques, equal to 20% of the current years costs. This specifically does not require basic lab research.

Our Government might also help to stimulate innovation by loosening existing tax regulations to allow Private Foundations to fund university research to benefit directly and, for a period of time, exclusively, the donor companies. Presently the results of such research must be available to the public. Permitting a period of exclusive use would appeal to the enlightened self interest of companies in the industry and in the long run enhance our cost effectiveness and competitiveness.

After years of talking about it, Perini has finally put together its own R&D Department. We've appointed a very senior experienced construction executive to head this up. Very briefly, its mission is to develop better construction methods, procedures or systems to increase productivity, reduce costs and thereby increase profitability.

Working with a Committee made up of top management representatives from our internal users, i.e. our construction operating units, this department will:

Inventory successful methods now used by Perini, and research specific areas of interest for use across the company.

Monitor industry research: methodologies used by peer companies and subcontractors, U.S. and foreign; and where appropriate, commission research by academic institutions.

Maintain a research library and catalog system, and disseminate new techniques to our construction divisions through periodic bulletins.

This is not a lab operation—no scientists walking around in white coats. This is just common sense. In an industry which brims over with innovative-creative people, we need to capture and disseminate for our own use our own innovations-to study what other industry innovators are doing and build on them. To reward our own people for their ideas and innovations and thereby stimulate fresh thinking and new approaches which will make us more productive and efficient.

We're expecting a lot from this initiative, and we hope it will produce some worthy nominations for Construction Innovation Forum Awards.

As I mentioned in the beginning, I'm so enthusiastic about your new undertaking because I believe it will combat inertia, inspire more R&D efforts on a wide-ranging basis and result in much improved performance in our industry; it will serve to advertise some of our best achievements and bring us all closer together in the pride we have in our industry. Thank you.

CATASTROPHIC HEALTH CARE

Mr. PRESSLER. Mr. President, on behalf of several thousand South Dakota senior citizens who have contacted me, I am pleased to go on record in support of a reduction in the Medicare surtax that finances the Catastrophic Health Care Program. The tax is both excessive and a financial hardship to seniors who have saved for their retirement years.

It is my understanding that the current surtax will produce at least $4.9 billion more than is needed to cover the cost of benefits and provide a reasonable reserve fund. Retaining substantial excess revenue is an injustice to older citizens who have worked hard all their lives to save for their retirement years.

I have written to the President and Treasury Secretary Nicholas Brady requesting that the surtax be reduced. Further, I applaud the decision of our distinguished colleague, Senator BENTSEN, who has announced that hearings on the catastrophic program will occur in the near future.

We must not only reduce the supplemental premium but also reexamine the entire method used to calculate the surtax. It is imperative that this program be evaluated in light of what our senior citizens are telling us. I stand committed to reducing the premium and further analysis of the method used to finance the program.

NATIONAL BICENTENNIAL COMPETITION ON THE CONSTITUTION AND BILL OF RIGHTS

Mr. HATCH. Mr. President, last week, in our Nation's Capital, over 950 young people from 44 States gathered to participate in the National Bicentennial Competition on the Constitution and Bill of Rights. I am proud to announce that a team from Hillcrest High School, in Midvale, UT, represented my State. These young scholars have worked hard to reach the national finals by winning the district and the State competitions, and I would like to wish them the best as they compete for the national title.

The members of the Utah team are: Amber Bigler, Randall Butterfield, Ryan Call, Kyle Curtis, Beth Coleman, Graden Jackson, Michelle Krelo, Angela Litster, Nathan McCleery, Paul Newman, Jennifer Nielson, Brock Pease, Melanie Selcho, Melanie Serassio, and Allen Thornell.

Along with the students, their teacher, Sharon L. Kerns, deserves much of the credit for the success of the team to date. Mark Garfield, the district coordinator, and Dr. Rulon Garfield, the State coordinator, have also worked hard to help their team reach the finals.

The National Bicentennial Competition on the Constitution and Bill of Rights is an extensive educational program developed to educate young people about the Constitution and Bill of Rights. With the support of Congress, the active involvement of Representatives and Senators, and the efforts of thousands of civil and education leaders, 1,022,320 students have studied the curriculum; 14,381 teachers are teaching the course; 420 congressional districts and the five territories have fully functioning programs; 92 U.S. Senators are supporting the program in their States; and 393 U.S. Representatives are participating in their districts.

The program provides students with a specially designed 6-week course of study designed to provide upper elementary, middle, and high school students with a fundamental understanding of the Constitution and Bill of Rights and the principles and values they embody. Students complete the instructional portion of the program with a test designed to measure their constitutional literacy and receive a certificate of achievement signed by their U.S. Representative.

Once again, I congratulate the fine students from the beautiful State of Utah on their achievement. I hope they not only study the Constitution but work throughout their lives to defend it.

Thank you. I yield the floor.

TRIBUTE TO EVELLE YOUNGER

Mr. WILSON. Mr. President, the recent passing of Evelle Younger closes a great chapter in California politics, of which Californians are rightly proud, for Evelle Younger was a man of deep conviction and lofty achievement who leaves a great legacy to the people of my State.

Having known Evelle personally and professionally for the past 25 years, I am deeply saddened at his passing. He was a conscientious and dedicated man who gave far more to California than he took. He championed many causes, and we will miss him.

Evelle Younger's contributions to California are too numerous to catalog. He was a great man who served our State selflessly and devotedly.

His career distinguished him as a tough prosecutor. As district attorney of Los Angeles, he oversaw prosecution of Charles Manson and Robert Kennedy's assassin, Sirhan Sirhan.

His work as a district attorney and as attorney general set standards of hard work, ethics and dedication that many have been hard pressed to follow. He strove to make the State, cities, and neighborhoods places where families could feel safe; where children could be free of the specter of crime and fear.

His career is an example of how one man can make a difference. He made a difference for countless families, businesses, and law enforcement agencies.

Evelle was a pioneer of consumer and environmental protection. He realized before many others that protection meant more than lives and property, it meant our coastline, our childrens' toys, and our parks.

That spirit and experience was recognized by Ronald Reagan when the President called upon Evelle to serve as chairman on the President's Task Force on the Administration of Justice.

His work as a prosecutor, judge, and law enforcement officer was marked by determination, compassion, and common sense. His commitment to good government is a legacy all of us would do well to heed.

Gayle and I extend our condolences to Millie and Evelle's son, Eric. They can be proud—as we all are—of Evelle's contributions and legacy. He will be long remembered by those of us who knew his humor, were touched by his values, and honored with his friendship.

QUIET MILLS, SLOW DEATH

Mr. HATFIELD. Mr. President, the State of Oregon has a heritage rich with tales of pioneers and early citizens who lived their lives working in the lush forests. Timber is big in Oregon: It provides the basic living wage for thousands of residents and economic benefits to the entire State.

But this forest resource-based economy is not always stable and the industry faces another crisis because log supplies are down. Elected officials from the Pacific Northwest are working with several Federal agencies, looking for a solution to the problems facing us. As we consider options, I am reminded by Oregonians that decisions made by Federal agencies and Federal lawmakers have tremendous impact on their ability to put bread on the table. When I came across this article by Robert Heilman of Myrtle Creek, I was certain that his story should be shared.

I ask unanimous consent that Mr. Heilman's article from the May 3, 1989, Oregonian be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Oregonian, May 3, 1989]

QUIET MILLS, SLOW DEATH—IN SURVIVING THE TIMBER RECESSION, PRIDE AND SHAME FIRST TO DISAPPEAR

"While the 1979-1985 years were disappointing for wood products manufacturers and workers alike, the net result may well have been a blessing in disguise for the survival and long-term health of the industry. Hundreds of inefficient sawmill, veneer and plywood plants have been shut down. Others have been modernized and streamlined to achieve maximum return per unit of product. New products have been developed which require lower labor costs, cheaper raw materials and result in a better value to end-user. The net effect is a leaner, more productive and cost-effective industry. . . .

"One of the principal means of reducing costs, of course, is to lower wage rates."

—Development Report and Plan 1986-1987, CGD Business Development Corp., Roseburg, Ore., July 1986.

(By Robert Heilman)

I used to work for a white-haired, old gyppologger who taught me many things about living and working around here. I remember one morning when he told me about the recession of 1958. We were taking a coffee break in the little two-man sawmill he'd built with discarded equipment and old truck parts. As he talked, we watched a bird building her nest in the rafters of the mill shed.

It was 1978 and timber industry wages and per capita income levels in Douglas County were at an all-time high.

"They used to call them panics," he said, "and then it was depressions, and nowadays they call them recessions, but it's all the same thing. Every time things get rolling good to where there's lots of small outfits working, money gets tight and the bottom falls out of everything. Then, after the smoke clears, you look around and most all the little guys are gone and the big outfits are bigger than ever."

That particular slump, back in '58, had cost him his home and his sawmill. He went to work in Northern California as head sawyer and then supervisor of someone else's mill. He stayed a few years, long enough to gather up a grub stake and return home to begin again. "A man does what he has to do to get by," he said.

In 1982, I bought a Brown Swiss milk cow and raised a small flock of laying hens. The unemployment rate that year averaged 17.2 percent in our country.

The cow gave four gallons of milk every day and the hens laid about a dozen eggs. I began selling eggs and milk to my friends at cost. I let them have the food on credit and allowed them to pay with barter (poached venison on one occasion) or with food stamps when they didn't have the money.

Poor people break laws as a matter of survival; corporations break laws as a matter of business acumen. Like many of my neighbors (and all of my friends) I lived as the pettiest sort of criminal—driving without car insurance; selling raw, uninspected milk; accepting food stamps without authorization; eating poached fish and game.

It is not something I am proud of nor particularly ashamed of, either. Pride and shame were luxuries we couldn't afford at the time. Sometimes the jug of milk and carton of eggs I dropped off was all that a family had to eat. Somehow there was always enough cash for a bale of alfalfa hay or a sack of grain when I needed it.

By the fall of 1985, unemployment had dropped to 11.6 percent with the long-awaited trickle-down. By then most of the families who were my customers and friends were gone. There weren't enough of them left in the valley to cover the cow's feed costs. I gave up my one-man, one-cow, nonprofit dairy and sold her at auction.

Bit by bit, we lost our self-respect as we knocked up against hard realities and even harder institutions that were indifferent to our humanity. It was a slow process, one that we feared but couldn't really see happening.

It's hard to wait when you're used to working. There's a slow, steady erosion that wears down a few people first, and then whole families crumble like dirt clods running through your fingers. Finally, the community itself is gone, washed downriver, never to return. "And I alone am escaped to tell thee."

Davey was my neighbor's son when we lived in town. He and I worked on the same tree-planting crew for a local mill during the winter of 1976. In the spring of that year he got a job in the mill. He was 18, fresh out of high school, and earning $5.35 an hour.

In the spring of 1986, I ran into him in the grocery store. He's been out of work for nearly a year but had just landed a job in another mill. He was grateful to have found work, which I could understand since he was now 28, married and a father.

"Well, that's good to hear." I congratulated him. "How much are you making?"

"$4.75 an hour."

I should have kept my mouth shut. But a little mental arithmetic told me that, given the inflation rate, he was earning about half the pay he had as a raw kid.

"Jeeze! You guys are still eligible for food stamps."

He looked away, over at the stacked boxes of margarine before he spoke.

"Yeah, well, actually I'm getting more than most of the guys because I've got experience. Starting pay's $4 an hour."

It's been an odd sort of recovery. Timber harvest levels for Douglas County were 400 million board feet higher in 1986 than in 1978, but produced $55 million less in wages. While the timber industry has become "leaner, more productive and cost-effective," the people have simply become leaner.

In 1938, the sixth straight year of economic recovery brought one in six Umpquans in for emergency food boxes or meals. Local relief agencies estimate that less than 5,000 pounds of emergency food were distributed in Douglas County in 1978. Today the 93,000 people living on the Umpqua eat nearly a million pounds of emergency food every year.

UNCOMPENSATED CARE—THE THREAT AND THE CHALLENGE

Mr. HATFIELD. Mr. President, our Nation provides the best health care in the world, but it is still beleaguered by high costs, incurable disease, and, in some areas, inaccessible care. Too many children and adults are unable to get the kind of medical attention they need.

Congress has already undertaken some difficult exercises in health care and has made some very important changes in the system. As we consider how we can bring down the costs of treatment and provide compensated care for all, we must look at our health care needs and goals.

The Oregon Legislature has been taking a lead in debating the issues of health care compensation. Dr. John Kitzhaber, the Oregon State Senate President has been instrumental in defining the issues. In a clear, cogent style, he addresses the problem of uncompensated care and I believe that his writings are worth sharing.

I ask unanimous consent that Dr. Kitzhaber's article from the June 1988 Western Journal of Medicine be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNCOMPENSATED CARE—THE THREAT AND THE CHALLENGE

(By John Kitzhaber, M.D.)

The growing crisis in uncompensated health care poses one of the most serious threats facing the medical profession today. If left unresolved, it will not only erode the health of our society and lead to an erosion of the clinical autonomy of physicians, but it will also undermine the very principles on which our health care system has been built. In addition, it will lead to increased regulation of the practice of medicine, and, quite probably, to a government-controlled health care delivery system.

To understand this threat, the challenge it poses, and our critical role in its resolution, we must first consider the evolution of our American health care system.

The health care system we enjoy in this country was founded on the principle of universal access, the idea that all Americans, regardless of their income, should have access to the health care system and to all the services it has to offer. We physicians were able to deliver on this social objective because of our fee-for-service reimbursement system and the ability to cost shift. So when the poor came for treatment, the service was rendered, and the cost was merely shifted to someone who could pay, through an incremental increase in their bill or in their insurance premium.

It is important to realize that this policy was no accident but was the result of conscious decisions in both the public and private sectors. In the public sector, the enactment of Medicare and Medicaid in 1964 extended coverage to the poor and elderly. At the same time, there was a rapid expansion of private health insurance policies funded primarily through employment. This rapid growth of public and private third-party insurance coverage led to the belief that, in America, health care for the poor was free, when in fact it was being subsidized primarily by the government and by the business community.

Thus, we created what we felt to be an ideal health care system. It was a system with no financial restraints, where individuals had access to as much health care as they needed or wanted regardless of their income. Physicians could practice pure medicine, viewing their patients primarily from the standpoint of their health needs without concerning themselves about their ability to pay. But this system also encouraged utilization and led to the deeply held social belief in this country that health care is a right. Not surprisingly, this resulted in a dramatic increase in expenditures. The amount we spend each year on health care has grown from $75 billion in 1980 to nearly $500 billion today. More telling, however, is the growth of health care expenditures as a percentage of the gross national product: 7.5 cents on the dollar in 1970 versus about 11 to 12 cents today. If this rate of increase were to continue, by the turn of the century we would be spending 20% of the gross national product on health care and by about 2020, we would be spending 40 cents out of every dollar on health care.

Obviously, this rate of increase is not going to continue. While our health care system makes a great deal of sense in terms of a social policy, it makes very little sense in terms of an economic policy. Even a beginning student of economics recognizes that no single set of expenditures can continually grow at a rate faster than the rate of growth of the gross national product. Every dollar we spend on health care is a dollar that cannot be spent on something else. There are many other interests and priorities in which this country must invest.[1]

And while the prosperity we enjoyed over the past 20 years has allowed us to absorb these rapid increases in health care expenditures, it also masked the underlying fallacy of the way health care is financed in this country. By 1980 that mask had been stripped away when a number of factors combined to bring our ideal health care system into a collision with economic realities.

First, new medical technologies were being developed and being used—at a tremendous cost—because the system contained no financial restraints. Second, there has been a significant increase in the elderly as percentage of the population. The elderly use more health care services than the nonelderly and have a higher incidence of chronic diseases. Both advances in medical technology and an aging population have increased the financial strain on the system.

Two additional factors forced those who had traditionally been subsidizing the cost of health care for the poor—the business community and the government—to reevaluate their ability to continue doing so. The first was the economic stagnation experienced in the United States at the beginning of this decade. While we could absorb the rapid increases in the cost of health care when the economy was growing. It was far more difficult to do so when productivity dropped. Our nation's annual productivity growth was a healthy 3% in the 1960s and 1970s but fell to 0.5% by 1979 and was actually negative in the early 1980s.

The federal budget deficit increased from about $73 billion to $211 billion in five years, and we liquidated all our foreign assets to become the largest debtor nation in the world. By the early 1980s, the government recognized that it could no longer continue an open-ended subsidy of the cost of care for the poor without raising taxes, increasing the deficit, or making deep cuts in other domestic programs. The government became interested in cost containment to balance the budget.

At the same time, this country entered the world market. American businesses began recognizing that they were no longer competing just among themselves, as the auto industry once did; they were competing with mainland China, West Germany,

[1] Thurow L: The Zero Sum Solution. New York, Simon & Schuster, 1985, p. 253.

Japan, Italy, and Canada. They realized they had to cut costs, particularly labor-related costs, in order to remain competitive with cheap labor industries abroad. They could not, for example, just pass the cost of health care on to their consumers and still remain competitive in a world market, particularly when American businesses had to carry the cost of health care on the books as a necessary expense and were competing with many countries that did not have to carry these costs because of nationally sponsored health care programs. The business community became interested in the need to contain costs to remain competitive.

This brought about very similar responses by both the government and the business community. The objective was simply to reduce the exposure to the cost shift and reduce the funding and subsidy of the cost of providing health care for the poor. It should be noted that the subsidy was not taken out of the system, it was merely shifted onto individuals and providers. Here is how it was done.

In 1983 the federal government enacted DRGs [diagnosis-related groups], which is a prospective reimbursement system that shifted economic risk onto providers. The federal government also began requiring first-day hospital deductibles for those on Medicare and increasing the Part B monthly Medicare premium that pays for physician services. This shifted costs onto the individuals. With Medicaid, the program for the poor, the federal government cut its match rate and shifted that to the states.

The first thing the states did was cut provider-reimbursement rates. Physicians currently average 45 to 50 cents on the dollar for taking care of someone on welfare. That pushed costs and responsibilities onto the providers. When that did not balance the budget, the states increased the requirements for Medicaid eligibility, which pushed people off the program altogether. That shifted responsibility to the individuals. In the past ten years, 800,000 women and children have been squeezed off Medicaid, and the program, which used to cover 65% of the poor, today covers less than 38%.

The private sector reacted in exactly the same way, with increased involvement in health maintenance organizations, preferred provider organizations, and other prospective managed care plans that put providers at risk. Businesses increased copayments and deductibles for their employees that shifted costs onto individuals.

The important point here is that these cost-containment actions reflected absolutely no social policy beyond that of cutting costs for the government and for the business community. There was a recognition that the amount of money that could be spent on health care for the poor was limited, but there was no consideration of the implications of those decisions on access to health care. The funding in the system was reduced but not what the public expected from the system.

Today, our health care system is in transition. We are still ostensibly committed to the principle of universal access, but now the system is driven by economic factors, not by the social factors that drove it in the 1960s, and the 1970's. Providers are at economic risk. We are losing the ability to cost shift.

As I mentioned earlier, our ability to deliver on the principle of universal access has depended on cost shifting and the willingness of the business community and the government to subsidize the cost of care of the poor. While there is still supposedly a commitment to universal access, we are seeing a progressive shifting of the responsibility to pick up that cost. Between 1965 and 1980 that subsidy was borne by the government and by employers, who spread it out over taxpayers in general and over most of the workforce. Society was paying for what was essentially a social policy objective universal access to health care.

Because of the cost-containment measures that have occurred, however, that subsidy has been shifted onto providers, who have far less ability to absorb it. What used to be subsidized care for the poor is now showing up as uncompensated care. As physicians reach a point where they cannot absorb additional uncompensated care and still pay the bills, they push the costs onto individuals. And today if a person does not have insurance coverage and does not have money, that person is increasingly likely to lose access to the health care system, either because providers will not accept any additional indigent patients or the patient delays treatment because of an inability to pay for it.

This has dramatically changed how health care is financed in this country. Our health care system has traditionally had a bifurcated financing mechanism. On the one side is the public system, which is Medicare and Medicaid. On the other side is the private system, which is mostly employment-based policies and some individual policies. There has always been a little gap in between where some people slipped through the cracks. But as long as the government and the business community were willing to subsidize the cost of care for the poor, that gap has been very narrow and has really contained only society's truly downtrodden.

Today, however, those two third-party payers, government and business, are trying to escape from the subsidy. As we see a reduction in government expenditures, the growth of copayments and deductibles in Medicare, and increases in Medicaid eligibility, people spill off the public side into the gap. As competition in the world market increases, as we shift from a manufacturing to a service-based economy with large numbers of low-paid, nonunionized workers without health insurance coverage, and as premium rates go up, people spill off the private side and into the gap. Today, the gap is now narrow: it contains 37 to 40 million Americans. And they are no longer just society's truly downtrodden. Of those uninsured people, 70% are working full time or part time or are dependent of someone who is working. Those in the gap are generating 75% of the uncompensated care.

Why should we be concerned about this shifting responsibility to pay for the care of the poor? We should be concerned because there are some serious social consequences affecting all of us, and some serious professional consequences affecting physicians in particular.

The first social consequence is an erosion in our commitment to universal access. Because there is a physician surplus in the country, and because care for the poor is no longer subsidized but is uncompensated, we have a very competitive, market-driven system in the provider community. And since market systems were not designed to foster social responsibility, it should not be surprising that no one is competing to care for the poor. Public health clinics are closing. We are seeing patient dumping from hospital to hospital, physician to hospital, and between physicians. There are treatment delays. And there are a growing number of people in the gap.

That leads to the second social consequence, which is a very real and measurable deterioration of health for a growing number of Americans. We have 40,000 neonatal deaths each year from the complications of low birth weight. Two thirds of those mothers do not receive adequate prenatal care. Of the poor in America 40% are children. Only a third of them are covered by Medicaid; the other two thirds are in the gap and are losing access to basic preventive services. We are seeing an increase in cases of pertussis and increases in pediatric nutritional problems. There is case after case of people actually dying because of a lack of access to the system—people dying of strokes because they could not get their blood pressure medication prescription refilled; people dying of heart failure and having myocardial infarctions because of a lack of routine checkups or medication; and people dying of perforated ulcers because of treatment delays.

The third and perhaps most serious social consequence is that we are mortgaging our own future. I think this is very important and would ask you to bear with me for a moment. As I mentioned, 40% of the poor in this country are children, and two thirds of them are in the gap with no insurance coverage. Also in that gap are tens of millions of young working Americans. These people constitute a large part of the shrinking workforce of tomorrow that we are expecting to fuel the economy and pay for a growing retired population. How are they going to do that in the face of $170 billion owed to foreign governments and nearly $3 trillion national debt? How are they going to do that in the face of a $10 trillion unfunded liability, the difference between what we expect them to make and what we are planning to take out of their paychecks to pay for medicare, Social Security, and federal pensions, most of which are automatically indexed to inflation and do not have income eligibility requirements? We are asking them to do something that we have all refused to do: to recognize that increases in personal consumption have to be balanced with increases in productivity.

In the past ten years, American workers have averaged a $3,100 increase per capita in personal consumption and only $950 of that has been paid for by increases in what each one produces. The remaining $2,150 has been paid for by cuts in domestic spending and investment and by foreign debt (P.G. Peterson, The Atlantic Monthly, Oct. 1987, p. 47). We are asking this group of people to be more productive than anyone in the history of this country and to probably take a reduction in their standard of living. Having asked them that, we are crippling them going in, by denying them access to the basic health care services they need to be healthy, productive members of the workforce. You cannot have an increase in productivity unless your workforce is healthy and well-educated. That is a very, very serious implication.

There are also some disturbing professional implications. The first is that the growing problem of uncompensated care is catching physicians between what society expects from our health care system and economic realities. When the government and the business community moved to limit their subsidy of the cost of health care for the poor, they could do so without denying access to individuals and without publicly or

explicitly abandoning the idea of universal access because they shifted that subsidy onto the providers. But when physicians move to limit their exposure to this subsidy, and for exactly the same reason, they have to deny access to individuals. When physicians reach the point where they cannot absorb any additional uncompensated care, they either have to reduce the number of indigent patients they see or reduce the services they provide to those patients. In either case, that means rationing. Increasingly, physicians in this country are being forced to become the rationing instruments for a society that refuses to recognize that rationing is occurring.

That puts us in direct conflict not only with our professional ethics but with social expectations for the health care system. It casts us in a very unfavorable light. Many people still view physicians as we were seen in the halcyon days of the 1960s and 1970s when the economy was booming and incomes were rising. Most legislators are not physicians—I am the only physician in the Oregon legislature. Many legislators do not understand the relationship between cost shifting and subsidizing care for the poor, and do not understand the implications of taking cost shifting away from providers.

The thought that a wealthy profession would be denying access to the poor is unacceptable to most legislators, a fact that puts physicians in a very vulnerable position politically. As the problems of the poor intensify, state legislatures are going to begin to react. They are going to say, "If you physicians are not going to take care of the poor voluntarily, we are going to force you to do so." There are many ways that coercion can be accomplished.

As a condition of licensure, physicians can be forced to take care of a certain number of indigent patients. That bill was actually introduced in Oregon last year. A gross income tax can be applied to physicians' earnings to help pay for indigent care. That bill was introduced in Washington in 1985 and has been considered in Pennsylvania. These types of intrusive regulatory measures are being introduced in state legislatures across the country. Unfortunately, all they do is force physicians to assume the fiscal responsibility for taking care of the poor. They ignore the fact that society, while paying lip service to universal access, has made a decision to limit the amount of money that will be spent on health care. The problem remains unresolved. When someone convinces corporate America that a government-sponsored health care program will put them in a better position in terms of competition in the world market, then we will be looking at a nationalized health care program. In the short run, we are looking at increased regulation and an erosion in our own clinical autonomy.

What do we do about this problem? To solve this crisis in uncompensated care, we have to start by accepting three hard realities.

The first reality is that resources are limited. That is a difficult one for physicians to accept because they have never had to accept it. But it should be obvious to anybody who looks at the need in this country and looks at the available dollars.

We have a national debt approaching $3 trillion that we must reduce. We have a huge defense budget that has been traditionally hard to pare down. We spend $450 billion a year on Medicare, Social Security, and other federal pensions. At the same time, we are cutting aid to education and investments in roads, bridges, sewers, and water systems. We are cutting civilian research and development. We are cutting all of the things we need to increase the productivity in this country.

No one wants their personal health care expenditures cut. At the same time, however, we want to reduce government spending, we want good roads and schools, safe streets with criminals behind bars, a comfortable retirement, police protection, fire protection, clean air, and clean water. And we want to do all that, of course, with lower taxes and higher wages.

Now, obviously that does not work. There is a finite amount of money that this country can invest in health care versus the other things that we also have to invest in. Once we come to grips with the fact that there is a finite health care budget in America, then we have to decide who is going to get the service and how much service each person is going to get.

That brings us to the second reality, which is simply that the rich are always going to have access to more health care than the poor. I think that is probably all right if what the poor get is adequate and if they are all getting it. After all, one of the hallmarks of a capitalistic system is that goods and services are distributed on the basis of income, not necessarily on need or merit. We readily accept that in most instances. We do not expect public housing to look like the Ritz. We do not expect food stamps to be redeemed in expensive restaurants. But because of our concept of universal access, we have taken for granted that the poor should have access to all the health care services that are available to the rich. I would remind you that this is the only part of our system that operates on this open-ended economic principle. We have in effect rejected a multitiered system based on income, but in reality we already have that kind of a system. The rich have always been able to fly to other states and other countries for diagnostic and therapeutic modalities not available at home. The rich have had consultations and elective operations to which the poor have not had access. So what we have really is a poorly defined definition of what we think everyone has a right to and what perhaps they do not have a right to.

I think we would all agree that everyone should have a right to prenatal care, but we may argue whether or not the public should pay for an elective face-lift for everybody on welfare. The question becomes much more difficult, however, when we are trying to balance a transplant versus prenatal care.

We need a better definition of adequate health care to address that question. If we know resources are limited, if we know people with high incomes can buy more health care than people of lower incomes, and if we know that society cannot buy everything for everyone who might benefit from it, we must consciously and responsibly decide what level of health care everybody should get. That means defining adequate health care and brings us to the third reality.

The third reality is the inevitability of rationing. This is also a very difficult concept for physicians to come to terms with, but when you define adequate health care, you also define what is more than adequate. And that provides the basis for the explicit rationing of health care. Before we overreact to this reality, I would suggest that rationing already exists in our system. We clearly already ration by income and by transportation barriers. More important, however, we ration inadvertently through legislative decisions because we lack any policy to guide how our health care dollars are spent. Rationing is the result of limits. If there is a limited amount of money in the health care budget and it is spent on one set of services, it is not available to be spent on another set of services. That is rationing.

Consider how this is being done today. Almost $2,000 per capita is spent each year on health care in America, far more than any other country in the world. Yet our wellness, as measured by morbidity and mortality statistics, is not significantly better than that in England, which spends $500 per capita, or even Singapore, which spends only $200 per capita (R. Lamm, "The Ten Commandments of Health Care," speech given at the Midwest Health Conference, Kansas City, MO, March 28, 1988).

Why? Because we have no policy to guide how we spend our health care dollars. We are spending huge sums on some and we are spending virtually nothing on others. We spend more per capita on health care than any other country in the world, yet 37 million Americans have no coverage and many of them are losing access to the system. We spend $3 billion a year on neonatal intensive care while denying prenatal care to hundreds of thousands. We spend $50 billion a year on people in the last six months of their lives while closing pediatric clinics.[2]

That is like having someone in charge of a corporate truck fleet who adopts a policy that the oil in the trucks will not be changed until the engine blocks melt. The trucks won't be maintained but will be serviced only when there is a major breakdown. I doubt if you would endorse this policy for your car, nor would you employ anyone who did, but that is exactly how we spend health care dollars in this country. Rather than spending money on prenatal care, we spend it on neonatal intensive care. Rather than treating hypertension, we treat people who have had strokes. We are rationing by default, unguided by any social policy. It is inequitable, inefficient, and we are wasting millions of dollars and thousands of lives. The reason we are rationing implicitly as opposed to explicitly is because we do not want to come to grips with our own limits.

To solve the problem of uncompensated care, with all of its ominous implications for society and for physicians, we have to recognize that our health care system is indeed in flux and that we have to build a new system based on the three realities that I mentioned: limited resources, acceptance of the fact that the rich will always be able to buy more health care than the poor, and the need for rationing.

We have to recommit ourselves to universal access—not universal access for everyone to everything—rather, universal access for everyone to an adequate level of health care. That will put our system back on a sound economic foundation. It also means that we are going to end up in this country with a three-tiered system of delivery. In reality we already have a nondefined, implicit multitiered system: the medically indigent, Medicaid, workers with insurance, the wealthy. What I am suggesting is that we stop pretending it doesn't exist, accept its inevitability, and take steps to make it work equitably and efficiently. This would mean

[2] Who Lives, Who Dies? Public Broadcasting System Documentary aired January 11, 1988. Produced by WNET-TV, New York.

a government-sponsored tier for the poor, a tier that the business community funds for those who are working, and a traditional fee-for-service tier for those who wish to buy additional health care services.[3]

I want to reiterate one point. The government has a responsibility, in my mind, to pay for the poor but not for the elderly unless they are also poor. The government should pay for the poor regardless of their age. There is no reason Lee Iacocca needs Medicare, or Johnny Carson, or even my parents. Government-subsidized health care programs should have income eligibility requirements.

This is important because it is at the first, or public, tier that we have to come to grips with rationing. It is at this tier that we must set the socially acceptable minimum level of health care for this country. How do we get there?

Let me describe what is being done in Oregon, where we are attempting to resolve this problem. There are three elements involved: first, a clear social policy: second, a definition of adequate health care; and third, a universal insurance system to guarantee that people get access to that care.

Because of my time constraint, I will only cover the first two elements. Concerning universal health insurance coverage, however, let me say that while it is an essential component of the final solution, it is putting the cart before the horse. We need to recognize that the objective of our social policy of the 1960s and 1970s was, in fact, universal access. One of the reasons we are in trouble today is that we were in the short run, able to cover everybody for almost everything. But unless we first define the level of care for which people are universally covered, we still have an open-end system that we cannot afford.

Therefore, we first need a clear social policy to ensure that we spend our limited health care dollars in a way that is efficient and equitable. In Oregon we have made an attempt to recognize our limits and to adopt such a policy. In the past legislative session, we discontinued funding for heart, pancreas, bone marrow, and liver transplants for people on welfare and used that money to extend preventive and prenatal services to a far larger group of people who had been in the gap. This constituted an explicit rationing decision. Let me go over the issue we were dealing with because, I assure you, it has not been an easy one to defend, politically or as a physician, although I firmly believe that it was the correct decision given the reality of limited resources.

The question was not whether transplants have merits; clearly they do. The issue was not whether in the short run we could find some additional money to buy a few more transplants for people on public assistance; clearly we could have. The issue was simply that if we were going to put additional money into health care, where was the best place to spend the next available dollar? Did it make more sense and was it a better use of limited public funds to buy high-tech services for a group of people (those on Medicaid) who already had access to virtually everything available in the private sector, or to extend services to a larger number of people who were in the gap, many of whom did not have access to any health care whatsoever?

We felt it made more sense to serve the larger number of Oregonians. Thus, the policy adopted in Oregon is one of universal access to adequate health care, and we have made that the first priority for spending the additional dollars that we can get into our health care budget. That still leaves the second element: defining adequate health care. Oregon's definition at this point does not include major organ transplants because we have made a decision that they are of a lower priority than preventive care. But we do need a more complete decision.

Before I describe to you the process we are using in Oregon to arrive at the decision, let me say that once you get a definition of adequate health care and array your health care services on a priority basis, you are changing, in a fundamental way, the nature of the rationing debate. The rationing debate traditionally has an individual focus, and it goes like this. We have one heart and three potential recipients. Do we give that heart to a 17-year-old unwed mother of three on welfare, do we give it to a 35-year-old man serving time for rape and armed robbery, or do we give it to a 40-year-old corporate executive?

This scenario raises the kinds of imponderable ethical and moral questions that society, almost by definition, cannot resolve on an individual basis. But once we develop a definition of adequate and array our health care services in a priority order, we shift that debate from an individual focus to a societal focus. We are no longer debating which service should be given or denied to which person, we are debating which priority of funding should be given to each service, given the reality of limited resources. Because society has made the decision to limit the amount of money it spends on health care, society needs to make the decision on how to spend that money. In addition to providing basic health care to a far larger number of people, this approach also takes physicians out of the squeeze and allows them to continue to be patient advocates. They can continue to do everything they can possibly do for their patients within the context of the resources that society has made available.

How do we get to this definition of adequate? There are really three steps. The first and probably the most difficult is building a consensus. In Oregon we are working with a group called Oregon Health Decisions, founded in 1982 by Ralph Crawshaw, MD, a Portland psychiatrist. It is a private, nonprofit group dedicated to educating Oregonians on the health policy choices and confronting them with the consequences of those choices. It was the first such group in the country. Now 14 states have similar organizations, including an active one in California.

We have appointed a steering committee of which I am the chair. We are breaking down everything on which Oregon currently spends its health care dollars. We are making a decision package for each service with a summary document that describes the number of people getting the service and the cost, the number of people not getting the service and the economic and health implications of not giving them that service, and then the cost to extend the service to everybody in the unmet-need population.

The plan over the next few months is to arrange this list in a tentative priority order and take it out to town hall meetings around the state of Oregon where citizens can actually get involved in working through the trade-offs and choices necessary to set up a priority list of health care choices, given the fact of limited resources. We will bring that information together this fall to generate a final list that will be submitted to the legislature.

Once the health care resources are arrayed in that kind of priority list, we come to the second step, which is to integrate this information with the legislative budget process. This requires that funding go to the first item on the priority list for everybody in the population for whom the state has responsibility. Going down the list, the second item is fully funded before moving to the next, then the third, the fourth, and so on, until the available money is exhausted.

This process puts accountability into the system. If, for example, a state legislature decides to cut $20 million out of the health care budget, it will no longer be an abstract accounting exercise but will mean deleting specific services for specific individuals off the bottom of the priority list. The debate becomes far more focused. If someone wants to refund the transplant program, clearly they either have to knock something else off the priority list—and they must make a choice, a clinical choice and a political choice, between those two health care services—or they have to rob another program or raise more money (increase taxes).

The final point with this type of system is that if it is done on the basis of sound clinical information, money can actually be saved. A California obstetrics-access study suggested that the cost of treating an indigent woman for prenatal care and delivery was $1,000 and the cost of treating a low-birth-weight infant was $28,000, up to six figures. The study suggested that if prenatal care were provided to all the indigent women who needed it, $22 million a year could be saved in the health care system. That is money that can be used to add services on the priority list, such as major soft organ transplants. It could be used to raise provider reimbursement to a reasonable level and thus remove the current economic disincentive to treat the medically indigent and those on Medicaid, or it could be used for roads. In any event, the debate becomes much clearer and more focused. Accountability is inescapable.

What is the role of physicians in resolving this problem? The first and most significant role we have to play is that we must come to grips with our own limits. We have to recognize that health care resources in America are, in fact, limited. If the leadership of professional medical organizations is going to publicly refuse to recognize that health care resources are limited, how can we expect the public to accept that, and how can we expect state legislatures to recognize that as well? If we are not willing to recognize this ourselves, we are inviting all of the ominous social and professional consequences that uncompensated care is bringing our way. As a first priority, therefore, physicians must recognize and accept limits in health care, express that view publicly, and talk it over with each other and with their patients.

Second, through our professional organizations we need to adopt policies on how to expend limited public health care dollars. Your society or association may already have such a policy but, if not, I would suggest one that states that the first priority should be to extend an adequate level of care to everyone. Then, and only then, should we indulge ourselves in the debate over how to spend what is left in the budget.

This means, of course, that we must also get involved in the definition of adequate.

[3] Thurow L: Medicine versus economics. N Engl J Med 1985; 313:611-614.

Physicians are really the only group in this country with the qualifications to provide sound clinical information to the state legislature. We need to say: "Yes, we are going to have to ration health care in this country. It is inappropriate and unethical for physicians to do the rationing; society needs to do it. And if you, the legislature, are going to ration health care, here is a list of priorities that make sense clinically. This makes sense in terms of marginal costs and marginal benefits. This makes sense in terms of probable outcome." Physicians have to provide that input. Then we have to support legislative decisions that make responsible resource allocation choices. We have to do that publicly, in our community, and at the legislative level.

This, then, is the threat and the challenge of uncompensated care. The solution, I believe, is a partnership between public policymakers at the state legislative level and leadership in the medical community. If left unresolved, this problem of uncompensated care is going to result in an erosion in our social commitment to universal access to health care and a deterioration of health for a growing number of Americans, with very serious social and economic consequences. It is going to put physicians in conflict with their professional ethics and with what society expects from the health care system, which will lead to regulation, an erosion of clinical autonomy, and very likely a nationally controlled health care delivery system. We need not accept this outcome. In fact, we cannot accept this outcome. With the active involvement and leadership from the medical community, we can meet this challenge and restore some rationality and equity and economic stability to our health care system.

I ask you to join me in meeting that challenge.

PROTECTING FREEDOM OF CHOICE

Mr. CRANSTON. Mr. President, in the next several weeks a number of letters will be read into the CONGRESSIONAL RECORD from women and men who care very deeply about the right to reproductive choice.

I am privileged to share with my colleagues a very moving letter from one of my constituents from California, Mr. Michael Wong of San Francisco, whose grandmother almost died from an illegal abortion 50 years ago. Mr. Wong's compelling letter eloquently makes the case for keeping abortions safe and legal.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Her family was her life.

In July 1984, Grandmother stunned the family when she revealed that she had an illegal abortion fifty years ago.

At the time, Grandmother and Grandfather had five children, all under the age of six. Two were still in diapers. They both held full time jobs. To supplement their income, Grandmother also had to moonlight in the evening (at home). Even with that, the family was still struggling to make ends meet.

Then Grandmother was pregnant. She would have to take time off from work and there would be another mouth to feed. She had to choose between her five children or the unborn baby.

Grandmother went to a "doctor" for the abortion. It was horrible and painful. Something went wrong because she was feeling so sick right after.

As she had done every night when her children went to bed, Grandmother began her moonlighting job. But the sick feeling would not go away. Grandfather found her unconscious on the floor when he arrived home.

For several days, they thought that she was going to die. She could not seek the help of a medical doctor. Grandfather had to cook herbs for her. They waited a few days, praying that she would not die and leave her children motherless.

Fortunately for the family, Grandmother survived the ordeal. And when times were better, Grandmother gave birth to two more children.

On September 18, 1984, Grandmother died at the age of 81 from cancer. Her children, grandchildren, great-grandchildren, other family members and 250 friends attended Grandmother's funeral.

Not everyone at the funeral might have chosen abortion to solve the dilemma that my Grandparents had during the Depression. But anyone who knew Grandmother would have wanted her to be able to go into a medical facility to have a safe abortion.

I have always been an advocate for a woman's right to have a safe abortion. But since 1984, the issue has become a personal crusade. I just don't want anyone to have to go through what Grandmother went through in order to obtain an abortion.

CONGRATULATIONS TO ISRAEL ON HER 41ST BIRTHDAY

Mr. JEFFORDS. Mr. President, as others of my colleagues have noted on the floor today, this is the 41st anniversary of the birth of the State of Israel. I would like to join in expressing my warm greetings to our friend and ally on this occasion.

One year ago there was must fanfare to mark Israel's 40th birthday. The administration, the Congress and the international commumity spoke out in support of the State of Israel and in recognition of her monumental achievements in building a thriving nation out of the ashes of the Holocaust.

It has been a difficult year for Israel. The unrest in the occupied territories has preoccupied the international media. Activities of the Intifada continue in spite of efforts to diffuse tensions. National elections on November 1 prompted intense and sometimes bitter debate about Israeli perceptions of the nature and direction of their state. Prime Minister Shamir's struggle to put together a coalition and form a government took an agonizingly long time.

Yet there is considerable optimism in the air now. Prime Minister Shamir enjoys broad support and the Likud-Labor coalition is functioning well. In his recent visit to Washington, Mr. Shamir put forward a proposal for elections in the occupied territories to select Palestinian representatives to negotiate peace with Israel. While solutions to the Palestinian issue remain elusive, Israel is now seen as taking the initiative to reinvigorate the peace process, the only viable avenue for resolution of this ongoing problem. The United States must be central player in furthering the search for peace.

The United States has remained firm in its financial support of Israel, even in the face of increasingly strong budgetary pressures in this country. Congress has seconded President Bush's statement of support by including full funding for Israel in fiscal year 1990 foreign aid legislation. I support this aid, knowing that our ally will use it wisely. While none of us can predict how deficit reduction will play out in the coming years, Israel can be sure of my continued commitment to the United States-Israeli relationship.

There will be difficult times in the coming year for Israel and for the United States, both predictable ones and unforseen crisis. Yet the United States knows it can count on the support of one of its most loyal and trustworthy allies—Israel. And Israel, on its 41st birthday, should feel confident in our support for her.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

CERTIFICATION WITH RESPECT TO THE BAHAMAS

The PRESIDING OFFICER. Under the previous order, the time of 2:30 p.m. having arrived, the Senate will now proceed to the consideration of Senate Joint Resolution 100 which the clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 100) disapproving the certification by the President under section 481(h) of the Foreign Assistance Act of 1961 with respect to the Bahamas.

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. Who yields time?

Mr. KERRY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KERRY. How much time is available with respect to this?

The PRESIDING OFFICER. The Senator from Massachusetts controls 1 hour on behalf of the majority leader.

Mr. KERRY. And the total time available, Mr. President?

The PRESIDING OFFICER. Two hours.

Mr. KERRY. Mr. President, I yield myself such time as I may need.

Mr. President, the issue before us at this time is whether or not the Baha-

mas is fully cooperating in the war on drugs. Section 481(h) of the Foreign Assistance Act requires that the President at the start of each fiscal year, October 1, withhold 50 percent of U.S. foreign assistance designated for any country identified as a major producing or transit country, unless he sends to the Congress on March 1 a list of those major producing or transit countries which he has certified as eligible to receive full U.S. assistance. The President's determinations of certification are based on data contained in the international narcotics control strategy report.

Mr. President, under the provisions of the Foreign Assistance Act, the President may justify a determination of certification for a country that has been found to be drug producing or drug transiting and he can do so on one of two grounds:

No. 1, that the country has cooperated fully with the United States in curbing illicit narcotics and/or has taken "adequate steps on its own" with regard to preventing drug production, drug processing, drug trafficking, drug-related money laundering, bribery and public corruption. That is No. 1. He can certify on the basis that that country is fully cooperating.

Or the President can certify that the United States' vital national interest preclude implementation of sanctions.

Over the course of the last few years, we have had a number of battles here on the floor of the Senate regarding the certification process. Last year we had resolutions to decertify Mexico and the Bahamas, and the Senate by a close margin did decertify Mexico. It decided again by close margin not to decertify the Bahamas.

I would like to remind my colleagues as we think about whether or not we should decertify the Bahamas this year that there are 10 factors that the law requires us to look at in making a judgment about whether or not a country should be decertified. Those 10 factors stated in the law range from the level of cooperation in interdiction, to the level of their own law enforcement effort, to the prosecutions and a host of different matters.

For instance, the number of seizures of drugs, the numbers of arrests of drug dealers, the extent to which United States law enforcement personnel are able to participate with the personnel of that country, these are benchmarks of one kind. Together they would compromise what most of us have come to call "operational cooperation."

There is no doubt, Mr. President, that from the Bahamas we have received on an operations level a kind of cooperation. Our DEA agents do participate in drug raids. They are present now when drugs are seized and destroyed. Our Customs boats and our aircraft have the right to hot pursuit. Our Coast Guard participates in joint patrols and surveillance. We have had this kind of cooperation for 3 years now and, Mr. President, I would say that the cooperation level operationally with the Bahamas is good. No one is going to argue that that should be a cause for decertification.

But, Mr. President, we have to look beyond 1 item out of 10 in which they have chosen to cooperate as we make a judgment about whether or not they are fully cooperating.

I would remind my colleagues of what a House Foreign Affairs staff mission to the Bahamas concluded in 1987.

I quote from their report:

> The fear of being decertified by the United States for failure to fully cooperate on antinarcotics efforts appears to be the major reason the Government of the Bahamas provides any cooperation which is received by the United States. This cooperation can be characterized as mainly of a low-level operational level.

Mr. President, I submit that we have learned enough about the drug war, we have learned enough about the problem of narcotics coming into this country to know if we are going to be serious about enforcing our efforts and calling on other countries to do. Then we have to look for something more than low-level operational cooperation.

Last year my esteemed distinguished colleague from Arizona, Senator DECONCINI, who will again this year assert that we should not in fact decertify the Bahamas, showed us letters extolling that cooperation, from Admiral Yost, commander of the Coast Guard, from Commissioner William von Raab of Customs and those letters praised the Bahamas and commended that Government for cooperation.

I hope, Mr. President, that my colleagues will not be misled by letters extolling the cooperation.

I concede this is low level, even high level if you want to call it that, cooperation of an operational kind.

But we have learned, also, about letters of cooperation, Mr. President. They were addressed to General Noriega. At one time we were told not very long ago, I think 2 years ago, in this debate on the floor of the Senate, that General Noriega is giving us full cooperation operationally.

Why? Because he allowed the Panamanian defense forces to cooperate with agents from the DEA in seizures and arrests.

In fact, the DEA seized large quantities of drugs and made arrests and the head of the DEA, Jack Lawn, wrote letters to General Noriega and thanked him for the help, and people actually came to the floor of the Senate and held up the letters and said we should not decertify Panama because Panama is helping us operationally.

On a certain level, Mr. President, General Noriega gave us cooperation. But it is clear to everybody today that in doing so, he took us and particularly his own nation on a gigantic ride. Noriega assisted in the arrest of small drug dealers. He provided information that resulted in the seizures of his competitors' drug shipments and in fact he even used his alliance with the DEA to get rid of people that he did not want to do business with or who somehow had become risks in his own organization.

It was very convenient for him to continue to work the Medellin cartel while meanwhile giving up a few people so that the statistics on narcotics seizures and statistics on narcotics-related arrests destroyed looked good while he continued to reap the profits of money laundering and indeed of other drug transactions.

So, I think we have to look beyond that, Mr. President. I hope my colleagues have reached a point where they are willing to look beyond that.

The best measuring stick for full cooperation, Mr. President, is the measuring stick that looks at the larger question of commitment to the war on drugs, and one of the most critical ingredients. When we were debating the drug law that we passed in 1986, we divided five areas of critical components of the drug war. Foremost among them at that particular time were interdiction, eradication, enforcement, education, and treatment.

Well, there is no country in Latin America or Central America or the Caribbean that has treatment and massive education. But interdiction, law enforcement, and the eradication are measurable.

Mr. President, section 481 of the Foreign Assistance Act, paragraph (e)3 instructs us—this is the law we passed when we created the certification process. And what we held ourselves accountable to was a standard where we said, here are the factors which the President must look at when making his determination on certification.

I quote from that particular section:

> In determining whether to make certification with respect to a country, the President shall consider the following: Has the government taken the legal and law enforcement steps necessary to eliminate, to the maximum extent possible, bribery and other forms of public corruption which facilitate the production, processing, or shipment of narcotic and psychotropic substances, or which discourage the investigation and prosecution of such acts, as evidenced by the enactment and enforcement of laws prohibiting such conduct.

Mr. President, we can continue to fool ourselves about a war on drugs and just look at cooperation on one level and say, "OK, we don't want to rustle the waters. Gee, we don't want

to upset anybody. A status quo is always safer. Let's not decertify."

Those were the arguments about Mexico. Everybody said, "If you decertify Mexico, our relationship will never be the same." Well, Mr. President, we decertified Mexico and as a result we have a President, a new President, in Mexico, who has taken strong steps to eliminate corruption and who has moved sufficiently that those of us who last year were willing to decertify this year have turned around and said, "We shouldn't do that this year. We should congratulate them for the steps they have taken and we should applaud the President for his movement and we should indeed provide greater assistance to encourage him to do that."

I regret, Mr. President, we cannot say that about the Bahamas. The Bahamas continues to be plagued by corruption.

Let me just quote what the State Department said in its own 1989 International Control Strategy Report, which provides the guideline to us about the actions that we should and should not take.

> Narcotics-related corruption continues to be a problem, making the country attractive to drug smugglers.

There it is. Corruption makes it attractive to drug smugglers.

Corruption is a festering wound in the Bahamas that, if we do not encourage them to take steps to cure, will prevent that country from ever truly cooperating part of the drug war.

I would like to call the attention of my colleagues to the Royal Commission of Inquiry report from 1984. The Royal Commission was made up of prominent individuals from various Commonwealth nations. Its purpose was to make—and I read from its charter—"a diligent and full inquiry into the extent and methods employed in the illegal use of the Bahamas for transshipment of dangerous drugs destined for the United States."

The Commission focused their investigation on drug-related corruption and in their final report they painted a devastating picture that implicated high government officials and prominent Bahamian businessmen and lawyers.

In 1987, the House Foreign Affairs staff report on the Bahamas said about the corruption and about the Royal Commission:

> Drug-related corruption remains rampant; individuals named in the 1984 Royal Commission of Inquiry report as known or suspected traffickers will operate freely.

This is 1989; that was 1985. So someone might say, "What's the relevance of reading the report from that period of time and here we are making a judgment about last year, 1988, 3 years out?" The relevance is, Mr. President, nothing has changed. Nothing has changed.

I spoke just recently with attorneys in the U.S. attorney's office in Florida. They will tell you that nothing has changed. Now if we are not willing to believe our own U.S. attorneys, who are charged with prosecuting in this war, who are we going to believe? The public relations men for the Government of the Bahamas? The people in the Government of the Bahamas who did not prosecute these people in the first place?

I believe that the Commission of Inquiry report provides us with an ongoing benchmark and that benchmark is as valid today as it was last year.

Mr. President, if you do not think it is valid today, then take note of what the U.S. attorneys in this country have done. Because developments in this country in the last months show that it is valid today. I am talking about the recent indictments of Kendall Nottage and Everette Bannister, both individuals featured prominently in the Royal Commission Report.

Last year, under questioning by Senator DECONCINI before the Committee on Appropriations, the Attorney General of the Bahamas responded to questions about Kendall Nottage and his alleged association with an American Mafia figure, Michael Caruana, of Massachusetts. Senator DECONCINI asked how Nottage, in the light of the findings of the Commission report, could have been appointed as head of the Bahamian broadcasting system—A very good question. The Attorney General's response was interesting. He said, "There was no evidence at the time that Mr. Nottage knew who Mr. Caruana, of Massachusetts, was said to be. There was no suggestion arising out of the Commission that his misdemeanor * * * was having a business relationship in the ownership of a hotel with a man who he said he did not know who he was at the time."

Well, Mr. President, either the Attorney General of the Bahamas does not know the facts or the Attorney General of the Bahamas is dealing with a different reality. Because if that Attorney General had quoted from the Royal Commission Report, he could have quoted paragraph 46, which says:

> Bearing in mind that both Mr. and Mrs. Nottage's telephone numbers, listed and unlisted, were noted under their Christian names in Caruana's address book seized when he was arrested, it is obvious that they were known to each other and to Caruana.

Now the Attorney General might have also quoted from paragraph 49.

> A prudent man, such as we assume Mr. Nottage to be, would make inquiries of the character of the person with whom he was dealing behind the corporate veil and thus avoid the risks of entering into a joint venture with an apparent criminal and the consequent effect upon his reputation of a person of Mr. Nottage's standing as a Cabinet Minister.

In a letter to me just last month, dated April 6, 1989, the Attorney General stated that "The Commission of Inquiry did not recommend prosecution because of the absence of any evidence either in the Bahamas or as provided by U.S. agencies."

Well, Mr. President, from the Royal Commission of Inquiry report, it is clear that they did not either substantiate, nor did they clear Mr. Nottage of allegations.

But, given that ambiguity and the prominence of Mr. Nottage, one might think that the Attorney General himself would have investigated the matter.

Why was it that the Bahamian Attorney General could not develop the evidence to indict Kendall Nottage? Well, I cannot answer that question, Mr. President, but I can tell you this.

Two months ago, on March 29, 1989, the U.S. attorney for the district of Massachusetts did indict Mr. Nottage, and the indictment charged him with conspiring with three others, including Michael Caruana, to defraud the Internal Revenue Service by laundering over $5 million of the proceeds of Caruana's unlawful drug business.

He is also charged with executing a false and fraudulent document, concealing Caruana's interest in the Islander Hotel, located in the Bahamas. And he was charged with giving false testimony to the Commission of Inquiry in 1984.

What do you think are the chances that Mr. Nottage is going to be extradited to the United States? That is another measure of whether or not there is full cooperation.

Well, again, one has to look at the record there, Mr. President. Because we have been trying to extradite another indicted Bahamian, who is very close to the Prime Minister, an attorney by the name of Nigel Bowe. And the Bahamian Attorney General has been responsible for this bungled and frustrated extradition process, an extradition process which, only 2 years ago, our own State Department in its narcotics and control report said was being held up, "due to specious legal grounds."

Mr. President, at a meeting in my office last month, I asked the Attorney General of the Bahamas why he never prosecuted Nigel Bowe. He told me the Commission of Inquiry report did not recommend the prosecution because of "the absence of evidence."

Again, Mr. President, either the Attorney General does not know the facts or he is dealing with a different reality. Let me read to you what the Commission of Inquiry report said in paragraph 92:

> We were disturbed by the number of drug traffickers, who quite independently of each other, were willing to describe in considerable detail their involvement with Nigel Bowe. Indeed, we note that his consistency

is denying any involvement with drug trafficking is exceeded only by the frequency of the allegations against him. We found this phenomenon of allegations too simplistic. He suggested that his frequent presentations on behalf of persons charged with drug trafficking led persons to make unwarranted assumptions that he was personally involved in the trade.

Quoting the report, Mr. President:

We do not believe that this is a sufficient explanation for the fairly consistent pattern which emerges from a careful analysis of the numerous allegations made by the various drug traffickers who, for the most part, did not fall within the category of persons identified by Bowe. In addition, we found that his repeated denials lacked a ring of truth.

That is the finding of the Commission. They include:

We have formed the opinion that Mr. Bowe's involvement with drug traffickers far exceeded a lawyer/client relationship and that he benefited materially from his numerous associations with them. We have concluded that he was aware of their nefarious activities and assisted them in their nefarious trade.

So, here we are, Mr. President; the Attorney General says: No evidence. And here is the evidence in the report. They concluded that he assisted them in their trade.

It sounds to me like the Commission of Inquiry believed there was probable cause for an indictment but, since the Commission did not tell the Bahamian Attorney General what to do, the Attorney General did not pursue the matter and has never pursued the matter. And to this moment, the Government of the United States is still struggling to get this crony of the Prime Minister's back here to the United States. Why? Because Mr. Bowe was indicated in the United States of America. Yet another person who they refuse to pursue in the Bahamas, but we have pursued here.

In 1985 he was indicted in the southern district of Florida and the Assistant U.S. Attorney who handled the case—incidentally, one of the finest prosecutors in the country, Richard Gregorie, who, sadly has left the U.S. attorney's office because he felt there was too much interference in his ability to wage the war on drugs—has said that the case against Nigel Bowe is a strong case.

He noted that much of the same evidence that was used to convict one of Bowe's co-conspirators in a State court would be used to prosecute Nigel Bowe in a Federal court.

You may ask, then, why was not Nigel Bowe extradited to the United States? Well, I asked the Attorney General of the Bahamas that very question. And he was asked that also by Senator DECONCINI in a hearing last year.

The Attorney general said that Bowe hadn't been extradited because "he can afford to take advantage of all the legal devices and all the legal niceties which he can employ lawyers to do." And, he added, "He hasn't been extradited because I won't tell the judge what to do * * * because in the Bahamas no Attorney General would dare tell a judge what to do. I would have to resign."

Well, there again, either the Attorney General does not know the facts or he is dealing with a different reality, Mr. President. Because, according to former U.S. attorney, Dick Gregorie, the reason Nigel Bowe was not extradited was the same reason stated by our own U.S. State Department, for specious legal grounds. And as Dick Gregorie said it was either "gross incompetence" or "corruption" on the part of the Bahamian Attorney General's office.

Indeed, the report of the International Narcotics Control Strategy of 1988 seems to indicate that it gave little credibility to the Attorney General's pursuit of this matter. Extradition can take time sometimes, Mr. President. But we do not have any difficulty extraditing, usually, people from Great Britain and elsewhere, under the same legal system. The United States Attorney forwards the request to the Bahamian Attorney General. He in turn forwards it to the appropriate Bahamian court.

Well, Mr. President, let me tell you what happened. The first time the Justice Department tried to get extradition of Bowe, the Attorney General's office forwarded the request of the proper court but it misspelled Bowe's name, B-o-w-e, misspelled Bowe's name so that the request was thrown out.

The second time the Justice Department sought extradition, the Bahamian Attorney General's office, which got the name right on the second one, cited the wrong Bahamian law, which it had not cited incorrectly on the first one, Mr. President. Now, under the certification law, matters to be considered, section 3(k). Again, this is one of the matters that we have said the President must take into account and we presume the President did. It says: "Has the government expeditiously processed United States extradition requests relating to narcotics trafficking?"

The answer, as regards Nigel Bowe, is an unequivocal "no." But the International Narcotics Control Strategy Report points out that there are 20 outstanding U.S. requests for extradition and "most of the U.S. requests are stalled in Bahamian legal proceedings."

It is not the case, Mr. President, where expeditious effort to expedite, is taking place.

Now, forget extradition. Forget Nigel Bowe, forget Kendall Nottage. What about Everette Bannister? I mentioned him previously.

Mr. CHAFEE. I wonder if the Senator will yield for a question on extradition?

Mr. KERRY. I will be delighted to yield for a question on extradition.

Mr. CHAFEE. Am I correct in saying that there is a new extradition treaty that has been worked out between our two governments but has not been ratified by the United States?

Mr. KERRY. We are still operating under the old extradition treaty.

Mr. CHAFEE. But a new extradition treaty has been worked out between the U.S. State Department and the Bahamian Government, but has not been ratified by the United States?

Mr. KERRY. That is accurate.

Mr. CHAFEE. But the Bahamians have ratified it?

Mr. KERRY. I believe the Bahamians have passed it. I cannot speak to whether they have ratified it.

Mr. CHAFEE. Well, that is my understanding. But the United States has not ratified it.

Mr. KERRY. That is correct.

Mr. CHAFEE. I know the distinguished Senator from Massachusetts is severe on the Bahamians, and particularly has addressed the matter of extradition. I do not quite understand why, following the negotiation of an extradition treaty between the two governments, and the Bahamians have ratified it, and the U.S. Government in the past 2 years has not ratified it, including the committee the Senator sits on. Is there any explanation for that?

Mr. KERRY. There is an explanation, and it probably will not be a comfortable one for the Senator on that side of the aisle. We have had a particular problem with a member of the committee from his side of the aisle who has slowed up some of the process with respect to a number of the agreements we have tried to forward not only with respect to the Bahamas but with respect to Mexico and a number of other areas.

Mr. CHAFEE. If I could follow on that, I do not find it a very satisfactory explanation, if I might say.

Mr. KERRY. It is a real one.

Mr. CHAFEE. For a majority party who controls the committee as substantially as that committee is controlled, to say that because of one individual——

Mr. KERRY. If I can answer the distinguished Senator from Rhode Island, I have no doubt that the committee is going to try to move that again in rapid order as we did the six mutual legal assistance treaties that we have been trying now in good faith for a year and a half to move through the committee. We held hearings on it I think about 2 to 3 weeks ago. It is my suspicion that they will be coming up for a vote in short order before the committee.

Mr. CHAFEE. The only point I would make, you just completed your dissertation, your comments upon the extradition problems moving on to something else, but I think it is fair to point out that in a treaty that has been negotiated between the two governments dealing with extradition, the Bahamians have ratified it, the United States has not ratified it, and I think that is worthy of pointing out. I want to thank the Chair.

Mr. KERRY. Let me make very clear, the Senator from Rhode Island raises a very valid point or question. The point is there is a major distinction between the application of the existing law, which is the one we are operating on, and the negotiating process of a new one. Again, we are glad that they have entered into negotiations and proceed forward, but as you look at the mosaic of cooperation, you have to look beyond mere negotiation into what has been done in terms of true cooperative effort within those fields. The record is very clear here.

Why is the last extradition treaty being applied speciously? Why is the last extradition agreement not being given the support of the Bahamian Government, if you will, and expedited process that would make it work? What was it that brought us to the point we have to negotiate a new one? Will we have the same problems applying the new one if and when it is finally ratified? We are not making those judgments prospectively. We are making them on the basis of where we are today. Take the issue of extradition out. If the extradition process does not convince you, you still have other enforcement proceeding deficiencies which are critical. I ask the Senator to look at the case of Mr. Everette Bannister. The Attorney General prosecuted Everette Bannister. In fact, according to the Bahamian Attorney General, he prosecuted all those individuals from whom the commission of inquiry recommended prosecuting.

How do I know that? Because he sat in my office and he told me that. The list of those people is Mr. Bannister, Mr. George Smith, Mr. Edward Maynard, Mr. Howard K. Smith, Mr. Langton Hilton and Mr. Godfrey Pinder. How many of them were convicted? Not one, In fact, not one of those cases even went to trial.

Mr. Smith in 1985 was the former Minister of Agriculture and Fisheries. He was accused of accepting a bribe of $100,000. A preliminary inquiry was held, and on January 26, the charges against him were dismissed on the grounds that the evidence presented was not sufficient to put him on trial.

Mr. Pinder was charged with bribery and perjury. During his preliminary inquiry, the magistrate conducting the proceedings ruled that a tape recording the crown attorney sought to introduce was inadmissible. The case was closed.

The charges against Mr. Hilton were dismissed at the end of the preliminary inquiry and no reasons were recorded on the case ledger for why.

Mr. Maynard, unlike the other individuals said, "I want to be tried." Lo and behold, after he said that, the attorney's key witness did not appear, and on February 27, the attorney withdrew the two counts of perjury that had been held against him.

Mr. Smith, this police officer was charged with seven counts of illegally accepting a bribe. The same key witness who failed to show for the Maynard trial also failed to appear for his and, again, the cases were dismissed.

What about Mr. Bannister? Mr. Bannister was charged with abetment to bribery, bribery, and two counts of perjury. The same magistrate who dismissed the charges against Mr. Smith discharged Mr. Bannister after the counsel argued that whatever evidence that had been presented by the crown attorney did not satisfy the requirements of the code, and those were thrown out.

So when he says he prosecuted these individuals, again, either he is not aware of the facts or he is in a different reality. They were all dismissed at the preliminary inquiry stage. None of the cases resulted in convictions and I think, Mr. President, that we have a right to make a judgment about convictions.

The Attorney General said to me again that the star witness against Bannister, a Mr. Edward Ward, proved to be "weak and unsatisfactory as a witness."

The Bahamian Attorney General, knew that there were other witnesses who could finger Mr. Bannister. One of those witnesses, and I hope the Senator from Rhode Island is aware of this, one of those other witnesses that the Attorney General could have used testified before the U.S. Senate Subcommittee on Terrorism and Narcotics.

I chaired that hearing. I want you to listen to how the son of Everette Bannister, a gentleman by the name of Gorman Bannister, described his own father's relationship with the infamous Colombian narcotics trafficker, Carlos Lehder, who was convicted in a Florida court last year.

Question by me:

Did your father warn Carlos Lehder of the police raid on Norman's Cay?

Mr. BANNISTER. Yes.

Would you describe that?

Mr. BANNISTER. Well, as I recall, he made a phone call to Carlos letting him know the police were going to——

You heard the phone call?

Oh, yes, yes, yes. I know my father called one time and he told him "Listen, the police are going to raid Norman's Cay on a certain day. Clean it up." And when they went there they didn't find anything.

Now if you question the credibility of Gorman Bannister, remember, it was his testimony that was used and accorded the United States by the U.S. attorney to convict Carlos Lehder.

So, again, Mr. President, if the Attorney General of the Bahamas will not prosecute, he should at least extradite him to this country because the U.S. attorney for the Middle District of Florida will prosecute Mr. Bannister. On March 22, 1989, he was indicted by U.S. Attorney Robert Genzman and he was charged with receiving money for bribes to facilitate the importation of cocaine into the United States for the Medellin cartel.

So, Mr. President, this Senator is convinced as a former prosecutor who has conducted grand jury investigations and watched the process, I know the difference between asking the right people the right questions and turning your head the other way. I know the difference between a bona fide effort to ferret out corruption in government and an effort which simply says business as usual.

Mr. President, in good conscience, in terms of what this law says, we cannot say that there is full cooperation.

The 1987 House Foreign Affairs Committee report said, "Officials in the Bahamas noted that it is extremely difficult to fire a corrupt policeman. In the 5 years since the commission of inquiry report, some public officials have been indicated, but few have been prosecuted."

Mr. President, I am not going to go on. There is more here. I know that Senator COATS and Senator LOTT each need time, and I want to allow time for them to speak. It is my hope that we are not going to be seduced by cosmetic cooperation if we are going to be serious about a war on drugs. Last year we made a serious statement about Mexico. I think it helped. I think it is time for us to make a serious statement about the Bahamas, and I hope my colleagues will join in doing so. I reserve what remaining time may exist.

Madam President, I yield 5 minutes to the distinguished Senator from Indiana.

The PRESIDING OFFICER (Ms. MIKULSKI). The Senator from Indiana.

Mr. COATS. Madam President, I rise in support of the resolution of the Senator from Massachusetts. At first glance it might seem trivial, perhaps even humorous, for the U.S. Senate to turn its wrath on the Bahamas. This is a nation, after all, of beaches, bikinis, and whose only previous threat to the United States was some particularly nasty sunburns.

But the Bahamas, in recent years, have become something else entirely—a staging area for drug shipments, an aircraft carrier for the drug trade. While it does not produce drugs for

export, it has become a major transit point for cocaine and marijuana entering the United States. It has also become an international bank for the illegal laundering of drug money.

Its geography is ideal for the drug trade, a nation of 700 islands covering over 100,000 square miles. It has 73 public and private airstrips and 110 small boat marinas. These are things that the Bahamian Government cannot help. But its actions on those things that are under its control have revealed an attitude that does not represent the full cooperation in the war against drugs demanded by the 1986 Anti-Drug Abuse Act. Narcotics-related corruption in the Bahamas is rampant and official investigations are slow. Cooperation is lacking on projects like "Operation Penguin" and interpretation of data from mobile radars.

We have a responsibility, rooted in law and in need, to ensure that every nation which receives our tax dollars also gives their full cooperation to the fight against drugs. Nothing less than the lives and futures of our children are at stake. We do not have the option to make exceptions. We do not have the luxury of timidity. We have set a standard in this Nation, and that standard must be met. We must demand that it be met.

It is for this reason that I intend to support this legislation to decertify the Bahamas, and I urge my colleagues to do the same.

I thank the Senator from Massachusetts for bringing this legislation before us, and I urge my colleagues to support it. I thank the Chair. I yield back to the Senator whatever time I have remaining.

Mr. KERRY. I thank the distinguished Senator from Indiana for his support and for his observations.

I yield 6 minutes to the Senator from Mississippi.

Mr. LOTT. Madam President, I thank the Senator for yielding this time to me. As a cosponsor, I rise in support of Senate Joint Resolution 100.

The Bahamas are a major transit point for cocaine and marijuana coming into the United States. I think it is a point that is not being disputed by the administration or by anybody. The Bahamas are a major point of transit. That is the reason why I am sponsoring this joint resolution. The administration's certification report states that we have enjoyed a very cooperative relationship with the Government of the Commonwealth of the Bahamas and it praises joint United States-Bahamanian law enforcement operations, but let me read to you what the report goes on to say.

Nonetheless, the reality is that too much cocaine still passes through the Bahamas. And, while the Government of the Commonwealth of the Bahamas is more active in investigating allegations of corruption, we are concerned by reports that corruption still exists. * * *

We also believe the noteworthy Bahamian cooperation in joint anti-narcotics efforts should be accompanied by stronger unilateral efforts to curb drug trafficking and consumption within the Bahamas.

These are the administration's own words in its own report which was submitted to the Congress just 2 months ago.

Madam President, I think we have here a classic example of the State Department placing its fear of offending the governments of major drug-producing and drug-transit countries above our Nation's war against drugs, which I believe must be the number one priority.

I am not trying to shift the blame to the Bahamas or to Mexico. The problem begins here, and we need to be more aggressive in the way we punish drug pushers and drug users in this country.

We need more active law enforcement, more determined and committed judges, more prison facilities, and more interdiction. But as an important part of that overall war against drugs, we must stop drugs where they begin, in the countries that are producing them or that are being used as a transit point.

To try to tell the people in Mississippi or in Massachusetts or other parts of the United States that these countries are doing the best they can, and that we cannot afford to be cutting off foreign assistance to these countries that are major transit points used in poisoning the people of this country, in my mind is totally unacceptable and indefensible.

On March 16, I wrote the new drug czar, Bill Bennett, and asked him to evaluate the certification process and to furnish me with his recommendations as to how the process might be tightened and strengthened. I also asked him what steps he planned to take to let the State Department know that we cannot continue to do business as usual if we are to win the war against drugs that is sweeping our country.

I am pleased to report that Mr. Bennett, in response to my letter, committed himself, as part of the national strategy to combat illegal drugs that he will be developing over the next 6 months, to deal with the steps being taken or not being taken by foreign countries to control drugs before they reach the borders of the United States and to work closely with the Secretary of State to study the narcotics control efforts of these countries very carefully.

I ask unanimous consent to insert in the RECORD my letter to Mr. Bennett and his response.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

OFFICE OF NATIONAL DRUG CONTROL POLICY, EXECUTIVE OFFICE OF THE PRESIDENT,
Washington, DC, April 5, 1989.

Senator TRENT LOTT,
U.S. Senate, Washington, DC.

DEAR TRENT: Thank you for your letter of March 16 discussing the State Department's recent report on international narcotics control strategy. Several other Senators and Members of Congress have also expressed concern to me about this process by which foreign countries are certified to be cooperating with the United States in our drug control efforts.

As you know, I was confirmed by the Senate on March 9. My first charge is to develop, within 6 months, our Nation's strategy to combat illegal drugs. A portion of that strategy will certainly deal with the steps taken by foreign countries to control drugs before they reach U.S. borders. In this regard, I will be working closely with the Secretary of State to study carefully the narcotics control efforts of these countries. My conclusions on this matter will be contained in the strategy report to be promulgated in 6 months.

I want to thank you for your interest in our international narcotics control efforts. I look forward to working with you during the 101st Congress.

Sincerely,

WILLIAM BENNETT.

U.S. SENATE,
Washington, DC, March 16, 1989.

Hon. WILLIAM J. BENNETT,
Director, Office of National Drug Control Policy, Executive Office of the President, Washington, DC.

DEAR BILL: I have reviewed the State Department's 1989 International Narcotics Control Strategy Report and the Presidential certifications for narcotics source and transit countries. And I am disturbed by the conclusions drawn.

In my opinion, the findings that major narcotics producing countries have cooperated fully with the United States, or have taken adequate steps on their own to control narcotics production, trafficking, and money laundering, are not justified by the evidence.

Rather, it seems to me that the State Department has subordinated our Nation's war against drugs to diplomatic niceties and its fear of offending major drug-producing countries. In short, they don't want to rock the boat.

I understand that at your confirmation hearing, you expressed similar misgivings about the Administration's decision to certify certain drug producing or drug transit countries as cooperating in the war against drugs.

As the national drug "czar," I would like your assessment of the certification process as well your recommendations as to how the process might be tightened and strengthened. I would also like to know what steps you plan to take to let the State Department know that we cannot continue to do business as usual if we are to win the war against drugs that is sweeping our country.

I am also enclosing an article from the New York Times by A.M. Rosenthal entitled, "The Giant Loophole." I would like your reaction to it.

I want to congratulate you on your recent confirmation. And I look forward to working with you in the weeks and months ahead.

With best wishes, I am
Sincerely yours,
TRENT LOTT.

Mr. LOTT. The most serious problem with the Bahamas is the failure of the Bahamian Government to prosecute, convict, and remove from positions of influence individuals involved in drug trafficking, individuals identified 5 years ago, in 1984, by a Royal Commission of Inquiry in the Bahamas. These people are still operating today and very little has changed. Although some public officials have been indicted, few have been prosecuted. Only one low-level policeman has been convicted.

On March 29, 1989, Everett Bannister—and we have already had some conversation about him—was indicted by the U.S. attorney for the Middle District of Florida. He was charged with receiving money for bribes to facilitate the importation of cocaine into the United States for the Medellin cartel.

The former attorney general of the Bahamas, Paul Adderly, declined to prosecute Mr. Bannister and has been unwilling to extradite him to the United States. For this action in behalf of Mr. Bannister and others involved with the drug trade, we find now that Mr. Adderly has been promoted to Minister of National Security.

Madam President, I sum it up this way. A strong message is essential. I want us to have a good relationship with the Bahamas, but in my opinion we do not have a good relationship with the Bahamas or any other countries that are allowing their borders to be used to produce cocaine and other drugs and to be used as transit points for them to come into the United States.

They must be more aggressive. We must be more aggressive. The State Department has to make the point we will not tolerate the status quo. And so I am pleased to join in cosponsoring this joint resolution. I compliment the Senator from Massachusetts for doing it. I intend to support other resolutions like this until we get more active and aggressive support from countries that are supposed to be our friends.

If this is a war on drugs, let us get serious about it. I yield back the remainder of my time.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. CHAFEE. I yield myself such time as required.

The PRESIDING OFFICER. The Senator may proceed.

Mr. CHAFEE. Madam President, this is one of those, what we call make-you-feel-good resolutions. It is a chance to beat our chests. It is a chance to get tough. It is a chance to show who is boss, but the question is—and I think the question that should remain before us—what are we doing to help conduct the war against drugs?

Now, are the Bahamas perfect? No one will say so. There are 700 islands down there spread over 80,000 square miles. Only 29 of those 700 islands are occupied. The Bahamas do not produce drugs but are an ideal transit point. The Bahamas probably have some corruption. I cannot certify to that. But I do know that the administration has stated that, in its best judgment, proceeding with this resolution would not be helpful.

In 1988, the last year for which we have statistics—obviously, just last year—over 9 metric tons of cocaine was seized in the Bahamas. One-quarter of that was seized unilaterally by the Bahamian police or defense forces. Three-quarters of it was seized in joint operations between the Bahamians and the United States enforcement agencies.

What we have in the Bahamas is a right for the United States antidrug forces—and that includes the Coast Guard—to overfly in their air space, to operate within their waters, and indeed just a year ago we received a letter addressed to Senator DECONCINI from the Commandant of the Coast Guard pointing out that the cooperation with the Bahamians was excellent.

This same resolution was brought up last year and was defeated.

I believe the vote was 54 to 40. I think that would be the best way to proceed today.

We do not have a perfect situation, nor I might say do we have a perfect situation to fight drugs in other countries in the world. Is there corruption? There probably is some but there is some corruption in drug matters in the United States likewise. To suggest that by cutting off this aid, by saying to the Bahamians you have not done enough, you are not simon-pure, it is all right for you to ratify an extradition treaty, we have not ratified it yet but forget that. And everybody that has brought it before your courts is not convicted on drugs. The way we feel it should be. Maybe the prosecution should have been better.

But the question is: What is going to be most helpful in fighting drugs? We have privileges in the Bahamian waters and overflight that we do not have with any other country, fortunately, and I think we can say this: that because of our efforts not solely in the Bahamian waters, but the amount of drugs that is coming up through that particular direction is not what it was before but that is true due to a whole series of war against the supply of drugs that has been fairly successful in that part of the world with the drug traffic shifting further west in the route up from Colombia.

I wish I could say that the Bahamians were perfect, but they are not. I do not think that this resolution is going to make progress for us. I think if approved it is going to set us back. The Bahamian Government, as I say, has cooperated in many, many respects, and if what happens is here in this Senate we say you have been good but not good enough, so we are going to cut your aid in half, I think if I were in the position of the Bahamian Government I would say, well, that is what we get for our cooperation. That cooperation has not been extended to us by any other country, and I would ask the distinguished Senator from Massachusetts, who is familiar with these:

Is there any other country that permits us overflight rights to the extent the Bahamians do? Is there any other country that permits us to go into their waters, into their territorial waters in hot pursuit, or in patrol to the extent the Bahamians do?

Mr. KERRY. Let me say to the distinguished Senator from Rhode Island two things. No. 1, Mexico does permit overflight, but not hot pursuit. But there is permission for overflight.

Mr. CHAFEE. Is there any other country that grants us the privileges that the Bahamians do? I do not think there is. The Senator is very deeply involved in these matters, and may be able to answer.

Mr. KERRY. With Canada we have a hot pursuit capacity there. But let me make a point to the distinguished Senator. First of all, I wanted to check with staff on the Foreign Relations Committee because I sense that there might be some confusion, and, indeed, I am correct. But I did not want to answer that for the distinguished Senator affirmatively without knowing.

On the issue of this extradition treaty, neither country has ratified. I believe the Senator is referring to the Mutual Legal Assistance Treaty, and there we have been working diligently to get that out of committee, and we hope it will be out very, very shortly.

The second comment I would make, I do not believe the Senator was here when I made this comment. So I, in a sense, addressed it but I reiterate that I would concede to the Senator, and I have conceded, completely the efforts in the Bahamas on this operational level.

Indeed, I said at the outset of my remarks that there really is not another country operationally that has gone as far as they have. But that is only one of some 10 ingredients which we wrote into the law by which we must judge full cooperation. Full cooperation is a term of art. But this is not a feel-good issue. In fact, I do not feel good. I feel badly that we have to come to this kind of confrontational point, but the point is it proved to have an effect in

Mexico and, if you look at the 10 other areas of noncooperation or of noneffort, it seems to me that one makes a judgment that there is considerably more the Bahamas could do.

Mr. CHAFEE. I suspect, and I agree with the distinguished Senator from Massachusetts. There is more the Bahamians can do. I suspect there is more the United States can do. To suggest that there is not bribery in these areas where drugs are involved would be naive. There is bribery taking place and acceptance of bribes by law enforcement officials in the United States, and sure I can see this taking place in the Bahamian Islands likewise.

When you have these massive amounts of money coming in, the temptation is there to take it, particularly if it is a nation with a relatively low standard of living, low per capita income, where these amounts are extremely tempting. I think we ought to keep the question before us. The question is: What is going to do most to win the war against drugs? Is it to follow the Senator's resolution? Mind you the administration has said that in its judgment the Bahamian Government has met the criteria. Now the Senator from Massachusetts has said, "No, they haven't." So here we are. We are disputing that. That is what the vote is all about in an hour or so.

Mr. KERRY. Madam President, will the distinguished Senator yield?

Mr. CHAFEE. Sure.

Mr. KERRY. Madam President, this Senator has never suggested that there is some yardstick of simonpurism by which we are supposed to be making this. The test is not a question of whether or not there is some corruption. Yes, there is some corruption in the United States. Ten percent of the Miami Police Department was fired a year-and-a-half ago. The difference is we are firing them. They are not. The difference is we are prosecuting Carlos Lehder. We are prosecuting Matta Ballesteros. We are seeking the extraditions.

We are prosecuting our own people, and we are snowed under, but I do not think anybody has alleged that in this country there is some high governmental conspiracy restraining our enforcement efforts. But there is an allegation that there is a high-level government restraint within the Bahamas.

That is the distinction here. The question is not whether or not there is some corruption or we are applying some ridiculous standard. The question is the bona fides of the effort to fight.

The Senator has cited these questions of cooperation of other countries and letters. My God, we were writing letters to Noriega. I remember a Senator on the floor reading to me the DEA Chief's letter to General Noriega saying we should not decertify Panama. I will bet you today if we had a decertification vote, the Senate would be 100 to 0. And the question is whether or not we are going to allow low-level cooperation efforts to allow them to continue to pull the wool over our eyes. It is the easiest thing in the world.

I have learned from some witnesses who testified before the Narcotics Subcommittee that Mexico can tally up seizure records. What they do is, on the side of the gulf they seize the drugs, and they have been known to give an escort to the very drugs they seize to the other side of the gulf. And then the guy goes off and sells them. But they have a seizure.

If we are going to be snookered by seizures and arrests, and have this concept of cooperation, which does not produce a real deterrent within the criminal justice system in society, then we do not deserve to be engaged in this so-called war on drugs.

Mr. CHAFEE. Madam President, I think the term "snookered" is good for perhaps a chuckle here, but I think to apply that to a statement by the Secretary of Defense of our country who wrote the chairman of the Foreign Relations Committee stating that he was concerned about the Bahamas, about the situation there, nonetheless in his judgment this certification of disapproval, or put it the other way, the certification of approval, should be granted.

That is what I am drawing on. That is my belief, and I am not sure what the Senator was referring to when he said we have had letters to Noriega. This letter that I was referred to was the letter from the Commandant of the Coast Guard to a Member of this Senate, pointing out the cooperation that the Coast Guard had received. No one will question the distinguished Senator's admiration for the Coast Guard and his support for their activities. They are the people on the front lines, the people who are trying to seize these drugs; and the Coast Guard's position has been—and nothing has changed; nothing has come up to indicate their position is otherwise—that the cooperation they are receiving and the advantage they have operating in the Bahamian wars and air space are extremely important. We delegate the Coast Guard to do its job, and in my judgment, they have done a good job, and this is their position, which has not changed.

Mr. KERRY. Madam President, will the Senator yield?

Mr. CHAFEE. Yes.

Mr. KERRY. I will answer his question. What I am trying to say to the distinghished Senator and my colleagues is not the question of whether or not Admiral Yost has received cooperation. He has, absolutely.

But operational cooperation is the easiest thing for a nation to give and still remain within the other channels of narcotics networking. General Noriega—and again the Senator from Rhode Island was not here when I described this—we had a number of witnesses, and we have had this confirmed by the FBI in documents, that there are individuals that General Noriega would feed up to them, when he was tired of them or finished with them, he would serve them up on a platter to the DEA; and indeed, he would get cooperative congratulations for it. Meanwhile, he would open another bank to launder money or cut a new deal with the Medellin cartel.

The same thing is happening in the Bahamas. Operationally, they can cooperate and pat us on the back. We can shake hands and have our pictures taken at a bust. Meanwhile, they know full well there were five or six other loads that can come through, and they have been paid off, whenever they have been paid off, and the capacity exists to maintain that other network of relationships which allow narcotics to come through.

If you do not put people in jail—it is happening in our country now, incidentally. Our jails are overcrowded, so we are letting people out early. The result is, we undermine deterrence into our country, and narcotics traffickers know that the risk of making a million dollars in one night is not a bad risk when weighed against the prospect of going to jail for 3 or 4 years; not a bad annuity. You get a trust fund when you get out, and it beats going to college for people who do not worry about their curricula vitae.

That undercuts the war in the Bahamas, this perception people have that even if you get arrested, you will not go to jail. It does not matter if you get arrested. It is an inconvenience; it is not a deterrent.

We have to measure their efforts, but not just in the photo-taking operational capacity. We have to measure it against the degree to which they are truly enforcing the law, restricting bribery, encouraging extradition, and cooperating with us to change the ethic of their own society—incidentally, where use is increasing at a dangerous rate.

Mr. CHAFEE. Madam President, I regret the comparison of Mr. Noriega as used. I think anybody can drag out Mr. Noriega for about any illustration that a Senator debating this matter wants.

I would like to just read from the letter from the Secretary of State to the chairman of the Foreign Relations Committee in the Senate, in which the Secretary of State follows the law and has certified these countries for continued assistance, amongst them being

the Bahamas. In it he points out, "While there is need for much improvement, the President and I believe these certifications are an important element in working toward that goal"; namely, the war against drugs.

He then goes on to say that attached to the letter is a statement of explanation.

The overall letter was a general letter applying to some six countries. He points out in his statement of explanation:

The islands of the Bahamas lie critically astride the principal narcotics trafficking route between South America and the United States. In dealing this this problem, we long have enjoyed a very cooperative relationship with the Government of the Commonwealth of the Bahamas. In particular, the joint U.S.-Bahamian OPBAT—

Which is an operational plan that is enforced—

is a premier example of a combined law-enforcement operation.

Nonetheless, the reality is that too much cocaine still passes through the Bahamas. And while the Government of the Commonwealth of the Bahamas is more active in investigating allegations of corruption, we are concerned by reports that corruption still exists. Prime Minister Pindling and his ministers must forcefully address this issue.

We also believe the noteworthy Bahamian cooperation in joint anti-narcotics efforts should be accompanied by stronger unilateral efforts to curb drug trafficking and consumption within the Bahamas.

That is the consumption within the Bahamas. Certainly, we think that effort should be made to curb the consumption in the Bahamas. We think greater effort should be made to curb consumption in the United States of America.

The point I would like to make, Madam President, is this: Our Government is aware of this, and our Government is monitoring the situation. But in making its decision and evaluating all aspects, the administration has come to the conclusion that we would be best served in this war by not denying the certification to the Government of Bahamas.

I believe in that, and I hope we will give this administration a chance. This thing is renewed and comes back every year. It will be back again. I am sure the Senator from Massachusetts is vigilantly going to follow it, as he has, to his credit, in the past.

I ask unanimous consent that the letter from the Secretary of State be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR MR. CHAIRMAN: Attached is the President's first Determination regarding the certification of major narcotics source and transit countries required by the Foreign Assistance Act. Quite frankly, he and I are both deeply troubled by the state of affairs upon which he based his certification decisions. Despite the hard work and dedication of many public servants and private citizens, both here and abroad, the international war on narcotics is clearly not being won. In fact, in some areas we appear to be slipping backwards.

Nonetheless, we present you these certifications in good faith in the hope that we can work together against the drug menance. For six countries, there are statements that explain the certification while acknowledging that each of the six can and must do more in the future to end the drug trade. For one country, we have provided a justification statement for a vital national interest waiver. These certification decisions have all been made after careful deliberation recognizing that the efforts of foreign governments to stem the production and use of drugs have yielded mixed results. While there is need for much improvement, the President and I believe these certifications are an important element in working toward that goal.

As you know, the Anti-Drug Abuse Act of 1988 established the Office of National Drug Control Policy. Bill Bennett has been selected by the President to become the first director of this office and has been instructed to pursue aggressively his new duties to revitalize our national anti-drug effort. One of his first priorities after confirmation will be to develop a revised national drug control strategy. As that strategy is being formulated, we would like to establish a dialogue on drugs with the Congress. A cooperative relationship with full exchange of ideas between the executive and legislative branches is the best way to forge an integrated and cohesive national strategy that will ultimately prove effective in curbing the availability and use of drugs in America.

Finally, I want to assure you that narcotics will remain a key element of our foreign policy agenda. The President and I intend to raise this issue with foreign leaders and express our personal interest in their efforts to reduce the supply of illicit drugs bound for the U.S.

We look forward to working with the Congress to establish a sound drug control strategy to remove the scourge of drugs from our nation.

Sincerely yours,

JAMES A. BAKER III.

STATEMENT OF EXPLANATION—THE BAHAMAS

The islands of the Bahamas lie critically astride the principal narcotics trafficking route between South America and the United States. In dealing with this problem, we long have enjoyed a very cooperative relationship with the Government of the Commonwealth of the Bahamas. In particular the joint U.S.-Bahamian OPBAT is a premier example of a combined law enforcement operation.

Nonetheless, the reality is that too much cocaine still passes through the Bahamas. And, while the Government of the Commonwealth of the Bahamas is more active in investigating allegations of corruption, we are concerned by reports that corruption still exists. Prime Minister Pindling and his ministers must forcefully address this issue.

We also believe the noteworthy Bahamian cooperation in joint anti-narcotics efforts should be accompanied by stronger unilateral efforts to curb drug trafficking and consumption within the Bahamas.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Madam President, I ask unanimous consent that time be split equally, in the course of a quorum call, between both sides, and I will suggest that quorum call if I receive that consent.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KERRY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DECONCINI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Madam President, I ask unanimous consent that the time be charged against the opponents for the amount of time necessary for me to make my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator may proceed.

Mr. DECONCINI. I thank the Chair.

Madam President, I rise today in opposition to the resolution of decertification of the Bahamas.

I have the greatest respect for the Senator from Massachusetts and of course his right to bring this matter up. I also want to compliment him and let the RECORD show my great admiration for the hearings he has held in the international narcotics area. I think they have been most constructive and extremely beneficial to point out the magnitude of the problem facing our Nation vis-a-vis other nations, but to have to revisit the Bahamas again really is unfortunate.

In fact, I believe it is a complete travesty that we even debate whether the Bahamas are fully cooperating with the United States in antidrug efforts when you compare its record with countries like Mexico, Peru, or Pakistan.

There is little doubt that the Bahamians are far and away the best cooperators. The question can always be what is full cooperation.

I believe the reason the Bahamas is being singled out is that it is a small country that is of very little importance geographically or economically to the United States—a country where the main source of revenue comes from tourism. Let us face it. They are easy to pick on.

The Bahamas are uniquely situated between the largest source country for cocaine and one of the largest producers of marijuana, that being, of course, Colombia, and the largest consumer of illegal drugs unfortunately to say is the United States. Central to the argument about the Bahamas is that it is not 1 island of several million people, but it is made up of over 700 islands and about 250,000 residents. The Ba-

hamas and its territorial waters cover approximately 80,000 square miles—that is the combined area of the States of New York, Connecticut, Massachusetts, New Hampshire, and Vermont.

The Bahamas has never been a producer of any kind of illegal drug that I can find. What they are is a transshipment point for cocaine and marijuana coming into our country, the United States. The Bahamians have attempted to address the transshipment problem by entering into several joint operations with United States law enforcement agencies.

Before I outline some of the antidrug efforts made by the Bahamians, I would like to review recent testimony before the Foreign Relations Committee by the Deputy Administrator of the Drug Enforcement Administration, David Westrate.

According to Mr. Westrate, because of Bahamian antidrug efforts and the increased presence of United States law enforcement agencies, that country is no longer the major transshipment point for drugs leaving South America and heading for the United States. That title now belongs to the 2,000-mile border along the Southwest part of this country, the United States-Mexico border.

Mr. Westrate also pointed out the United States customs preclearance facility in the Bahamas is not used as either a major or even minor source for drugs being smuggled into our country.

The problem of corruption in the Bahamas is an issue that greatly disturbs me as it does many in this body. I have continually pressured our law enforcement agencies operating in the Bahamas to detail for me the corruption problem in that country and what can be done about it. These agencies have informed me that progress is slow but they believe some changes are being made by the Bahamian government. I do not think it is a fast enough effort.

A newly created police corruption unit investigated 22 cases in 1988. That is a great increase but probably is not enough. Corruption charges were brought against six Bahamian law enforcement officers with one of these cases successfully concluded as of this date. The Bahamas police force also recently completed five major conspiracy investigations against five organizations that have been moving cocaine from Colombia through the Bahamas.

The question that is often raised at this point is what happens to these individuals once they are arrested in the Bahamas. I have challenged Bahamian officials to provide me with that information, as have others, including my distinguished colleague from Massachusetts [Mr. KERRY] who is offering this resolution. At my request the Bahamian government has compiled a list of those arrested in the Bahamas during 1987 and 1988 for narcotics violations. The list includes the date of arrest, the offense the individual was charged with, the nationality, the amount and type of drug seized, and the result of the case. I would be more than happy to share this information with my colleagues.

I have written several letters to Bahamian officials requesting prompt passage of a mutual legal assistance treaty, known as the MLAT Treaty, and an extradition treaty with the United States after several years of negotiations, the Bahamian government last year approved an MLAT Treaty and passed implementing legislation for it. The only thing holding up implementation of the MLAT Treaty is ratification by the U.S. Senate.

The United States-Italian MLAT Treaty has proved to be most beneficial to law enforcement officials and prosecutors from both countries. It has helped in solving major criminal organized crime and narcotic crimes in this country, particularly in the city of New York. I believe the United States-Bahamas MLAT Treaty will prove equally beneficial if we would give it a chance, and, of course, to give it a chance the United States Senate must approve it.

So I hope that the Senator from Massachusetts will work hard to see that that treaty is approved by the Foreign Relations Committee and eventually this body and I will join in any way I can.

Another tool that could be a real asset in the battle against corruption is an extradition treaty. Officials from the Bahamas have told me they have attempted to enter into an agreement with the United States, but our negotiators have put them off until an MLAT is signed. It appears that once again the United States is dragging its feet.

There are currently 20 United States extradition requests pending with the Bahamian Government. However, there are currently 16 pending extradition requests by the Bahamian Government of United States citizens.

So we both have failed to meet a responsibility, as working partners, in the enforcement or war against drugs. We both ought to extradite in a more expeditious manner. That is why we need a treaty. That is why we need the MLAT Treaty.

The Nigel Bowe extradition case has been going on for several years. It disturbs me immensely. I have had an opportunity to discuss this with the law-enforcement people in the Bahamas. The case is presently pending before the privy council in London. I have repeatedly questioned the Bahamians on this matter to expedite a resolution of this particular extradition. According to a recent letter I have received from the Bahamian Embassy, the Bowe hearing took place last month in London and a decision is pending. Maybe we are going to see that come to fruition in a very short period of time.

Madam President, I would like to briefly outline for this body how the government of the Bahamas has cooperated with the United States Government to battle drug traffickers.

The Bahamas is the only country to allow unimpeded hot pursuit by United States law-enforcement agencies. What is that? This involves Bahamian defense forces and military and police forces flying on United States aircraft and helicopters, and on ships at sea, and making arrests on Bahamian soil or its territorial waters. Operation BAT, involving the Drug Enforcement Administration, the United States Customs Service, the Coast Guard, the United States Army, and the Bahamian defense force is largely responsibile for the record seizures of cocaine in the Bahamas and south Florida in 1988. Secretary Baker called Operation BAT "a premier example of a combined law-enforcement operation." I agree with Secretary Baker.

The United States Coast Guard has unimpeded access to all of Bahamian territorial waters and has established a relocatable floating boat dock for its vessels in the Bahamas with the approval of the Bahamian Government.

The Bahamas is the only country that has allowed the United States to install three aerostat radar surveillance centers on Bahamian soil, staffed by American personnel. They have also allowed unimpeded access to islands for mobile radars for pulse operations and other United States-Bahamian operations jointly operated.

It is estimated—I cannot prove this, because I do not have the figures—but it is estimated that the United States has as many drug enforcement officials in the Bahamas as the Bahamians do. So here is a country that has welcomed us into their country. They have permitted us to operate our own surveillance. They have permitted us hot pursuit.

They have allowed unimpeded undercover operations, including wiretape by DEA agents in the Bahamas, both jointly and unilaterally by this country.

What more can you ask? Yes, we can ask them to do more, and we should, but decertification is not the answer to the Bahamas.

In 1988 the State Department and DEA were given dates and quantities for every time confiscated drugs were destroyed. DEA had an agent there to witness each one in 1988. Also, the State Department and British Government are in the process of building and purchasing a storage facility and

incinerator for the Bahamas for the destruction of drugs.

One of the problems that comes up is, what happens to the drugs? Are they recycled? We have seen on occasion news stories that indicate that maybe they are recycled. What evidence do they have?

Well, I have been told by the DEA that the Bahamians do include them at every destruction. Whether or not the DEA goes, that is a decision made by somebody else and I do not know the answer. But certainly they have extended the invitation to us, according to the Drug Enforcement Administration and the State Department.

The Bahamas has established three special drug courts to handle nothing but drug cases. That, to me, is a message that it is clear that they realize the significant problem involved here and they are prepared to commit their own resources inside their own country, within their own judicial system, to address the problem of arrest and confiscation.

The Bahamas has also revised its drug penalties, making them tougher than they were in the past.

In February, the United States and the Bahamas signed a bilateral agreement on the control of narcotic drugs and psychotropic substances. At the signing of the agreement, United States Ambassador Carol Hallett said the Bahamas has demonstrated an unusually fine level of cooperation and noted that probably no other country in the world does as much as the Bahamas does in cooperative efforts and in increasing its capability to stop drug traffickers.

When an opportunity presents itself to move into a sovereign nation, at their request, and establish joint, cooperative antidrug efforts, I believe we should take advantage of those opportunities and work hard to make those efforts effective in combating drug smuggling. In the case of the Bahamas, we have made major inroads into developing such joint operations on Bahamian soil with respect for even greater cooperative efforts on the horizon. If this resolution were to pass, we would destroy the progress we have made. I urge my colleagues to vote against decertification of the Bahamas.

Drug seizures by the joint United States-Bahamian interdiction operation in 1988 included 20,500 pounds of cocaine and 21,000 pounds of marijuana. Some of the seizures were made by the Royal Bahamas Police and Defense Force in unilateral operations.

Let me just end, Madam President, again complimenting the Senator from Massachusetts. I know he has devoted a tremendous amount of time and effort to hearings on international narcotics trafficking. I have witnessed some of those on television and in the newspaper. I have read many of the reports and I find them to not only be fascinating but to be extremely helpful in developing the strategy and policies that the United States must develop if we are going to combat this on the international level.

My hat goes off to the Senator from Massachusetts for this effort. I am sure he is going to continue to do just that.

But now is not the time, in my judgment, at least, to send such a message to a country, the only country I know, by the way, that permits what is known as hot pursuit, where we can fly anytime we want inside their territory, stop inside their territory on their soil and make arrests. We do have Bahamian officials on board so that they can make the arrests when the time comes if necessary.

This is the kind of cooperation, Madam President, we need from Mexico. This is the kind of cooperation we need from Pakistan and Colombia and other nations.

If we were debating a decertification here of one of those countries, the argument might be a little different based on the record and the cooperation or noncooperation. But here we have a clear indication of a country that has not cured the problem, nor has the United States, of drugs coming through their country, but we have a clear record of their willingness to cooperate, to permit U.S. law enforcement officials to operate within their territory, to let our equipment be operated there by our officials, not hampered by their bureaucracy. I do not know what more you could ask of a country except to ask them to continue to do it and I believe the Bahamas are prepared to do that.

I yield the floor.

Mr. KERRY. Madam President, I thank the distinguished Senator from Arizona. We have a difference, obviously, in subjective analysis here about what will have an effect or will not have an effect. But I want to thank him for his kind comments. I particularly want to say to the distinguished Senator from Arizona that I thank him for his efforts with respect to these matters. He has been one of the leaders in the Senate.

It is ironic that while we have worked so closely on most of these matters and worked very hard on the drug bill of 1986 and agree on most of these matters, this is one that we just agree to disagree on for a number of different reasons.

But I must say to the distinguished Senator that he herald significantly this notion of hot pursuit. And it is a good notion. We want hot pursuit and that is good and we ought to be doing it. But what is very significant about what is happening in the Bahamas is that most of it is happening because the Coast Guard is there, because we are there, because we are part of that presence in terms of operational aspect of things.

I can remember full well—and I learned the hard way about now being duped about sort of operational cooperation. When I was in Vietnam, we used to hear consistently about how important it was to have the cooperation of the ARVN, and the so-called rough-puffs, the regional popular reconnaissance forces. We would go out on joint operations with them. The only problem was half of them were Vietcong, and they always knew where we were going and what we were doing. As a result, we were always ambushed.

Likewise, if you have corruption in a society and there is no law enforcement agency that is destroying that corruption, then people know when the hot pursuit may take place. They know where the airplanes are. They know what is happening operationally because they have people within the operation.

Unless, when they get caught, you have something that ferrets them out in a significant way.

I went through the materials that were given, that the distinguished Senator cited, at great length.

You know, last year they had 182 arrests, but they only had 14 people who were convicted who were Bahamian. They had seven Americans convicted. What is that, 21 out of 182? That is not a terrific conviction rate.

Four pleaded guilty, and all four were Americans

What is more, we found two different sets of documents regarding the Bahamas, and the fact is that there was no real way to determine what was real, what was happening, and what is not. But I want to assure the distinguished Senator from Arizona that however this comes out, I want this to contribute to the process of improving the capacity to fight narcotics. If we do not prevail here today, I am certainly pledged to work with the Senator from Arizona and with the Government of the Bahamas to try to get a better benchmark as we proceed.

I know the distinguished Senator from Georgia was here, and he seeks time. How much time does the Senator want?

How much time remains for the Senator?

The PRESIDING OFFICER (Mr. DECONCINI). The Senator from Massachusetts has 7 minutes 25 seconds remaining.

Mr. FOWLER. Begging the indulgence of both the chairman and my friend from Massachusetts and my friend from Pennsylvania, who I assume is here on the bill, I was about to ask for 5 minutes out of order on an unrelated matter.

Mr. KERRY. Mr. President, if possible I would ask unanimous consent

that we permit the Senator to have 5 minutes outside of this, as if in morning business. Is that permissible at this time?

The PRESIDING OFFICER. Such a request is permissible. Is that a unanimous consent request?

Mr. KERRY. I do make that request.

The PRESIDING OFFICER. The Chair wants to make clear that this is an additional 5 minutes?

Mr. KERRY. An additional 5 minutes. I am not sure we will need the time.

The PRESIDING OFFICER. Outside of the time allotted for both sides.

Mr. KERRY. The Chair, I believe, controls the time for the other side. Can the Chair inform me whether he wishes to use it? We might take it off the time available.

Mr. FOWLER. Mr. President, let me clear this up. I would not like this time to come off the bill. I ask unanimous consent to speak out of order on an unrelated matter as if in morning business.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Georgia? The Senator from Pennsylvania.

Mr. SPECTER. Reserving the right to object, and I will not object, I want to be sure it is not off the bill, and I may have 5 minutes from the bill?

I thank the Chair and I do not object.

The PRESIDING OFFICER. Without objection, the unanimous consent request is agreed to. The Senator from Georgia is recognized for 5 minutes.

Mr. FOWLER. I thank the Chair.

(The remarks of Mr. FOWLER pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. KERRY. Mr. President, I yield 5 minutes to the distinguished Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I thank the distinguished Senator from Massachusetts for yielding time.

Mr. President, I support the resolution of decertification because of my view that it is time that the Government of the United States stop giving foreign aid to countries who are prime violators on the narcotics issue and fail to enforce the narcotics laws adequately.

Regrettably, I have not been on the floor this afternoon to hear all of the arguments, and I infer that I missed an argument by the distinguished Senator from Arizona on the other side. Am I correct, I ask my colleague, on that?

Well, I regret having missed it, but we have just been in the course of hearings on the Voting Rights Act on the Judiciary Subcommittee on the Constitution, and I could not be present. My view is that the U.S. Government has been excessively lenient on the granting of foreign aid to countries where they have not really taken tough action against the drug problem.

This Government gives in excess of $1 billion a year to more than a dozen countries where there is a substantial question as to whether they are entitled to foreign aid under the provisions of the law.

We talk repeatedly, and for many years have talked repeatedly, and for many years in the Foreign Operations Subcommittee of Appropriations, on the question of cutting off foreign aid to countries which have a poor record on the issue of narcotics.

Notwithstanding a great deal of talk, there has been very little floor consideration of this issue. Last year there was a resolution of decertification as to the Bahamas, and that resolution was defeated by a vote of 40 to 53. I favored decertification at that time in the face of the very poor record held by the Bahamas. Not surprisingly, the record is just as bad now, or perhaps a little worse than it was last year, with respect to the Bahamas.

There is a real question as to whether these efforts to decertify are counterproductive when they fail, because, having failed, it just gives added incentive for countries like the Bahamas to continue on in their errant ways. I certainly hope, Mr. President, that we receive more than 40 votes in favor of decertification today. Because if we were to fall backward, then I think even the possibility of decertification would be in worse shape now than it has been in the past, and it has always been in dreadful shape.

In supporting this resolution of decertification, Mr. President, I have no illusions about the lack of ultimate success, because there will have to be a two-thirds vote in both the Senate and the House ultimately for decertification to occur. Because under the Chadha decision, any resolution of decertification would be subject to veto by the President and would then have to be overridden by two-thirds of each House in order to have the decertification occur.

Mr. President, I think it would be enormously salutary for decertification to occur and for it to come to the personal attention of the President to see the seriousness with which many of us in the Congress view this problem; and certainly if we come to a majority, it will put the State Department on real notice that the Congress is not going to sit still for what I consider to be casual certification.

I understand that the State Department has its problems in terms of motivating countries like the Bahamas and other countries to undertake some efforts in narcotics control. The current efforts, however, in the view of this Senator, are simply insufficient. They are not even minimal. There is no issue about the national security of the United States being involved here which is an alternative base for certification.

Mr. President, when you take a look at the President's letter and the documents on certification of the Bahamas, you note that within that certification itself is an admission of enormous problems in the Bahamas. Realistically viewed, I would suggest, beyond an admission, in fact a confession that the Bahamas ought not to be certified. This is in the package submitted by the administration, submitted by the Secretary of State with a brief cover letter by the President and, again, I repeat, Mr. President, that if these details were brought to the personal attention of the principal authorities, the President and the Secretary of State, this Senator doubts very much if this certification would have occurred.

I state now, for the RECORD, what the covering documents and the inside pages have to say about the Bahamas:

> The reality is that too much cocaine still passes through the Bahamas, and while the Government of the Commonwealth of the Bahamas is more active in investigating allegations of corruption, we are concerned by reports that corruption still exists. Prime Minister Pindling and his ministers must forcefully address this issue.

And then it continues:

> We also believe the noteworthy Bahamian cooperation and joint antinarcotic efforts should be accompanied by stronger unilateral efforts to curb drug trafficking and consumption within the Bahamas.

Mr. President, where you have the administration saying that "The reality is that too much cocaine still passes through the Bahamas," how can certification be appropriately based? If you have too much cocaine passing through the Bahamas, why are they entitled to foreign aid from the United States? The statistics show that an enormous portion of cocaine and marijuana which comes to the United States transits through Bahamaian territory.

The December 1988 report of the Senate Foreign Relations Subcommittee on Terrorism states that "as of 1988" that is last year "the Bahamas remained a major transit country for both drugs with 50 to 60 percent of all the cocaine and marijuana entering the United States transiting through Bahamian territory."

Mr. President, that is a factual situation which, in the view of this Senator, is simply inexcusable. The problem of cocaine in this country is overwhelming. The problem of coke, the problem of crack, the problem of cocaine derivatives are simply overwhelming. That is the major reason this Congress passed a $1.8 billion antidrug bill in

1986. That is the major reason this Congress passed a $2.7 billion drug bill last October. That is why we have appropriated on last year's bill $900 million and why President Bush has asked for an additional $1 billion. That is why most of us in this body will make every effort to fully fund that drug bill.

There have been many speeches on the floor of this Senate, Mr. President, about the terrible consequences of cocaine and other drugs in this country. For example, Washington, DC, is the murder capital of the United States. The number of homicides rise daily, more than 50-percent increase over last year. Not just Washington, DC, Mr. President, Chicago, IL, has a 37-percent increase; Philadelphia, a 36-percent increase. It is a problem across this country, a crime wave coast to coast, occasioned largely by the problem of drugs, significantly by the problem of cocaine.

In the report by the U.S. Department of State Bureau of International Narcotics Matters, March 1989, a very current report starts off with the Bahamas as the No. 1 country.

U.S. law enforcement agencies estimate that the Bahamas are a major transit point for a significant portion of cocaine and marijuana entering the United States.

Mr. President, in light of the fact that the Bahamas are a major transit point, and in light of the fact that the administration's own documents criticize the Bahamas for not doing more, it seems to this Senator that we ought to set an example for once in the Congress and say we ought to decertify. Perhaps there is more reason for a majority vote in this body today knowing that it is only a shot across the bow; that it is realistically improbable, perhaps impossible, to have a two-thirds vote in both Houses to override a veto.

I certainly hope that my colleagues will speak very forcefully on this issue. It seemed 1 year ago that drugs could not be a worst problem in the country than they were then, but they are. Now is the time for a very strong vote for decertification to put the Bahamas and the State Department and the Federal Government on notice that something more has to be done by countries like the Bahamas if they are to get foreign aid from the United States.

I thank the Chair and I yield the floor.

The PRESIDING OFFICER (Mr. FOWLER). The Senator from Arizona.

Mr. DECONCINI. Mr. President, I ask unanimous consent I be allowed 5 minutes on the opposing side of this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I am pleased the Senator from Pennsylvania is still here. I am not aware, maybe the Senator is, that we have any foreign aid to the Bahamas. We do have roughly $2 million in law enforcement assistance on drug enforcement, but I think the point ought to be made clear for the record. To my knowledge, we do not have any foreign aid directly to the Bahamas.

I would also like to note this Senator realizes and agrees with the Senator from Pennsylvania that everything that could be done in the Bahamas to stop the flow of drugs has not occurred. My argument has been, Mr. President, that in comparison to what we have in other countries, is the record that the Bahamians have put forward in permitting the United States Armed Forces, as well as law enforcement officials, to be inside their territory with total discretion as to undercover activities, to penetrate their territory in hot pursuit, I know of no other country that permits us to do that. That, to me, is not rewarded by decertification. If anything, it should be a pat on the back and ask them to continue to do this and do more.

Drug seizures by the joint United States-Bahamian interdiction operation in 1988 alone included 20,500 pounds of cocaine and over 21,000 pounds of marijuana. That is a significant amount of drugs.

The Senator from Massachusetts pointed out about convictions and what-have-you. I have information here, as I indicated in my opening statement, from the Embassy of the Bahamas where there were 138 arrests on drug-related charges; 17 were Americans and 44 were Bahamians. Those are convictions. So we have over almost a 50-percent rate of convictions. I am not sure we do that well in our own country. I do not say that it could not be better, but I think it is important to make the distinction here that this country is working toward a cooperative effort to reduce the flow of drugs and to prosecute those within their territories that are caught bringing those drugs and transshipping them to the United States.

Mr. President, it would be a tragedy if we decertified the Bahamas, and I am not one who is easy on certification. I hope that our colleagues will not vote in favor of this resolution. I think we should keep in mind that the Bahamas are a very small country; that they have a huge territory; that they are asking our help to fight drugs; that they are permitting us access to their country; that we have a treaty that has not been ratified by us yet; that we have extraditions that have not been honored by the United States as well as the Bahamas, so we are both guilty of not cooperating in that area.

But in the overall picture, I think it is very clear, Mr. President, that the Bahamas, of all the countries that are considered transhipment and drug-producing countries, is the best. It does not mean they cannot do better. I think we have developed a rapport here that we can use as an example. I certainly would like to see the Republic of Mexico permit the United States to have hot pursuit into their country with Mexican officials on board when drug dealers are seen—and I have seen videotapes of drug dealers coming into the United States from Mexico—dropping the drugs, turning around and going back and our planes not being able to chase them.

It would be an improvement to see an MLAT treaty, to see an extradition treaty, and to see the Mexican Government cooperating. And I must say on that subject matter we have seen a slight improvement in the last 3 months under the Salinas regime. I am most grateful to the Mexican Government for at least attending to a problem that has been ignored, in this Senator's judgment, for a long time.

The Bahamian Government is not perfect, and I do not contend that it is. But they have not ignored the problem of drug transhipment. I think it is important we look at the total record here and that we vote against this joint resolution. I yield the floor.

Mr. SPECTER. Mr. President, the distinguished Senator from Arizona and this Senator seldom disagree on matters. We serve on four committees together—I think it is an all time record—Appropriations, Judiciary, Intelligence, and Veterans' Affairs. We have cosponsored much legislation. So my differing with Senator DECONCINI is done with great reluctance, but there is a difference of opinion.

The proceeding here is pursuant to the Foreign Assistance Act, and Senator DECONCINI has raised a question about whether this is foreign aid. I think it is fairly stated in a class of foreign aid, but there is no question about the underlying fact and that is in fiscal year 1989 the Bahamas received approximately $30,000 in United States foreign assistance under the international military education training program administered by AID, and the fiscal year 1990 budget request is $40,000. For what we customarily consider on this floor, those are not enormous sums but I think the principle is of enormous importance.

When the distinguished Senator from Arizona talks about cooperation of the Bahamian Government, I will concede that they are better than many, perhaps better than most, maybe even better than any others, but not sufficient. When he talks about hot pursuit and the Mexican Government, they ought to permit hot pursuit as well. That is a very basic principle of law enforcement that when we have a felon, a perpetrator, a violator of the criminal law and you are right near him as you are going after him, you ought not to be de-

terred by a boundary line. You can move across the boundary line from Pennsylvania to Arizona, even though there are quite a few boundary lines intervening, when you are in hot pursuit under the law of the United States.

There are a number of areas where I submit the Bahamian Government has not done so well. Now I quote relatively briefly because there is not a great deal of time remaining from the Department of State Bureau of International Narcotics Matters International Narcotics Control Strategy Report, which is very current, March 1989, page 122, as follows:

In 1987, the government requested U.S. training assistance for the formation of a national police Drug Enforcement Unit (DEU) which was provided in 1988 and resulted in the training of 75 police officers. However, efforts to organize the DEU were seriously hampered by manpower shortages, a lack of resources and management problems.

The government also failed to make significant advances in forming a national drug information/intelligence coordination center. The government agreed to develop the center with U.S. assistance early in the year and then failed to meet a self-established November staffing deadline. The lack of progress in this project is disappointing.

The report by the Department of State further particularizes failures by the Government of the Bahamas.

Mr. President, what it boils down to in my view is the success of the program. I think best efforts are fine up to a point. But, speaking for myself, I am not prepared to accept best efforts. I do not think we really have best efforts here, but I am not prepared to accept best efforts. I think we ought to demand success and we ought to demand results. There is going to have to be a great deal more done in the United States on the same line, establishing that kind of a rigorous standard. Even though we are talking in relatively small sums of money, I think we ought to be very forceful in our insistence that if foreign governments are to get U.S. dollars, there has to be more done and there has to be a minimal level of success. I do not think you have that when 50 to 60 percent of the cocaine coming into this country passes through the Bahamas.

Mr. KERRY. Mr. President, very quickly, if I may, I thank the distinguished Senator from Pennsylvania. I wish to merely add that I really think money is not the issue at all. It is the question of the statement we make by virtue of whether we certify or decertify that someone is fully cooperating. It seems clear that by almost any standards of making that judgment, when only 1 particular area out of 10 is being met—and that is principally one in which we are wholeheartedly engaged—one has to be deeply concerned about whether or not full efforts are being made to assist in the war on drugs.

It is clear that unless enforcement itself takes place, in a thorough manner, it is impossible to really have full cooperation.

I received two different sets of statistics from the Embassy and the Attorney General, but according to one of those sets of statistics on narcotics trafficking in the Bahamas in 1988 given to me by the Embassy of the Bahamas, 224 people were arrested, and when you go through the numbers, 65 were convicted; 21 of those arrested were Americans, 16 of whom were convicted; 197 were Bahamians. There was an 80-percent conviction rate for Americans arrested in the Bahamas and 20 percent for Bahamians under that particular set of statistics.

In another set of statistics we got it was about a 50-percent conviction rate, and I might add that the conviction rate in the United States in most of our major cities is 90 percent.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The time on the bill under the control of the Senator from Massachusetts has expired.

Mr. KERRY. I yield to the distinguished Senator from Arizona.

Mr. DECONCINI. Mr. President, I just want to reassert on conviction rates, out of 130 arrests in 1988 in the Bahamas, of those that were charged and terminated, 17 were Americans and 44 were Bahamians. So we have a difference of opinion. I will be glad to submit my——

Mr. KERRY. Will the Senator yield on his time?

Mr. DECONCINI. I will be glad to yield.

Mr. KERRY. That is precisely the problem. We do have a difference of opinion because we have different statistics because the Bahamians themselves cannot even tell us what is going on.

Mr. DECONCINI. If the Senator will yield, if the Bahamian Embassy represents this with the name and the date of the charge, the individual, where they live, what the charge is, I think that they are certainly going on record very clearly what they purport to be the number of charges and the convictions.

I am not saying it is great. I am not saying that 50 percent is terrific, but I am just refuting that it is as lopsided as the Senator from Massachusetts seems to indicate.

Mr. KERRY. If the Senator will yield on his time again, I am not so much concerned about the lopsidedness as I am about the statistic. Both of my sets of statistics came from the Bahamians. I asked the State Department if they could give us an accurate assessment and they were unable to. So we do not really have a handle on the issue which again I think underscores precisely the argument that the Senator from Massachusetts has tried to make.

Mr. DECONCINI. Mr. President, I would only respond that the convictions are important but the important issue is the Bahamians cooperating with the United States. I think it is clear that they are.

Mr. GRAHAM addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. GRAHAM. Mr. President, who controls time?

The PRESIDING OFFICER. The Chair is controlling the time.

Mr. GRAHAM. Will the Chair on behalf of the opposition to the resolution of disapproval yield 3 minutes to the Senator from Florida?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAHAM. I thank the Chair. I appreciate the generosity.

Mr. President, I am not here to speak about specific numbers or document the details of past prosecutions.

I am here to speak as one who over the past several years has had a regular, continuous, deep interest and involvement in relationships of law enforcement between the Bahamas and the United States of America. I can report from that experience that over a period of years when those who had front line responsibility for United States law enforcement efforts involving the Bahamas, including the United States district attorneys, Coast Guard personnel, drug enforcement agencies, and other Federal agencies, as well as State and local agencies with extensive experience and impact from activities in the Bahamas, have been asked for an evaluation of the level of Bahamian involvement and cooperation, they have been uniformly positive. They have been uniformly negative as to the consequences of the United States invoking the law which would cause us to sanction the Bahamas for their actions.

They have not been prepared to state that the Bahamas were perfect in their efforts. Frankly, Mr. President, it is sad to say we fall far short of perfection. But the reality is that for a small country, 250,000 people, asked to protect an enormous area of small islands, disassociated, stringing from the southeastern coast of the United States almost to the Island of Hispaniola, a country which I understand is spending over 10 percent of its gross national product on areas of law enforcement and security, I believe that the performance of the Bahamas justifies our declining to take this action of sanction.

This is at least the second year that we have had this debate on whether the United States should find the acts

of the Bahamas to meet the standard of full cooperation.

I believe that there have been some positive aspects of this debate, even if the result is as it was last year, and I hope it will be this year, and that is that we do not sanction the Bahamas.

This debate has helped to focus American attention on the importance of the Bahamas as part of the United States' effort to suppress the flow of drugs into the United States. I hope that importance will continue to reflect itself in some other substantive decisions that we will be called upon to make in the next few weeks. One of those has to do with resources. The Bahamas, even spending 10 percent-plus of its gross national product on areas that will impact its ability to secure its borders and protect itself against drug-related activities, depends to a very high degree on the United States, and particularly on assets that can be provided through agencies such as our Customs and Coast Guard.

So we are going to be tested, Mr. President, as we have been in the past as to our level of commitment to this when we are deciding what level of resources to make available for the various initiatives that will make a real difference in this war on drugs.

Second, we are going to have a decision to make shortly relative to who will be the next United States Ambassador to the Bahamas. Mr. President, one might think what could be a more casual, enjoyable, nonstressful representation of the United States around the world than to be the Ambassador to the Bahamas. The fact is, Mr. President, it is a very demanding position.

I met recently with the current United States Ambassador to the Bahamas, and she told me when asked how she allocates her time, "that 95 percent of my time is spent on drug-related activities." The Ambassador of the Bahamas becomes in many ways an operational officer relating United States activities which are conducted in a sovereign nation with those of the Government of the Bahamas.

So when we face the question of who will be our next Ambassador to the Bahamas, we are effectively making a decision as to who will be an important field grade commanding officer in terms of our carrying out a successful war on drugs.

I hope we will contribute to the success of that war by defeating this resolution of censor today, and being faithful to our commitment to resources and appropriate leadership tomorrow.

Mr. PELL. Mr. President, let us be honest. There is not one of these countries certified by the President and accompanied by a statement of explanation that is "fully cooperating" under the common usage of the term "fully." There is without question corruption in the Bahamas. But there is also solid evidence that the Bahamas are giving us good cooperation in the war on drugs.

The Bahamas is the only country in the world to allow United States law enforcement units to enter its territory in hot pursuit of drug targets.

These cooperative efforts netted over 10 metric tons of cocaine, more than 13 metric tons of marijuana, 20 aircraft, and 9 vessels in 1988.

Despite the Senate delay in ratification of a Mutual Legal Assistance Treaty with the Bahamas, the Bahamian Government turned over to us temporarily two persons serving time in a Bahamian prison so they could testify in an important Federal narcotics prosecution. This was one of the Department of Justice's first uses of the Attorney General's authority to request prison transfers under the 1988 Omnibus Anti-Drug Act.

Negotiations are progressing well for a new extradition treaty; we believe they will be concluded in the next round. Meanwhile, the Government of the Bahamas has just extradited to the United States a Bahamian national on marijuana smuggling charges.

Although we have not yet achieved success, our request for Nigel Bowe's extradition remains active and is now pending before the Privy Council in London.

The PRESIDING OFFICER. All time on the joint resolution has expired.

The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, Shall the joint resolution pass?

Mr. KERRY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL], would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 40, nays 57, as follows:

[Rollcall Vote No. 65 Leg.]

YEAS—40

Adams	Exon	McConnell
Baucus	Grassley	Mitchell
Biden	Heinz	Moynihan
Bingaman	Helms	Pressler
Bryan	Hollings	Riegle
Burdick	Kennedy	Rockefeller
Burns	Kerrey	Roth
Byrd	Kerry	Sanford
Coats	Kohl	Sarbanes
Conrad	Lautenberg	Sasser
Cranston	Leahy	Specter
Dixon	Levin	Warner
Dodd	Lieberman	
Dole	Lott	

NAYS—57

Armstrong	Glenn	Metzenbaum
Bentsen	Gore	Mikulski
Bond	Gorton	Murkowski

Boschwitz	Gramm	Nunn
Breaux	Harkin	Packwood
Bumpers	Hatch	Pryor
Chafee	Hatfield	Reid
Cochran	Heflin	Robb
Cohen	Humphrey	Rudman
D'Amato	Inouye	Shelby
Danforth	Jeffords	Simon
Daschle	Johnston	Simpson
DeConcini	Kassebaum	Stevens
Domenici	Kasten	Symms
Durenberger	Lugar	Thurmond
Ford	Mack	Wallop
Fowler	McCain	Wilson
Garn	McClure	Wirth

NOT VOTING—3

Bradley	Matsunaga	Pell

So, the joint resolution (S.J. Res. 100) was rejected.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the joint resolution was rejected.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order. Senators will clear the well. The Senate will be in order.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, as I indicated earlier today and on several occasions previously, it has been my intention to proceed to the debate over the FSX transaction on tomorrow.

The Foreign Relations Committee met today and it has been my hope that they would take action on it. However, it was advised that the distinguished Senator from Alaska, Mr. MURKOWSKI, objected to the Foreign Relations Committee meeting this afternoon, thereby preventing the committee from acting with respect to that matter.

That is, of course, the Senator's right which he exercised. But it has made it not possible for the committee to complete action today.

I see the Senator on the floor now and I would like to ask him.

I hope that the Foreign Relations Committee will meet tomorrow morn-

ing and report the matter to the Senate, and I will then ask unanimous consent to proceed to consideration of that resolution.

I pose through the Chair to the Senator from Alaska the question as to whether or not he intends to object to that resolution and whether or not he intends to exercise his rights to prevent the Senate from considering that matter and require us to go through a series of procedures to bring the matter up.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I would be happy to respond to the majority leader.

The PRESIDING OFFICER. The Senator will suspend 1 minute. The Senate will be in order.

Mr. MURKOWSKI. I thank the Chair and the distinguished majority leader.

I had hoped that we would have the opportunity to avail ourselves as members of the Foreign Relations Committee of the opportunity to have a classified briefing on certain aspects of the FSX. That was considered, I believe, by the chairman and the ranking member. There was some discussion about meeting again tomorrow at 10 o'clock.

It is my understanding that they are considering our request currently to have a spokesman from the administration to address certain sensitive aspects.

As a member of the Intelligence Committee being on the Foreign Relations Committee as well, I feel that my colleagues on the Foreign Relations Committee should be briefed on this matter and I believe at 10 o'clock we will have an opportunity to go into executive session and hopefully we can resolve the concerns that I have currently over aspects of perhaps Japanese involvement associated with certain aspects of activities in Libya and whether or not they should be taken into consideration as we debate the merits of the transfer of technology on the FSX.

We all recall the incident of the transfer of technology concerning the Toshiba incident. I am not suggesting there is any connection.

By the same token, I think it is fair to say there is very little that occurs overseas without the knowledge of the Japanese Government. I think we should have the availability of determination from our intelligence community as to whether or not there is anything to comments that have been made in various committees, including the Armed Services Committee, with regard to possible Japanese presence in certain aspects of delivery systems in Libya that obviously concern us all.

It is the intent of the junior Senator from Alaska, in reflecting on this, that if indeed there is Japanese presence in that particular arena, that the Japanese be encouraged to withdraw and we not hold up necessarily acting upon the FSX. But I think we have that obligation to at least satisfy ourselves if there is any involvement, and again I repeat that seldom does Japanese capital venture overseas without some knowledge of either MITI or the Japanese Government.

I hope I have addressed by concerns adequately.

Mr. MITCHELL. I understand that the Senator's objection went only to the absence of a briefing; that it is his understanding that a briefing will be held tomorrow morning and that if this briefing does occur, he will not object to my unanimous-consent request at that time to bring the matter before the Senate.

Mr. MURKOWSKI. The majority leader is correct. Please understand, I am not the chairman of that committee nor the ranking member.

Mr. MITCHELL. I understand. But I thought I understood the Senator's remarks to mean that it was his current impression that a briefing will be held.

Mr. MURKOWSKI. It is my understanding a request has been made and it is being considered and the administration has agreed to provide a competent witness. But I cannot commit that the briefing will be held. The chairman or the ranking member, I am sure, would avail themselves of that. I am not familiar with the whole process. I had hoped that I would not embarrass anybody, including myself. But, obviously, the communication does move about the Chamber.

Mr. MITCHELL. I was just trying to find out what the reasons were so that we could, hopefully, proceed to this tomorrow.

Mr. MURKOWSKI. I do not intend to hold up action on the FSX.

Mr. MITCHELL. I thank the Senator.

UNANIMOUS-CONSENT AGREEMENT—FSX

Mr. MITCHELL. Mr. President, if the Senator from Alaska would give me his attention, I am about to propound a unanimous-consent request and I want him to be aware of it before I do so.

Mr. President, I ask unanimous consent that, if the Senate Foreign Relations Committee reports the FSX matter out tomorrow, the majority leader be authorized to bring the matter to the Senate following consultation with the distinguished Republican leader on tomorrow at my discretion.

Mr. MURKOWSKI. I would certainly not object to that.

The PRESIDING OFFICER (Mr. BRYAN). Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting a nomination which was referred to the Committee on Environment and Public Works.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE DURING RECESS

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate on today, May 10, 1989, during the recess of the Senate, received a message from the House of Representatives announcing that the House has passed the following joint resolution, without amendment:

S.J. Res. 68. Joint resolution to designate the month of May 1989 as "Trauma Awareness Month".

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 1385) to make permanent the Martin Luther King, Jr., Federal Holiday Commission.

The message further announced that the House disagrees to the amendment of the Senate to the concurrent resolution (H. Con. Res. 106) setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. PANETTA, Mr. FOLEY, Mr. RUSSO, Mr. JENKINS, Mr. LEATH of Texas, Mr. SCHUMER, Mrs. BOXER, Mr. SLATTERY, Mr. OBERSTAR, Mr. FRENZEL, Mr. GRADISON, Mr. GOODLING, Mr. THOMAS of California, Mr. BUECHNER, and Mr. HOUGHTON as managers of the conference on the part of the House.

ENROLLED BILL SIGNED

The message also announced that the Speaker has signed the following enrolled bill:

H.R. 1385. An act to make permanent the Martin Luther King, Jr., Federal Holiday Commission.

The enrolled bill was subsequently signed by the President pro tempore [Mr. BYRD].

MESSAGES FROM THE HOUSE

At 2:33 p.m., a message from the House of Representatives, delivered by Mr. Hanrahan, one of its reading clerks, announced that the House has

passed the following joint resolution, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 37. Joint resolution designating the week beginning May 14, 1989, as "National Osteoporosis Prevention Week of 1989".

The message also announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 972. An act to amend section 3724 of title 31, United States Code, to increase the authority of the Attorney General to settle claims for damages resulting from law enforcement activities of the Department of Justice;

H.J. Res. 132. Joint resolution to designate the second Sunday in October of 1989 as "National Children's Day"; and

H.J. Res. 170. Joint resolution designating May 1989 as "National Digestive Disease Awareness Month".

H.J. Res. 247. Joint resolution designating May 29, 1989, as the "National Day of Remembrance for the Victims of the U.S.S. *Iowa*."

ENROLLED JOINT RESOLUTIONS SIGNED

At 3:27 p.m., a message from the House of Representatives, delivered by Mr. Hanrahan, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 68. Joint resolution to designate the month of May 1989 as "Trauma Awareness Month"; and

H.J. Res. 135. Joint resolution to designate the week beginning May 7, 1989, as "National Correctional Officers Week".

The enrolled joint resolutions were subsequently signed by the President pro tempore [Mr. BYRD].

MEASURES REFERRED

The following bill and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 972. An act to amend section 3724 of title 31, United States Code, to increase the authority of the Attorney General to settle claims for damages resulting from law enforcement activities of the Department of Justice; to the Committee on the Judiciary.

H.J. Res. 132. Joint resolution to designate the second Sunday in October 1989 as "National Children's Day"; to the Committee on the Judiciary.

H.J. Res. 170. Joint resolution designating May 1989 as "National Digestive Disease Awareness Month"; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports and documents which were referred as indicated:

EC-1067. A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, a report on six proposed rescissions of budget authority; pursuant to the order of January 30, 1975, as modified on April 11, 1986, referred jointly to the Committee on Appropriations the Committee on the Budget, the Committee on Banking, Housing, and Urban Affairs, the Committee on Environment and Public Works, the Committee on Energy and Natural Resources, the Committee on the Judiciary, the Committee on Labor and Human Resources, the Committee on Armed Services, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Foreign Relations, the Committee on Finance, and the Committee on Commerce, Science, and Transportation.

EC-1068. A communication from the Deputy Secretary of Defense transmitting, pursuant to law, a report on the transfer of funds in support of the Nicaraguan Democratic Resistance; jointly, to the Committee on Appropriations, the Committee on the Budget, and the Committee on Armed Services.

EC-1069. A communication from the Assistant Secretary of the Army (Installations and Logistics), transmitting, pursuant to law, a report on the emergency disposal of recently discovered chemical munitions at Dugway Proving Ground, UT; to the Committee on Armed Services.

EC-1070. A communication from the deputy general counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize certain construction at military installations for fiscal years 1990/1991, and for other purposes; to the Committee on Armed Services.

EC-1071. A communication from the deputy general counsel of the Department of Defense, transmitting a draft of proposed legislation to increase the rates of basic pay, basic allowance for quarters, and basic allowance for subsistenace for members of the Uniformed Services; to the Committee on Armed Services.

EC-1072. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Financial Audit-Federal Deposit Insurance Corporation's 1988 and 1987 Financial Statement"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1073. A communication from the Executive Director of the Neighborhood Reinvestment Corporation, transmitting a draft of proposed legislation to extend the authorization of appropriations for the Neighborhood Reinvestment Corporation; to the Committee on Banking, Housing, and Urban Affairs.

EC-1074. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 533(b) of the Housing Act of 1949 to require that housing preservation grant funds be matched dollar-for-dollar by State, local, or other non-Federal funds; to the Committee on Banking, Housing, and Urban Affairs.

EC-1075. A communication from the Secretary of Transportation, transmitting, pursuant to law, the annual report on administration of the offshore oil pollution compensation fund for fiscal year 1988; to the Committee on Energy and Natural Resources.

EC-1076. A communication from the Secretary of Energy, transmitting pursuant to law, the program opportunity notice for the third round of the Clean Coal Technology Demonstration Program; to the Committee on Energy and Natural Resources.

EC-1077. A communication from the Secretary of the Interior, transmitting, pursuant to law, the onshore oil and gas leasing report for fiscal year 1988; to the Committee on Energy and Natural Resources.

EC-1078. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report entitled "Management of Hazardous Wastes From Educational Institutions"; to the Committee on Environment and Public Works.

EC-1079. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a report on abnormal occurrences at licensed nuclear facilities for the fourth calendar quarter of 1988; to the Committee on Environment and Public Works.

EC-1080. A communication from the Chairman of the Physician Payment Review Commission, transmitting, pursuant to law, the annual report of the Commission for 1989; to the Committee on Finance.

EC-1081. A communication from the Acting Assistant Secretary of Commerce (Import Administration), transmitting, pursuant to law, the annual report on the activities of the Foreign-Trade Zones Board for fiscal year 1986; to the Committee on Finance.

EC-1082. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law a report entitled "Citizens' Self Defense Groups in the Philippines"; to the Committee on Foreign Relations.

EC-1083. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting pursuant to law a quarterly report on human rights activities in Ethiopia for the period January 15 to April 14, 1989; to the Committee on Foreign Relations.

EC-1084. A communication from the Secretary of State, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and related statutory provisions, to authorize additional development and security assistance programs for fiscal year 1990, and for other purposes; to the Committee on Foreign Relations.

EC-1085. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, the semi-annual reports for the period April-September 1988 listing voluntary contributions made by the U.S. Government to international organizations; to the Committee on Foreign Relations.

EC-1086. A communication from the Inspector General of the Department of Health and Human Services, transmitting, pursuant to law, the annual report of the Office of Inspector General for the period October 1, 1988 to March 31, 1989; to the Committee on Governmental Affairs.

EC-1087. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law copies of D.C. Act 8-25 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1088. A communication from the Chairman of the Council of the District of Columbia; transmitting, pursuant to law, copies of D.C. Act 8-24 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1089. A communication from the Chairman of the Council of the District of Columbia; transmitting, pursuant to law, copies of D.C. Act 8-26 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1090. A communication from the Chairman of the Council of the District of Columbia; transmitting, pursuant to law,

copies of D.C. Act 8-28 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1091. A communication from the Chairman of the Council of the District of Columbia; transmitting, pursuant to law, copies of D.C. Act 8-29 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1092. A communication from the Chairman of the Council of the District of Columbia; transmitting, pursuant to law, copies of D.C. Act 8-27 adopted by the Council on April 18, 1989; to the Committee on Governmental Affairs.

EC-1093. A communication from the Chairman of the National Labor Relations Board, transmitting, pursuant to law, the annual report of the Board under the Government in the Sunshine Act for calendar year 1988; to the Committee on Governmental Affairs.

EC-1094. A communication from the Executive Director of the Neighborhood Reinvestment Corporation, transmitting, pursuant to law, the annual report of the Commission under the Government in the Sunshine Act for calendar year 1988; to the Committee on Governmental Affairs.

EC-1095. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Managing the Government: Revised Approach Could Improve OMB's Effectiveness"; to the Committee on Governmental Affairs.

EC-1096. A communication from the Deputy General Council of the Department of Defense, transmitting a draft of proposed legislation to amend section 5584 of title 5, section 2774 of title 10, and section 716 of title 32, United States Code, to increase from $500 to $2,500 the maximum aggregate amount of a claim that may be waived by the head of an agency under those sections; to the Committee on Governmental Affairs.

EC-1097. A communication from the Secretary Health and Human Services, transmitting, pursuant to law, the Special Report on Services for Older Indians; to the Select Committee on Indian Affairs.

EC-1098. A communication from the Executive Director of the Federal Home Loan Bank Board (Administration and Human Resources), transmitting, pursuant to law, the annual report of the Board under the Freedom of Information Act for calendar year 1988; to the Committee on the Judiciary.

EC-1099. A communication from the Chief Justice of the United States, transmitting, pursuant to law, amendments to the Federal Rules of Appellate Procedure; to the Committee on the Judiciary.

EC-1100. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the Departments of Education and Health and Human Services report on the relationship between drug and alcohol abuse and youth suicide; to the Committee on Labor and Human Resources.

EC-1101. A communication from the Secretary of Education, transmitting, pursuant to law, Final Regulations—Fund for the Improvement and Reform of Schools and Teaching; to the Committee on Labor and Human Resources.

EC-1102. A communication from the Secretary of Education, transmitting, pursuant to law, Final Regulations—General Education Provisions Act—Enforcement; to the Committee on Labor and Human Resources.

EC-1103. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, the second biennial report on the progress of the accessibility of polling places to the elderly and handicapped population in the 1988 general elections; to the Committee on Rules and Administration.

EC-1104. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to revise the provisions relating to refinancing loans and manufactured housing loans to veterans, to modify the procedures for the sale of loans by the Secretary of Veterans Affairs, and for other purposes; to the Committee on Veterans Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PELL, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Res. 124. An original resolution expressing strong support for the North Atlantic Treaty Organization on the occasion of its 40th anniversary; confirming continued dedication to NATO's founding principle, which is the commitment by democratic nations to their common defense; and urging energetic and cooperative participation by NATO member-states in the development and implementation of joint policies aimed at strengthening the East-West military balance while upholding and promoting democratic values.

S. Res. 125. An original resolution congratulating the Kingdom of Norway on its 175 years of constitutional government.

By Mr. PELL, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Con. Res. 26. Concurrent resolution urging first asylum countries of the Association of Southeast Asia Nations [ASEAN] to reinstate the practice of providing refuge to all asylum-seekers from Vietnam, and for other purposes.

3. Children and spouses names; Ruth Jacobeth Abram (Mrs. Herbert Tetielbaum), none; Ann Abram (Mrs. Steve Novak), none; Jonathan Adam Abram (Roslyn), none; Morris B. Abram, Jr., none; Joshua Anthony Abram, none.

4. Parents names: Father, Sam Abram, deceased, Mother, Irene Jacobeth Cohen Abram, deceased.

5. Grandparents names; Dr. Morris S. Cohen, deceased; Daisy E. Cohen, deceased; Morris Abram (deceased).

6. Brother and spouses names: (Brother) Dr. Lewis E. & Doris Abram, none.

7. Sisters and spouses names: sister, Ruthanne Reis, none; Harold Reis, (husband, none.

Joseph Verner Reed, of Connecticut, for the rank of Ambassador during his tenure of service as Chief of Protocol for the White House.

Nominee: Joseph Verner Reed, Jr.

Post: Chief of Protocol.

Nominated: January 6, 1989.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Contributions, amount, date, and donee:

1. Self: (Per year since 1984), $1,000, June 1988, President Elect Bush; $1,000, June 1988, Alan Keyes for Senate.

2. Spouse: Mimi Byers Reed, no contributions.

3. Children and spouses names: Electra Reed; Paul & Serena Kusserow, N/A.

4. Parents names: Permilia P. Reed, N/A.

5. Grandparents names: Deceased.

6. Brothers and spouses names: Adrian & Nancy Jane Reed; Nathaniel & Alita Reed; Samuel Reed (not married), N/A.

7. Sisters and spouses names: Laurel Reed Hemmes, N/A

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PELL. Mr. President, for the Committee on Foreign Relations, I report favorably a nomination list in the Foreign Service which was printed in full in the CONGRESSIONAL RECORD of April 18, 1989, and ask unanimous consent, to save the expense of reprinting on the Executive Calendar, that these nominations lie at the Secretary's desk for the information of Senators.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PRESSLER:

S. 954. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for amounts paid by a physician as principal and interest on student loans if the physician agrees to practice medicine for 2 years in a rural community; to the Committee on Finance.

By Mr. CONRAD:

S. 955. A bill to amend the Internal Revenue Code of 1986 to allow institutions for the Farm Credit System to deduct amounts added to a reserve for bad debts under rules applicable to the deduction of such amounts by small banks; to the Committee on Finance.

By Mr. COATS:

S. 956. A bill to exclude users of alcohol and illegal substances from the definition of handicapped individuals under the Rehabilitation Act of 1973, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HEINZ:

S. 957. A bill to suspend temporarily the duty on Ceftazidime Tertiary Butyl Ester; to the Committee on Finance.

By Mr. HATCH:

S. 958. A bill for the relief of Zahra Moghimi Najaf Abadi and Mohmoud Reza Moghimi Najaf Abadi Farahani; to the Committee on the Judiciary.

By Mr. DASCHLE:

S. 959. A bill to amend title III of the Public Health Service Act to make improvements in the National Health Service Corps scholarship program, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. SIMON (for himself, Mr. DIXON, Mr. DANFORTH, and Mr. BOND):

S. 960. A bill to amend the Act of May 17, 1954, relating to the Jefferson National Expansion Memorial, to strike the proposed limitation on park extension to allow the acquisition of State lands by means other than donation and to increase funding for the East St Louis portion of the Memorial; to the Committee on Energy and Natural Resources.

By Mr. SIMON:

S. 961. A bill to authorize the exchange of certain Federal public land in Madison County, IL; to the Committee on Environment and Public Works.

By Mr. FOWLER (for himself, Mr. BOREN, Mr. PRYOR, Mr. NUNN, Mr. LOTT, and Mr. THURMOND):

S. 962. A bill to provide for the establishment of a coordinated program of promotion and research designed to strengthen the position of the pecan industry in the marketplace, to maintain and expand foreign and domestic markets and uses for improved and native pecans and pecan products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOMENICI (for himself, Mr. DECONCINI, Mr. BINGAMAN, Mr. BOND, Mr. BOREN, Mr. CRANSTON, Mr. DIXON, and Mr. SIMON):

S. 963. A bill to authorize a study on methods to commemorate the nationally significant highway known as Route 66, and

for other purposes; to the Committee on Energy and Natural Resources.

By Mr. FORD (by request):

S. 964. A bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. BENTSEN:

S. 965. A bill to clarify the exemptive authority of the Securities and Exchange Commission; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. KERRY:

S. 966. A bill to carry out long-term research on the effects of oil spills on the marine and estuarine habitats and resources of Prince William Sound, and for other purposes; to the Committee on Energy and Natural Resources.

S. 967. A bill to amend the Coastal Zone Management Act of 1972 to designate the Secretary of Commerce as the lead trustee for ocean and coastal resources and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. REID:

S.J. Res. 125. Joint resolution relating to responsible trade and conservation of tropical forest resources; to the Committee on Foreign Relations.

By Mr. PELL (for himself, Mr. MITCHELL, Mr. HOLLINGS, Mr. DOLE, Mr. CHAFEE, Mr. NUNN, Mr. MATSUNAGA, Mr. DIXON, Mr. CONRAD, Mr. PRYOR, Mr. SARBANES, Mr. RIEGLE, Mr. HATCH, Mr. COHEN Mr. THURMOND, Mr. DODD, Mr. BOREN, Mr. COCHRAN, Mr. HUMPHREY, Mr. D'AMATO, Mr. KERRY, Mr. GORE, Mr. LIEBERMAN, Mr. REID, Mr. LUGAR, Mr. KASTEN, Mr. GRAHAM, Mr. GORTON, Mr. LAUTENBERG, Mr. BURDICK, Mr. EXON, Mr. ROBB, Mr. LEVIN, Mr. PACKWOOD, Mr. JEFFORDS, Mr. BOSCHWITZ, Mr. WILSON, Mr. BRADLEY, Ms. MIKULSKI, Mr. MURKOWSKI, Mr. STEVENS, Mr. WARNER, Mr. INOUYE, Mr. CRANSTON, Mr. MACK, and Mr. BREAUX):

S.J. Res. 126. Joint resolution commemorating the bicentennial of the U.S. Coast Guard; to the Committee on the Judiciary.

By Mr. SIMON:

S.J. Res. 127. Joint resolution designating Labor Day Weekend, September 2-4, 1989, as "National Drive for Life Weekend"; to the Committee on the Judiciary.

By Mr. MITCHELL (for Mr. BYRD (for himself, Mr. MITCHELL, and Mr. DOLE)):

S.J. Res. 128. Joint resolution authorizing a first strike ceremony at the U.S. Capitol for the Bicentennial of the Congress Commemorative Coin; considered and passed.

By Mr. DOLE (for himself, Mr. MITCHELL, Mr. CHAFEE, Mr. ROTH, Mr. GARN, Mr. WARNER, Mr. MURKOWSKI, Mr. DOMENICI, Mr. BOSCHWITZ, Mr. BURNS, Mr. COATS, Mr. ARMSTRONG, Mr. COHEN, Mr. MCCONNELL, Mr. HATCH, Mr. DURENBERGER, Mr. LUGAR, Mr. GRAHAM, Mr. LEAHY, Mr. MATSUNAGA, Mr. PELL, Mr. SHELBY, Mr. HOLLINGS, Mr. MOYNIHAN, and Mr. REID):

S.J. Res. 129. Joint Resolution to provide for the designation of September 15, 1989, as "National POW/MIA Recognition Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL (for himself and Mr. DOLE):

S. Res. 123. Resolution to amend Senate Resolution 38, 101st Congress, providing for the appointment of a committee to receive and to report evidence with respect to articles of impeachment against Judge Alcee L. Hastings; considered and agreed to.

By Mr. PELL from the Committee on Foreign Relations:

S. Res. 124. An original resolution expressing strong suppport for the North Atlantic Treaty Organization on the occasion of its 40th anniversary; confirming continued dedication to NATO's founding principle, which is the commitment by democratic nations to their common defense; and urging energetic and cooperative participation by NATO member states in the development and implementation of joint policies aimed at strengthening the East-West military balance while upholding and promoting democratic values; placed on the calendar.

S. Res. 125. An original resolution congratulating the Kingdom of Norway on its 175 years of constitutional government; placed on the calendar.

By Mr. BAUCUS (for himself, Mr. HARKIN, Mr. PRYOR, Mr. CONRAD, Mr. BURDICK, Mr. BOREN, Mr. DASCHLE, and Mr. EXON):

S. Res. 126. Resolution expressing the sense of the Senate that the Prospective Payment Assessment Commission does not equitably represent the proportion of Medicare beneficiaries living in rural America, and that four additional Commissioners with experience in rural health care delivery should be appointed to the Commission to help correct the inequity; to the Committee on Finance.

By Mr. HATCH (for himself, Mr. GARN, Mr. DURENBERGER, Mr. BAUCUS, and Mr. GRASSLEY):

S. Con. Res. 36. Concurrent resolution expressing the sense of Congress regarding the problem of geographical variations under the current medicare physician reimbursement system; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PRESSLER:

S. 954. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for amounts paid by a physician as principal and interest on student loans if the physician agrees to practice medicine for 2 years in a rural community; to the Committee on Finance.

DEDUCTION FOR STUDENT LOAN PAYMENTS FOR PHYSICIANS PRACTICING IN RURAL AREAS

Mr. PRESSLER. Mr. President, I rise today to introduce legislation that can assist rural communities with the recruitment and retention of medical doctors while benefiting the physician who must pay the high cost of a medical education.

Rural America's health care system is in a crisis. We are all aware of the financial plight experienced by rural hospitals. As we all know, some are closing every day. Today, the Ipswich, SD, Community Hospital will close its doors. Of equal importance to hospitals, if not more so, are physicians. Physicians are the backbone of the health care delivery system. Without doctors, hospitals and other medical personnel cannot serve the public.

Contrary to reports of a physician surplus, a severe shortage plagues rural communities. According to a 1987 report by the Department of Health and Human Services [HHS], 33 States had fewer than 20.7 non-Federal physicians, the national average, per 10,000 civilian persons. South Dakota ranked 45th among the 50 States. Only the States of Alaska, Mississippi, Idaho, and Wyoming experienced a more severe shortage of doctors. Further, 38 States fall below the national average of 18 patient care physicians per 10,000 civilians. South Dakota ranked 45th of the 50 States with a ratio of 12.3 patient care physicians per 10,000 civilians.

South Dakota has 37 health manpower shortage areas. Ten physicians are urgently needed in those areas. The South Dakota Medical Association reports an immediate need for at least 50 family physicians in the State.

A tremendous vacuum of primary care services, including preventive care, exists in many rural areas. The National Health Service Corps [NHSC] has benefited many rural areas. However, the time has come to go a step further and provide additional incentives to attract physicians to areas that the NHSC may never reach. NHSC uses health manpower shortage areas as the basis for placing physicians. Many communities that need primary care are located in health manpower shortage areas. Their small size and low per capita income cannot attract a physician. This bill addresses the concern of physicians who might want to practice in such areas but cannot afford to do so.

Provisions contained in the bill would allow physicians to deduct the cost of medical education, including reasonable living expenses, of $5,000 per year as a business expense. In return, interested physicians would be required to practice for a minimum of 24 consecutive months in a community of 5,000 population or less and a per capita income of $15,000 or less.

The cost of medical education is excessive. Further, beginning practice in a rural community with a poor economic base will not provide a physician with sufficient income to pay his or her debts and simultaneously develop a practice.

By investing in young physicians who are willing to practice in rural areas, we can save dollars in the future—financial resources that could be spent on acute care, or long-term

chronic illnesses such as heart and lung disease and cancer. Primary care doctors are educated in the science of preventive care as well as acute and chronic care. Preventive services, such as well-baby clinics and prenatal care; farm safety programs, such as machine safety and the hazards of pesticides and herbicides; alcohol programs; smoking cessation programs; nutrition education; hearing safety and many other services are critically needed in rural America. Health research is demonstrating that preventive health services do reduce costs and enhance the healthful life style of people.

Increasing the supply of physicians in rural areas also can help more remote areas that are unable to support a physician. These areas could be served by physician assistants or nurse practitioners if physicians were available within a reasonable distance to act as supervisors to one or more satellite clinics in the remote communities.

This legislation is vitally important for the future health of rural America. It would increase the supply of doctors in communities with a population of 5,000 or less and assist with building stable medical practices. Also, it is a statement that costs can be reduced by enhancing the availability of primary, preventive care services in rural America.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 954

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEDUCTION FOR STUDENT LOAN PAYMENTS BY PHYSICIANS PRACTICING IN RURAL AREAS.

(a) IN GENERAL.—Section 162 of the Internal Revenue Code of 1986 (relating to trade or business expenses) is amended by redesignating subsection (m) as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) STUDENT LOAN PAYMENTS OF PHYSICIANS PRACTICING IN RURAL AREAS.—

"(1) IN GENERAL.—In the case of an individual with respect to whom services are performed under a qualified rural medical practice agreement during the taxable year, there shall be allowed as a deduction under this section an amount equal to the amount which bears the same ratio to the principal and interest paid on qualified educational loans during the taxable year as—

"(A) the number of months during the taxable year during which such services were performed, bears to

"(B) the number of months in the taxable year.

"(2) DOLLAR LIMITATION.—The aggregate amount of the deduction under subsection (a) for any taxable year with respect to any individual shall not exceed $5,000.

"(3) QUALIFIED MEDICAL PRACTICE AGREEMENT.—For purposes of this subsection—

"(A) IN GENERAL.—The term 'qualified medical practice agreement' means a written agreement between an individual and an applicable rural community under which the individual agrees, upon completion of the individual's residency (or internship if no residency is required), to perform full-time services as a medical doctor in the applicable rural community for a period of 24 consecutive months.

"(B) 24-MONTH PERIOD.—An individual shall be treated as meeting the 24 consecutive month requirement under subparagraph (A) if, during each 12-consecutive month period within such period, the individual performs full-time services as a medical doctor in the applicable rural community during 9 of the months in such 12-consecutive month period. For purposes of this subsection, an individual meeting the requirements of the preceding sentence shall be treated as performing services during the entire 12-month period.

"(C) APPLICABLE RURAL COMMUNITY.—The term 'applicable rural community' means any political subdivision of a State or an Indian reservation which—

"(i) has a population of 5,000 or less, and

"(ii) has a per capita income of $15,000 or less.

"(4) QUALIFIED EDUCATIONAL LOAN.—The term 'qualified educational loan' means any indebtedness to pay qualified tuition and related expenses (within the meaning of section 117(b)) and reasonable living expenses—

"(A) which are paid or incurred as a candidate for a degree as a medical doctor at an educational institution described in section 170(b)(1)(A)(ii), and

"(B) which are paid or incurred within a reasonable time before or after such indebtedness is incurred.

"(5) RECAPTURE.—If an individual fails to carry out a qualified rural medical practice agreement during any taxable year, then—

"(A) no deduction with respect to such agreement shall be allowable by reason of this subsection for such taxable year and any subsequent taxable year, and

"(B) there shall be included in gross income for such taxable year the aggregate amount of the deductions allowable under this section (by reason of this subsection) for all preceding taxable years."

(b) 2-PERCENT FLOOR NOT TO APPLY.—Section 67(b) of the Internal Revenue Code of 1986 is amended by striking out "and" at the end of paragraph (12), by striking out the period at the end of paragraph (13) and inserting ", and", and by inserting after paragraph (13) the following new paragraph:

"(14) the deduction allowable by reason of section 162(m) (relating to student loan payments of physicians practicing in rural areas)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

By Mr. CONRAD:

S. 955. A bill to amend the Internal Revenue Code of 1986 to allow institutions of the Farm Credit System to deduct amounts added to a reserve for bad debts under rules applicable to the deduction of such amounts by small banks; to the Committee on Finance.

DEDUCTIONS FOR BAD DEBT RESERVE BY FARM CREDIT INSTITUTIONS

Mr. CONRAD. Mr. President, the tax technical corrections bill passed by Congress last year contained many revisions to the Tax Reform Act of 1986 that are beneficial to the farm community.

Key agricultural features included restoration of the diesel tax exemption for farmers, drought-related tax deferrals, repeal of the heifer tax and extension of special estate tax valuation to cash-renters.

While the technical corrections package made great strides in revising problems in the 1986 act, at least one farm-related problem created by the law remains.

The 1986 tax law repealed the reserve method of calculating loan losses for the Farm Credit System's Production Credit Associations [PCA's] and Banks for Cooperatives [BC's]. At the same time, the act retaiend this loss calculation system for banks with less than $500 million in assets. The loss of the reserve method has added some $85 million in additional taxes to the Farm Credit System. This increased tax burden forces the already financially distressed system to absorb further losses which are inevitably passed along to it borrowers.

In a State like North Dakota, which led the Nation last year in per capita income decline—3.2 percent—farmers simply cannot afford to pay these additional costs.

The increased tax burden also exacerbates the difficulties PCA's and BC's confront in charging competitive interest rates. Similarly situated commercial banks, with loan loss reserve accounting capability, have an obvious advantage in setting competitive rates.

My bill would restore the ability of Farm Credit System institutions to use the reserve method of accounting for loan losses. This would allow production credit associations and banks for cooperatives to deduct, as a business expense, income reserved to provide for loan losses as they did prior to enactment of the 1986 Tax Reform Act.

Mr. President, we must continue to lead the financially stressed agricultural sector of this country on the road to economic recovery. Relieving the Farm Credit System and its borrowers of the tax burden they have had to absorb through loss of deductions on loan losses is one step that we can take.

I urge my colleagues to join me on this path. Let us allow the Farm Credit System to participate on a level playing field with its competitors. Let us allow the Farm Credit System to make better use of the money it must now use to cover new tax payments. Let us allow the Farm Credit System to free up these funds and work on lowering interest rates. It is time to end the unfair tax treatment of the Farm Credit System and, in doing so, provide farmers and farmer-owned cooperatives with more equitable rates.

Mr. CONRAD. Mr. President, I recognize the Chair's effort in helping us

last year. Rural America will forever be indebted to your leadership when you served as majority leader in helping us expedite the passage of the drought relief bill. I can say without fear of contradiction, Mr. President, that without that bill my State would be in the most serious economic straits imaginable.

And it was the leadership of the current occupant of the Chair, the President pro tempore, that made that legislation move quickly and all of rural America owes you its thanks.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEDUCTION ALLOWED FOR ADDITIONS TO BAD DEBT RESERVE BY FARM CREDIT SYSTEM INSTITUTIONS.

(a) IN GENERAL.—Section 166 of the Internal Revenue Code of 1986 (allowing deduction for bad debts) is amended by inserting after subsection (b) the following new subsection.

"(c) RESERVE FOR BAD DEBTS OF FARM CREDIT SYSTEM INSTITUTIONS.—

"(1) IN GENERAL.—In the case of an institution of the Farm Credit System, in lieu of any deduction under subsection (a), there shall be allowed a deduction for a reasonable addition (determined under rules similar to the rules of section 585(b) (relating to addition to reserves for bad debts on loans of banks)) during the taxable year to a reserve for bad debts.

"(2) INSTITUTION OF THE FARM CREDIT SYSTEM DEFINED.—For purposes of paragraph (1), the term 'institution of the Farm Credit System' means any institution continued as a federally chartered instrumentality of the United States under the Farm Credit Act of 1971 (12 U.S.C. 2001 et seq.)."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1986.

By Mr. HATCH:

S. 958. A bill for the relief of Zahra Moghimi Najaf Abadi and Mahmoud Reza Moghimi Najaf Abadi Farahani; to the Committee on the Judiciary.

RELIEF OF CERTAIN INDIVIDUALS

Mr. HATCH. Mr. President, I am introducing a bill to provide permanent residence in Zahra Moghimi Najaf Abadi and her brother Mahmoud Reza Moghimi Najaf Abadi Farahani.

Ms. Moghimi came to the United States in November 1984, with a visitor's visa to receive medical assistance. She has severe scoliosis, which was caused by polio. She needs corrective surgery in order to prevent this condition from worsening and becoming a possible life-threatening situation.

When she first arrived, Ms. Moghimi was under the impression that the surgery would cost approximately $10,000, an amount which she was then prepared to pay. Much to her dismay, after meeting with qualified medical personnel, she discovered that the approximate cost of her surgery is about $35,000. Until recently she did not have the funds to have this surgery done. Consequently, the hospital would not schedule her operation until she had enough for a downpayment. That amount, approximately $15,000, has now been raised, the surgery is scheduled for July 31, 1989, and the family has agreed to a payment schedule for the remainder of the cost.

Ms. Moghimi's brother has been caring for her while the funds were raised. Ms. Moghimi has indicated that she will need his continued help during the recovery period after her surgery.

The Moghimis' visas have now expired and they were given a voluntary date in April. It was shortly after this time they raised sufficient funds for the downpayment for the operation; however, deportation has now been ordered.

Mr. President, since the money has been raised, and a surgery date has been set, Ms. Moghimi should be allowed to remain in the country for her operation. Ms. Moghimi's American doctors are not aware of any qualified doctors in Iran who could perform this special surgery. To send her home, when she is so close to obtaining relief from this terrible condition, is unconscionable. This is a humanitarian case that deserves our careful consideration. I urge my colleagues to support this legislation.

By Mr. COATS:

S. 956. A bill to exclude users of alcohol and illegal substances from the definition of handicapped individuals under the rehabilitation Act of 1973, and for other purposes; to the Committee on Labor and Human Resources.

EXCLUSION OF DRUG ABUSERS FROM DEFINITION OF HANDICAPPED

Mr. COATS. Mr. President, for several years now the Congress and executive have exhibited a disciplined, bipartisan commitment to pressing a vigorous was against drugs. We have put policies into place that evidence a reasoned resolve—forged in a time of anger and maintained in a time of somber reflection. Our efforts have been characterized by a clear-eyed facing of fundamental facts and an unequivocal and unhesitant repudiation of any hint of lingering tolerance for drug abuse.

So it is particularly disturbing to me that the healthy body of our resolve seems to have been injected with a paralyzing dose of ambiguity. Just as we have begun to finally survey the boundaries of our drug crisis, we find that the fences have been torn down, opening up a vast new region of barely explored unpleasantness. And all because of noble legislation flawed by a single provision which gives comfort only to those with a vested interest in error.

The problem is really quite simple. The Rehabilitation Act of 1973, 29 U.S.C. 791, prohibits discrimination on the basis of handicap in programs or activities receiving Federal financial assistance. The act provides in sections 503 and 504 that no Federal agency or federally subsidized enterprise can discriminate against handicapped persons. This is both admirable and vital. There is no place in our society for discrimination against people with physical and mental handicaps.

But the difficulty comes in the fine print. An individual with handicaps is not defined in a way that most americans would understand. It is broadened to include drug abusers, addicts, and alcoholics. Thus, substance abusers are protected from any effort to exclude them from activities or benefits based on their drug or drinking problems. They are put in the same category with the blind or the mentally retarded.

The results of such definitional gymnastics are as shocking as they are absurd. Expelling a drug addict from school becomes the moral equivalent of throwing out a student for being confined to a wheelchair. Federal employees or postal workers who are addicted to illegal drugs can't be fired to create a drug-free workplace. Drug addicts can't be evicted to clean up public housing. All, under this law, are handicapped. And each action is illegal discrimination.

The bill I am introducing today would amend the Rehabilitation Act of 1973 to exclude drug abusers and alcoholics from the definition of the handicapped, not because they are unworthy of help or concern, but because this is the only way we will restore credibility to our fight against the demand for illegal drugs. This bill represents the official view of both the Reagan and Bush administrations. And it represents my convictions as well. Those who abuse drugs or alcohol should be treated as responsible persons who must be held accountable for their acts.

Former Assistant Attorney General Richard Willard testified before the House Post Office and Civil Service Subcommittee on September 25, 1986 in favor of this change in the Law. He made it clear that the Justice Department supports such an amendment because of the propensity of some courts to adopt an overly broad reading of the act. Often they end up requiring repeated offers of rehabilitation before the Government is allowed to take action against a drug addicted employee who is unable to perform his job. As Mr. Willard correctly pointed out, it makes no sense to permit an

employee to seek treatment, come back to work fall off the wagon and resume his or her drug habit, and then seek treatment over and over again. Such a policy certainly does not help the worker. But it both sets a bad example for others, and costs the Government a great deal of money. It is far better for the Government to be able to discipline an employee who, due to repeated drug use, cannot carry out his or her duties properly.

Mr. President, the Department of Education also supports this change in the law. Secretary Cavozos explains, "Virtually every public school in the country is covered by this antidiscrimination statute, the practical, and presumably unintended, effect of which—when combined with the present definition of individual with handicaps—is to make it virtually impossible to establish a drug-free educational environment." If one of our goals in the war on drugs is to have drug-free schools for our children and young people, then we must be sure that our local school districts, school boards and parent-teacher groups have the means to take appropriate and effective measures against student repeat drug offenders.

Mr. President, I ask unanimous consent that the full text of a letter from Secretary of Education Lauro Cavazos to Minority Leader BOB DOLE in support of an identical amendment to the 1988 omnibus antidrug bill be entered into the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF EDUCATION,
Washington, DC, October 12, 1988.

HON. ROBERT DOLE,
Minority Leader, U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I write to urge your support of an amendment to S. 2852, the Omnibus Anti-Substance Abuse Act of 1988. The amendment would make clear that illegal drug abusers are not defined as individuals with handicaps due solely to their illegal use of drugs.

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of handicap in programs or activities receiving Federal financial assistance. Because the current definition of individual with handicaps in the Rehabilitation Act includes the term drug abuser, it is difficult for school districts to impose effective disciplinary measures upon students who abuse drugs.

Virtually every public school in the country is covered by this anti-discrimination statute, the practical (and presumably unintended) effect of which—when combined with the present definition of individual with handicaps—is to make it virtually impossible to establish a drug-free educational environment.

The amendment is supported by the administration and is the same as that contained in section 103 of S. 2849 of the 99th Congress which you introduced on September 23, 1986 on behalf of the administration.

This amendment is vitally important. The goal of a drug-free environment in American public schools will be very difficult to achieve without enactment of this amendment. I strongly urge you to make every effort to gain its enactment. The Office of Management and Budget advises that there is no objection to the submission of this report to the Congress from the standpoint of the administration's program.

Sincerely,

LAURO F. CAVAZOS,
Secretary.

Mr. COATS. Mr. President, many public schools have adopted tough policies against drug offenders, but as a consequence of current law, have been forced by Federal authorities to change their policies and even to take back students who were expelled for repeated drug violations. And if they refuse, they risk the loss of Federal education assistance.

Let me cite one actual case history to illustrate my point. A junior high school student in a public school in Washington State started using drugs and alcohol during the seventh grade. As a result, his grade average plummeted, his truancies became more frequent, and increasingly he became a disciplinary problem at school. His parents finally withdrew him from school and placed him in a local hospital care unit for treatment where he was diagnosed as suffering from acute chronic alcoholic and drug addiction and dependency. He was later released and was enrolled again at his former school the following year. Once again, after a short time he fell into the old pattern of repeated unexcused absences, poor grades, and a bad attitude, resulting in frequent detention and suspensions. Following his suspension for being caught under the influence of drugs at a school dance, the school district had him withdrawn from school for nonattendance. At the time he left school the student was flunking three out of his four academic subjects and had a "D" in the other course.

The boy's parents later enrolled their son at another school. But they also filed a complaint against the school district for failure to provide their son a "free appropriate public education," alleging he was handicapped by alcoholism and drug addiction. The Office of Civil Rights of the Department of Education investigated the complaint and ruled in favor of the parents, finding that the school district had violated the student's civil rights, by discriminating against him under the section 504 of the Rehabilitation Act. For fear of losing Federal funding, the school district was forced to change its policy. They were required to treat students with drug or alcohol dependency like any other handicapped group.

In other words, instead of being disciplined, addicted students must receive special educational programs offered by the school district, just like students with mental or physical handicaps. The school district has the responsibility of setting up a program to detect drug and alcohol addiction and to educate students to cope with their handicap.

The problem, as I see it, is not that students with serious drug and alcohol problems should not be given treatment and education, or that schools should not offer treatment and education programs for students who use drugs. The problem is that local school authorities are not given any choice as to what they can do with students on drugs. The Federal Government, it seems, has overruled the disciplinary policies of every school district in the Nation. Local education authorities no longer have any choice as to the kind of program or action they deem best because the Department of Education, under the guise of civil rights law, is forcing them to change their policies and readmit chronic drug users and alcoholics as if they were handicapped.

Mr. President, this story, which was an actual incident in Washington State, has been repeated many times around the country. It illustrates the kind of problem that is plaguing education officials everywhere, including the Department of Education's Office of Civil Rights, as a result of the unclear language in the Rehabilitation Act.

As a consequence, education groups across America are seeking to change the law. Let me quote from a letter from Save Our Schools, a citizens' group: "Save Our Schools [SOS] believes that this situation makes a mockery of the Department of Education's position that schools should get tough on drugs. The current definition of "handicapped" also sends conflicting signals to parents, teachers, school administrators and students as to the proper penalty for using illegal drugs."

The Department of Housing and Urban Development faces a similar problem. Unless the definition of "handicapped" persons is changed in the law, HUD will be unable to enforce "eviction on conviction" of drug abusers in federally funded public housing projects. HUD Secretary Jack Kemp's policy to provide drug free public housing will be severely weakened.

Unless the Rehabilitation Act is amended along the line I propose, it will be difficult, if not impossible, to enforce the tough provisions included in the Anti-Drug Abuse Act of 1988 to prevent the use of drugs and the presence of drug-related crime in public housing. Under section 5101 of the act, if a public housing tenant or a member of the tenant's household engages in drug-related criminal activity, that is cause for eviction. The "handicapped" definition must be changed or drug abusers will be able to resist eviction as "handicapped" persons under section 504. This provision in the antidrug law will be a dead letter, and the

removal of drug offenders from housing projects will become a problem for housing authorities and law-abiding tenants and their families.

Mr. President, if we are to win the war on drugs, we must be able to take strong measures to stop both the demand and the supply of illegal drugs. Stopping supply, to some extent, is a simpler challenge—success is limited only by the resources we devote. But the fight against demand must be fought everywhere—in drug-free schools and drug-free workplaces and drug-free housing. These are precisely the places where the war against drugs will be won or lost. For it is in schools, at work, and in the home that attitudes toward drugs are shaped and demand for drugs is determined. If expulsions, firings, and evictions are declared off limits—prohibited as illegal discrimination—we've taken away the tool of last resort necessary to show we're serious in the fight against drugs.

It's been said that you can argue over exactly what hospitals should do, but surely they shouldn't spread disease. There's a lot of debate in Washington on how the Government should fight the drug war. But at the very least it shouldn't prevent people from combating the problem themselves. The Rehabilitation Act must be changed.

Drug addiction is many things. It is a trap that robs our children of life and hope. It is slow suicide that merits our compassion and help. It is the root of an industry that spreads violence and terror. But is is not the same as deafness or paralysis. It is not the same as a handicap. And, if we hope to see victory in the war against drugs, we can't treat it like one.

For these reasons, I hope that my legislation will receive early consideration and I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENTS TO THE REHABILITATION ACT OF 1973.

(a) HANDICAPPED INDIVIDUAL.—Section 7(8)(B) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)(B)) is amended—

(1) by striking out "Subject to the second sentence of this subparagraph, the" in the first sentence and inserting in lieu thereof "The"; and

(2) by striking out the second sentence and inserting in lieu thereof the following new sentences: "The term 'handicapped individual' does not include any individual who uses, or is addicted to, alcohol or illegal drugs, except that an individual who is otherwise handicapped shall not be excluded from the protection of this Act if such person also uses or is addicted to drugs. For purposes of sections 503 and 504 as such sections relate to employment, the term 'handicapped individual' does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.".

(b) ILLEGAL DRUGS.—Section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 706) is amended by adding at the end thereof the following new paragraph:

"(22) The term 'illegal drugs' means controlled substances, as defined by Schedules I and II, section 102(6) of the Controlled Substances Act (21 U.S.C. 802(6)) the possession or distribution of which is unlawful under the Comprehensive Drug Abuse Prevention and Control Act of 1970.".

By Mr. DASCHLE:

S. 959. A bill to amend title III of the Public Health Service Act to make improvements in the National Health Service Corps Scholarship Program, and for other purposes; to the Committee on Labor and Human Resources.

NATIONAL HEALTH SERVICE CORPS IMPROVEMENT ACT

Mr. DASCHLE. Mr. President, I rise today to introduce the National Health Service Corps Improvement Act of 1989. The aim of this legislation is to ensure that individuals living in rural and underserved communities across America have access to health care professionals.

Rural America is home to over 25 percent of the total U.S. population, and over 33 percent of the elderly. However, only 12 percent of the physicians and 18 percent of the nurses reside in rural areas. This means that rural Americans are going without critical health care services because the providers just aren't available.

These shortages can be illustrated in the physician-patient ratios that we find in rural America. Physician availability in counties with fewer than 10,000 residents in 1985 (53 physicians per 100,000 population) is roughly one-third of the U.S. average (163 physicians per 100,000 population.)

In 1988, the Department of Health and Human Services [DHHS] identified approximately 1,300 rural primary care shortage areas. These shortage areas were in need of 1,800 health care providers. In the same survey, as many as 25 percent of practicing rural physicians indicated that they would retire or leave their communities within the next 5 years.

The outlook for attracting more physicians to small rural communities is not very bright. The financial viability of physican practices is threatened by the growing numbers of rural hospital closures and uninsured patients. Rising malpractice premiums have resulted in rural counties losing almost all obstetrical services. Federal funding has not kept pace for rural community health centers that provide an important source of primary care for the poor and the non-poor.

Furthermore, serving in rural areas is no easy task for health care providers since the patients they must serve are generally older, poorer, and in worse health than those of their urban counterparts. Hours are long, equipment is often not state of the art, and reimbursement from government programs is inadequate.

Throughout the 1970's and much of the 1980's, the National Health Service Corps [NHSC] placed hundreds of physicians in rural communities and Indian reservations across the country. Reports of a physician surplus, however, fueled the Reagan administration's efforts to dismantle this successful physician recruitment/placement program. Today, only 222 corps physicians will be available to provide medical services to residents in health manpower shortage areas compared to 1,350 corps physicians who were available in 1985.

As a result, many families across this country must worry whether they will have access to a doctor should a medical emergency arise. Access to health care is not something taken for granted in rural America.

The proposal I am introducing today seeks to revive the NHSC, a program that has proven its effectiveness in addressing the health manpower shortage in rural areas. My legislation would improve the physician retention rate and enhance the attractiveness of serving in the NHSC.

The first provision would require the NHSC to give preference to medical students from Health Manpower Shortage Areas [HMSAs], economically disadvantaged or minority students, or those students attending medical schools with rural training opportunities.

The second provision would require the NHSC to inform all first-year medical students about the availability of the program and advise them of what commitment it entails. If a student accepts a scholarship, he or she would receive yearly interviews and quarterly publications to keep abreast of the needs and requirements of the corps. In addition, the corps will provide case management to develop a mutually acceptable site for scholarship recipients.

The third provision would allow corps physicians to rotate to another medical facility for the purpose of meeting their medical board requirements and continuing medical education requirements. The physician would be able to stay at the new facility until he/she met the medical board requirements. The physician's commitment would be extended to compensate for the absent period.

The fourth provision would require the NHSC loan repayment program to

establish a minimum amount of $20,000 per year of service in an underserved area. It also directs the Secretary to raise this amount to a level that is determined as an effective incentive to potential applicants.

Finally, this bill would mandate a recruitment goal of 450 physicians. While attaining this goal would not solve the physician shortage in underserved areas, it would be an important first step to improving access to health care for rural Americans.

Mr. President, I recently received an eloquent letter from a young South Dakotan who summed up the concerns that I am attempting to address today. He wondered "how many other bright, enthusiastic and intellectual young men and women, who enjoy the rural lifestyle, would be inclined to become doctors if they didn't feel like they had to live in the big city just to pay off their school loans." My proposal would enable these young physicians to consider rural America as an option when establishing their practices.

I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 959

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Health Service Corps Improvements Act of 1989".

SEC. 2. PRIORITY IN APPROVAL OF APPLICATIONS.

(a) SCHOLARSHIP PROGRAM.—Section 338A(d) of the Public Health Service Act (42 U.S.C. 2541(d)) is amended—

(1) in paragraph (2)(C), by striking out the period and inserting in lieu thereof "; and"; and

(2) by adding at the end thereof the following new paragraph:

"(3) third, to applications made (and contracts submitted) by individuals—

"(A) who are residents of health manpower shortage areas;

"(B) who are disadvantaged or minority students; or

"(C) who are attending, or planning to attend, an accredited educational institution as provided for in subsection (b) that provides rural training opportunities.".

(b) LOAN REPAYMENT PROGRAM.—Section 338B(d) of the Public Health Service Act (42 U.S.C. 2541-1(d)) is amended—

(1) in paragraph (2), by striking out the period and inserting in lieu thereof "; and"; and

(2) by adding at the end thereof the following new paragraph:

"(3) individuals—

"(A) who are residents of health manpower shortage areas;

"(B) who are disadvantaged or minority students; or

"(C) who are attending, or planning to attend, an accredited educational institution as provided for in subsection (b) that provides rural training opportunities.".

SEC. 3. PROGRESS INTERVIEWS.

Section 338A(f) of the Public Health Service Act (42 U.S.C. 2541(f)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(5) an agreement that the individual will, at least once during each year of the scholarship, participate in an interview with an appropriate official of the institution (as determined through regulations issued by the Secretary) who shall monitor the progress and development of the individual within the course of study of such individual.".

SEC. 4. REPORT ON PLACING OF GRADUATES.

Section 338A(i) of the Public Health Service Act (42 U.S.C. 2541(i)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(5) the top one half of all medical schools in the United States that place a greater percentage of their graduates each year in underserved areas than the national average of graduates so placed by all such medical schools.".

SEC. 5. PROVISION OF INFORMATION AND MATERIALS.

Section 338A of the Public Health Service Act (42 U.S.C. 2541) is amended by adding at the end thereof the following new subsection:

"(j)(1) As part of the program established under this section, the Secretary shall ensure that the admissions offices at accredited educational institutions that offer degrees of the type specified in subsection (a) provide applicants for admission into such institutions information concerning the availability of the Scholarship Program, and such information shall contain a statement that applicants for such scholarships must be interested in providing primary care and practicing in underserved areas.

"(2) The Secretary shall provide all individuals participating in the Scholarship Program established under this section with the quarterly publication of the National Health Service Corps.".

SEC. 6. RECRUITMENT GOAL.

Section 338A of the Public Health Service Act (42 U.S.C. 2541) (as amended by section 5) is further amended by adding at the end thereof the following new subsection:

(k) The Secretary shall, to the extent practicable, award scholarships under this section in such a manner so as to reach the goal of awarding 450 such scholarships for each school year.".

SEC. 7. MINIMUM LOAN REPAYMENT AMOUNT.

Section 338B(g)(2)(A) of the Public Health Service Act (42 U.S.C. 2541-1(g)(2)(A)) is amended by striking out "up to $20,000" and inserting in lieu thereof "not less than $20,000, or greater amount as determined appropriate by the Secretary,"

SEC. 8. OBLIGATED SERVICE.

Section 338C of the Public Health Service Act (42 U.S.C. 254m) is amended by adding at the end thereof the following new subsection:

(f) The Secretary shall promulgate regulations that—

"(1) permit, Scholarship Program participants who have been assigned to participate in as Corps physicians under this section and in accordance with section 331 through 335, to rotate among separate facilities on the approval of such facilities;

"(2) permit participants who rotate under paragraph (1) to accumulate the periods of service provided to such facilities for the purpose of medical board and continuing medical education requirements;

"(3) extend the time that such participants are required to provide service at their primary assigned site to compensate for periods of time when such participant was absent from such site; and

"(4) permit other Corps physicians to be temporarily reassigned to other facilities to ensure physician continuity at such facilities.".

By Mr. FOWLER (for himself, Mr. BOREN, Mr. PRYOR, Mr. NUNN, Mr. LOTT, and Mr. THURMOND):

S. 962. A bill to provide for the establishment of a coordinated program of promotion and research designed to strengthen the position of the pecan industry in the marketplace, to maintain and expand foreign and domestic markets and uses for improved and native pecans and pecan products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

PECAN PROMOTION AND RESEARCH ACT OF 1989

Mr. FOWLER. Mr. President, the U.S. pecan industry is a $400 million business that provides about 15,000 jobs. However, it is the only major nut producing industry that does not have a marketing agreement to promote its product through advertising and product use development.

For that reason, I am today introducing the Pecan Promotion and Research Act of 1989, to establish a coordinated program of promotion and research of this important crop. I am pleased that five of my colleagues from both sides of the aisle—Senators DAVID BOREN, SAM NUNN, DAVID PRYOR, STROM THURMOND, and TRENT LOTT—are original cosponsors.

This bill is designed to strengthen the position of the pecan industry in the marketplace, and to maintain and expand foreign and domestic markets. It is also intended to develop and promote expanded uses for improved and native pecans and pecan products.

The program will be implemented through establishment of a Pecan Marketing Board, made up of at least 15 members who represent growers, shellers, handlers, importers, and the general public. Funding under this bill will be provided through assessments on all pecans produced in the United States, or imported into this country.

To assure the full support of pecan producers themselves, a referendum will be conducted in which all pecan producers will have an opportunity to approve the provisions of this act.

Mr. President, as a member of the Senate Agriculture Committee, I have

held hearings on this matter and I was impressed with the strong arguments put forth by pecan growers, shellers, and others in the industry on the need for this bill. They are a responsible, productive segment of our agricultural community, and they deserve the opportunity to help themselves be more competitive in a challenging environment.

This approach is fair, and it is cost effective because it is producer supported. It is a sensible way to bring to the pecan industry the marketing and research advantages now enjoyed by other nut producing industries, and to allow American pecan producers to move strongly into the world market.

By Mr. DOMENICI (for himself, Mr. DECONCINI, Mr. BINGAMAN, Mr. BOND, Mr. BOREN, Mr. CRANSTON, Mr. DIXON, and Mr. SIMON):

S. 963. A bill to authorize a study on methods to commemorate the nationally significant highway known as Route 66, and for other purposes; to the Committee on Energy and Natural Resources.

ROUTE 66 STUDY ACT OF 1989

● Mr. DOMENICI. Mr. President, today I am rising to introduce the Route 66 Study Act of 1989. This bill would direct the National Park Service to conduct a feasibility study to determine the best ways to preserve, commemorate, and interpret historic U.S. Route 66.

At one time, Route 66, stretching from Chicago to Santa Monica, was the most famous highway in America. Like a modern day Santa Fe Trail, it carried thousands of migrating Americans to the West. It also allowed vacationers to experience previously remote areas of the Southwest and the Far West.

Route 66 is fast fading from the landscape of America, having been superceded by the superhighways. However, one can still see vestiges of the highway and the gas stations, curio shops, restaurants, motels, and other facilities that were situated along the highway to service travelers.

This bill would direct the National Park Service to study the significance of Route 66, its history, and its place in American culture, and report on ways to preserve what remains of the highway and the facilities associated with it. The study would examine preservation not only by the Government, but by private sector as well. Each of the eight States along Route 66 would have a representative on the study group.

Mr. President, I am pleased to be joined in this effort by my distinguished colleagues, Senators DECONCINI, BINGAMAN, BOND, BOREN, CRANSTON, DIXON, and SIMON. I hope that this legislation will have the enthusiastic support of all Members of the Senate.

I ask unanimous consent that an article from the February issue of New Mexico magazine entitled, "Getting Your Kicks on Route 66: Cruising Down America's Mother Road" and the text of the bill be inserted in the RECORD immediately following my remarks.●

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 963

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Route 66 Study Act of 1989."

SEC. 2. FINDINGS.

The Congress finds that—

(1) United States Route 66, that great 2,000-mile highway from Chicago, Illinois to Santa Monica, California, played a major role in the Twentieth-Century history of our Nation;

(2) Route 66, a product of a grassroots effort for better American roads and a prime example of the 1926 National Highway System Program, served a similar historical function as many earlier "travel and commerce corridors," such as the Santa Fe Trail;

(3) Route 66 has become a symbol of the American people's heritage of travel and their legacy of seeking a better life;

(4) Route 66 served as a funnel for the Twentieth-Century westward migration from the Dust Bowl of the central States;

(5) Route 66 has been memorialized in books, songs, motion pictures, and television programs, and has become a cherished part of American popular culture;

(6) although the remnants of Route 66 are fast disappearing, many structures, features, and artifacts of Route 66 remain, including several segments of the highway that offer excellent insight into the experience of so many who traveled the highway; and

(7) in light of the growing interest by organized groups and State governments in the preservation of features associated with Route 66, the route's history, and its role in American popular culture, a comprehensive evaluation of preservation and tourism options should be undertaken.

SEC. 3. STUDY AND REPORT BY THE NATIONAL PARK SERVICE.

(a) STUDY.—The Secretary of the Interior, acting through the Director of the National Park Service, shall undertake a comprehensive study of United States Route 66. Such study shall include an evaluation of the significance of Route 66, options for preservation and use of remaining segments of Route 66, and options for preservation of features associated with the highway. Private sector initiatives are to be fully evaluated. The study shall include participation by representatives from each of the States traversed by Route 66 and representatives of associations interested in the preservation of Route 66 and its features.

(b) REPORT.—Not later than 2 years from the date that funds are made available for the study referred to in subsection (a), the Secretary shall submit a report of such study to the Committee on Energy and Natural Resources of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

[From New Mexico Magazine, February 1989]

ROUTE 66: CRUSING DOWN AMERICA'S MOTHER ROAD

(By Michael Wallis)

Warm afternoon breezes, also like the breath of spring, turn chilly as evening shadows appear and ribbons of neon outlining roadside motels and cafes flash awake. It's the close of a February day in Tucumcari, the first New Mexican town of any size people encounter after leaving the Texas Panhandle.

At the Blue Swallow Motel, perched on the edge of what once was Route 66, Lillian Redman stops fooling with her paperwork and takes time to step outside and look at the heavens. She's not disappointed. The sun's a blazing valentine and stains the western sky like spilled *salsa*. It's a sight that deserves a standing ovation. Only Lillian and some of the tourists and truckers still out on the nearby interstate watch the last of the fiery sun melt on the horizon and spy the first evening star when it blinks to life.

The travelers aren't about to pull over and lose time clapping for a natural act that's taken for granted. Same is true in Tucumcari, where most everyone's too busy with supper to worry about witnessing twilight.

But Lillian pauses. With a single glance she watches the sky give way to evening shade. It makes her day. Then she goes back inside to pull on a sweater and finish her work. The last couple of hours have been busy for Lillian and she's thankful that many of the 14 rooms at her motel are booked. There's an array of trucks, sedans and station wagons parked in front of several units. Tonight, the Blue Swallow will be home for people from big cities and villages from all across the land.

At a time when much of the nation has become generic, the Blue Swallow Motel is a breath of fresh air. It's the genuine article—a monument to the hundreds of motor courts, motels, greasy spoons, filling stations and curio shops that disappeared when the interstate system came along and cut off whole towns, leaving them behind like so many discarded memories.

But this evening there still are rooms to rent at the Blue Swallow and Lillian watches to see if her neon will do the trick and lure somebody else off the interstate and bring them back to the old road. Each night when Lillian Redman switches on the neon blue swallows at her place, the soul of the highway comes alive and sings.

Route 66.

Just the name is magic. It started at the corner of Jackson Boulevard and Michigan Avenue in Chicago, stretched across some 2,200 miles and three time zones and wound through eight states before it dead-ended at the intersection of Ocean Avenue and Santa Monica Boulevard in Los Angeles. People like to say it started in Lake Michigan and ended in the roaring Pacific.

The highway, which spanned two-thirds of the continent, was first designated as the U.S. Route 66 in 1926 when the nation was between wars and on the wagon.

John Steinbeck christened it the Mother Road. Others called it the Glory Road. For

thousands of 1930s migrants, including the Joad family, it was the way west—a road of flight from misery, dust and broken dreams.

Everyone, at one time or another, has traveled at least a portion of its length. Route 66 is Steinbeck and Will Rogers and Woody Guthrie and Merle Haggard and Phillips 66. It's a road of phantoms and dreams. It's the romance of traveling the open highway.

It's the free road.

It was the road that put Americans in touch with Americans—neon lights, Burma Shave signs, motor courts, diners and cafes with big-boned waitresses who served up juicy burgers and plate lunches and homemade pie and had the coffee pot welded to their fist.

An asphalt thread looping together a giant patchwork of Americana, this fabled road represented much more than an American highway. Route 66 meant "going somewhere." Few American highways provoke such a positive response. Even today, when people think of Route 66, they picture a road to adventure.

Although it still stands for the romance of traveling the open highway, in recent years—thanks to the huge interstates—Route 66 has become a memory. A ghost road.

The demise of Route 66 came slowly. As segments of new interstate were completed, the federal designation was stripped from 66, mile by mile, and shifted to the new highway.

Auctions were held to dispose of the old 66 shields. Maps began showing only fragments of the route, or else ignored it altogether. Finally the last bits of highway to wear the proud 66 shield were eliminated from the interstate system.

But there is no killing the spirit of the Mother Road.

Route 66 is reborn every time someone reads the Grapes of Wrath or sees the movie or catches a television rerun of "Route 66" or hears the Bobby Troup song that was an anthem of the road.

It lives in the minds and memories of countless nostalgia buffs, historians and Route 66 diehards. From Illinois to California there is an astonishing Route 66 revival that is growing larger and gaining momentum.

But nowhere was Route 66 more at home than in New Mexico. Today travelers still can find remnants of the old highway and those who made the road America's Main Street. From the ranching and farming communities of Glenrio, Endee and San Jon in the far eastern part of the state to tiny settlements such as Allison, Mentmore and Manuelito in far western New Mexico and in the many towns and cities in between, the spirit of Route 66 is alive and well.

Head westward on I-40, look hard and Route 66 becomes apparent. It's there—off in the ranchlands, hidden by the sagebrush or still serving as the main drag in several towns. Stop in Tucumcari and drive the old road where more than 50 motels once did a booming trade serving travelers attracted by the famous signs that promised "Tucumcari Tonite! 2,000 Motel Rooms."

An eastern New Mexican oasis, Tucumcari has used other aliases through the years. Back in the 1880s life was truly fierce, raw and wideopen, and the settlement was known as Liberty. After the turn of the century, when the railroad was built, citizens called the construction camp Six-Shooter Siding. But by 1902 the name Tucumcari, after the nearby mountain, was accepted. It's never changed.

Some credit the name to a folktale tied to Gerónimo about a pair of starcrossed Apache lovers named Tocom and Kari. But the Tucumcari area was Comanche territory, not Apache country. Fact is, the old Comanche warriors used the peak for smoke signals across the valley to the plains. The mountain was an ideal lookout for war parties. Linguistic experts explain that the name in Comanche is tukamukaru, which means "to lie in wait for someone or something to approach."

That makes sense. Folks in Tucumcari have been lying in wait for a long time, ready to serve up a hamburger or bowl of posole or peddle some postcards or pump a tank of gas or rent a motel room. Lillian Redman knows about waiting. Every day for more than three decades she's staged a daily vigil, waiting for guests from points east and west to arrive at the old Route 66 relic she calls the Blue Swallow.

"This is a friendship place," says Lillian. "People stop here to take a break. They've been doing that for years. It might be some guy thumbing his way cross country or somebody driving a Cadillac. It could be a homeless family or a couple of kids that just got married. It doesn't matter. I end up traveling the highway in my heart with whoever stops here for the night."

A few years back, the venerable Smithsonian magazine declared that "the Blue Swallow may be the last, best and friendliest of the old-time motels." There are few who could argue otherwise.

Born in Texas in 1909, Lillian came to New Mexico in 1915 in a covered wagon when her father homesteaded near Santa Rosa. After she completed school, Lillian put in yeoman's service working for years as a waitress and cook at Fred Harvey Houses throughout the Southwest. She finally settled in Tucumcari, where she met and married Floyd Redman, a man who ran a trailer park and pawnshop on Route 66 for many years. In 1958, Floyd presented Lillian with an engagement present—the Blue Swallow. Built in the 1940s, it was the best present she ever received.

Floyd's dead and so are her parents and a few years back she had to get a new right eye, but Lillian's hanging on to the Blue Swallow. Rooms rent for $10 to $25 a night, there's a well-worn Bible on the check-in counter and over each garage flickers a neon blue bird.

"We've had all kinds of people stay here," says Lillian, her blue eyes as warm as they were when she was a Harvey Girl. "Once we had a 'streaker' and he stayed a week. At sundown he liked to take off his clothes and run around the block. A lot of repeat customers stop, too. One couple honeymooned here in 1965 and every year on their anniversary they come back and get the very same room."

No matter who checks in, Lillian treats them all alike and hands every guest a card that says: "Greetings traveler—may this room and motel be your second home. May those who you love be near you in thoughts and dreams. Even though we may not get to know you, we hope that you will be as comfortable and happy as if you were in your own house. . . ."

And when the sun rises and it's time to get back on the road, there are no wake-up calls. Instead, Lillian gently knocks on every door and says, "Good morning."

With folks like Lillian Redman living here, it's little wonder that Tucumcari continues to prosper despite the loss of Route 66.

"Route 66 had a definite feel to it," Lillian says. "It made you feel warm all over. When it closed, I felt just like I lost an old friend."

There are plenty of other Route 66 guardians like Lillian Redman scattered up and down the highway.

One of them is Ron Chavez, owner of the Club Cafe, a Route 66 institution since 1935, located on the old road in the center of Santa Rosa. Even though I-40 bypasses the city, several of the famous Club Cafe billboards, depicting a grinning fat man, remain on the interstate beckoning all comers to get off at Santa Rosa and try some of the cafe's "honest-to-goodness, authentic sourdough biscuits, hamburgers made with 100% ground beef, homemade chile and chicken-fried steaks made with tender, fresh meat and served with old-fashioned, iron-skillet gravy."

Chavez was born in Puerto de Luna, only 10 miles south of Santa Rosa on the Pecos, just a year after the Club Cafe was founded by Newt Epps. In 1939, Phillip and Ruby Craig bought the club and served hot meals to bone-weary turistas and truckers until 1973 when Chavez, who shined shoes as a boy in front of the restaurant and later learned how to cook there, bought the place. For Chavez, owning and operating the Club Cafe is a dream come true.

"Everybody's who's ever traveled in this part of the country has seen the fat man signs," says Chavez, who explains the image actually is a caricature of Phil Craig, the former owner who taught Chavez how to cook and bake biscuits. "Phil wanted to create an image of someone who appreciated good food and had a satisfied look on his face. People still come in here and ask to see the fat man."

Don't expect to find quiche or blackened red fish on the club's ample menu. Chavez serves only "real food"—piping hot and fresh off the griddle, just like in the boom years of Route 66.

"They've ruined food today," Chavez says. "Fast food has done it. The food comes out of a cookie cutter. But not here. In the Route 66 days there was nothing frozen and microwaved. I have customers who stopped here to eat when they were kids. They're amazed to see that nothing's changed. Sometimes they even get emotional."

Up and down the ghost road are many people who get emotional when it comes to remembering the heyday of the highway. One of them is Bob Audette, a retired steeplejack and iron worker who lives by old Route 66 in the small mountain town of Barton, just east of Albuquerque.

Audette is fearful that some stretches of the highway have been forgotten and he is leading a battle to purchase Historic Route 66 signs to post along the road. His Save Route 66 Association is raising funds for highway signs to help the many tourists Audette claims can't find any traces of 66 along the 120-mile stretch between Albuquerque and Santa Rosa. Audette says motorists often stop at his roadside home to ask directions to the old highway.

"We hope to eventually get all of Route 66 in the state marked," says Audette. "This is history we're talking about. Route 66 is a ribbon of history across the country and with lots of memories. That's what this sign business is all about."

Audette was raised in Albuquerque not far from the University of New Mexico campus on Central Avenue, at one time one of the busiest sections of Route 66 in the country.

Central Avenue is still as busy as it was when it proudly bore the 66 moniker. Many

of the old landmarks—including the Alvarado Hotel, one of the last Mission Revival-style Harvey Houses—have vanished. But there are reminders of the old days and even new attractions that memorialize the highway.

One of the new Central Avenue gems that harkens back to the good old days is named the 66 Diner. This popular beanery opened less than 2 years ago in an old Phillips 66 station that dates back to the '40s. The walls are covered with Route 66 photographs and the juke box plays "I Fall to Pieces," "Jail House Rock," "La Bamba," "Mr. Sandman" and other vintage tunes. At lunchtime every booth, counter seat and table is jammed with downtown office workers, students and, of course, tourists eager to gobble meat loaf or chicken-fried steak and wash it all down with milk shakes, malts, cheery Cokes or icy beers.

"We get a lot of out-of-town people who come by and tell us they remember driving through Albuquerque on old 66 when they were kids," says Peggy McCafferty, the diner's former general manager. "We think this concept is a winner. Where else can a customer be seated by someone wearing a bowling shirt, enjoy a green chile cheeseburger and boogie with a waitress in a poodle skirt."

One of the regulars at 66 Diner is Marianne Dickinson, a New Yorker who fled to New Mexico in 1981 to continue her successful journalism career. Dickinson edits Route 66 Magazine, an arts and entertainment publication, due to go weekly this year, which she explains is dedicated to discussing the issues, trends and lifestyles that harken back to the time when Route 66 was going strong.

"It's actually a metaphorical name," Dickinson says. "We're interested in the arts and architecture of the area that was part of 66 and we're part of the movement to revitalize this area. Route 66 gave people romance. It was a highway they came west on to build new lives and find new opportunities. It meant adventure, and I think much of that is still alive. People are still coming here looking for the golden West—the wild and free West. Remember, the romance of the automobile still holds sway here."

Another Albuquerque editor and writer, Jack Rittenhouse, retired from the University of New Mexico Press, knows full well about the romance of Route 66. In 1946, Rittenhouse published A Guide Book to Highway 66, a mile-by-mile travel guide for the highway.

"When I wrote the book," Rittenhouse says, "I anticipated that after World War II there'd be a second big wave going west over 66. The first big one was probably the 'Grapes of Wrath' people." The booklet sold for one buck. Today, Rittenhouse gets $50 for one of the handful still in stock. UNM Press will reissue the guide this spring.

In his book, Rittenhouse provided a list of tips for travelers, such as "Check your equipment. Be sure you have your auto jack. One of those surplus foxhole shovels may come in very handy." Another tip says, "Anytime you see several huge trucks parked outside a roadside cafe, you can usually be assured of excellent coffee. For these men who make long drives know where to stop."

One Albuquerque motor court that provided refuge for many of Rittenhouse's guidebook readers is El Vado Motel on west Central Avenue, near the Old Town Plaza. El Vado, with its white adobe walls and electric Indian sign, is much the same as it was in 1937 when it was built by Dan Murphy, an Irishman who had previously worked as a bellboy at the Waldorf-Astoria and managed Albuquerque's old Franciscan Hotel. Some say El Vado is the purest Route 66 motel surviving Albuquerque.

El Vado is managed these days by Ali Hakam, an affable young man who was born in India, lived in Pakistan and Sweden, studied urban planning and speaks five languages. Hakam, his wife, Salma, and their three children have called El Vado home since their family moved there in 1985.

"People enjoy staying here because it's like stepping back in time," Hakam says. "It's a very special place. Most of our customers are regulars. I know many of their names. They say it's just like coming home."

Veteran road warriors say the same thing when they arrive in Gallup and pull up at El Rancho, the fabled Route 66 hotel officially reopened only last July after being restored to its original luster by owner Armand Ortega, a well-known Indian trader. After a day spent driving through the natural beauty of western New Mexico, this classic hotel is a worthwhile stop if only to gawk at the photos of the celebrity guests covering the hallways.

First opened in 1937, El Rancho was built by the brother of Movie magnate D. W. Griffith and from the beginning was a gathering place for the stars. Attracted by the many films made in the region, El Rancho's guest register logged such greats as Spencer Tracy, Katharine Hepburn, Kirk Douglas, Alan Ladd, Humphrey Bogart and Jack Benny.

"She's a glitzy lady," Ortega says of his hotel. "This was the home for movie stars and cross-country travelers. It brings back a taste of another time."

What Ortega calls the "taste of another time" is the same story all across New Mexico. From east to west, whether in Cuervo or Tijeras, Laguna, Thoreau or Grants, there are those who can recall with pride when Route 66 was the main transcontinental highway. There are those who know the old highway not just as a ghost but as the open road.

And, if they're in the right mood, most of them will say they have sweet memories of those days when there seemed to be more time. Those days when time was kind of holy.

When there was time to stop for a home-cooked meal, time to play a round or two of miniature golf, time to stretch out in a room cooled with refrigerated air, time to scribble postcards. And, time to pause—just for a minute—to step outside and watch the sunset.

That's what Route 66 was all about. It still is.

By Mr. FORD (by request):

S. 964. A bill to authorize appropriations to the Department of the Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991, and for other purposes; to the Committee on Energy and Natural Resources.

CIVILIAN ENERGY PROGRAMS AUTHORIZATION FISCAL YEARS 1990 AND 1991

● Mr. FORD. Mr. President, today I am introducing, by request, legislation to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and 1991. This bill was transmitted to Congress by the Department of Energy on April 17, 1989.

The cover letter accompanying the bill indicates that certain provisions of the bill may need to be revised to reflect the results of negotiations with Congress on the budget. Certainly provisions need revision. I do not support the bill as introduced. For example, the proposed spending on fossil energy research and development is too small by half. Proposed spending on the superconducting super collider is too high. I could cite a number of other disagreements with the bill.

However, the Secretary of Energy's bill deserves to be introduced so his proposals are on the table and subject to debate. I want to work with Secretary Watkins on the problems I have with this bill. I think I will be able to work with Secretary Watkins.

This bill contains provisions authorizing research, development, and demonstration [RD&D] programs of the Department of Energy as well as other programs, such as those of the Energy Information Administration, that do not involve RD&D. I intend to hold hearings on the RD&D proposals of the Department in my Subcommittee on Research and Development of the Committee on Energy and Natural Resources. I urge my fellow subcommittee chairmen on the Committee to hold hearings on the portions of this bill that fall within their subcommittee jurisdictions. We may find this bill a useful vehicle to express our energy policy concerns to the administration.

I ask unanimous consent that the texts of the April 17 transmittal letter and the bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 964

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Civilian Energy Programs Authorization for Fiscal Years 1990 and 1991."

TITLE I—RESEARCH AND DEVELOPMENT

SEC. 101. Funds are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act for fiscal year 1990 for civilian research and development programs of the Department of Energy for the following accounts:

(1) General Science and Research Activities, $1,169,431,000, of this amount $250,000,000 for the Federal share of the Superconducting Super Collider project;

(2) Energy Supply Research and Development, $1,901,199,000 for all programs in this account other than programs authorized to be appropriated under section 401 (3) of this Act;

(3) Geothermal Resources Development Fund, $75,000;

(4) Fossil Energy Research and Development, $163,574,000;

(5) Energy Conservation, $80,158,000 for all programs in this account other than pro-

grams authorized to be appropriated under sections 201(1) and 401(4) of this Act;

(6) Strategic Petroleum Reserve, $194,999,000; and

(7) Strategic Petroleum Reserve Petroleum Account, $126,962,000.

TITLE II—CONSERVATION, REGULATION, AND INFORMATION

SEC. 201. Funds are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act for fiscal year 1990 for the following appropriations accounts:

(1) Energy Conservation, $2,800,000 for appliance standards and the Federal Energy Management Program:

(2) Economic Regulation, $20,346,000;

(3) Emergency Preparedness, $6,641,000;

(4) Federal Energy Regulatory Commission, $116,550,000 of which are not more than $116,550,000 may be derived from collections of licensing fees, inspection services, and other services which may be retained and used for necessary expenses in this account.

(5) Energy Information Administration, $65,232,000.

TITLE III—POWER MARKETING ADMINISTRATIONS

SEC. 301. Funds are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act of fiscal year 1990 for the following appropriations accounts;

(1) Alaska Power Administration, Operations and Maintenance, $3,145,000;

(2) Southeastern Power Administration, Operation and Maintenance, $42,369,000;

(3) Southwestern Power Administration, Operation and Maintenance, $25,172,000; and

(4) Western Area Power Administration, Operation and Maintenance, $314,797,000.

TITLE IV—OTHER ACTIVITIES

SEC. 401. Funds are authorized to be appropriated in accordance with section 660 of the Department of Energy Organization Act for fiscal year 1990 for the following appropriations accounts;

(1) Uranium Supply and Enrichment Activities, $1,445,000,000;

(2) Departmental Administration, $179,923,000 together with $228,715,000 to be derived from miscellaneous revenues and receipts as necessary to provide a level of $408,638,000;

(3) Energy Supply Research and Development, $261,077,000 for the following programs in that account: international solar energy program; solar technology transfer; remedial actions and waste technology; and in-house energy management;

(4) Energy Conservation, $12,570,000 for the following programs in that account: state and local assistance programs; building and community systems; technology assessment and transfer; industrial energy conservation; implementation and deployment; multi-sector; National Appropriate Technology and Assistance Service; and policy and management;

(5) Isotope Production and Distribution Fund, $16,243,000;

(6) Office of the Inspector General, $22,959,000, and

(7) Nuclear Waste Fund, $500,000,000.

TITLE V—FISCAL YEAR 1991 AUTHORIZATION

SEC. 501. There are authorized to be appropriated to the Department of Energy such sums as may be necessary for fiscal year 1991 to carry out civilian programs.

DEPARTMENT OF ENERGY,
Washington, DC, April 17, 1989.

Hon. DAN QUAYLE,
President of the Senate, Washington, DC.

DEAR MR. SPEAKER: Enclosed is proposed legislation "[t]o authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1990 and fiscal year 1991, and for other purposes." The bill would authorize fiscal year 1990 (FY 90) appropriations to the Department of Energy totaling $6,899,937,000.

Section 101 would authorize FY 90 appropriations totaling $3,636,398,000 for all civilian research and development programs. $250,000,000 of that amount would be provided for the Federal share of construction of the Superconducting Super Collider (SSC). The SSC will provide the capability for the U.S. to remain the world's leader in the field of high energy physics.

President Bush has accelerated the Clean Coal Technology Program to its original schedule, requesting advance appropriations of $600,000,000 for both fiscal year 1991 and 1992 in order to meet our original commitment of $2,500,000,000 in Federal funding over 5 years. New funding authorization is not necessary in this bill, however, because an advance appropriation in the Department of the Interior and Related Agencies Appropriations Act, Fiscal Year 1989 (Pub. L. 100-446) already has provided full FY 90 funding for the program.

Section 201 would authorize FY 90 appropriations of $211,569,000 for certain programs within the Energy Conservation account, emergency preparedness, economic regulation, the Federal Energy Regulatory Commission, and the Energy Information Administration.

Section 301 would authorize FY 90 appropriations totaling $385,483,000 for the power marketing administrations.

Section 401 would authorize FY 90 appropriations totaling $2,666,487,000 for uranium supply and enrichment activities, departmental administration, the Isotope Production and Distribution Fund, and certain programs with the Energy Supply Research and Development account and the Energy Conservation account.

Section 501 would authorize such sums as may be necessary for FY 91.

This proposal's appropriation authorization for the SSC is needed to carry out the President's FY 90 Budget plan as was highlighted in the President's Building a Better America document as transmitted to Congress on February 9th. Its enactment would be in accord with the program of the President.

The remaining provisions of this proposal are included in the residual freeze category of the President's budget plan. Final decisions concerning programs in this category are still to be determined through negotiations between the Administration and Congress. Accordingly, these provisions, which as drafted reflect President Reagan's FY 90 Budget, may need to be revised to reflect the results of such negotiations.

The Office of Management and Budget advises that there is no objection to the submission of this proposal to Congress. The enactment of this proposal, subject to the qualifications stated above, would be in accord with the program of the President.

Sincerely,

ERIC J. FYGI,
Acting General Counsel.●

By Mr. KERRY:

S. 966. A bill to carry out long-term research on the effects of oilspills on the marine and estuarine habitats and resources of Prince William Sound, and for other purposes; to the Committee on Energy and Natural Resources.

S. 967. A bill to amend the Coastal Zone Management Act of 1972 to designate the Secretary of Commerce as the lead trustee for ocean and coastal resources, and for other purposes; to the Committee on Commerce, Science, and Transportation.

OILSPILL LEGISLATION

Mr. KERRY. Mr. President, I rise today to introduce two pieces of legislation. The first relates to general oil and toxic spills in our marine resources, and the second specifically addresses some of the problems that we have learned in the wake of the disastrous oilspill in Prince William Sound in Alaska.

The first will authorize NOAA to carry out a 10-year comprehensive monitoring and research program to determine the long-term effects of the oil discharged by the *Exxon Valdez* spill on the diverse marine and estuarine habitats as well as the resources of Prince William Sound.

Mr. President, a lot of oil has been spilled in Prince William Sound which will have some very long-term effects on the environment. I have to admit that I regard the cleanup attempt to be completed in the next few months with a great deal of skepticism. On April 13, the cleanup effort had recovered 20,000 barrels, since then we have managed to recover only 31,000 more. Frankly much more has simply evaporated—84,000 barrels—than been recovered. What this tells me, is that nature is winning out. This feeble attempt by man to help nature after we have despoiled it has been a travesty and an embarrassment.

Furthermore, to date less than 3 miles of beach has been cleaned, with roughly 400 miles of beach to supposedly be finished by a September 15 deadline. With 3 miles in 40 days can we believe Exxon's prediction of 400 miles cleaned in 128 days? Mr. President, I think we will have a seriously oiled shoreline for quite some time and much to learn about the effect this oil will have on the precious natural resources.

The arctic and subarctic marine and estuarine ecosystems of the United States are a unique and important part of our national heritage. The immediate vulnerability of the ecosystems to damage and degradation caused from discharges of oil has been most clearly demonstrated in Prince William Sound. What we do not know however, are the long-term effects. Scientists tell us that to fully understand the impact not only of this oilspill, but other spills that could occur

in icy waters in the North Atlantic or North Pacific, that we must spend at least 10 years studying the effects of the *Valdez* spill on the natural resources.

The legislation amends the Trans-Alaska Pipeline Authorization Act to authorize an appropriation of $2 million for each fiscal year through 1999, to the Secretary of Commerce, so that NOAA can carry out the study.

The results of such a study would be applied to the development of methods of protecting arctic and subarctic marine and estuarine habitats and resources such as fish, wildlife and the resource itself, from discharges of oil. This will include minimizing the effects of oil discharges on such habitats through new dispersants and other technologies. The bill also requires a 5-year interim report.

Furthermore, the legislation will postpone until the interim report is completed, any opening of oil and gas development in the small sensitive area of the Arctic National Wildlife Refuge [ANWR] known to many as the 1002 area. ANWR is 19 million acres of wilderness area in the northeast corner of Alaska. The 1002 area consists of a small 1.5 million acre tract. In 1980 Congress withheld the 1002 area from being designated as wilderness pending a report by the Interior Department on ANWR's wilderness qualities and an energy potential. In 1987 former Secretary Hodel released his study and recommended that the entire 1002 area be opened to full-scale oil and gas development.

Despite the question of how much oil can be found in the area, former Secretary Hodel's recommendation ignores the potential and detrimental effects that drilling for oil can have on wildlife and the environment. Furthermore until NOAA completes at least 5 years of its study on the effects of the *Valdez* oilspill in the arctic area, and until I have full assurances from the Secretary of Transportation that oil can safely be shipped through the Port of Valdez, I do not think that opening up a new pipeline which feeds into the Port of Valdez should be permitted. My legislation requires the Secretary of Transportation to provide assurances that significant improvements have been made in the navigation safety of oil tankers in Prince William Sound.

Finally the second piece of legislation that I am proposing deals with damage assessments to the natural resources when there is an oil or toxic spill in a marine environment. The legislation establishes a mechanism to recover funds and to restore damaged resources.

It amends the Coastal Zone Management Act in order to clarify existing Federal trusteeship authority over the natural resources in the ocean and coastal resource trusteeship zone. This legislation establishes a system that places the Department of Commerce as the lead trustee for incidents occurring in this zone. The lead trustee would coordinate the cleanup effort among all Federal and State trustees, direct the damage assessment, ensure that damage assessments made by the trustees are compatible and not duplicative, resolve disputes among the trustees, manage reimbursement costs, enlist the support of experts, and provide legal support to the Department of Justice during negotiations or court actions on trustee's claims.

The legislation addresses the need for up front funding for damage assessment costs. Currently none exists. Trustees must fund damage assessments out of their operating budget and then seek reimbursement from responsible parties. For example, over 2 years ago in New Bedford, MA, NOAA spent roughly $500,000 on a damage assessment of PCB's dumped into New Bedford Harbor by the Aerovox Co. Although a lower court has awarded over $2 million to go for resource recovery, the issue has been appealed. Consequently, NOAA is out $500,000 during tight budgetary times. In addition the agency wants to pursue damage assessments off of Long Beach, CA, and Hawaii, yet no funding is available.

The legislation will establish a revolving loan fund in the U.S. Treasury of $10 million for funding damage assessments. It requires that once money goes into the fund, that the initial startup money will slowly be drawn back into the general fund. The account in the Treasury in which specific funds are recovered, can also be used by trustees for restoring, replacing, or aquiring the equivalent of damaged resources.

Mr. President, much has been learned from the disaster in Prince William Sound and there is still much more to understand. Several congressional hearings have taken place regarding the oilspill and I know there will be more to come. In the past 6 weeks a lot of blame has been tossed around, but now is the time to put that behind us and get on to what needs to be done, restoration of the Alaskan coast, develop policies that avert this type of spill from ever occurring again, and learn what long-term effects the spill will have on our precious natural resource.

By Mr. REID:

S.J. Res. 125. Joint resolution relating to responsible trade and conservation of tropical forest resources; to the Committee on Foreign Relations.

CONSERVATION OF RAIN FOREST RESOURCES

Mr. REID. Mr. President, 3 months ago I said we could not wait any longer for actions to conserve the world's tropical rain forests.

I suggested that if countries with large rain forests such as Brazil did not act, then perhaps we should send them a message by enacting restrictive measures.

Many others in both the public and private sectors echoed my sentiments and advocated increased pressure on Brazil.

The Brazilian reaction was decidedly antagonistic. They did not welcome the world's involvement in what they characterized as a domestic concern and a matter of national sovereignty.

They said we were trying to internationalize their rain forests. We were not. We were trying to help prevent destruction of the rain forests—a matter of great concern to the world.

President Jose Sarney acknowledged the conservation problem in a statement to the Brazilian people earlier this year.

He said, "We must create nationwide consciousness that we are all passengers in the adventure of man on Earth. The era of unlimited resources is over."

We are witnessing the slow but sure depletion of one of our most precious resources—the tropical rain forests.

These forests are of enormous importance to the world, as explained in the joint resolution that I intend to introduce today We cannot let political disagreements and misunderstandings obstruct our overriding joint goal of rain-forest conservation and cooperative partnerships with tropical rainforest nations.

I believe we as a nation can reverse present animosities and evoke positive action if we clearly explain our position. And so, today, I offer a joint resolution outlining a U.S. policy for conservation and sustainable use of the rain forests.

The proposed policy is one of support and cooperation. It is based on the need for all interested organizations, individuals, and countries to work together toward a common goal. The policy embodies the key concept of sustainable use, meaning that rain forests do not have to be destroyed in order to provide people with means to make a living.

The rain forests offer many rich resources that can be extracted without clearing millions of acres of trees. My joint resolution calls for improved cooperation and a spirit of partnership between the United States and Brazil, as well as with other tropical rainforest countries.

Partnerships in forest conservation and sustainable economic growth are strongly advocated. President Sarney has said that Brazil would welcome this kind of foreign cooperation. This past month, the Brazilian Government announced the initiation of a program called "Our Nature" which includes a

series of rain-forest protection measures.

The program is augmented by the National Fund for the Environment, which may provide financial support for conservation groups. These recent actions indicate a willingness on Brazil's part to preserve what some call the "lungs of the Earth."

My resolution will be introduced in the House of Representatives by Congresswoman CLAUDINE SCHNEIDER. It outlines a constructive, viable policy. The approach is advocated by Brazilian Congressman Fabio Feldman, who considered the reactions of his colleagues to this joint resolution.

The joint resolution also places blame on the United States for not fully supporting sustainable use of the rain forests and not providing environmentally sound assistance. A policy is set forth in this resolution that would encourage the United States to import products derived from sustainable use practices.

This policy is in keeping with the methods pioneered by Chico Mendes, the Brazilian union organizer murdered last December. Following his death, I joined many of my congressional colleagues for a memorial service here at the Capitol. We honored a man who advocated beneficial use of the many resources of the rain forests without destroying them.

I think our sentiments and sorrows expressed that day are represented in this joint resolution to ensure we help carry on the conservation policy pioneered by Mr. Mendes and promoted by the Brazilian Government in their new initiative.

My resolution also calls for accountability. It states that, 1 year after passage, the President of the United States shall submit to the Congress a report describing the progress the United States has made in honoring the spirit of the joint resolution. We heard from top scientists this week about the increasing severity of the greenhouse effect. And, Mr. President, I might add, we heard both the abridged and unabridged versions of their testimony. My joint resolution would help conserve the rain forests, whose destruction greatly contributes to the global warming trend.

We chided Brazil for all talk and no action. This joint resolution helps guarantee the United States will not garner the same criticism. If we do not take positive and cooperative action soon, there will be nothing left to talk about. There will be no more rain forests.

I encourage my colleagues to help me initiate action by cosponsoring this resolution.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 125

Whereas tropical forests are the world's storehouse of biological diversity, containing more than one half of the plant and animal species on earth and millions have yet to be identified;

Whereas these tropical forests are a major absorber of atmospheric carbon dioxide and help prevent serious buildup on the atmosphere;

Whereas more than one half of the world's medicines were derived from wild plants and animals and future medicine, industry, and agriculture will depend on wild genetic resources;

Whereas approximately one-third of the world's tropical forests have already been lost and over 25-30 million acres are being cleared each year, most without reforestation, and this threatens the futures of all nations;

Whereas some United States assistance to tropical forest nations have encouraged nonsustainable forest development, environmental impact analyses are not required for all of this assistance, and existing environmental requirements are not always complied with;

Whereas the United States has imported tropical forest products derived from nonsustainable utilization of these forests;

Whereas successful foreign policy to help developing nations establish effective conservation programs and support democracy must include exchange of technology and managerial expertise;

Whereas Brazil and other sovereign nations with tropical forests are developing effective conservation programs, and the United States wishes to work together with them in these efforts;

Whereas practicable technology and management strategies are greatly needed to manage sustainable uses of tropical forests, and the United States desires to help develop these technologies; and

Whereas nongovernmental organizations in concerned nations are playing an increasingly important role in tropical forest conservation and conservation of biological diversity: Now, therefore, be it

Revolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the policy of the United States—

(1) to encourage import of products derived from sustainable uses of tropical rain forests.

(2) to work together as a partner with nations owning tropical forests to help conserve these forests and help ensure utilization of these forests is sustainable;

(3) to furnish United States assistance programs, including multi-lateral banks, for the maintenance of tropical forests and sustainable uses of these forests, complemented by professional environmental analyses;

(4) to support the strengthening of intercongressional links between the United States and Brazil, and between the United States and other nations owning tropical forests, to explore jointly partnerships in forests conservation and sustainable economic growth;

(5) to encourage nongovernmental organizations to work with governments to help design, implement, and assess sustainable forest management policies and programs for conservation of tropical forests and biological diversity;

(6) to establish a bilateral agreement between the United States and Brazil and between the United States and other interested nations to share technology, experience, training, and research in tropical forest conservation, through direct personal contacts with congressional, scientific, educational, and management personnel;

(7) to encourage and directly support development of model projects demonstrating sustainable use and conservation of tropical forests;

(8) to support increased research and training by the United States in tropical forest ecology and management; and

(9) to place extremely high priority on the conservation of the world's tropical forests and the biological values and opportunities found in these forests.

SEC. 2. REPORT.

Not later than one year after the date of enactment of this joint resolution, the President shall submit to the Congress a report describing progress made toward the purposes in section 1.

By Mr. PELL (for himself, Mr. MITCHELL, Mr. HOLLINGS, Mr. DOLE, Mr. CHAFEE, Mr. NUNN, Mr. MATSUNAGA, Mr. DIXON, Mr. CONRAD, Mr. PRYOR, Mr. SARBANES, Mr. RIEGLE, Mr. HATCH, Mr. COHEN, Mr. THURMOND, Mr. DODD, Mr. BOREN, Mr. COCHRAN, Mr. HUMPHREY, Mr. D'AMATO, Mr. KERRY, Mr. GORE, Mr. LIEBERMAN, Mr. REID, Mr. LUGAR, Mr. KASTEN, Mr. GRAHAM, Mr. GORTON, Mr. LAUTENBERG, Mr. BURDICK, Mr. EXON, Mr. ROBB, Mr. LEVIN, Mr. PACKWOOD, Mr. JEFFORDS, Mr. BOSCHWITZ, Mr. WILSON, Mr. BRADLEY, Ms. MIKULSKI, Mr. MURKOWSKI, Mr. STEVENS, Mr. WARNER, Mr. INOUYE, Mr. CRANSTON, Mr. MACK, and Mr. BREAUX):

S.J. Res. 126. Joint resolution commemorating the bicentennial of the U.S. Coast Guard; to the Committee on the Judiciary.

BICENTENNIAL OF THE U.S. COAST GUARD

Mr. PELL. Mr. President, as a retired captain in the U.S. Coast Guard Reserve, I am especially pleased today to introduce a joint resolution in the Senate honoring the 200th anniversary of the founding of the U.S. Coast Guard.

I am also most pleased that 45 of my colleagues in the Senate have joined as original cosponsors of this important commemoration of the Coast Guard.

The U.S. Coast Guard was established by George Washington and Alexander Hamilton in 1790, as the Revenue-Marine Cutter Service to help defray some of the costs of the Revolutionary War debt through the interdiction of violators of U.S. custom laws.

Since that date, the Coast Guard has evolved from a service of 10 revenue cutters mainly concerned with maritime smuggling, to a service of

more than 43,000 individuals assisted by approximately 2,190 vessels. As we are all very much aware these days, the Coast Guard's critical missions now include search and rescue operations, the monitoring and supervision of oil spill cleanup efforts, drug interdiction patrols, coastal and port security, ice breaker assistance and the maintenance of navigational aids.

While the bicentennial of the U.S. Coast Guard will be commemorated during the period of time beginning August 4, 1989, and ending August 4, 1990, I believe it most appropriate and important for the 101st Congress to memorialize the distinguished service of the members of the U.S. Coast Guard to our country since its formation in 1790.

I welcome cosponsors to this resolution honoring the U.S. Coast Guard, and ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 126

Whereas August 4, 1990, marks the 200th anniversary of the Act of August 4, 1790, by which Congress authorized 10 revenue cutters requested by Alexander Hamilton for the purpose of interdicting violators of the customs laws;

Whereas the seagoing service which began with those first 10 cutters lives on in the form of the service now known as the "United States Coast Guard";

Whereas the Coast Guard has served this Nation well, in war and peace, in both the defense of this Nation against foreign enemies and against the use of the sea for crimes against the Nation;

Whereas the Coast Guard has also served this Nation well in protecting against the perils of the sea, by rescuing those in danger at sea, maintaining aids to navigation, and regulating the safety of vessels;

Whereas the Coast Guard, despite its small size, has served the Nation in these and in many other areas with efficiency and gallantry;

Whereas the Coast Guard's present-day battle against the importation of drugs by sea reminds us of the origins of the Coast Guard with those first 10 cutters 200 years ago, and of the other essential services performed by the Coast Guard; and

Whereas the bicentennial of the Coast Guard will be commemorated during the period beginning August 4, 1989, and ending August 4, 1990: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States hereby gives recognition to the two centuries of service by the United States Coast Guard and authorizes and requests the President to issue a proclamation calling upon the people of the Nation to share in the pride and satisfaction enjoyed by the dedicated and committed members of the United States Coast Guard during the commemoration of this bicentennial.

Mr. CHAFEE. Mr. President, I am delighted to join with my colleagues in introducing this important resolution. If any organization deserves recognition for its efforts on the public's behalf, it is the U.S. Coast Guard.

As a Senator from the ocean State of Rhode Island, I am particularly aware of the importance of the Coast Guard's role. We in New England see the Coast Guard every day—the lifeboats patrolling our beaches and marinas, the blinking lights of lighthouses and other aids-to-navigation, and the search-and-rescue helicopters circling overhead.

With 28,500 recreational motorboats, thousands of sport fishermen, and countless sailboats—not to mention the heavy commercial marine traffic—Rhode Islanders find these daily reminders of the Coast Guard's presence extremely reassuring.

Last year, the Coast Guard responded to 647 calls for help in Rhode Island alone. It is a tribute to their hard work and devotion that while the number of recreational boats has increased by 280 percent since 1961, the number of boating fatalities has increased by only 15 percent.

But the Coast Guard is not just an agency created to protect boaters and bathers. It is the Federal agency with maritime authority for the United States, and it has played a vital role in our Nation's history. Since the first "fleet of cutters" was authorized by Congress 199 years ago to protect U.S. revenues, the duties of the Coast Guard have increased rapidly.

Ice patrols and life-saving services have been added. Enforcement duties ranging from prohibition laws to international whaling conventions to drug interdiction have been expanded. We here in Congress recognized the importance of the Coast Guard's role in drug interdiction efforts when we passed the omnibus drug bill last year. And, of course, the Coast Guard is an integral part of our Nation's military defense, as was proven in World Wars I and II.

In addition, the Coast Guard has an important volunteer component: A civilian auxiliary that aids the Coast Guard in rescue missions and promotes safe, recreational boating as a public service. I would also like to point out that the Coast Guard Academy was the first to admit women—in July 1976.

Mr. President, this variety of duties is what the Coast Guard calls multimission. I call it pretty amazing.

I would like to commend and congratulate the Coast Guard for its excellent work over the years. As Admiral Yost, Commandant of the Coast Guard, has put it: "The Coast Guard remains the best buy the taxpayer has."

By Mr. SIMON:

S.J. Res. 127. Joint Resolution designating Labor Day weekend, September 2-4, 1989, as "National Drive for Life Weekend"; to the Committee on the Judiciary.

NATIONAL DRIVE FOR LIFE WEEKEND

Mr. SIMON. Mr. President, I rise today to introduce a joint resolution asking the President to designate September 2-4, 1989, as "National Drive for Life Weekend."

This joint resolution, which is similar to the one I introduced last year, will designate Labor Day weekend as the focus of the third annual "Drive for Life," a national public service campaign sponsored by Mothers Against Drunk Driving [MADD] and Volkswagon United States, Inc., asking all Americans to pledge to be responsible by driving sober and encouraging others to do the same.

More than 23,000 people were killed in the United States last year as a result of alcohol-related accidents, an average of 65 individuals each day. Statistics indicate that two out of every five individuals in this country will be involved in a drunk-driving related accident at some point in their lives. The Drive for Life campaign seeks to reduce the very high number of alcohol-related car accidents in the United States by implementing a month-long public awareness program aimed at educating the public on the dangers of drunk driving.

Drive for Life focuses on the Labor Day weekend, a time when the incidence of alcohol-related accidents traditionally runs 10 percent above the average. During the second annual Drive for Life Day the death toll for drunk-driving related crashes was down 28.6 percent from Labor Day weekend Saturday in 1987. By declaring September 2-4 as "National Drive for Life Weekend," Congress will assist the campaign's effort to continue focusing national attention on the dangers of drunk driving.

By Mr. DOLE (for himself, Mr. MITCHELL, Mr. CHAFEE, Mr. ROTH, Mr. GARN, Mr. WARNER, Mr. MURKOWSKI, Mr. DOMENICI, Mr. BOSCHWITZ, Mr. BURNS, Mr. COATS, Mr. ARMSTRONG, Mr. COHEN, Mr. MCCONNELL, Mr. HATCH, Mr. DURENBERGER, Mr. LUGAR, Mr. GRAHAM, Mr. LEAHY, Mr. MATSUNAGA, Mr. PELL, Mr. SHELBY, Mr. HOLLINGS, Mr. MOYNIHAN, and Mr. REID):

S.J. Res. 129. Joint resolution to provide for the designation of September 15, 1989, as "National POW/MIA Recognition Day"; to the Committee on the Judiciary.

NATIONAL POW/MIA RECOGNITION DAY

Mr. DOLE. Mr. President, in 1969, when I first expressed concern about resolving the fates of the missing Americans who served this Nation in times of conflict, I spoke to only 20 POW/MIA family members. Twenty

years later, thousands of concerned Americans have become involved in keeping this issue a national priority.

President Bush has demonstrated his strong commitment to resolving this issue by reappointing Gen. John Vessey, Presidential Emmissary to Hanoi for POW/MIA. I am pleased that General Vessey's mission has produced positive results. Under his direction, an unprecedented number of remains have been recovered and identified. However, much more still needs to be done to account for the few thousand men still missing and unaccounted for in Southeast Asia, as well as previous wars.

Earlier this year, I joined the majority leader and several colleagues in both Chambers to unveil the POW/MIA flag in the Capitol rotunda to serve as a constant reminder to Congress and the American people of the missing and captive American service men. Today, I am pleased once again to introduce legislation designating September 15, 1989, as "National POW/MIA Recognition Day." This day will pay tribute to all of those who suffered, and may still be suffering, for their selfless service to this great Nation. It will also renew our promise to the families of these courageous servicemen and women that we will never rest until we can gain a full accounting for all of our heroes.

Mr. President, I am pleased that 22 Senators have already agreed to cosponsor this important resolution. I encourage other Members to join with us in commemorating this important day and rededicating our commitment to account for all missing Americans.

I ask unanimous consent for the text of the joint resolution to be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 129

Whereas the United States has fought in many wars;

Whereas thousands of Americans who served in those wars were captured by the enemy or listed as missing in action;

Whereas many American prisoners of war were subjected to brutal and inhuman treatment by their enemy captors in violation of international codes and customs for the treatment of prisoners of war, and many such prisoners of war died from such treatment;

Whereas many of these Americans are still missing and unaccounted for, and the uncertainty surrounding their fates has caused their families to suffer acute hardship; and

Whereas the sacrifices of Americans still missing and unaccounted for and their families are deserving of national recognition and support for continued priority efforts to determine the fate of those missing Americans: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 15, 1989, is hereby designated as "National POW/MIA Recognition Day." The President is authorized and requested to issue a proclamation calling upon the people of the United States to recognize that day with appropriate ceremonies and activities.

ADDITIONAL COSPONSORS

S. 5

At the request of Mr. BREAUX, his name was added as a cosponsor of S. 5, a bill to provide for a Federal program for the improvement of child care, and for other purposes.

S. 6

At the request of Mr. MCCAIN, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 6, a bill to grant the power to the President to reduce appropriated funds within 10 days after the date of enactment of a bill appropriating such funds.

S. 11

At the request of Mr. CRANSTON, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 11, a bill to provide for the protection of the public lands in the California desert.

S. 15

At the request of Mr. CRANSTON, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 15, a bill to amend the Public Health Service Act to improve emergency medical services and trauma care, and for other purposes.

S. 341

At the request of Mr. HOLLINGS, the names of the Senator from Connecticut [Mr. LIEBERMAN] and the Senator from Louisiana [Mr. BREAUX] were added as cosponsors of S. 341, a bill to amend the Federal Aviation Act of 1958 to prohibit discrimination against blind individuals in air travel.

S. 342

At the request of Mr. DANFORTH, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 342, a bill to amend the Internal Revenue Code of 1986 to provide that certain credits will not be subject to the passive activity rules, and for other purposes.

S. 350

At the request of Mr. LOTT, the name of the Senator from New Hampshire [Mr. HUMPHREY] was added as a cosponsor of S. 350, a bill to repeal section 89 of the Internal Revenue Code of 1986 (relating to rules for coverage and benefits under certain employee benefit plans).

S. 366

At the request of Mr. BAUCUS, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 366, a bill to amend title XVIII of the Social Security Act to make certain payment reforms in the Medicare Program to ensure the adequate provision of health care in rural areas, and for other purposes.

S. 369

At the request of Mr. BOSCHWITZ, the fame of the Senator from Wisconsin [Mr. KOHL] was added as a cosponsor of S. 369, a bill to seek the eradication of the worst aspects of poverty in developing countries by the year 2000.

S. 448

At the request of Mr. SIMON, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 448, a bill to amend the Immigration and Nationality Act to change the level, and preference system for admission, of immigrants to the United States.

S. 488

At the request of Mr. FOWLER, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 488, a bill to provide Federal assistance and leadership to a program of research, development and demonstration of renewable energy and energy efficiency technologies, and for other purposes.

S. 501

At the request of Mr. D'AMATO, the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of S. 501, a bill to amend the Internal Revenue Code of 1986 to make permanent, and to increase the amount of, the exclusion for amounts received under qualified group legal services plans.

S. 570

At the request of Mr. DANFORTH, the names of the Senator from North Dakota [Mr. CONRAD] and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 570, a bill to amend the Internal Revenue Code of 1986 to enhance the incentive for increasing research activities.

S. 578

At the request of Mr. DANFORTH, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 578, a bill to amend title 10, United States Code, to provide for consideration of whether certain defense agreements adversely impact the international competitive position of U.S. industry.

S. 595

At the request of Mr. DOMENICI, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 595, a bill to amend section 89 of the Internal Revenue Code of 1986 to exempt certain small businesses from the application of the employee benefit nondiscrimination rules, to delay and to simplify the requirements of such section, and for other purposes.

S. 630

At the request of Mr. BREAUX, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of S. 630, a bill to conserve, protect, and to restore the coastal wet-

lands of the State of Louisiana, and for other purposes.

S. 654

At the request of Mr. PRYOR, the names of the Senator from Connecticut [Mr. LIEBERMAN] and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 654, a bill to amend the Internal Revenue Code of 1986 to provide for the establishment of simplified health arrangements meeting the requirements of section 89, to modify the definition of part-time employee for purposes of section 89, and to simplify the application of section 89.

S. 670

At the request of Mr. ARMSTRONG, the name of the Senator from Arizona [Mr. MCCAIN] was added as a cosponsor of S. 670, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 771

At the request of Mr. REID, the names of the Senator from Connecticut [Mr. LIEBERMAN] and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 771, a bill to amend the Internal Revenue Code of 1986 to disallow deductions for costs in connection with oil and hazardous substances cleanup unless the requirements of all applicable Federal laws concerning such cleanup are met, and for other purposes.

S. 880

At the request of Mr. MCCONNELL, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 880, a bill to amend the Child Nutrition Act of 1966 to require the Secretary of Agriculture to provide startup funds to State educational agencies for distribution to schools to establish or expand school breakfast programs, to require the Secretary to collect and disseminate certain information concerning the school breakfast program, and for other purposes.

SENATE JOINT RESOLUTION 47

At the request of Mr. PRESSLER, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of Senate Joint Resolution 47, a joint resolution to recognize the 75th Anniversary of the Smith-Lever Act of May 8, 1914, and its role in establishing our Nation's system of State Cooperative Extension Services.

SENATE JOINT RESOLUTION 55

At the request of Mr. SIMON, the names of the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Delaware [Mr. ROTH], and the Senator from Louisiana [Mr. BREAUX] were added as cosponsors of Senate Joint Resolution 55, a joint resolution to designate the week of October 1, 1989, through October 7, 1989, as "Mental Illness Awareness Week."

SENATE JOINT RESOLUTION 66

At the request of Mr. HELMS, the names of the Senator from Florida [Mr. MACK], the Senator from California [Mr. CRANSTON], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 66, a joint resolution to designate the third week of June 1989 as "National Dairy Goat Awareness Week."

SENATE JOINT RESOLUTION 67

At the request of Mr. DOMENICI, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of Senate Joint Resolution 67, a joint resolution to commemorate the 25th anniversary of the Wilderness Act of 1964 which established the National Wilderness Preservation System.

SENATE JOINT RESOLUTION 71

At the request of Mr. HELMS, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of Senate Joint Resolution 71, a joint resolution designating April 16 through 22, 1989, as "National Ceramic Tile Industry Recognition Week."

SENATE JOINT RESOLUTION 76

At the request of Mr. HELMS, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Missouri [Mr. BOND], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Joint Resolution 76, a joint resolution to designate the period commencing on June 21, 1989, and ending on June 28, 1989, as "Food Science and Technology Week."

SENATE JOINT RESOLUTION 104

At the request of Mr. MITCHELL, the names of the Senator from New Jersey [Mr. LAUTENBERG] and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of Senate Joint Resolution 104, a joint resolution to express the sense of the Congress with respect to the health of the Nation's children.

SENATE JOINT RESOLUTION 110

At the request of Mr. SIMON, the names of the Senator from Arizona [Mr. DECONCINI], the Senator from California [Mr. CRANSTON], the Senator from Florida [Mr. MACK], the Senator from Idaho [Mr. MCCLURE], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Colorado [Mr. WIRTH], and the Senator from Indiana [Mr. COATS] were added as cosponsors of Senate Joint Resolution 110, a joint resolution designating October 5, 1989, as "Raoul Wallenberg Day."

SENATE JOINT RESOLUTION 112

At the request of Mr. GRASSLEY, the names of the Senator from North Carolina [Mr. HELMS], the Senator from Delaware [Mr. ROTH], the Senator from Texas [Mr. BENTSEN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Connecticut [Mr. DODD], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Mississippi [Mr. LOTT], the Senator from Nevada [Mr. REID], and the Senator from Washington [Mr. GORTON] were added as cosponsors of Senate Joint Resolution 112, a joint resolution designating May 29, 1989, as the "National Day of Remembrance for the victims of the U.S.S. Iowa."

SENATE JOINT RESOLUTION 113

At the request of Mr. DIXON, the names of the Senator from South Carolina [Mr. HOLLINGS] and the Senator from Michigan [Mr. RIEGLE] were withdrawn as cosponsors of Senate Joint Resolution 113, a joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

SENATE JOINT RESOLUTION 117

At the request of Mr. BURDICK, the names of the Senator from Iowa [Mr. GRASSLEY], the Senator from California [Mr. WILSON], the Senator from Texas [Mr. BENTSEN], the Senator from Arizona [Mr. DECONCINI], the Senator from Utah [Mr. GARN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Colorado [Mr. ARMSTRONG], the Senator from North Carolina [Mr. HELMS], the Senator from Rhode Island [Mr. PELL], the Senator from South Carolina [Mr. THURMOND], the Senator from Missouri [Mr. BOND], the Senator from Tennessee [Mr. GORE], and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of Senate Joint Resolution 117, a joint resolution to designate the week of November 19, 1989, through November 25, 1989, and the week of November 18, 1990, through November 24, 1990, as "National Family Week."

SENATE CONCURRENT RESOLUTION 13

At the request of Mr. SYMMS, the names of the Senator from South Carolina [Mr. THURMOND] and the Senator from Mississippi [Mr. LOTT] were added as cosponsors of Senate Concurrent Resolution 13, a concurrent resolution expressing the sense of the Congress that the President or the Congress should abrogate the Panama Canal Treaties of 1977 and the Neutrality Treaty and the Congress should repeal the Panama Canal Act of 1979.

SENATE CONCURRENT RESOLUTION 36—RELATING TO PHYSICIAN PAYMENT REFORM

Mr. HATCH (for himself, Mr. GARN, Mr. DURENBERGER, Mr. BAUCUS, and Mr. GRASSELY) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 36

Whereas substantial geographical disparities exist under the current medicare physician reimbursement formulas which may not be accounted for by regional differences in the cost of practice;

Whereas the Subcommittee on Health and Environment of the Committee on Energy

and Commerce of the House of Representatives has held extensive hearings documenting these geographical variations;

Whereas the Physician Payment Review Commission, created under section 9305 of Public Law 99-272 (42 U.S.C. 1395w-1), concluded that geographical variations in prevailing charges are substantial, and stated that "wide variation in charges unrelated to differences in cost of practice could mean access to care and beneficiary financial protection might be compromised in areas where prevailing charges are low"; and

Whereas these geographical disparities may penalize doctors who have historically charges lower rates: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) the problem of geographical variations in physician reimbursement under the medicare program needs to be addressed; and

(2) any mechanism for medicare physician reimbursement should not permit any geographical variations beyond those which can be justified by regional differences in the cost of medical practice or the need to maintain access to high quality health care.

Mr. HATCH. Mr. President, today, I am pleased to join with Senators GARN, BAUCUS, DURENBERGER, and GRASSLEY in the submission of a concurrent resolution expressing the sense of Congress regarding the problem of geographical variations under the current medicare physician reimbursement. This concurrent resolution is being introduced in the House by the Utah delegation.

The current Medicare reimbursement system for physicians is both inequitable and unfair: physicians providing exactly the same service are reimbursed at very different levels depending on whether the office is on one side of a State line or the other. For example, physicians in States surrounding Utah may receive up to 20 percent more for services provided in the office than do physicians practicing in Utah. For physicians providing hospital care, this discrepancy can be as high as 33 percent.

The Physician Payment Review Commission [PPRC] recently completed a study of geographic variations in Medicare charges and reported their findings to Congress in March 1988. This report also found that prevailing charges may vary extensively from one locality to another. The PPR Commission looked at factors that could explain and justify these geographic differences and concluded that the cost of practice differences accounted for some of the variation, but certainly not all.

Unfortunately, when our current reimbursement mechanism was created over 15 years ago, it highlighted the differences in practice costs between States. In addition, these State differentials were frozen at those 1973 levels, because the law limited percentage increases in out-years and applied this limitation to all States equally. Thus, over time, arithmetic increases in payments have been considerably greater in those States which started with a higher base, compounding the problem with each passing year. States like Utah, which had low fee structures in 1973, have been penalized ever since for their conservative charges. We are punishing those physicians who were cost conscious in delivering services.

In the same report, the PPR Commission went on to state that:

The wide variation in charges unrelated to differences in cost of practice could mean access to care and beneficiary financial protection might be compromised in areas where prevailing charges are low.

It is not hard to imagine that physicians practicing in States with low reimbursement rates may choose to move their practices to neighboring States with higher reimbursement rates or that young physicians may decide to avoid practicing in these States all together. One day, many seniors may have difficulty finding a doctor when they need one. In addition, seniors may be faced with higher out-of-pocket costs for their health care as physicians become more reluctant to accept Medicare assignment.

At the same time, Medicare beneficiaries from States with low reimbursement rates are subsidizing beneficiaries in wealthier States. All Americans, regardless of their residence, are subject to the same Federal tax and Social Security liability; all Medicare enrollees pay the same premiums for part B coverage. Yet, there is not an equal distribution to the providers serving these seniors. Taxpayers in some parts of the country, like Utah, are subsidizing citizens living elsewhere. Ironically, in the case of Medicare, more prosperous sections of the country tend to be subsidized by less prosperous ones.

It is because of these immediate problems, Mr. President, that we are introducing this resolution expressing the sense of Congress that the problem of geographical variations in physician reimbursement under the Medicare Program needs to be addressed. Any mechanism for Medicare physician reimbursement should not permit any geographical variations beyond that which can be justified by regional differences in the cost of medical practice or the need to maintain access to high quality health care.

SENATE RESOLUTION 123—APPOINTMENT OF A COMMITTEE TO RECEIVE AND REPORT EVIDENCE WITH RESPECT TO THE IMPEACHMENT OF JUDGE ALCEE L. HASTINGS

Mr. MITCHELL (for himself and Mr. DOLE) submitted the following resolution; which was considered and agreed to:

S. RES. 123

Resolved, That section 6 of Senate Resolution 38, 101st Congress, is amended to read as follows:

"SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the Committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay."

SENATE RESOLUTION 124—ORIGINAL RESOLUTION REPORTED RELATING TO THE 40TH ANNIVERSARY OF THE NORTH ATLANTIC TREATY ORGANIZATION

Mr. PELL, from the Committee on Foreign Relations, reported the following original resolution; which was placed on the calendar:

S. RES. 124

Whereas the North Atlantic Treaty was signed in Washington on April 4, 1949; was ratified by the United States pursuant to Senate consent; and entered into force on August 24, 1949;

Whereas the Atlantic Alliance now comprises 16 member-nations and will celebrate NATO's 40th anniversary at a summit meeting beginning May 29, 1989;

Whereas the North Atlantic Treaty Organization has facilitated effective cooperative participation by member-nations in their common defense since the inception of the Alliance;

Whereas the North Atlantic Assembly has, since 1955, fostered active participation by elected representatives throughout NATO in discussions leading to recommendations and cooperative policies on essential Alliance issues;

Whereas open discussion, meaning the full airing of views, among member-states of the Alliance is fundamental to the nature of a voluntary alliance of democratic nations;

Whereas experience has demonstrated that a firm and coherent NATO position is crucial to effective East-West arms control; and

Whereas the common interests of Alliance members continue to outweigh any disagreements on particular issues of defense posture and arms control negotiating strategy; Be it therefore,

Resolved, That this resolution may be referred to as the "Renewed Commitment to NATO Resolution," passed on the occasion of NATO's 40th anniversary.

That the United States Senate remains dedicated to the North Atlantic Alliance as a critical instrumentality for maintaining an effective Western defense of the principles and institutions of democratic freedom;

That it remains in the overwhelming interest of the United States and other members of NATO that recurring disputes concerning defense posture and arms control negotiating strategy be resolved in a spirit of comity and compromise, and with a continuing emphasis on the largest purposes

NATO has so effectively served for forty years.

SENATE RESOLUTION 125—ORIGINAL RESOLUTION REPORTED CONGRATULATING THE KINGDOM OF NORWAY ON 175 YEARS OF CONSTITUTIONAL GOVERNMENT

Mr. PELL, from the Committee on Foreign Relations, reported the following original resolution; which was placed on the calendar:

S. RES. 125

Whereas, May 17 is the 175th anniversary of the adoption of the Norwegian Constitution in 1814;

Whereas, the Norwegian Constitution was inspired in important aspects by the Constitution of the United States;

Whereas, the Norwegian Constitution was one of the first written constitutions adopted by a monarchy recognizing the sovereignty of the people, emphasizing the importance of human rights, and delineating the roles of the monarchy, the legislature, and the judiciary;

Whereas, the Norwegian Constitution has been an essential element in Norway's long tradition of democratic government, political and social tolerance, and devotion to freedom and self-determination;

Whereas, the people of Norway heroically resisted a brutal occupation during World War II;

Whereas, Norway has been one of America's staunchest allies in NATO; and

Whereas, immigrants from Norway have enriched American life and culture; Therefore, be it

Resolved, That the Senate of the United States congratulates the Kingdom of Norway on its 175 years of constitutional government.

SENATE RESOLUTION 126—RELATING TO THE PROSPECTIVE PAYMENT ASSESSMENT COMMISSION OF MEDICARE

Mr. BAUCUS (for himself, Mr. HARKIN, Mr. PRYOR, Mr. CONRAD, Mr. BURDICK, Mr. BOREN, Mr. DASCHLE, and Mr. EXON) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 126

Whereas the Prospective Payment Assessment Commission was established to advise the Secretary of Health and Human Services on ways to update and improve the Medicare Prospective Payment System;

Whereas the Commission, by its own admission, has been "slow to anticipate the extent to which rural hospitals would have major problems under the system";

Whereas the Commission's inattention to the severity of the impact of the Medicare Prospective Payment System on rural hospitals has contributed to the closure and threatened closure of hospitals that provide critical access to health care for Medicare's beneficiaries;

Whereas 30 percent of Medicare beneficiaries live in rural America; and

Whereas only one (or 6 percent) of the 17 Commissioners appointed to the Prospective Payment Assessment Commission has direct practical exposure to, or experience with, the problems of providing health care to rural America: Now, therefore, be it

Resolved, That a minimum of four additional members with demonstrated experience in providing or developing health care services in rural America should be appointed to the Prospective Payment Assessment Commission, and that in the future a minimum of 25 percent of the Commissioners should have such experience.

Mr. BAUCUS. Mr. President, I rise today to introduce a resolution to restore equitable representation for rural America on the Prospective Payment Assessment Commission [ProPAC]. I am very pleased that a number of my distinguished colleagues, including Senator HARKIN of Iowa and Senator PRYOR of Arkansas, are joining in this important effort.

As my colleagues know, ProPAC is the Commission that was established by Congress in 1983 to advise the Secretary of Health and Human Services on the Medicare Prospective Payment System. ProPAC has a task of great importance to our Nation's hospitals and, indeed, to every citizen.

Last week an event occurred that underscored the significance of ProPAC and its effect on rural hospitals.

The esteemed chairman of the Finance Committee, Senator BENTSEN, conducted a remarkable hearing examining Medicare payments to rural hospitals. I have championed rural health issues for years, but have never witnessed the subject discussed with such clarity and insight.

Despite the diversity of rural America, the themes presented at the hearing were constant. Rural hospitals are in trouble, and closures will adversely affect access to health care for the 30 percent of our Nation's seniors who live in rural areas. It is important to remember that these seniors have contributed an equal share to the Medicare trust fund and deserve to get their money's worth.

Rural hospitals are trying hard to provide care with a variety of innovative programs, but financially they are barely treading water.

It is clear the Medicare Prospective Payment System [PPS] has not been fair to rural hospitals from its inception in 1983.

However, Mr. Curtis Erickson, the only one of 17 Commissioners on ProPAC with significant rural health care experience noted, "ProPAC did not anticipate the extent to which rural hospitals would have major problems under the system."

Mr. President, it is entirely possible that the reason they did not anticipate the current disaster is that they did not consider rural America to be important.

It is possible that the inequity of rural America's representation on the Commission could have had something to do with this inattention.

It is possible that Mr. Erickson, the proverbial lone voice in the wilderness, just couldn't get the attention of the other ProPAC members.

Well, Mr. President, it was very clear to the members at the hearing that something needs to be done to make sure that ProPAC never again forgets rural America.

The resolution we submit today makes a start in reintroducing equity in health care for rural America. It expresses our strongly held view that four additional Commissioners with rural health care experience should be appointed to ProPAC. This would raise the proportion of Commissioners with a knowledge of rural issues close to the proportion of seniors whose access they are supposed to be protecting.

Mr. President, I hope that many of our colleagues will join us in our call for more rural representation on ProPAC.

Mr. HARKIN. Mr. President, I am pleased to be joining Senator BAUCUS in introducing this resolution to increase the rural representation on the Prospective Payment Assessment Commission [ProPAC]. Rural hospitals have waited too long for a fair shake. Our resolution will help them get their due by making sure that rural hospitals have a strong voice in Washington, where policy affecting them is made.

Since 1983, Congress has relied on ProPAC for sound advice on how the prospective payment system can meet the needs of all senior citizens, regardless of whether they live in rural communities or in cities.

Since 1984, unfairly low payments from Medicare have closed 159 rural community hospitals, and brought another 700 to the brink of closing. Two of my Iowa hospitals are among them.

What's wrong with this picture? For one thing, the urban-rural differential in Medicare payments to hospitals. Right now, urban hospitals receive an average of 40 percent more for each case than rural hospitals—for providing the same care, urban hospitals get 40 percent more.

Last week I testified before the Finance Committee in favor of eliminating the urban-rural differential as soon as possible. Rural hospitals deserve payment equity, and I will do all I can to see they get it.

My testimony was received very favorably by Chairman BENTSEN, Senator DOLE, and the members of the Finance Committee. They understand that the urban-rural differential, while it was meant to reimburse all hospitals fairly, has not been fair. It has bled many rural hospitals to death.

To my surprise and disappointment, who should be at the hearing arguing against helping rural hospitals? ProPAC. ProPAC has been asleep at the switch while payments to rural

hospitals have gone off track. Instead, the Commission has been paying more attention to the problems of large urban teaching hospitals than to the needs of our rural hospitals.

And why is that? Just a look at the membership of this Commission gives you a good idea: only 1 of 17 Commissioners has experience in a rural hospital. Mr. President, rural hospitals account for half the prospective payment system hospitals. Many of our Nation's elderly population are living in rural areas. Simple fairness dictates that, at a minimum, a third of ProPAC Commissioners should represent rural areas, if not half of them.

This resolution will increase the rural membership of ProPAC so that rural hospitals will have a voice on the inside. As long as Congress uses ProPAC for advice on Medicare, I want to ensure that the advice we get is balanced and treats all hospitals fairly.

Mr. PRYOR. Mr. President, taxation without representation was one of the major causes of the American revolution. Today, over 200 years later, our rural hospitals and the people they serve find themselves in a similar situation—grossly under represented on the Federal Commission that makes key Medicare policy recommendations that directly affect rural communities.

The Prospective Payment Assessment Commission [ProPAC] was established to advise the Secretary of Health and Human Services on Medicare hospital policy. Yet, despite the fact that 30 percent of all Medicare patients live in rural America, only 6 percent of the ProPAC Commissioners—1 out of 17—has direct practical experience with the difficulties of delivering health care to rural communities. This is both unfair and unacceptable.

Last Thursday, the sole rural hospital representative of ProPAC, Mr. Curtis Erickson, testified before us on the Finance Committee. While recognizing the sensitivity and professionalism of the staff and members of the Commission, he did acknowledge that he felt the Commission would be better served by more representatives from rural communities.

At a time when rural hospital after rural hospital is being forced to close, it is absolutely imperative that the administration and the Congress receive policy recommendations from those who have direct experience with the problem. Washington, DC, beltway bandits and representatives from large urban cities find it all too easy to casually dismiss rural hospital closures as necessary to make the health care system more efficient. I believe it is time we have the benefit of those who are from rural areas and who have a more personal understanding of what a hospital closure means to the communities affected.

With the above in mind, I am pleased to join Senator BAUCUS in sending a strong message to the HHS Secretary and to ProPAC. The resolution we are offering today simply states it's time for a change. It's time to recognize that it is essential that at least 25 percent of ProPAC's membership be comprised of people with demonstrated experience in providing or developing health care services in rural America. And finally, it's time to make a change now by appointing four new Commissions members with rural health care backgrounds.

Mr. President, in many cases, new perspectives yield new and improved ideas. Most of us on the Aging Committee I chair, as well as the Finance Committee and Senate Rural Health Caucus I am proud to serve, have concluded that we certainly could use a few new approaches to help us address the immediate concerns of rural hospitals. The resolution we are introducing today takes a small but important step in achieving this goal. I hope all our colleagues will join us in taking that step.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. WIRTH. Mr. President, I would like to announce for the public that a field hearing has been scheduled before the full Committee on Energy and Natural Resources.

The hearing will take place Saturday, May 20, 1989, at the Lincoln Junior High School Auditorium, 15th and California Streets, Santa Monica, CA, at 10 a.m.

The purpose of the hearing is to examine policies to combat the greenhouse effect, as well as likely regional implications for the State of California. The hearing is intended to offer Californians an opportunity to learn about the potential impact of global warming on the State and to examine State initiatives to conserve energy and reduce the output of greenhouse gases.

For further information, please contact Leslie Black, professional staff member on the full committee, at (202) 224-9607.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. LEVIN. Mr. President, I wish to announce that the Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, will hold a hearing on oversight of DOD's inadequate use of off-the-shelf items, on Tuesday, May 16, 1989, at 9:30 a.m., in room 342 of the Dirksen Senate Office Building.

SUBCOMMITTEE ON PUBLIC LANDS, NATIONAL PARKS AND FORESTS

Mr. BUMPERS. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources.

The hearing will take place on May 18, 1989, beginning at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building in Washington, DC.

The purpose of the hearing is to receive testimony on:

S. 737, a bill to authorize the Secretary of the Interior to acquire certain lands adjacent to the boundary of the Rocky Mountain National Park in the State of Colorado;

S. 267, a bill to authorize the Secretary of the Interior to convey certain lands in Idaho to Mr. and Mrs. Kenneth Blevins of Kuna, ID;

S. 319, a bill to effect an exchange of lands between the U.S. Forest Service and the Salt Lake City Corp., within the State of Utah, and for other purposes;

S. 393, the Camp W.G. Williams Land Exchange Act of 1989; and

H.R. 310, a bill to remove a restriction on land in Roanoke, VA, in order for that land to be conveyed to the State of Virginia for use as a veterans' nursing home.

Because of the limited time available for the hearing, only administration witnesses will be invited to appear at the hearing. However, anyone is welcome to submit written testimony for the hearing record. Those wishing to submit written testimony should send two copies of the testimony to the Subcommittee on Public Lands, National Parks and Forests, Committee on Energy and Natural Resources, 364 Dirksen Senate Office Building, Washington, DC 20510-6150.

For further information, please contact David Brooks of the subcommittee staff at (202) 224-9863.

AUTHORITY FOR COMMITTEES TO MEET

SPECIAL COMMITTEE ON INVESTIGATIONS

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Special Committee on Investigations of the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on May 10, 1989, at 10 a.m. to hold hearings pursuant to Senate Resolution 66, section 21, agreed February 28, 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MERCHANT MARINE

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Merchant Marine Subcommittee of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 10, 1989, at 1:30 p.m. to hold a hearing on the *Exxon Valdez* oil spill focusing on oil transportation and tanker safety.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation and the National Ocean Policy Study, be authorized to meet during the session of the Senate on May 10, 1989, at 9:30 a.m. to hold a hearing on the status of the *Exxon Valdez* oilspill cleanup and impact of the spill on Alaskan natural resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SUPERFUND, OCEAN AND WATER PROTECTION

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Subcommitte on Superfund, Ocean and Water Protection, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Wednesday, May 10, beginning at 10 a.m., to conduct an oversight hearing to examine the implications of and responses to the toxic release inventory released pursuant to section 313 of the Emergency Planning and Community Right to Know Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC FORCES AND NUCLEAR DETERRENCE

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Subcommittee on Strategic Forces and Nuclear Deterrence of the Committee on Armed Services be authorized to meet on Wednesday, May 10, 1989, at 10 a.m. in closed session to receive testimony on operational requirements of the Strategic Air Command and the fiscal years 1990-91 budget request for strategic forces.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE HANDICAPPED

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Subcommittee on the Handicapped, of the Committee on Labor and Human Resources, be authorized to meet during the session of the Senate on Wednesday, May 10, 1989, at 9:30 a.m. to conduct a hearing on Americans With Disabilities Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE THE CONSTITUTION

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution of the Committee on the Judiciary, be authorized to meet during the session of the Senate on May 10, 1989, at 1:30 p.m., to hold a hearing on S. 675, a bill to eliminate discriminatory barriers to voter registration.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERNATIONAL ECONOMIC POLICY, TRADE, OCEANS AND ENVIRONMENT

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Subcommittee on International Economic Policy, Trade, Oceans and Environment of the Committee on Foreign Relations be authorized to meet during the session of the Senate on May 10 at 9 a.m., to hear witnesses on Inter-American Development Bank replenishment.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. DASCHLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on May 10, 1989, at 2 p.m. in open session to receive testimony on the amended defense authorization request for fiscal years 1990 and 1991 and on the fiscal year 1990-94, 5-year defense plan.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

MOTHER'S DAY FOR PEACE PROCLAMATION

● Mr. KERRY. Mr. President, this Sunday, May 14, 1989, will be Mother's Day, a day on which millions of Americans celebrate the meaning of family and motherhood.

The act of having a child and giving birth is a profound statement of hope for the future. It is a commitment to life and family as the center of our meaning. Generation after generation of the mothers and fathers creating new families are the living and continuing affirmation and celebration of life.

These days, we often find ourselves worrying about whether the human race can even survive, because of the threat of nuclear destruction. This is a terrible fear, one unknown just two generations ago. And it is not merely that we fear the destruction of our species, but the world itself in a nuclear cataclysm.

Even if we can avoid a nuclear war, there remains the ongoing injury to the world caused by the nature of the arms race itself. Resources that are desperately needed for education, development, nutrition, shelter, and other essentials of life are squandered on weapons. The arms race has already caused significant injury to the environment from radioactive waste that no one in the world knows what to do with. Even the mere possession of weapons by the military forces of the world has caused, and continues to cause, outbreaks of both new conflicts and new waste.

Today, Americans are beginning to recognize that the greatest threat to our national security comes from the loss of economic strength and creative and scientific resources as a result of their being wasted on the arms race. We have real needs to meet, and real problems to solve, and the arms race does very little to respond to either.

We are beginning to see new thinking from nations across the oceans. Japan spends little of its national resources on the military. Japan's increasing economic power in comparison to the United States teaches us what can happen when one nation uses its resources productively and another does not.

At the same time, the Soviet Union has begun to recognize that its reliance on military power has drained its resources and damaged the quality of life for its people. Soviet leaders have appeared to recognize that it must go down a different path if it is to be a great nation in the future.

As we come to celebrate Mother's Day in 1989, we should note that millions of Americans have come to recognize that nuclear war represents the greatest threat to the future of all children, everywhere.

The Governors of Alaska and Wisconsin and the mayors of Santa Barbara, CA, and Oak Park, IL, have joined this year to proclaim May 14, 1989, as "Mother's Day For Peace."

I urge Americans wherever they are this Mother's Day to celebrate the day in honor of both mothers and their continuing work toward peace.

I ask that the full text of the Mother's Day proclamation issued by these States and cities be included in full in the RECORD.

The text of the proclamation follows:

MOTHERS' DAY PROCLAMATION

Whereas, millions of mothers and grandmothers recognize that the ultimate parenting issue is a secure future for all children;

Whereas, Mothers' Day was intended by its originator, Julia Ward Howe, in 1872, as a time when mothers and children could come together to speak out against war and to work for peace;

Whereas, never in its history has the United States faced the critical decisions that it now must entrust to Congress and the President—decisions about the threat of nuclear war, proposed massive and costly new weapons systems and the delicate process of diplomatic approaches to disarmament;

Whereas, the nuclear arms race affects the quality of life for children and families by redirecting national resources away from education, health care, and other family support services to weapons of mass destruction;

Whereas, nuclear war represents the greatest threat to the future of all children; and

Whereas, concerned people are making statements and organizing events and local activities to focus on the importance of preventing nuclear war; and are bringing local and national attention to the fact that millions of mothers want peace and a future for all children;

Therefore, the Governors of Alaska and Wisconsin and the Mayors of Santa Barbara, CA and Oak Park, IL have joined in the proclamation of May 14, 1989 as "Mothers' Day for Peace."●

THE PRODUCT LIABILITY MESS

● Mr. KASTEN. Mr. President, I rise today to bring to the attention of my colleagues an important contribution to the ongoing debate on product liability reform. In today's Washington Times, economics columnist Warren Brookes paints a compelling portrait of an out-of-control tort liability system.

At a time when America is locked in a life-and-death competitive struggle with its international rivals, we can ill afford to shackle the productive talents of our businesses and workers. But, to the tune of $80 billion a year, that is in fact what we are doing.

In San Francisco alone, product liability settlements have risen by 1,016 percent over the last two decades. And there is reason to fear that this is not an isolated outbreak of tort madness, but part of a nationwide trend.

In the near future, I will be introducing a bill which I am confident will help restore a measure of sanity to liability law. The need could not be more compelling.

Mr. President, I ask that this important article by Mr. Brookes be included in the RECORD.

The article follows:

THE HIGH COSTS OF NADER-TORT

Today in Washington, the Committee for Economic Development will try to jump-restart the tort-liability reform movement on Capitol Hill with the release of a 150-page study of the effects of the $80 billion direct tort-liability "tax" on US. manufacturing unmatched anywhere else in the world.

The larger cost of this tax may be more than $300 billion, and is one of the key reasons the U.S. economy now does such a slow job of converting technology and research into marketable products, for fear of massive new litigation costs arising from courts that no longer recognize any limits on liability, nor any reasonable standards for the assessment of responsibility.

Unfortunately, while CED has a powerful ally on Capitol Hill in House Energy and Commerce Chairman John Dingell, it faces formidable enemies in Ralph Nader and the American Bar Association, whose membership collectively take more than 50 percent of most tort liability settlements, which now exceed $40 billion a year.

Mr. Nader's hand has been strengthened by the California Supreme Court, which last week upheld his Proposition 103 which rolls back state auto insurance rates by 20 percent, and makes insurance companies, not the courts, the villains on rates.

While California's motorists have every right to be upset about $2,000 a year car-insurance bills, just as municipalities are furious over $1 million premiums on playgrounds, the chief culprit in this explosion was not so much the self-serving insurance industry, but the explosion in expensive tort settlements of all kinds, from auto accidents to product lability. (See table.)

That explosion is largely the work of Naderite judges and lawyers attempting to use the courts to pick the deep pockets of corporate America in the interests of "social justice."

In March 1988, for example, a jury ordered the Southern California Automobile Club to pay a couple $3.3 million in damages for failure to pay a $25,000 insurance claim. Last September another California court awarded $45 million in compensatory damages and $85 million in punitive damages to a San Diego couple who had sold their resort to a Dallas company for $2 million and a share of future profits, because the resort began to lose money.

This kind of lunatic litigation is a key reason why in California bodily injury and "pain and suffering" claim costs and court awards have skyrocketed 15.5 percent a year since 1983, twice as fast as in the nation as a whole, even though property-damage claim frequency has been virtually flat.

California insurers belatedly tried to promote the idea of "no fault insurance," but the trial-lawyer lobby, Ralph Nader's friends in the liability "business," effectively killed that idea, just as they have watered it away in most states.

When states have tried to fight back by limiting premium increases, an insurance-supply crisis always developed. More and more drivers wound up having to be insured by state-administered "assigned risk pools"—more than 50 percent of the drivers in New Jersey, and more than 60 percent in Massachusetts, where at least three major insurance companies have recently bought their way out of that state's insurance market.

The origins of this insurance supply and price crisis which spawned Proposition 103 are brilliantly developed in one of the most important books of our time, Peter Huber's Liability—The Legal Revolution and Its Consequences" (Basic Books 1988).

In clear, concise prose laced with hundreds of examples, Mr. Huber, the former Massachusetts Institute of Technology engineering professor and top graduate of the Harvard Law School, shows how a generation of liberal judges and lawyers gradually repudiated the whole law of contract based on individual responsibility and consent, and replaced it with a vastly expanded notion of general societal "tort."

AVERAGE SETTLEMENTS IN SAN FRANCISCO

[In constant dollars]

	1960–64	1980–84	Percent change
Aggregate	$74,000	$302,000	308
Auto	46,000	131,000	185
Personal injury	66,000	302,000	358
Products	99,000	1,105,000	1,016
Medical malpractice	125,000	1,162,000	830

Source: Committee For Economic Development.

Under this new theory, accidents are socially costly, and the law should encourage accident prevention not by assessing fault, but by placing the liability against those most likely to have the money to pay, irrespective of fault.

The result of this approach was but to turn the courts into a kind of unpredictable social lottery in which some individuals could strike it rich with the right lawyers and sufficiently large corporate targets of opportunity, but all at costs shifted back to workers and consumers, rich and poor alike, regressively.

Under this new "deep pockets" premise judges and juries assessed corporations huge settlements for a man who suffered a heart attack because of a lawn-mower rope too hard to pull: a driver who was killed driving over 100 mph when a tire exploded: a mechanic who exploded a tire with 48 pounds of pressure to make it fit the wrong size rim; a teen-ager pouring cologne over a candle and getting burned.

The greatest impact of this new "tort wave" was to turn the insurance principle upside down from insuring known individual risk to unknown societal third-party claims. As Mr. Huber points out, "The founders of this new tort principle took it as an article of faith that the insurance systems would provide a broad financial umbrella over the expanding new tort system.

"But they were clumsy in their work and remarkably uninformed about how insurance markets really operate. In the end they succeeded in sharply increasing demand for liability insurance, but they devastated supply. The result was an insurance crisis eerily reminiscent of the endless gas lines during the Arab oil embargo."

When courts extended liabilities, insurance companies priced up and hedged in the policies. When courts then tried to rewrite those policies retroactively, companies stopped writing them altogether.

Insurance, after all, is a contract based on predictable risks spread over a defined insurance pool. But, as Mr. Huber writes: "Take away contract [law] and there is nothing left to insurance; either bargains of this sort are enforceable on their own mutually understood and accepted terms or they will not be written at all. Legislative intervention [Proposition 103] was then all but inevitable, first in laws that attempted to bludgeon the private insurance contracts into submission, then through insurance directly established and funded by government."

That is where Ralph Nader and his Proposition 103 advocates are now taking California and the nation in all forms of casualty and property insurance, and the only sure winners will not be the consumers but the lawyers, even as insurance rates soar and availability dries up for ordinary middle- and lower-income folks.

As Peter Huber says of the Naderite tort liability system of socializing all risks and taxing the public through $80 billion in hidden costs most of which go to lawyers, "A more inefficient and regressive scheme of social welfare could hardly be imagined."

Author's Update: In last Wednesday's column on radon, we cited a news item that Ralph Nader receives a rebate on every radon testing kit. Public Citizen (a Nader group) says the rebate of 50 cents per kit is paid to them and only on kits purchased by their members.●

CITIZENS DEFEND THEMSELVES WITH HANDGUNS

● Mr. McCLURE. Mr. President, in the Washington Post, an item speaks for itself. Every year, some 650,000 citizens defend themselves against violent crime using handguns. Florida State Criminologist Gary Kleck points this out in a scholarly article, "Crime Control Through the Private Use of Armed Force," in the February 1988 issue of Social Problems.

It is also interesting to note that the intruder had a criminal background. If he had been obliged to pay the price for his crimes, the individuals in this incident would not have been subjected to this ordeal.

In any event, the right to self defense is basic and necessary. We must not leave honest citizens defenseless against those who seek to prey on the weak.

Mr. President, I ask that the article from the May 3, 1989 Washington Post be inserted in the RECORD.

MEN SHAKEN AFTER INTRUDER FATALLY SHOT—"EITHER HE WAS GOING TO BE DEAD OR I WAS"

(By Debbie M. Price)

Frail and thin as a whip, the 78-year-old man sat upright on the porch swing and turned down the radio. His hands shook.

"Pretty torn up about it, yes, I guess I am," he said. "If it weren't for [my stepson] here and his gun, I'd been dead. We'd all been. Sure of that."

The man has lived for two dozen years with his wife, 79, and her son, 48, in the pretty red-brick house set back from the road in Seat Pleasant. They have watched the neighborhood change and they have become more and more afraid.

The man said he and his wife were getting dressed Monday morning when, he said, Ernest Lamont Chase, 31, tapped out the glass in the kitchen window and crawled inside. The elderly man met Chase coming down the hall.

"He grabbed me and pushed me over the bed and held my cane against my neck," said the man, who asked that neither his name nor address be printed because he fears retaliation.

"He said he wanted money. I hollered [to my stepson] and he come running."

Chase turned on the man's stepson with the cane and the two began struggling down the hall, through the kitchen and into the living room, breaking furniture as they went, the men said.

In the living room, the stepson, managed to reach under the cushions of his easy chair and get his gun, a 9mm Smith & Wesson pistol loaded with hollow-point bullets the men said.

"I only tried to clip the guy. Hit him low in the gut first, but he was crazy up on drugs or something and he just kept coming," the stepson said.

"I didn't have no choice but to aim at his head," he said.

Chase, who lived in Seat Pleasant, was pronounced dead at 12:40 p.m. at Prince George's Hospital Center, police said.

The stepson said police told him that Chase was shot seven times.

Officers found a folding knife with an eight-inch blade in Chase's pocket, the man said.

Chase had two convictions, a misdemeanor narcotics charge in 1985 and a burglary charge for which he received a six-month suspended sentence and three years' probation last September, according to court records.

Prince George's county police said yesterday they do not plan to file charges against the man who did the shooting.

A spokeswoman for the state's attorney office said that the office will review the case after police complete their investigation.

The stepson, stooped, whiskered and looking years older than 48, has been hunting since he was 5 years old and is no stranger to guns.

As he talked about killing a man—something he said he hoped he never would have to do—he sat his beer on the concrete slab of the front porch and tilted his chair against the brick.

His right eye was red with broken blood vessels, his nose bruised, his hand scraped.

The police, he said, arrived within a minute of his call, took many photographs and carried his 9mm pistol off with them when they left the house.

"Sure is a good gun. Hope I get it back," he said. "But if I don't, I got plenty of others."

Then he disappeared into the house and emerged a minute later. He hefted a .44 magnum pistol, nickel-plated and long in the barrel and pointed it at an oak tree across the yard.

He calls the gun "Dirty Harry."

"It's not a very good feeling to have to shoot someone," the stepson said. "Don't like it a bit, but I knew either he was going to be dead or I was going to be dead. I ain't dead."●

TERRY ANDERSON

● Mr. MOYNIHAN. Mr. President, today marks the 1,516th day of captivity for Terry Anderson in Beirut.

I ask that an October 25, 1986, article from Editor and Publisher magazine be printed in the RECORD.

The article follows:

THE BUCK STOPS HERE

(By M.L. Stein)

(Media accused of not doing enough to help free AP's Terry Anderson by condoning the Reagan administration's policy of "quiet diplomacy")

Relatives of two Americans being held hostage in Lebanon assailed the press last week for allegedly letting the Reagan administration get away with stalling on efforts to free them.

Describing her captive brother, Associated Press' Terry Anderson as a "truly dedicated journalist," Peggy Say told an audience of some 500 news executives: "We know what Terry Anderson did for you. Now I must ask the question: what have you done for Terry Anderson? He's a fellow journalist and he has been in deep trouble for 19 months. Have you reached out your hand to him? How long are you going to sit back and let him suffer while our government pursues the course of 'quiet diplomacy?' "

Say, who appeared on a panel, "The Festering Sore" at the Associated Press Managing Editors convention in Cincinnati Oct. 21, later charged at a news conference that "the press has not done its job" in seeking answers on the Lebanon hostage situation from the U.S. government.

She was joined on the panel by the Rev. Lawrence Jenco, a recently released hostage, and Eric R. Jacobsen whose father, David, has been held by guerrillas for more than 500 days.

Both Say and Jacobsen were bitterly critical of government reaction to the kidnappings, but they also scored the press for not asking tougher questions when administration officials claim they are seeking the hostages' freedom through "quiet diplomacy."

Say declared: "I have yet to hear anyone confront (President Reagan) and ask, 'what is quiet diplomacy?' Prove to us what you are doing. There has to be a time when we force the administration to acknowledge that quiet diplomacy is not working."

The panelists also disputed government statements that the captives are held by "faceless terrorists" or "shadowy figures," contending that the kidnappers have been identified.

The media should be more probing on this matter as well, they added. "How long are you going to let him (Anderson) suffer while our government pursues the course of quiet diplomacy?" Say demanded.

"For Terry Anderson the buck stops right here in this room. You're the people he put his behind on the line for. You're the smart guys . . . the ones who know how to ask the right questions. You know who to go to. You know how to make Terry Anderson an issue.

"Eventually, Terry will come out and he's going to ask, 'what did you do for me?' "

Jacobsen appealed to the press "as a catalyst of public concern . . . and as a watchdog of American rights, values and freedoms" to alert people to what he termed the "blatant inconsistencies" of the Reagan administration in handling the Lebanon hostage crisis.

Both Jacobsen and Say contended the Government made deals in the TWA hijacking and the arrest in Russia of American journalist Nicholas Daniloff, but refuses to take similar action in connection with their relatives and others held by Lebanese muslims.

"I want your help in finding out why representatives from U.S. News & World Report were welcomed to meet immediately with top White House and State Department officials, when we were denied this for months," Jacobsen told his press audience.

"I want to know," he continued, "why the administration is willing to communicate and even meet with Soviet officials, privately and publicly, but refuses to do the same for my father and the men with whom he is held."

Calling the press a "court of last resort," Jacobsen asserted "the time for cross-examination is long overdue. I ask you, as members of the news media, to assume your role as counsel for the defense of these innocent men. Too many questions have been left unanswered. Don't back off until you get the answers that are required."

Father Jenco said that "Perhaps the time has come to speak and write, not about terrorism, but the causes of terrorism. I believe the American people are asking why the Middle East is such a violent place. I would hope to see more articles on the causes, not the effects of terrorism."

Later, APME president James F. Daubel, editor and publisher of the Freemont (Ohio) News-Messenger, announced to the convention that a tape of the panel was being sent to the White House that day with an invitation for an administration representative to come to the conference and answer Say and Jacobsen's complaints.

Walter Mears, AP vice president and executive editor, said AP is "pursuing every avenue" for Anderson's release but he contended the time was not right to reveal the agency's file on the steps it has taken.

But later, Mears also raised some questions about the Reagan administration's handling of the Anderson matter.

"I have nothing against quiet diplomacy," Mears said, "as long as it is active quiet diplomacy and so long as it isn't covering up inaction. I continue to hope and trust that this is not the case and that there is a continuing process."

The theme of terrorism was continued in a luncheon speech by former New York Daily News editor Michael J. O'Neill, who suggested that the defunct National News Council might be revived to deal with media excess in covering hostage incidents.

O'Neill, author of the book Terrorist Spectaculars: Should TV Coverage Be Curbed? labeled television "overwhelmingly the dominant medium" in terrorism, adding that it not only covers such events but often becomes a participant."

Referring to the TWA hijacking, as a classic case in point, the speaker said: "In these conditions, television literally changes the course of events. It alters official positions. It affects outcomes."

O'Neill, who noted that he once opposed the National News Council, commented that it could be resurrected in a different form in which it would center on professional improvement, not passing judgment.

"Stripped of its judicial pretense," he explained, the Council could provide an independent forum for airing journalistic problems, its original intent.

Asked from the audience for more detail on his change of heart, O'Neill said he originally was against the Council because it consisted of a "bunch of judges. The whole atmosphere was wrong."

He said he would again fight a media council that attempted to impose judgment, but would support one that examined means of improving journalism.

The speaker asserted that reporters "should be citizens first and journalists second. In terrorism stories especially, where lives are at stake, they should show more restraint than their nature usually allows in revealing government tactics or military moves."●

ANNE FRANK DAY

● Mr. D'AMATO. Mr. President, I rise today to express my pleasure toward the passage of Senate Joint Resolution 65, a joint resolution honoring June 12 as Anne Frank Day. It is her rightful day of remembrance; she would have been 60 on June 12 had it not been for the Nazi Holocaust.

Nothing in modern history stained the soul of mankind more than the millions of innocent men, women, and children who suffered and died under the opressive hand of Adolf Hitler. The immense tragedy of the slaughter of over 6 million Jews in Europe during the Holocaust is of such enormity that it is sometimes lost on an individual. Through our own incomprehension we are sometimes anesthetized to an event which should remain seared in our memories forever.

In an attempt to prevent the world from ever repeating such evil, we keep vigilence so that the Holocaust, or oppression in any form, does not plague mankind again. Therefore, we honor June 12, Anne Frank's birthday, as Anne Frank Day. As this is the 44th anniversary of the liberation of Europe from Nazi control, the Anne Frank Center in New York City will be hosting the exhibit, Anne Frank in the World—1929-1945. This exhibit will be occurring simultaneously in Amsterdam and Frankfurt.

In New York City the center will be honoring professor Elie Wiesel of Boston University, who I have recommended for the Nobel Peace Prize, with the first annual Anne Frank award. Through the efforts of people like Anne Frank and Elie Wiesel, we are reminded of what we must never forget and we have been shown how indomitable the human spirit is.

We are reminded when we hear firsthand how a boy named Elie who was so hungry that he stole a piece of bread from his father on a train bound for Auschwitz—later to watch his father die before him—could become one of the foremost spokesmen for the hope of humanity. We are moved when reading a little girl's diary that conveys the fears, hopes, and frustrations of a 13-year-old, only to realize that this little girl is in hiding with her family delaying their inevitable death at the hands of a ruthless, occupying army. The inspiration we are provided by these and others like them is what allows us to emerge from such a human catastrophe and still believe that there is hope for mankind.

We always must keep in mind what Anne Frank means to us and how and why she died.●

NEW YORK CITY'S SCHOOLS CHANCELLOR RICHARD R. GREEN

● Mr. MOYNIHAN. Mr. President, today, I am saddened to inform my colleagues that New York City and New York State citizens have lost a valuable leader. Chancellor for the Public Schools of New York City, Richard R. Green died this morning. Chancellor Green was inauguarated in January 1988 and came to New York from the city of Minneapolis, where he served as superintendent of schools. His arrival was rightfully greeted with enthusiasm and hope.

Chancellor Green emerged as a child of Minneapolis' Sumer-Field housing project to become his hometown's first black high school athletic team coach, first black principal, and first black superintendent. He had attended local Augsberg College on a basketball scholarship and in 1973 earned a doctorate at Harvard, his education partially funded by local foundations. Chancellor Green had convinced these benefactors that it would be a good investment. He was correct.

His responsibilities in New York City would have been daunting to many. He had the assignment of caring for nearly 1 million children, responsible for their educational lives. Not a small task.

Mr. President, Chancellor Green accepted this challenge with innovation and concern. His first and foremost priority, he reiterated, was children. He consistently questioned how programs would affect children directly in the classroom. He viewed education as a year-round process and sought a connection between children and schools as early in life as possible. Next, he understood the importance of teachers. He worked to involve teachers in policy decisions and sought to instill a new respect for teachers. Finally, Chancellor Green knew that parents had to be involved in the education of their children.

With a realistic yet visionary eye, Chancellor Green saw the school as an integral, vital part of a modern, troubled community. In the New York Times, he stated: "I see schools as places that feed children, educate their parents, and provide early childhood education. Schools are the place where antidrug programs will take place and where AIDS will be debated and understood more clearly. They must become the most important fact of the urban community." I fully agree.

These were his goals, amidst a sprawling, difficult system. Chancellor Green did not balk before this system. He realistically recognized that schools had to be safe to be effective. He put the creation of new schools and the improvement of the physical plant as a high priority. He outlawed beepers—used by drug dealers—in schools and insisted that students attend school or face the consequences. It seemed to work.

Of course, as befits an able man assigned to a formidable task, expectations were great. But, Chancellor Green's priorities were not to meet every expectation placed upon him. His priority was children. As Chancellor Green stated at a meeting in Astoria, Queens, "It is children that bring me to this city." The city and the city's children shall not forget him or his work to improve the education and very lives of the children of New York City.●

NATIONAL BICENTENNIAL COMPETITION ON THE CONSTITUTION AND BILL OF RIGHTS

● Mr. GRASSLEY. Mr. President, during 1987 our Nation celebrated the bicentennial of the framing of the Constitution. In 1991, we will celebrate another bicentennial: the ratification of the Bill of Rights. Celebrations for these historic events create an opportunity to educate young people on the history and principles of the documents which formed our country's Government. Such an opportunity is available through the National Bicentennial Competition on the Constitution and Bill of Rights."

The competition is an extensive program to educate elementary and secondary school students.

I am proud that a team from Cedar Falls High School, Cedar Falls, IA,

represents Iowa. These fine young individuals have studied hard to reach the national finals.

The members of the Iowa team are: Chris Babinat, Melissa Barnholtz, Marc Barry, Jonathon Brundrett, Aaron Cain, Brooke Carey, Eric Collins, Warren Curry, Brenda Dahlin, Jackie Dewey, Aaron Durchenwald, Sarah Fisher, Barbara Franke, Nicole Frink, Jerod Gross, Matt Gutknecht, Jason Hamrock, Rick Hansen, Zach Johnson, Darcy Juhl, Susan Kerns, Kimberly Knight, Sheryl Rammelsberg.

These students were guided to their success by their instructor, Kelvin Schuchart. While also receiving assistance from the district coordinator, Linda Martin; and Barbara Romar, the State coordinator.

The competition was funded by Congress and cosponsored by the Commission on the Bicentennial of the U.S. Constitution. The program's curriculum, developed by the Center for Civic Education, is designed for a wide range of achievements, complementing regular school curriculum.

The curriculum focuses on the underlying principles of our constitutional democracy and constitutional history. It fosters civic competence and responsibility through better understanding of the Constitution and Bill of Rights.

Mr. President, the Constitution and Bill of Rights form the backbone of this great Nation. Educating our young people in the principles and values of the Constitution and Bill of Rights is paramount to civic consciousness. These young people are the future of America. Their decisions will form tomorrow's policies. I am proud of the students from Cedar Falls High School who represent Iowa. I commend each one of them on their hard work. It was indeed a pleasure meeting them during their stay in Washington.●

STANLEY PRIBYSON

● Mr. DODD. Mr. President, I would like to take this opportunity to comment on the recent passing of a good Democrat, a good American, and a dear friend of mine, Stanley Pribyson.

To the people of Connecticut, Stanley was a devoted public servant and a good citizen. After his retirement in 1980 from the position of District Director for the United States Savings Bonds Division of the Treasury Department, Stanley found he could not remain outside of public service, and 2 years ago he accepted Governor William O'Neill's invitation to serve on the Connecticut State Gaming Policy Board. He was active in a variety of charitable organizations, including the Hartford Lodge of Elks and the Knights of Columbus.

Stanley's service to the State and Nation spanned decades. In 1952 he ran for Congress, back in the days when Connecticut elected a representative at-large, in addition to representatives from districts. He served as adminstrative assistant to two U.S. Representatives, and held a variety of appointive posts in Connecticut.

Stanley also provided valuable service to me personally. He served for many years as an unofficial liaison to Connecticut's Polish community, providing me with valuable assistance in drafting legislation concerning immigration issues. He also was very helpful in connection with my visit to Poland several years ago.

The friendship between Stanley Pribyson and my family extends back to an earlier generation of Dodds. He was very close to my father Thomas Dodd, and provided at least as much service to my father as he did to me.

Stanley Pribyson was close to my family for a good number of years. It is rare that a person comes along who carries with him such a strong sense of service and devotion to a cause. I will greatly miss his assistance; I will miss his friendship even more.●

LOW-INCOME TAX CREDIT

● Mr. D'AMATO. Mr. President, I rise today in support of legislation introduced by my distinguished colleagues, Senators MITCHELL and DANFORTH, which improves and extends one of the most successful tax subsidies assisting low- and moderate-income families today. I am pleased to join my colleagues who have been key national leaders in the area of tax subsidies for housing and I look forward to working with them as the Congress designs a comprehensive national housing policy.

On December 31, 1989, the low-income housing tax credit will expire. This tax credit provides an efficient incentive to the private sector to produce housing for low- and moderate-income families. Created in 1986, this tax credit has proven to be a key form of gap funding to produce needed housing around the Nation.

The legislation introduced by Senators DANFORTH and MITCHELL makes the low-income housing tax credit a permanent program. This will rid the Congress of annual piecemeal extensions of the program. In addition, the legislation makes a number of improvements to the credit. Revisions have been made to use fully the allocated amount of tax credit, to extend the duration of low-income use, and to allow the tax credit to work effectively with tax-exempt bonds and other housing subsidies. In general, this legislation insures that the tax credit is responsive to the critical housing needs in a broad array of housing markets around the Nation.

Although the legislation makes a number of changes to the tax credit, it also continues some of the successful aspects of the program. The program continues to focus on those who are most in need. The credit is targeted to families with an income of 60 percent of less of the median, and it insures that these families pay no more than 30 percent of their income for rent.

As the ranking member of the Housing Subcommittee, I have worked closely with Senators MITCHELL and DANFORTH attempting to insure that tax subsidies for housing work in conjunction with direct housing subsidies. I have been impressed with the leadership exhibited by my two colleagues and I am uplifted by their commitment in focusing on our Nation's housing problems. As Senator CRANSTON and I continue our bipartisan effort to provide a comprehensive housing strategy for our Nation, I look forward to a continued working relationship with the leaders in this area on the Finance Committee.●

THE ACT FOR BETTER CHILD CARE [ABC], S. 5

● Mr. BREAUX. Mr. President, I have asked to be added to S. 5 the Act for Better Child Care, as a cosponsor. I have chosen to do this because there is a great need for more and better child care facilities in Lousiana and throughout the United States. This need has gone unaddressed for too long, and I would like to see child care legislation passed as soon as possible.

I would, however, like to take this opportunity to express a few concerns that I have about specific provisions in the ABC bill.

Nationally, about one-third of all child care services are provided by religiously based child care facilities. The important role of church-based child care is, if anything, greater in Lousiana than elsewhere. The current provisions of S. 5, as approved by the Senate Committee on Labor and Human Resources, were they to be broadly interpreted, carry the potential of limiting the availability of child care from this source. Our goal here is to increase access, so we must be very careful how we proceed. I would favor an approach that placed a greater priority on ensuring that parents had the option of placing their children in settings of their own choosing, and this includes the church-based option.

S. 5 calls for the development of national minimal standards for federally supported child care. I support the concept of reasonable minimum standards, especially in the areas of health and safety. There are more than enough precedents wherein Federal programs require that minimum standards be met as a condition of funding. I am not convinced that the

proper forum for the development or enforcement of minimum standards should lie so heavily with the Federal Government. I would favor a greater role for the States in developing, implementing, and enforcing standards for child care.

In voicing my support for the ABC bill, I do not mean to rule out my support for some of the other approaches to the child care issue that have been proposed. President George Bush has expressed a commitment to improving the day care situation in the United States, and has put forward his own proposal. I believe that we should give due consideration to the needs of mothers who choose to stay at home and care for their children, or place their children in less formal child care arrangements.

Again, Mr. President, I feel strongly that we need to move quickly to address the day care crisis. We need to develop a national commitment not only to getting assistance to low income families for their immediate day care needs, but a means of building the child care infrastructure, which is now sorely lacking.

The ABC bill is the immediate vehicle for consideration and I am confident that, building on this measure, we can quickly address the need for child care in a fair, bipartisan way, that takes into account the varying needs of families throughout the United States.●

SENATE REPUBLICAN CONFERENCE TASK FORCE ON HISPANIC AFFAIRS

● Mr. CHAFEE. Mr. President, I want to call the Senate's attention to the efforts of the Senate Republican Conference Task Force on Hispanic Affairs. Comprised of Senators ARMSTRONG, D'AMATO, DOLE, DOMENICI, GRAMM, GRASSLEY, HATCH, MACK, MCCAIN, SIMPSON, WILSON, and myself, our task force seeks to examine the impact of public policy on the Hispanic community in such areas as economic development, employment, education and literacy, health care and others. It also provides a forum for Hispanic Americans to raise awareness and support on the national level for key issues facing the Hispanic community.

Founded in October 1987, the task force concentrated its efforts during the 100th Congress on studying some of the major problems facing the Hispanic community. After a series of meetings and inquiries, and with the contributions of Hispanic Americans around the country, the task force released an initial report entitled, "Hispanics: Talent for America's Future." The report's recommendations included:

Improved employment recruitment of Hispanics in managerial and professional positions in the public and private sector.

Expansion of Hispanic literacy programs through public/private partnerships.

Improved access to bonding and insurance for small minority firms.

Increased health and disease prevention efforts in the Hispanic community, with particular emphasis on combating AIDS.

During the 101st Congress, the task force is committed to taking action on these issues. A Conference on the Hispanic Work Force, sponsored by the task force, was held on May 4. This conference brought together government officials, corporate executives, Hispanic American businessmen and community leaders to focus on ways to improve job training initiatives and education and literacy programs in the Hispanic community.

Minority job training and education are issues of profound importance for America's future. As we approach the year 2000, our work force will need many well-skilled, highly trained workers. Hispanic Americans will be a major element of the new work force. This conference highlighted programs in the public and private sector that have been successful in training those in need.

I particularly want to praise the efforts of my colleague from Utah, Senator HATCH, who is chairman of the Task Force on Hispanic Affairs. Senator HATCH has taken the lead on the task force by providing his time and staff to meet with members of the community, and by working with them to address the needs of all Hispanics.

In addition, Senator HATCH and others have formed an advisory committee comprised of prominent Hispanic Americans, corporate and government officials, and leaders from major national Hispanic community organizations. I want to commend the members of this group for their assistance to the task force by providing information about community initiatives and by participating in task force activities in Washington at their own expense.

Mr. President, the Hispanic community is the fastest growing population group in the United States. The members of the Task Force on Hispanic Affairs recognize the diverse contributions being made by the members of our Hispanic communities. The task force will continue to explore the steps necessary to ensure the full participation of Hispanics in all aspects of American life.●

THE REBARBARIZATION OF AMERICA

● Mr. SIMON. Mr. President, one of the things that we have not recognized in this country is that we have an underclass.

We are increasingly segregating ourselves on the basis of economics, and the poor become more and more distant from us, usually concentrating in certain areas of urban America, though pockets of rural poverty abound in this Nation, too.

Recently, George Will, whom no one would describe as a flaming liberal, had a column that was in the Los Angeles Times titled, "The Rebarbarization of America."

George Will simply describes what is happening.

He does not propose solutions, but he at least is facing reality.

That is something our society has not done.

I urge my colleagues in the House and Senate and their staffs to read George Will's column, and I ask to insert it in the RECORD at this point.

The column follows:

THE REBARBARIZATION OF AMERICA—TO WALK AMID THE UNDERCLASS IS TO GLIMPSE SOCIAL REGRESSION

(By George F. Will)

CHICAGO.—The police cruiser crawls like a cockroach across worn linoleum through the concrete and grassless dirt of an urban lunarscape called Cabrini Green. It is a public-housing project on the Near North Side, not far from the posh shops of Michigan Avenue's "Magnificent Mile" and cheek-by-jowl with some gentrified yuppiedom.

This cluster of high-rise and half-abandoned buildings is a dispiriting beat for the two police officers who give their passenger a laconic lecture on their experiences as part of the half-hearted pretense of government in the project. They describe which gangs control which buildings, which weapons are used in the sporadic fire-fights that erupt between building-fortresses, how many foolhardy people have been hit by snipers while trying to cross the free-fire zone between buildings.

Public housing, particularly in high-rise configurations, usually is a concentration of pathologies. During today's drug plague, public housing has become recrudescent of the worst of the American frontier—Dodge City without a marshal.

So, you modern-day Jeffersonians, you who think that government is best that governs least: Welcome to your world. It is Hobbes' world, where life is always poor, nasty and brutish, and often short. Public housing here is anarchy tempered by juvenocracy—power wielded by adolescents.

Cabrini Green will eventually be eradicated by the most powerful and revered social force, the real-estate market. Developers are salivating for these 70 or so acres near good shopping. The concentrated pathologies will be shuffled away, perhaps even dispersed. But they will be reconcentrated daily in the public schools.

In a series of hammer-blow reports, the Chicago Tribune has documented its characterization of this city's school system as "institutionalized child neglect." The bureaucracy and teachers' union are culprits. However, the reports rightly stress that two-thirds of the students live in poverty and come to school from environments of deprivation that would defeat the best intentions of even the best school system.

One high school provides day care for the children of its students, 90% of whom come

from public housing. At another school, a 14-year-old girl is in her third pregnancy. "Another student," the Tribume reports. "sleeps with five other children on three piled-up mattresses in an unheated apartment. During the winter the boy often came to school smelling of urine, because it was too cold for the smaller kids to get up and go to the bathroom at night." A teacher asks, "How can you learn when people tell you you smell of piss, and you do?"

Some sixth-graders, never having used rulers, do not know how many inches are in a foot. Some 8-year-olds from homes without books tear pages from school books to use as toilet paper. Some children come to kindergarten still not toilet-trained. There are first-graders who have not learned numbers or colors. "A teacher," says a teacher, "cannot take mom and dad's place. What am I going to accomplish when mom doesn't take the time to pick up a can of peas and say, "Green! Round! Peas!'?"

This panorama of pain, waste and the perpetuation of squalor and violence is a chilling example of rebarbarization. It is the eruption of primitivism in the midst of urbanity. Let us have no more abstract arguments about the relative importance of nature and nurture in the formation of individuals. Look around here, and in all other cities, and you will see the consequences of the abandonment of nurturing.

In Anne Tyler's novel "Breathing Lessons," a woman attending classes to prepare for natural childbirth exclaims, "Breathing lessons—really. Don't they reckon I must know how to breathe by now?" To which a wise woman responds, "I remember leaving the hospital with Jesse and thinking. 'Wait. Are they going to let me just walk off with him? I don't know beans about babies.' "

She continues: "You're given all those lessons for the unimportant things—piano-playing, typing . . . But how about parenthood? . . . Before you can drive a car, you need a state-approved course of instruction, but driving a car is nothing, nothing, compared to . . . raising up a new human being."

In any city in any age, a walk among the underclass is apt to be a walk on the wild side, with glimpses of deeply moving bravery, tenacity and heroism in nurturing. However, the drug epidemic and the disintegration of families under the pounding of today's urban poverty is giving us a glimpse of how much social regression can occur in a modern society.

What is called the "cycle" of poverty is actually a downward spiral. The spiral tightens, gaining speed, because so few people live in Cabrini Green and similar places who give—or learn—lessons in the important things.●

CONGRATULATIONS TO DONALD ZINN

● Mr. D'AMATO. Mr. President, I rise today to honor the significant achievements and contributions of Donald Zinn, New York State's Small Businessperson of the Year.

The purpose of this award is to recognize the accomplishments of the most successful small business owners in New York State. The criteria for selection are extremely competitive. Candidates are rated on a scale of one to five in categories such as growth in number of employees; increase in sales and/or unit volume; and evidence of contributions by nominee to aid community-oriented projects.

To earn this distinction, Mr. Zinn helped launch Management Dynamics, a Yonkers-based management consulting firm. Starting in 1980 with only four employees, his organization has since grown 823 percent, with 1988 sales of $3.5 million. His clients include General Electric, Tropicana, Pepsico, Citicorp, General Foods, and Merrill Lynch, Mr. Zinn also serves on the board of directors of the professional services section of ADAPSO—a computer industry trade association—and works in a special program designed to help the handicapped become productive by extending technology to their communities.

After work, Mr. Zinn serves his community as a Cornell University ambassador to local high schools and as a volunteer for ADAPSO's careers 2000, a project to guide young students toward careers in computer industries. As a Senator from New York, I am proud to represent such an outstanding citizen and I congratulate him for his accomplishments.●

VIVA CINCO DE MAYO

● Mr. SIMON. Mr. President, I rise today to commemorate the 127th anniversary of a great day for our neighbors to the South and to Americans of Mexican ancestry. Last Friday was Cinco de Mayo, the fifth of May.

In the early morning hours of May 5, 1862, the French General Laurencez positioned 6,000 troops for an advance on the Mexican city of Puebla de los Angeles. Shortly before noon, a young 33-year-old Mexican General, Ignacio Zaragoza, and his 3,600 soldiers held back the first attack. The French warriors, thought to be the best army of its day, launched a second attack at the forts of Laredo and Guadalupe. They, too, were repelled. A third, and then a fourth, attack on the Mexican city failed. The French army retreated to Orizaba and the victory of "Cinco de Mayo" was declared.

About Cinco de Mayo, a Mexican historian once wrote: "Cinco de Mayo was a lesson of faith for our people, an injection of optimism, an example of valor and character, a moral resurrection, in a word, the most beautiful page of independent Mexico." One of my constituents, Margarita Esquiliano of Chicago, said it this way in last Friday's USA Today, "For us, for Mexican people, it's important because we know little people can win big wars."

Today, the United States of America and the United States of Mexico share more than a common border. We face uncommon challenges and, together, enjoy the potential for uncommon opportunities. But these opportunities require working together, be it on immigration policy, economic development, or water and energy programs.

It has been said that the Cinco de Mayo victory prevented Napoleon III from gaining the base he needed to assist the Confederate States in lifting the blockade of their ports which conceivably would have affected the outcome of our own Civil War. There is no doubt, therefore, that what Mexico experiences, we experience.

Yesterday, Chicago held a Cinco de Mayo parade down Cermak Road. I join the tens of thousands of Mexican-Americans in Illinois and the millions around the Nation in celebrating the victorious spirit of their ancestors on Cinco de Mayo.●

I KNOW HOW TO ASK FOR WHAT I WANT

● Mr. SIMON. Mr. President, one of the ways we test whether we are a civilized society is how we treat those who are less fortunate.

We are gradually doing better in terms of the disabled of our country, but we still have a long way to go.

One of the most encouraging recent articles I have read is a moving article that appeared in Parade magazine entitled, "I Know How To Ask For What I Want," by Lou Ann Walker.

It is one person's perspective on the story of the deaf in this country.

I encourage my colleagues in the Senate to read the article.

In my years in the private sector and now as a U.S. Senator, I have had the chance to employ those who are deaf. This Nation is much better off with the talents and resources of all of our people, including those who are deaf. But this also applies to those with other handicaps.

I urge my colleagues in the House and Senate to read this article, if they have not already.

I ask, Mr. President, to have the article inserted in the RECORD at this point.

The article follows:

I KNOW HOW TO ASK FOR WHAT I WANT

Just a year ago, Gallaudet University in Washington, D.C., the only liberal arts college for deaf people in the world, chose its first deaf president. This exercise in self-determination came after a dramatic week in which students and faculty, as well as deaf people around the world, banded together to let the administration know that they refused to have a hearing person who knew no sign language—and who had never had contact with deaf culture—govern their college. It was a terrible insult, they declared. Hearing people were once again saying that deaf people couldn't even take care of themselves.

The incident had special meaning for me. Both my parents have been deaf since infancy. I ached as my father recounted to me, in sign, what had happened to him just a few months before the Gallaudet uprising. My father spent his entire adult life working tirelessly for organizations for deaf people. And the crowning point of his life

was when the governor of Indiana asked him to be on an advisory board—the only deaf person on that board—for the Indiana School for the Deaf. Suddenly he found himself under attack by hearing teachers from the school who said he didn't have adequate credentials—even though my father, a newspaper printer, had been asked to advise on vocational programs. Finally, a deaf teacher from the school pulled my father aside to explain: "Hearing people don't want to give up the power."

As a hearing child with deaf parents, I had straddled the hearing and deaf worlds, acutely aware of the ways people misunderstand each other. All the stares our familiy got when we talked in sign made us feel like outsiders.

My parents' lives were filled with inconveniences: having to drive all the way to the dentist's office to make an appointment instead of just picking up the phone; having someone turn his head just as they were lipreading his directions. And large frustrations: There is the sobering knowledge that deaf people can't hear cars careening around corners, that they've been shot in the back by policemen when they haven't heard a command to halt. Once, my parents' house caught fire. Frantically, my father searched for my mother—unable to hear her cries—ignoring third-degree burns on his legs.

Over the years I've heard many alarming stories. A woman spent 57 years at a Washington, D.C. home for the mentally retarded because she had been misdiagnosed. Her IQ was normal; she was simply deaf. In Oregon, Florida and Michigan, officials took children away from their natural parents just because the parents were deaf. The children were returned only after long legal battles. In another instance, a deaf man went in for surgery. When he awoke, he was missing his right hand—both his communication and his livelihood. The doctors had never bothered to explain how extensive the operation would be. All over the country, deaf people have been arrested—even convicted of serious crimes—without having a qualified interpreter.

But what hurt the most was seeing people treat my bright, loving parents as if they were not intelligent, just because they had "broken ears." All my life, I've watched my father's quiet determination. As a child, whenever I went to him with a broken toy, he would take it in his strong hands and study it. He'd nod, carry it to his workbench and, no matter how long it took, he would work on it until the toy was repaired. I have seen this trait in other deaf people: persistence, perseverance. "We'll find a way," my father says.

And so when the Gallaudet administration announced a hearing president last year, there was an explosion—the culmination of years of being ignored. Yet the week was also a model of civil disobedience: No one was hurt, no property damaged. Students boycotted classes and closed the campus. Professors joined them. They marched to the Capitol and listed their demands succinctly: Deaf people need to take care of themselves. Why bother to give us higher education if we will never be allowed to use it?

Roslyn Rosen, a lively, beautiful, dark-haired deaf woman and educator, told me that one of the best repercussions of the Gallaudet protest is visibility—for an invisible disability. "Parents of deaf children all over the U.S. saw deaf people on TV," she signed to me. "They may never have had contact with a deaf adult before, but they learned what deaf people can do."

When I. King Jordan was named the eighth president of Gallaudet since its founding in 1864, people at the school were overjoyed. Jordan, who became deaf at age 21 in a motorcycle accident and who was a psychology professor, is an extremely popular choice because he is so down-to-earth. Students and faculty say there is far more communication than in previous administrations. Jordan has been talking actively to Congressmen about Gallaudet. "It used to be that everyone focused on the disability," he says. "Now it's on the ability. It is a real revolution." Congress has just passed a law to launch a National Institute on Deafness and Other Communication Disorders, which will lead the nation in research. The board of trustees has named a deaf person as its chairman: Philip Bravin. For the time being, all future vacancies on the board will be filled with deaf people—until they constitute a majority of the board.

The changes in the last year have been incredible, says Jordan. Gallaudet's budget was increased by several million dollars after cuts in previous years, and people from all over the country sent donations after the protest. Jordan wants the university to become more self-sustaining and less reliant on government funds. Enrollment at the school is up. So is the quality of students.

"And you can't believe the number of Congressmen and their staff members who are taking sign-language classes," Jordan exclaims. Indeed, around the country, public schools and colleges are teaching American Sign Language (ASL)—the subtle, beautiful language deaf people use—as a full-fledged foreign language.

More people are starting to research technological advances for the deaf, such as devices that synthesize speech and can change spoken words into written ones. Superchips are being developed for TVs so that closed-captioning can be seen on more sets. And people are using technology in better ways. When Jordan started teaching at Gallaudet, there was a television setup, but deaf students weren't encouraged to work in many of the jobs. Today, that has changed. Simply by using a TV screen and camera, a deaf director can sign to a deaf technician in the control booth about what needs to be done.

"There's a new respect for deaf people," Roslyn Rosen says. "They're feeling more assertive."

Greg Hlibok, one of the leaders during Gallaudet's "Deaf President Now" week, has changed his major from engineering to government. He hopes to become a lawyer and work on behalf of deaf clients. "There will be a brighter future for deaf children," Hlibok says. "The pride within deaf people has grown."

Bridgetta Bourne, another Gallaudet student leader, says that hearing people have become more sensitive. At first, she says, many hearing people overreacted to the deaf people's demands, and many hearing faculty members feared for their jobs—until they learned that the deaf people wanted to work with them as equals. Not all deaf people want to use sign language, Greg Hlibok points out, but in touring the country during summer break and talking to parents of deaf children, he emphasized that hearing parents need to be able to communicate well with their deaf children and must find the best way of doing that.

Looking into the expressive faces of deaf people at Gallaudet, I see real joy. Over the years, these people have had to develop their own kind of spunk. Bridgetta Bourne told me about spying a "Help Wanted" sign in a pizza parlor in her hometown. She went in to apply for the job. The owner told her it was filled. When she walked by later that day, the sign was up again. This time the small, energetic Bourne marched in announcing, "I can work for you! I worked at another restaurant." Finally, the owner decided to give her a chance. "It turned out he was glad he hired me, she says. "I even got his daughter to stop running away from home. After I left he hired another deaf fellow."

Mary Malzkuhn, now a government professor, vividly recalls her mother having long discussions about her when she was a child, yet when Mary asked what was being said, she was brushed aside. And she chafed at being told what she couldn't become. "Those barriers aren't there anymore," she says, looking dreamily out a classroom window. "I won't let them be. I know how to ask—in a nice way—for what I want."

Rosyln Rosen says that because deaf people stood up for themselves, they created a milestone in the history of deaf people. The reverberations will be felt for generations to come.

And I have seen a change within my own family. My parents' lives have been a struggle for dignity. Yet now in restaurants and shops, people who would once have acted chilly are friendly. The hearing teachers who complained about my father's appointment stopped grumbling, suddenly realizing how important it is for deaf people to govern themselves. And now my father has a new struggle on his hands: There have been calls to close the Indiana School for the Deaf—as well as other schools for the deaf around the country. My father doesn't want that. He feels many deaf people need a place of their own, a place where they are understood.●

ORDERS FOR TOMORROW

RECESS UNTIL 10:45 A.M. TOMORROW

LIVE QUORUM CALL

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 10:45 a.m. tomorrow, Thursday, May 11, and that following the prayer, the Senate conduct a live quorum call.

The PRESIDING OFFICER. Without objection, it is so ordered.

ARTICLES OF IMPEACHMENT WITH RESPECT TO JUDGE WALTER L. NIXON, JR.

Mr. MITCHELL. Mr. President, upon the establishment of a quorum, the managers on the part of the House of Representatives will be admitted to present the articles of impeachment with respect to Judge Walter L. Nixon, Jr. All Senators should remain on the floor to be sworn pursuant to article 1, section 3, clause 6 of the Constitution as the Senate commences the preliminary procedures in trying the impeachment of Judge Nixon.

LEADER TIME AND MORNING BUSINESS

Mr. MITCHELL. Mr. President, following the completion of these procedures and the disposition of any resolution related to these proceedings, I

ask unanimous consent that there then be time for the two leaders, followed by a period for the transaction of routine morning business, not to extend beyond 1 p.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROVIDING FOR THE APPOINTMENT OF A COMMITTEE TO RECEIVE AND TO REPORT EVIDENCE WITH RESPECT TO THE ARTICLES OF IMPEACHMENT AGAINST JUDGE ALCEE L. HASTINGS

Mr. MITCHELL. Mr. President, for myself and the distinguished Republican leader, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 123) to amend Senate Resolution 38, 101st Congress, providing for the appointment of a committee to receive and report evidence with respect to the articles of impeachment against Judge Alcee L. Hastings.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maine?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 123) was agreed to, as follows:

S. RES. 123

Resolved, That section 6 of Senate Resolution 38, 101st Congress, is amended to read as follows:

"SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the Committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay."

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING A FIRST STRIKE CEREMONY AT THE U.S. CAPITOL FOR THE BICENTENNIAL OF THE CONGRESS COMMEMORATIVE COIN

Mr. MITCHELL. Mr. President, on behalf of Senator BYRD, myself, and Senator DOLE, I send a joint resolution to the desk and ask for its immediate consideration. The joint resolution authorizes a ceremony here at the Capitol for the first strike of the bicentennial of the Congress commemorative coin.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 128) authorizing a first strike ceremony at the United States Capitol for the Bicentennial of the Congress Commemorative Coin.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maine?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. BYRD. Mr. President, this is a joint resolution to authorize a first strike ceremony on June 14, 1989, Flag Day, at the U.S. Capitol for the bicentennial of the Congress commemorative coin. Under this resolution authority is granted for such a ceremony to be conducted on the Capitol grounds, and for the appropriate congressional offices to make arrangements necessary to prepare for and conduct this event. The joint resolution will also allow the U.S. Mint to strike coins authorized by the bicentennial of the U.S. Congress Commemorative Coin Act in Washington, DC, during the ceremony authorized by this joint resolution.

The Coin Act was passed in the 100th Congress to authorize the minting of $5 gold coins, $1 silver coins, and half dollar clad coins with designs emblematic of the bicentennial of the U.S. Congress. A significant portion of the surcharges received from the sale of these coins will be deposited in the Capitol preservation fund for restorations and improvements in the U.S. Capitol building as Congress' lasting bicentennial gift to the American people. The balance of the surcharges received by the Secretary of the Treasury shall be deposited in the general fund of the Treasury for the sole purpose of reducing the national debt.

The first strike ceremony authorized by this joint resolution will be a historic occasion on which U.S. coins will be minted for the first time at other than a U.S. Government Mint facility. Certainly, the grounds of the U.S. Capitol on Flag Day will provide a beautiful and fitting location to strike the first several coins minted to commemorate the bicentennial of the Congress, especially where proceeds from this coin will go toward the restoration and improvement of our "shrine of democracy," the Capitol.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 128

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF A FIRST STRIKE CEREMONY AT THE UNITED STATES CAPITOL FOR THE BICENTENNIAL OF THE CONGRESS COMMEMORATIVE COIN.

(a) On June 14, 1989, or any other date that the President pro tempore of the Senate and the Speaker of the House of Representatives jointly designate, a first strike ceremony may be conducted at the United States Capitol and on the Capitol Grounds to strike coins authorized by the Bicentennial of the United States Congress Commemorative Coin Act (P.L. 100-673).

(b) All activities of and preparations for the ceremony authorized by subsection (a), including the striking and distribution of coins, shall be jointly coordinated with the Commissions on the Bicentennials of the United States Senate and the United States House of Representatives and the Secretary of the Treasury.

(c) Notwithstanding the Bicentennial of the United States Congress Commemorative Coin Act or any other provision of law, the United States Mint may strike coins authorized by the Bicentennial of the United States Congress Commemorative Coin Act in Washington, DC, during first strike ceremonies conducted as authorized by subsection (a). Such coins shall bear the mint mark of the mint facility which is designated to strike the coins.

SEC. 2. RESPONSIBILITY OF CONGRESSIONAL OFFICERS AND PHYSICAL PREPARATIONS.

(a) Under the direction of the President pro tempore of the Senate and the Speaker of the House, the Secretary of the Senate, the Clerk of the House, the Architect of the Capitol, and the Capitol Police Board shall take any action necessary to carry out section 1.

(b) The Architect of the Capitol may prescribe conditions for physical preparations for the ceremony authorized in section 1.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE 1989 LAW ENFORCEMENT TORCH RUN FOR SPECIAL OLYMPICS THROUGH CAPITOL GROUNDS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Rules Committee be discharged from further consideration of House Concurrent Resolution 71, a concurrent resolution authorizing the 1989 law enforcement torch run for the Special Olympics to be run through the Capital Grounds, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 71) authorizing the 1989 law enforcement torch run for Special Olympics to be run through the Capitol Grounds.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Maine?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 71) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL OSTEOPOROSIS PREVENTION WEEK

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 37.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 37) entitled "Joint resolution designating the week beginning May 14, 1989, as "National Osteoporosis Prevention Week of 1989", do pass with the following amendments:

Page 2, line 3, strike out "1989, is", and insert "1989, and the week beginning May 13, 1990, are".

Page 2, line 4, strike out "of 1989".

Amend the title so as to read: "Joint resolution designating the week beginning May 14, 1989, and the work beginning May 13, 1990, as 'National Osteoporosis Prevention Week'."

Mr. MITCHELL. Mr. President, I move that the Senate concur in the amendments of the House.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maine.

The motion was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations:

Calendar Order No. 100, Paul D. Wolfowitz to be Under Secretary of Defense for Policy; Calendar Order No. 104, Eric I. Garfinkel to be an Assistant Secretary of Commerce; Calendar Order No. 105, Constance Horner to be Under Secretary of Health and Human Services; Calendar Order No. 106, Mary Sheila Gall to be Assistant Secretary of Health and Human Services; Calendar Order No. 108, Charles H. Dallara to be a Deputy Under Secretary of the Treasury; Calendar Order No. 109, Hollis S. McLoughlin to be an Assistant Secretary of the Treasury; Calendar Order No. 110, Roger Bolton to be an Assistant Secretary of the Treasury, and Calendar Order No. 111, Kay C. James to be an Assistant Secretary of Health and Human Services.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, and that the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en block are as follows:

DEPARTMENT OF DEFENSE

Paul Dundes Wolfowitz, of the District of Columbia, to be Under Secretary of Defense for Policy.

DEPARTMENT OF COMMERCE

Eric I. Garfinkel, of Maryland, to be an Assistant Secretary of Commerce.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Constance Horner, of the District of Columbia, to be Under Secretary of Health and Human Services.

Mary Sheila Galkl, of Virginia, to be an Assistant Secretary of Health and Human Services.

DEPARTMENT OF THE TREASURY

Charles H. Dallara, of South Carolina, to be a Deputy Under Secretary of the Treasury.

Hollis S. McLoughlin, of New Jersey, to be an Assistant Secretary of the Treasury.

Roger Bolton, of Virginia, to be an Assistant Secretary of the Treasury.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Kay Coles James, of Virginia, to be an Assistant Secretary of Health and Human Services.

LEGISLATIVE SESSION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. MITCHELL. Mr. President, I want to call to the attention of Senators the fact that there will be a live quorum tomorrow morning commencing at about 10:45 a.m. and that, upon the establishment of a quorum, the managers on the part of the House of Representatives will present the articles of impeachment with respect to the proceedings against Judge Walter L. Nixon. All Senators should be present and remain on the floor to be sworn and to receive the House managers and their presentation.

RECESS UNTIL TOMORROW AT 10:45 A.M.

Mr. MITCHELL. Does the distinguished Republican leader have any further business?

Mr. DOLE. I have nothing.

Mr. MITCHELL. If no Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess under the previous order until 10:45 a.m. on Thursday, May 11.

There being no objection, the Senate, at 5:11 p.m., recessed until Thursday, May 11, 1989, at 10:45 a.m.

NOMINATIONS

Executive nominations received by the Senate May 10, 1989:

ENVIRONMENTAL PROTECTION AGENCY

FRANK HENRY HABICHT II, OF VIRGINIA, TO BE DEPUTY ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY, VICE A. JAMES BARNES, RESIGNED.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 10, 1989:

DEPARTMENT OF THE TREASURY

CHARLES H. DALLARA, OF SOUTH CAROLINA, TO BE A DEPUTY UNDER SECRETARY OF THE TREASURY.

DEPARTMENT OF COMMERCE

ERIC I. GARFINKEL, OF MARYLAND, TO BE AN ASSISTANT SECRETARY OF COMMERCE.

DEPARTMENT OF THE TREASURY

HOLLIS S. MCLOUGHLIN, OF NEW JERSEY, TO BE AN ASSISTANT SECRETARY OF THE TREASURY.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

CONSTANCE HORNER, OF THE DISTRICT OF COLUMBIA, TO BE UNDER SECRETARY OF HEALTH AND HUMAN SERVICES.

MARY SHEILA GALL, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF HEALTH AND HUMAN SERVICES.

DEPARTMENT OF THE TREASURY

ROGER BOLTON, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF THE TREASURY.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

KAY COLES JAMES, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF HEALTH AND HUMAN SERVICES.

DEPARTMENT OF DEFENSE

PAUL DUNDES WOLFOWITZ, OF THE DISTRICT OF COLUMBIA, TO BE UNDER SECRETARY OF DEFENSE FOR POLICY.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

HOUSE OF REPRESENTATIVES—*Wednesday, May 10, 1989*

The House met at 2 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O gracious God, as Your loving spirit has inspired people through all the years to do the good works of grace, so inspire us to be good stewards of that same grace by doing the deeds of justice and mercy in our time and day. Make broad our vision, O God, so we see holy tasks, not only in temples of stone and glass, but in the concerns before us, in the responsibilities of our work, and by an attitude of respect with all those people we meet. Bless us this day and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Would the gentleman from California [Mr. GALLEGLY] please come forward and lead our colleagues in the Pledge of Allegiance.

Mr. GALLEGLY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 135. Joint resolution to designate the week beginning May 7, 1989, as "National Correctional Officers Week."

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 65. Joint resolution designating June 12, 1989, as "Anne Frank Day."

The message also announced that Mr. ARMSTRONG be a conferee, on the part of the Senate on the concurrent resolution (H. Con. Res. 106) entitled "Concurrent resolution setting forth the congressional budget for the United States Government for the fiscal years 1990, 1991, and 1992," vice Mr. KASTEN, excused.

APPOINTMENT AS MEMBERS OF THE COMMISSION ON THE UKRAINE FAMINE

The SPEAKER. Pursuant to the provisions of section 4(a) of title 5, Public Law 99-180, the Chair appoints as members of the Commission on the Ukraine Famine the following Members on the part of the House:

Mr. HERTEL of Michigan, Chairman;
Mr. DORGAN of North Dakota;
Mr. BROOMFIELD of Michigan; and
Mr. GILMAN of New York.

PROFESSIONAL MILITARY EDUCATION REPORT

(Mr. SKELTON asked and was given permission to address the House for 1 minute.)

Mr. SKELTON. Mr. Speaker, last week the Committee on Armed Services, the Panel on Military Education, of which I am chairman, issued the 206-page report calling for improvement in the intermediate and senior level educational programs of the four armed services, the war colleges and command and general staff schools.

Our charter was to assess the Defense Department's ability to develop professional military strategists and to review the joint professional military education requirements of the Goldwater-Nichols Act of 1986. Through the course of the 17-month effort the panel visited all 10 of the military colleges and held 28 hearing with 48 witnesses.

Our effort was the first congressional review of our professional military education. While the American military system is basically sound, improvements can be made. We have a number of suggestions to strengthen the system which will combine greater operational competence in the military level with sound management and strategic thinking at the national political level. Starting tomorrow, Mr. Speaker, I will give a series of floor speeches during special orders on our recommendations. We can make our military educational system even better, and as a result, have a stronger national security.

PROPOSED FSX AGREEMENT SACRIFICES COMPETITIVENESS

(Mr. ERDREICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ERDREICH. Mr. Speaker, we cannot judge defense sales entirely on issues of alliance management or defense cooperation. The proposed FSX fighter aircraft agreement between the administration and the Japanese Government raises broader concerns of our economic survival in an increasingly competitive world. Economic competitiveness is and must be a necessary component of our national security policy.

This proposal sacrifices the long-term competitiveness of the U.S. aerospace industry. It allows vital U.S. technologies to be freely transferred to Japanese firms, greatly helping their aircraft industry compete with American businesses. If this is the best deal the Pentagon could obtain, then I would rather have no deal.

At the earliest, the FSX will be operable in 1997, but Japan's defense needs are immediate. By purchasing F-16's or other top of the line United States fighter planes, Japan can meet their present national security goals and strengthen our bilateral relationship by reducing the $55 billion trade deficit that exists between our two countries. Those huge trade deficits take jobs from Alabama and America. We should pursue agreements to reduce those deficits.

The FSX agreement is a poor deal for the United States. The time has come for us to stand up for America's economic self-interest. Wake up, Uncle Sam; American jobs and our competitiveness are at risk.

LEGISLATION EXCLUDING TAXATION ON SALE OF PRINCIPAL RESIDENCE

(Mr. SCHULZE asked and was given permission to address the House for 1 minute.)

Mr. SCHULZE. Mr. Speaker, a debate in the Congress is raging on the proper tax treatment of capital gains income. One central part of this debate must not be ignored—the treatment of real estate.

For any capital gains proposal to be seriously considered by this body, it must be perceived as fair and beneficial to all Americans. The Bush proposal, while a good start, does not go far enough in attracting middle income investors. It excludes depreciable real estate.

Legislation I have introduced, H.R. 1287, excluding 100 percent of the gain of the sale of a principal residence from taxation, would bring the Bush proposal the public support it needs to gain serious consideration. I urge my colleagues to cosponsor my legislation

and protect the American dream of homeownership from the ravages of inflation.

Any capital gains solution must include real property—the backbone of taxpayer investment in America.

STOP THE FSX DEAL

(Mr. LIPINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIPINSKI. Mr. Speaker, the FSX deal is another sign of the United States undermining its own economic competitiveness worldwide.

If Japan is serious about sharing the defense burden and relieving America's massive trade deficit, it should buy F-16's directly.

While America has poured tax dollars into new weapons systems, Japan has invested in new products sold in America. The United States needs a comprehensive economic policy to address this inequity, not the FSX deal to compound the problem.

Technology transfers are nothing new. Japan came here for VCR and semiconductor technology, and promptly destroyed American leadership in those industries. Japan certainly has a right to create its own civil aeronautics industry, but we need not subsidize a venture which could undermine America.

By disapproving the FSX deal, Congress can place a high priority on American economic competitiveness—a policy which will offer more rewards than the FSX deal ever could.

□ 1410

THIS IS DEFINITELY NOT GOVERNING

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, yesterday in voting 397 to 10 for a motion putting gasoline taxes off limits, we showed, once again, how adept we are at saying, forcefully, what we won't do to solve the deficit crisis.

Last year, on a budget BILL FRENZEL and I offered, the House forcefully rejected addressing the deficit with a hard freeze on everything. Our budget found only 64 courageous souls out of 435.

A week or so ago, there were less than half that number supporting JOHN KASICH and his attempt at a soft freeze, one leaving out Social Security.

So, Mr. Speaker, if the American people want to know what we won't do about the deficit, we're clearly and strongly on the record.

Finding out what we will do, however, is a mite harder. In fact, other than adopting six straight budgets of deceit, with fudged numbers, wildly optimistic economic assumptions, spending flipped between fiscal years, smoke, mirrors, and thoroughly cooked books, the plain answer to what we will do is nothing.

Mr. Speaker, this is government by poll. When we survey people and ask them if they want to pay more taxes, of course they say no. When we ask them if, instead, they want less services, they also say no. So what Congress does is simply reflect their preferences. No less services, no increase in taxes. This takes no leadership, no courage, no tough choices, no responsibility for the bottom line, and no recognition of what we are doing to our young, who will ultimately be the ones to pay.

This approach is definitely perpetuating ourselves in office, with over 98 percent of Members being reelected in the last two elections. But, Mr. Speaker, this is definitely not governing.

JOHN HINCKLEY'S MIRACULOUS CURE

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, we remember John Hinckley. John Hinckley tried to kill President Reagan in 1981. Thank God he failed.

Hinckley said he was innocent. He had a plea. He said it was temporary insanity. Everybody bought it. John Hinckley dodged the bullet.

Now, guess what? John Hinckley says miraculously he is all cured and he does not want any more problems with America. He says he is willing to leave America and never return.

Now, how nice of John Hinckley. I say John Hinckley made his bed and he should sleep in it. I did not buy that garbage plea of insanity years back, and I say that John Hinckley is now just trying to have an option. If his aim had been better, President Reagan and Nancy would have had no option. I say John Hinckley should spend the rest of his life in an insane asylum. He earned it.

MASSIVE OPPOSITION TO NORIEGA POWER GRAB

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, as a member of the Presidential delegation to Panama to observe the elections on May 7, I am shocked—but not surprised—by the callous disregard of General Noriega for the wishes of the Panamanian people.

The hundreds of thousands of Panamanians who expressed their desire to see a change in government in their country have been ignored, and their demands for justice have been suppressed.

The outpouring of opposition to Noriega was so massive that he had to resort to a total manipulation of the results. It was not just a matter of changing a few tallies here and stuffing a few ballot boxes there. It required a complete disruption of the tabulation process—world class fraud.

The evidence collected by independent sources including the Catholic Church suggests that the percentages for the opposition were so high that even large numbers of the Panama defense forces and Government employees must have voted for the opposition as well.

Now that Noriega's theft of the election has been carried out, it is imperative that the administration, the Congress and our allies in the region work together to devise a strategy to remove Noriega from power in Panama. The Panamanian people deserve better, and the United States national security interests demand it.

ABORTION

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, among the many prochoice letters constituents have sent recently, one letter in particular stands out.

It is about the days of no choice, before the Roe versus Wade decision was handed down.

One New York woman, pregnant by accident in the 1950's, was desperate for an abortion.

Her abortion was performed by a stranger, in an apartment in a seedy section of Greenwich Village.

She writes:

> The only other person present was the woman who had let me in, given me something to drink, and was now stuffing rags into me.
>
> The woman finally finished, and indicated—we had something of a language barrier—that I was to return the next day.
>
> Terrible cramps followed, and I did return the next day.

When it was over, she writes:

> I was no longer trapped. I felt nothing but enormous relief.
>
> There has been no aftermath of physical or mental trauma—not then, and not ever.

She is, in her words:

> Haunted by the thought of my daughter—or any woman's daughter—having to undergo an illegal abortion under similar primitive and dangerous circumstances.

That thought haunts me, too.

SAVING LIVES BY ALLOWING WOMEN REPRODUCTIVE FREEDOM AND CHOICE

(Mrs. COLLINS asked and was given permission to address the House for 1

minute and to revise and extend her remarks.)

Mrs. COLLINS. Mr. Speaker, the Supreme Court has heard oral arguments in the case Webster versus Reproductive Health Services, and a decision is expected this summer. At this time I wanted to take a minute to read a letter from an Illinois woman describing the horrible reproductive choices that women had to make before the Roe versus Wade decision. Restricting the right to choose abortion would surely mean a return to these very dark days for women.

The woman reports:

When I was in high school, abortion was not legal in Illinois. I remember hearing a pregnant 15-year-old offer to sleep with an entire car-full of young men in hopes that this vigorous activity would cause her to lose the baby. I remember one young man of my acquaintance repeatedly punching his 16-year-old girlfriend in the stomach in hopes of initiating a miscarriage. I know of another case in the late fifties in which a woman tried to self-abort by douching with an industrial solvent. Her son, born alive, is in his 30's now with the reasoning ability of a 6-year-old. No one knows who will take care of him when his mother dies.

Mr. Speaker, American teenagers and women deserve better than this. Roe versus Wade has made such horrible actions and results a thing of the past. Surely our government must not subject women to these terrors again. We must not close off the legal right of women to have reproductive freedom and choice.

OFFENSIVE ARTWORK GETS GOVERNMENTAL RECOGNITION

(Mr. BAKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAKER. Mr. Speaker, the protection of the first amendment right to expression is a precious right that should be defended by all Americans, even when the perspective which is expressed is contrary to our own beliefs. There is, however, a marked difference between the right to self-expression, and governmental support of views which are offensive and contrary to basic tenets of the American value system. I am shocked by the recent actions of the National Endowment of the Arts in recognizing the work of Mr. Andres Serrano as accomplished artistic achievement. This individual photographed a crucifix submerged in a container of urine. For this effort, he was rewarded with a $15,000 prize, which is funded by taxpayers, and has his work included in a nationwide tour of carefully selected art by the National Endowment for the Arts. Whether this individual shares my religious perspective is of no concern. Whether this individual has the right to engage in such pursuits, is not in question. Whether someone feels that this work has artistic value, is a matter of personal judgment. I am enraged, Mr. Speaker, because taxpayer dollars have been used to reward actions offensive to the vast majority of Americans. Holding up this work as that which our Government rewards, is denegrating the values which are the foundation of our democracy. I know there are thousands of Americans who have fought to defend the right of free speech and expression, who feel as I do. I cannot stand by and let this action be viewed as artistic excellence. Our Government has no conceivable defense for this action. It must not happen again.

□ 1420

LET LUJAN BE LUJAN

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Madam Speaker, last night the Public Broadcasting System aired on the "Frontline" news program a documentary entitled "Yellowstone Under Fire." At first blush you may have thought this was a look at the fires that raged in Yellowstone National Park last summer. The program though was devoted to a far more insidious threat to one of our premier national parks, a threat that continues to have repercussions for Yellowstone long after the smoke of the fires have cleared. The expanding and encroaching development that encircles the perimeter of Yellowstone National Park is without question the single greatest threat facing this park and others today. Accelerated timber sales, oil and gas drilling, hardrock mining, and expanding subdivisions and other development along the park's borders threaten to turn the park and its resources into an island, cut off from the surrounding ecosystem that is so vital to the park's survival.

What "Frontline" exposed for all to see was that this threat to the park was and is in good part the Reagan administration's own making. During the past 8 years development of public lands around the park has been undertaken at breakneck speed, exceeding that undertaken during the 4 previous administrations combined. The tragedy, as "Frontline" showed, was compounded as the Reagan administration sat back, forgoing the opportunity to head off problems affecting the park ecosystem before they arose so that today we are playing catch up, attempting to mitigate the dangers posed by development encroaching the park.

Furthermore, it would have been bad enough if the Reagan administration policies were the result of blind ignorance, yet as "Frontline" showed they were clearly calculated. There was former Interior Secretary Jim Watt on the show still espousing his discredited policies and boasting that his successors are carrying forth these policies even today. I knew Jim Watt. I fought Jim Watt and I've seen the damage Jim Watt wrought. Secretary Lujan, you're no Jim Watt for which all I can say thank goodness. Let Lujan be Lujan, Mr. Watt. The discredited Watt policies have no place in the Interior Department. I call upon President Bush to uphold his campaign pledge where he resolved "I'd like to be known as a President who strengthened our park system and passed it on to the next generation of Americans in better shape than we found it. * * * I will undertake a program to strengthen and preserve our parks." Yellowstone and other national parks today are waiting, Mr. President.

INTRODUCTION OF LEGISLATION TO REPEAL CERTIFICATION TEST FOR NURSE'S AIDES

(Mr. GEKAS asked and was given permission to address the House for 1 minute.)

Mr. GEKAS. Madam Speaker, do my colleagues know that every single nurse's aide in every single nursing home in every one of our congressional districts could stand to lose his or her job by January 1, 1990, if certain provisions of the Omnibus Budget Reconciliation Act of 1987 are permitted to come into effect because of certain provisions in that act? No nurse's aide can continue to work unless they pass a State certified examination for continuation of work which they have performed sometimes for 25 and 30 years, but who have never had to take an examination to do so.

Madam Speaker, this is a dangerous result of this particular act, and it threatens the health care facilities in each and every one of our districts. There is no need to punish, to throw out of work, nurse's aides who have worked their art of tender care for their patients over a long period of time on the basis of some artificial certification test.

Thus, Madam Speaker, I am introducing two pieces of legislation today, one for the outright repeal of that provision of OBRA in order to give us a chance to look at it again; and, second, as a fallback position, a bill to grandfather, at least to grandfather in those employees who will be already on duty before July 1, 1989.

Madam Speaker, I ask for the consideration of the Members for these pieces of legislation.

MINIMUM WAGE

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS. Madam Speaker, I was home again in Montana this last weekend, and among the meetings I had was one meeting with a couple of dozen workers. One of those workers' name is Helen.

Madam Speaker, Helen told me that she has been a waitress for 33 years and has worked for the same chain restaurant company in Montana. After 33 years Helen, in her early sixties, earns $3.35 an hour.

Madam Speaker, let me say to Helen, "Helen, we're about to pass a minimum wage bill here to help you, and the President of the United States is going to veto it, and, Helen, the majority of the Republicans in this Chamber seem satisfied that, after 33 years, you're making $3.35 an hour.

QUESTION OF PRIORITIES

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Madam Speaker, occasionally an issue arises that brings us a question of priorities, not just in the ordinary sense, but as symbolic of larger, more profound issues.

Take the issue of the proposed exemptions from Gramm-Rudman.

In considering the FSLIC restucturing bill, the majority wants to (a) place the $50 billion financing mechanism on budget and (b) exempt that money from Gramm-Rudman-Hollings deficit targets.

This is a concept the administration is concerned about because it will delay enactment of the S&L solution. So allow me to remind our colleagues of one principle that I thought we had all agreed to.

Exemptions from Gramm-Rudman should be taken only in the most extraordinary circumstances.

Such a circumstance already exists with regard to the Medicare catastrophic health care law.

It is clear to most of us that the catastrophic surtax provisions create too large a burden for our elderly.

But if we are going to correct this injustice—for that is what it is—we will need a Gramm-Rudman exclusion because our budget baseline already anticipates revenue for the surtax.

Madam Speaker, as I see it, some want to make a unique exception to Gramm-Rudman for the sake of savings and loan institutions.

Others, such as this Member, would prefer to make that unique exception for the sake of elderly Americans crushed by an unjust burden.

It is a question of priorities, Madam Speaker.

A SALUTE TO STEELWORKERS OF THE OHIO VALLEY

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. APPLEGATE. Madam Speaker, it is with a great deal of pride that I rise today to pay tribute to the steelworking men and women of the Ohio Valley. This is very fitting in light of the dedication of a statue in Steubenville, OH on Thursday, May 18th commemorating the valley's steelworkers. The sculpture, standing 7 feet tall, and weighing nearly 4 tons, depicts a steelworker garbed in the protective clothing worn by those who work the open hearth furnace in a steel mill.

At a time when the country seems to be moving in a direction away from our basic industrial base and our smokestack industries, it is important to remember our roots, how we have progressed and the key role that the American steelworker played in this transition. It is also very important to understand that while the steel industry has undergone significant change in the last decade, and continues to change today, it is not a dinosaur as some would believe; but rather a striving industry that relies much upon high technology itself and is poised to again be a major force in the industrial heartland of America.

The key ingredient to this industry has been, is and will always be the steelworker. While the tasks they perform may have changed, it is still the efforts of the many men and women in the industry who have made the industry what it is today. They are a dedicated, proud, and hard working lot that have endured many difficult times always to rebound and not only make the industry better, but themselves as well. They epitomize the American work ethic which is very much alive and well.

The American steelworker is not afraid of competition by foreign companies or their workers. There is no doubt that we can outproduce, man for man and woman for woman, workers from any other country and at a very competitive price.

The dedication of the statue in Steubenville is symbolic of the trials and tribulations of steelworkers and the strengths and abilities upon which they helped build the American steel industry to be the very best.

Madam Speaker, I hope that you and my colleagues will join with me in commending all steelworkers and thanking them for their contributions to America.

A WOMAN'S RIGHT TO CHOOSE

(Mr. SMITH of Vermont asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. SMITH of Vermont. Madam Speaker, I would like to read excerpts from a letter which I received from a young woman in the State of Vermont, which I represent, having to do with her feelings about a woman's right to choose an abortion:

I became pregnant two months before my graduation from college, in spring, 1970. My graduation plans included a job and possibly graduate school; marriage and motherhood were still far in my future. I was in no position to raise a child either financially or—especially—emotionally.

We lived in New York, and abortion was illegal then except when the pregnancy threatened the life of the mother. A minister explained how to arrange to go to New Orleans for an abortion. I would have to arrive and leave the same day and travel alone. No names involved. The cost was very expensive and did not include transportation. I felt like a criminal; I suppose had I gone through with it, I would have been one.

I was able to get a legal abortion, however, because I could demonstrate that if I went through with my pregnancy, I would probably die. At least I was able to obtain a safe abortion. The total monetary cost was well over $1,000. The emotional price was unmeasurable.

I hope that when you and your colleagues consider the abortion issue, you will keep the mothers' stories in mind. I consider myself extremely fortunate. I have always had my family's support and access to enough money to cover emergencies. In the era when abortion was illegal, other women were not so lucky. They didn't pay for their abortions merely with great unhappiness—they paid with their lives.

Sincerely,

——— ———.

BRATTLEBORO, VT.

HONORING THE CREW OF UNITED AIRLINES FLIGHT 811

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Madam Speaker, the Secretary of Transportation, Samuel Skinner, honored the crew of United Airlines Flight 811 today with the Secretary's Award for Heroism.

As many of you will recall, the cargo door of United Flight 811 was blown open in flight over the Pacific Ocean on February 24. What could have been a tragedy of massive proportions was averted by the crew's heroic conduct during that terrifying emergency. Even with the threat of personal injury or death, the crew acted with the courage and skill of true well-trained professionals.

The flight attendants have shown that beneath their smile and kind words are even greater qualities: Courage, commitment, and concern for the safety of airline passengers. Now more than ever, these are the virtues that

stand out when people think of flight attendants.

The pilots maneuvered the impaired plane back to safety with skill and adroitness. Calm, cool, and collected they are the embodiment of the fearless aviators in the sky.

To the crew of United Flight 811, congratulations on receiving the Secretary's Award for Heroism. You are deserving recipients for your valiant efforts in securing the safe return of several hundred people on board. You are an inspiration to us all.

TRANSFER OF TECHNOLOGY OF F-16 FIGHTER A BAD IDEA

(Mr. JAMES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JAMES. Madam Speaker, transferring our F-16 fighter technology to the Japanese is, plainly and simply, a horrible idea. It holds dire, long-term consequences for this Nation. The plan is to provide this state-of-the-art technology to the Japanese for free. They will use it to compete with U.S. firms. Many in Congress oppose subsidies for U.S. industry. But this is worse, it is a United States subsidy for the Japanese aerospace industry.

It cost U.S. firms $7 billion to develop this technology. Yet we are giving it to the Japanese for nothing. In return, we get a promise of a possible 40 percent of the component manufacturing for the FSX aircraft Japan intends to build. That is a lousy business deal. And there is no guarantee that this critical technology won't be leaked to our enemies. It was not too long ago that submarine technology we shared with Japan's Toshiba Corp. wound up in Soviet hands costing United States defense firms billions of dollars and greatly diminishing national security. We just cannot afford to take that risk again.

We have a constitutional duty to serve and protect the interests and the well-being of the American people. This proposal to give Japan our best technology fails that charter.

A TRIBUTE TO THE LATE CHANCELLOR OF NEW YORK CITY SCHOOL SYSTEM

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Madam Speaker, today all New Yorkers and all Americans mourn the loss of a great leader, chancellor of the New York City Board of Education, Richard Green, who was taken at the untimely age of 53.

Richard Green was not a New Yorker, but our city asked great things of him. We asked him to run our school system, and amidst the most trying times in history, an era of unparalleled violence and drugs, he began a sensible, thoughtful reform of the school system. That he died so early in this task is a tragedy, not just for his family, but for all New Yorkers.

A few months ago, I sat down with Richard Green and we discussed the obstacles he faced. He said something that I think this city and our country should take to heart. He said that New York has a good school system, one of the best of the big cities, but the relentless focus on the negative was his greatest problem. The focus on the negative made his announcement of a brandnew prekindergarten program an insignificant event, but the arrest of a single principal a nonstop crisis.

We should learn from the thoughtful and positive leadership of Chancellor Green. He shunned expediency. He did what he thought was best for the city's children. It is his family's tragedy, a tragedy of all ours, that he was never able to implement his wonderful ideals.

UNITED STATES MILITARY COPRODUCTION PROGRAMS ASSIST JAPAN IN DEVELOPING ITS CIVIL AIRCRAFT INDUSTRY

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Madam Speaker, this week and next week the Congress of the United States is considering the agreement between Japan and the United States concerning the codevelopment of the FSX airplane. In connection with that, I want to read some paragraphs from a 1982 report by the General Accounting Office concerning the United States military coproduction programs of the F-15, which assists Japan in developing its civil aircraft industry. The cover has this paragraph on it:

> In the post World War II period, Japan's aircraft industry grew and developed largely through U.S. military coproduction programs. Much of the technology transferred through these programs has commercial application. Now, building on the experience and technology gained through military coproduction programs, the Government of Japan is assisting in the development of the civil aircraft industry, along with other high technology export industries.

I point this out particularly, Madam Speaker, because we have heard so much that this will not lead to civil aircraft production.

In the conclusions the GAO says:

> The Departments of State and Defense have not given adequate attention to the economic implications of coproduction along with the political and military objectives. It is appropriate for Japan and other countries to consider their economic interests when addressing defense issues, but we believe it is just appropriate for the United States to do the same.
>
> The United States receives some economic benefits from coproduction with Japan in the form of licensing and technical assistance fees. Also, as in the case of the F-15, a significant portion of the aircraft's value is U.S.-produced, and some machinery and tools are sold to Japan for their production facilities. However, there could be long-term adverse effects on the U.S. economy. Coproduction by definition involves the transfer of technology and industrial know-how. The transfer of military technology with commercial application could contribute to the erosion of our technology-based comparative advantage.
>
> Coproduction of U.S. military aircraft with Japan contributes to Japan's national goal of developing a world class civil aircraft industry and enlarging its share of the world market.

We need to think of this warning, Madam Speaker, when we consider entering into a much more complex agreement, that of codevelopment, not just coproduction, of the more sophisticated and much more highly technical aircraft, the F-16.

The agreement should be voted down.

TRIBUTE TO THE LATE CHANCELLOR GREEN OF NEW YORK CITY SCHOOL SYSTEM

(Mr. FLAKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLAKE. Madam Speaker, today we come to a point in our lives of great mourning in the city of New York for a man who a year ago assumed the position of the New York City school system as its chancellor.

The life of Richard Green is one that has served as a role model for many of the young people of that city, many young people of our Nation, a young man who grew up in the ghettos of Minneapolis, made his way into Harvard University to receive a Ph.D., and from there to go back and become the superintendent of schools of Minneapolis and then to be asked to take over the school system of New York, a city where the dropout rate is extremely high, a city where motivation is lacking, a city where many do not feel that it is possible to get an education, and yet a city where Richard Green dared to come and say that education can be meaningful, that education can be a matter of excellence, and by his own life demonstrating the possibility of academic excellence for those who would aspire to achieve it.

Therefore, Richard Green is not only an example for New York City, Richard Green represents an example for the Nation. For young people who feel captured in the ghettos, for young people who are captured in environments where they cannot learn, Richard Green demonstrated that you can

overcome, and though he has been taken from us, though he leaves at a very early stage in his chronological life, that which he tried to innovate in education remains with us to emulate.

□ 1440

PANAMA

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Madam Speaker, the dirty little secret is out of the box: The Government of Panama led by General Noriega is no more a reflection of public opinion in Panama than any other ruthless dictatorship. The election this past weekend was a complete fraud. And as soon as it became apparent that Noriega's hand-picked stooge would receive no more than 25 percent of the votes, Noriega stole the election.

Madam Speaker, the time has come for us to recognize what can no longer be denied: Our country will not turn over the Panama Canal to Noriega and his ilk. Our treaty commitment is with the people of Panama, not their oppressors.

Accordingly, I am introducing today a resolution which is identical to the one introduced yesterday in the other body by our former colleague, CONNIE MACK. This concurrent resolution urges the President to abrogate the existing canal treaties, and to re-open negotiations with Panama only at such time as that country enjoys a government which is freely elected and reflective of the will of the people.

INTRODUCTION OF RESOLUTION CALLING ON INDIA TO LIFT BLOCKADE OF NEPAL

(Mr. DURBIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DURBIN. Madam Speaker, I am joining my colleagues today in introducing a resolution calling on India to immediately lift its economic blockade of Nepal and negotiate a resolution to the trade and transit differences between these two countries.

India's blockade is an inhumane effort to pressure tiny Nepal. Because of the Indian blockade, Nepal is suffering from shortages of fuel, medicine, and essential food items. America's 138 Peace Corps volunteers in the remote villages of Nepal are forced to ration fuel, reducing their travel and training activity.

Madam Speaker, I am happy to report that moral among our Peace Corps volunteers in Nepal is very high, but their work in this isolated area of the world is made more difficult by India's blockade.

I encourage my colleagues to join me, the gentleman from Iowa [Mr. LEACH], the gentleman from Oklahoma [Mr. SYNAR], the gentleman from New York [Mr. WALSH], and the gentlewoman from Washington [Mrs. UNSOELD] in cosponsoring this resolution which calls on India to immediately lift its blockade of tiny Nepal and commence negotiations with Nepal to resolve its differences without pressure.

SITUATION BETWEEN NEPAL AND INDIA

(Mr. WALSH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALSH. Madam Speaker, today I would like to express my concern for the current conflicts between the countries of Nepal and India.

From 1970 to 1972 I served as a Peace Corps volunteer to Nepal near the border city of Raxaul. During my service I became very familiar with the country as well as the trade and transit agreements there. I was alarmed to learn of the recent dispute that has arisen between these two countries.

Nepal, the 6th poorest nation in the world, is almost completely dependent on India. Its economic survival depends on the free transit of goods over their borders, particularly the trade of petroleum, kerosene, and medical supplies. If this impasse continues and the borders remain closed, the economy will become paralyzed, and the country will begin to collapse.

Just in the past few weeks, the people of Nepal have been forced to cut down trees to replace the petroleum as fuel. This could have a serious consequence, as Nepal's forest lands are already greatly endangered, as are the diverse wildlife which inhabit the jungle.

The Nepalese have also had to close businesses and schools, postpone medical care and halt development projects that fed some of the poorest people in the world.

I wish to encourage the leaders of these two nations to sit down and discuss their differences. I would like to see the hostilities of Nepal and India negotiated in a peaceful way.

THE NEPAL-INDIA DISPUTE

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Madam Speaker, I join today with my colleague, the gentleman from Illinois [Mr. DURBIN], in introducing the legislation which will call upon the Indian Government to come to the table with the Nepal Government to try to resolve this dispute.

Madam Speaker, great nations have great responsibilities, and India does have a great responsibility. This measured response of asking India to lead to the table of negotiations, second, to open up the border during those negotiations and, finally, to have our Secretary of State to continue to monitor it, is a very measured response that hopefully India will take not as pressure but as a simple concern by this Nation. This simple concern is not only shared by this Nation but all nations surrounding India and the rest of the world. We hope they will take the opportunity with this legislation's introduction to come to the table and open up the borders so we can resolve this dispute.

WHERE IS "DIRE SON OF SUPP."?

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Madam Speaker, 2 weeks ago today, the dire emergency supplemental was taken off the floor for certain corrective surgery.

Then, it was scheduled to be brought back today.

But now it has been postponed once again.

Where is this "Dire Son of Supp.?" What are we waiting for?

Hundreds of letters from veterans are pouring in, waiting on funding for their medical care.

What do we tell the veteran in Vermont, who can no longer get colostomy bags?

What do we tell the double amputee with a heart condition in Pennsylvania, who cannot get his medication?

What about the veteran in Ohio, who cannot get his monthly treatment for blood clotting?

Our Nation's veterans have risked their lives and sacrificed their limbs to keep this country free. Memorial Day is just around the corner.

And now we are playing games with their medical care?

Stop holding our veterans hostage.

Let us get a clean, trimmed down "Son of Supplemental" out here that we can pass, and cut out the monkey business. Our veterans are counting on us.

WHAT WILL WE DO WHEN DICTATORS IN NICARAGUA PULL A NORIEGA?

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Madam Speaker, when the drug-running dictator of Panama stole the election, most nations of the world condemned what he did. Most of Panama's neighbors in Latin America condemned this perversion of democracy. There was one no-

table exception. One neighbor came to the drug-running dictator's defense. One nation thought his way of handling democracy was perfectly appropriate. That nation was Nicaragua.

Since the Commies in Nicaragua are soon to run an election of their own, what does their attitude toward the election-stealing in Panama tell us? In my opinion we have learned the Commies have no intention of having a fair and free election in Nicaragua.

The question then for us is clear: What will we be willing to do when the drug-running, gun-running dictators in Nicaragua pull a Noriega?

REJECT THE FSX PROPOSAL

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Madam Speaker, I think that it is important to emphasize the need for close and good relations between the United States and Japan and the need to understand that within that context it is urgent for both of our nations to take a careful, thoughtful, and hard look at whether particular agreements are or are not within the national security interests of each country.

The key question that the supporters of the FSX proposal have indicated that they will review is whether the FSX proposal will or will not significantly increase and enhance Japan's ability to compete with our civilian aerospace industry. The supporters of the FSX proposal, Madam Speaker, doubt that the FSX will enhance Japan's competitive ability.

I ask these supporters, Madam Speaker, to listen to the words of the president of Mitsubishi Heavy Industries as translated from the Japan Economic Journal on January 21 of 1989, where the then president of Mitsubishi Heavy Industries said that the FSX project will "be a great boon to us. The technology we will develop and accumulate during the project will be instrumental in developing next-generation planes such as hypersonic and supersonic transports."

We should take the Japanese leadership at their word. They are much more candid about their goals than the administration is willing to be about what their goals are. I urge us to review carefully the statements coming from responsible and candid leaders in Japan and to reject the FSX proposal.

□ 1450

WHAT THE UNITED STATES SHOULD DO ABOUT NORIEGA

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Madam Speaker, our policy in Panama by President Bush has been applied correctly. There is a fraud that took place. We knew that, but what do we do? What should be our new policy?

First of all, talking about abrogating the Canal Treaty is the worst thing we could do. It would inflame Panamanian passions and would decrease our credibility in Latin America and give Noriega the card he desperately needs to show that we are beating him up.

But we need to be measured in our response, but in the same vein consistent. First, our entire bureaucracy and Congress should work together.

Second, we should consider economic sanctions applied in a more coherent and consistent way.

Third, we should get international pressure, but effective international pressure from Latin American countries, Alfonsin of Argentina, Carlos Andres Perez of Venezuela. We should not lead internationally ourselves. I think everybody knows this has been a fraudulent election.

We should also encourage Panamanian opposition, their continued protesting, to get out there and talk about this election. They should not expect the United States should do it all.

As a measure of safety, we should consider withdrawing some of our dependents from Panama for fear of some kind of military conflagration that might be caused by Noriega.

Madam Speaker, Noriega is on the ropes and we should deal a knockout blow, but do it carefully and not in a way that would only give him more life to recover.

UNITED STATES SHOULD SUPPORT INTERNATIONAL CONFERENCE ON GLOBAL WARMING

(Mr. WISE asked and was given permission to address the House for 1 minute.)

Mr. WISE. Madam Speaker, the failure of the President to have the United States support an international conference on global warming is incredibly disappointing. It also shows a total unwillingness to exert leadership, particularly since our own Department of State and Environmental Protection Agency recommend participating.

I am from a fossil fuel producing State. Hasty action in this area can jeopardize jobs. Yet failure to be at the international table seeking realistic solutions can also be harmful.

I believe there are responses to global warming that permit continued fossil fuel use, alternative fuels, for instance, made from coal, natural gas, and so on. But the United States must be there putting them on the table.

There is another reason. Many Third World nations today are resisting basic environmental changes, charging that their development should not be restricted, cynically charging that the United States has already achieved a high standard of living and now wants to deny the same level to others.

The global warming challenge cannot be met by one nation alone, but yet it cannot be met by the absence of a great nation like the United States.

Please, Mr. President, show environmental and economic leadership by reconsidering and having the United States participate in an international conference on global warming.

OPPOSE THE FSX DEAL

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINETA. Madam Speaker, when we signed an agreement with Japan several years ago to end that nation's unfair semiconductor industry trade practices, Japan said that it would open up its domestic market to U.S. semiconductor manufacturers. But in what has become a classic negotiating tactic, Japan shunted this critical facet of the agreement into a so-called side letter and now refuses to live up to that part of the semiconductor industry agreement.

Incredibly, we are being asked again to fall for the same old smoke and mirrors when it comes to the FSX technology transfer deal. We are being told that Japan has made important technological and production concessions as part of the deal. But do we find these consessions in the formal FSX agreement? No. Where we find them is in—you guessed it—an exchange of letters.

Madam Speaker, the real agreements on these concessions will only be negotiated after we have finished transferring our key technologies to Japan. As far as I am concerned, this is an open invitation for the United States to get burned twice with the same trick, and so I urge my colleagues to oppose the FSX deal.

INDIA SHOULD REOPEN BORDER WITH NEPAL

(Mrs. UNSOELD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. UNSOELD. Madam Speaker, because of a trade dispute, India closed the border with Nepal, a tiny landlocked country in the heart of the Himalaya.

With that border closed, petrol is no longer coming to the nation's capital and to the populated areas of the country. Without that petrol that not only provides the fuel for the nation

but also is the major cooking fuel in the capital and other populated areas, the people are turning to firewood again as a means of cooking. What this means is that a major reforestation program with which we have been involved is seriously threatened. Thirty-five acres a day are being cut to provide fuel.

I join with my colleagues in supporting the resolution asking India to immediately open its borders with Nepal, to permit the passage of goods and people between these countries.

RESIGNATION AS MEMBER OF COMMITTEE ON GOVERNMENT OPERATIONS

The SPEAKER pro tempore (Mrs. COLLINS) laid before the House the following resignation as a member of the Committee on Government Operations:

HOUSE OF REPRESENTATIVES,
Washington, DC, May 10, 1989.

Hon. JIM WRIGHT,
Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: I, hereby, resign my seat on the Government Operations Committee of the U.S. House of Representatives, effective this date.

Cordially,

ROBERT S. WALKER.

The SPEAKER pro tempore. Without objection, the resignation is accepted.

There was no objection.

PRIVILEGES OF THE HOUSE—IMPEACHMENT OF JUDGE WALTER L. NIXON, JR.

Mr. BROOKS. Mr. Speaker, I rise to a question of the privileges of the House, and I call up a privileged resolution (H. Res. 87) impeaching Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi for high crimes and misdemeanors.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 87

Resolved, That Walter L. Nixon, Jr., judge of the United States District Court for the Southern District of Mississippi, is impeached for high crimes and misdemeanors.

CALL OF THE HOUSE

Mr. SENSENBRENNER. Madam Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 49]

The SPEAKER pro tempore (Mr. HOYER). On this rollcall, 406 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call were dispensed with.

PRIVILEGES OF THE HOUSE—IMPEACHMENT OF JUDGE WALTER L. NIXON, JR.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: Strike out all after the resolving clause and insert the following:

That Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi, be impeached for high crimes and misdemeanors, and that the following articles of impeachment be exhibited to the Senate:

Articles of impeachment exhibited by the House of Representatives of the United States of America in the name of itself and all of the people of the United States of America, against Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi, in maintenance and support of its impeachment against him for high crimes and misdemeanors.

ARTICLE I

On July 18, 1984, Judge Nixon testified before a Federal grand jury empaneled in the United States District Court for the Southern District of Mississippi (Hattiesburg Division) to investigate Judge Nixon's business relationship with Wiley Fairchild and the handling of the criminal prosecution of Fairchild's son, Drew Fairchild, for drug smuggling. In the course of his grand

jury testimony and having duly taken an oath that he would tell the truth, the whole truth, and nothing but the truth, Judge Nixon did knowingly and contrary to his oath make a material false or misleading statement to the grand jury.

The false or misleading statement was, in substance, that Forrest County District Attorney Paul Holmes never discussed the Drew Fairchild case with Judge Nixon.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

ARTICLE II

On July 18, 1984, Judge Nixon testified before a Federal grand jury empaneled in the United States District Court for the Southern District of Mississippi to investigate Judge Nixon's business relationship with Wiley Fairchild and the handling of the prosecution of Fairchild's son, Drew Fairchild, for drug smuggling. In the course of his grand jury testimony and having duly taken an oath that he would tell the truth, the whole truth, and nothing but the truth, Judge Nixon did knowingly and contrary to his oath make a material false or misleading statement to the grand jury.

The false or misleading statement was, in substance, that Judge Nixon had nothing whatsoever officially or unofficially to do with the Drew Fairchild case in Federal court or State court; and that Judge Nixon "never handled any part of it, never had a thing to do with it at all, and never talked to anyone, State or Federal, prosecutor or judge, in any way influence anybody" with respect to the Drew Fairchild case.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

ARTICLE III

By virtue of his office as a judge of the United States District Court for the Southern District of Mississippi, Judge Nixon is required to uphold the integrity of the judiciary, to avoid impropriety and the appearance of impropriety, and to obey the laws of the United States.

Judge Nixon has raised substantial doubt as to his judicial integrity, undermined confidence in the integrity and impartiality of the judiciary, betrayed the trust of the people of the United States, disobeyed the laws of the United States and brought disrepute on the Federal courts and the administration of justice by the Federal courts by the following:

After entering into an oil and gas investment with Wiley Fairchild, Judge Nixon conversed with Wiley Fairchild, Carroll Ingram, and Forrest County District Attorney Paul Holmes concerning the State criminal drug conspiracy prosecution of Drew Fairchild, the son of Wiley Fairchild, and thereafter concealed those conversations as follows:

(1) Judge Nixon concealed those conversations through one or more material false or misleading statements knowingly made to an attorney from the United States Department of Justice and a special agent of the Federal Bureau of Investigation during an interview of Judge Nixon conducted in Biloxi, Mississippi, on April 19, 1984. The substance of the false or misleading statements included the following:

(A) Judge Nixon never discussed with Wiley Fairchild anything about Wiley's son's case.

(B) Wiley Fairchild never brought up his son's case.

(C) At the time of the interview Judge Nixon had no knowledge of the Drew Fairchild case and did not even know Drew Fairchild existed, except for what the judge previously read in the newspaper and what he learned from the questioners in the interview.

(D) Nothing was done or nothing was ever mentioned about Wiley Fairchild's son.

(E) Judge Nixon had never heard about the Drew Fairchild case, except what he told the questioners in the interview, and certainly had nothing to do with the case.

(F) Judge Nixon had done nothing to influence the Drew Fairchild case.

(G) State prosecutor Paul Holmes never talked to Judge Nixon about the Drew Fairchild case.

(2) Judge Nixon further concealed his conversations with Wiley Fairchild, Paul Holmes, and Carroll Ingram concerning the Drew Fairchild case by knowingly giving one or more material false or misleading statements to a Federal grand jury during testimony under oath in Hattiesburg, Mississippi, on July 18, 1984. The substance of the false or misleading statements included the following:

(A) Paul Holmes never discussed the Drew Fairchild case with Judge Nixon.

(B) To the best of his knowledge and recollection, Judge Nixon did not know of any reason he would have met with Wiley Fairchild after the Nixon-Fairchild oil and gas investment was finalized in February 1981.

(C) Judge Nixon gave the grand jury all the information that he had and that he could, and had withheld nothing during his grand jury testimony.

(D) Judge Nixon had nothing whatsoever unofficially to do with the Drew Fairchild criminal case in State court.

(E) Judge Nixon never talked to anyone, including the State prosecutor, about the Drew Fairchild case.

(F) Judge Nixon never had a thing to do with the Drew Fairchild case at all.

(G) Judge Nixon "never talked to anyone, State or Federal, prosecutor or judge, in any way influence anybody" with respect to the Drew Fairchild case.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

□ 1530

The SPEAKER pro tempore (Mr. HOYER). The gentleman from Texas [Mr. BROOKS], is recognized for 1 hour.

Mr. BROOKS. Mr. Speaker, I yield myself such time as I may consume.

In February 1986, Chief Judge Walter L. Nixon, Jr., of the U.S. District Court for the Southern District of Mississippi, was convicted of two counts of making false declarations before a grand jury, a form of perjury, in violation of 18 U.S.C. 1623. Judge Nixon was sentenced to 5 years imprisonment by the late Chief Judge James Meredith of the Eastern District of Missouri, specially assigned to the case. Judge Nixon began serving his 5-year sentence at Eglin Air Force Base Prison camp on March 23, 1988, and is currently in confinement there.

Following the guilty verdict, the trial judge denied Judge Nixon's motion for a new trial. On appeal, the Fifth Circuit Court of Appeals affirmed the convictions, 816 F.2d 1022 (5th Cir. 1987), and thereafter denied Judge Nixon's petition for rehearing en banc, 827 F.2d 1019 (1987). On January 19, 1988, the U.S. Supreme Court denied Judge Nixon's petition for a writ of certiorari.

On March 15, 1988, the Judicial Conference certified to the Speaker of the House of Representatives that impeachment of Judge Nixon may be warranted. The judge is drawing his judicial salary of $89,500, and will, as an article III judge, continue to do so for life unless he is impeached by the House and removed from office by the Senate.

In the 100th Congress, House Resolution 407, a resolution of impeachment was introduced by Mr. Rodino, Mr. EDWARDS, Mr. FISH, and Mr. SENSENBRENNER on March 17, 1988, and referred to the Subcommittee on Civil and Constitutional Rights. The subcommittee began an independent investigation of the facts underlying Judge Nixon's prosecution and conviction. The subcommittee assembled and reviewed the complete criminal record, including testimony and exhibits from the 2-week jury trial, and interviewed witnesses and other persons involved in the case.

In a moment, I will yield to my friend, DON EDWARDS, the chairman of the Subcommittee on Civil and Constitutional Rights, for a detailed explanation of the subcommittee's investigation.

In the 101st Congress, on February 22, 1989, I introduced House Resolution 87 along with Mr. EDWARDS, Mr. FISH, and Mr. SENSENBRENNER. It was referred to the same subcommittee for completion of action. The subcommittee reported the resolution with an amendment in the nature of a substitute containing three articles of impeachment by a vote of 8 to 0.

The Judiciary Committee has, in House Resolution 87, recommended three articles of impeachment against Judge Nixon by a vote of 34 to 0.

Article I deals with Judge Nixon's false statement to the grand jury that the State prosecutor never discussed a particular criminal case with him involving Drew Fairchild, the son of a businessman with whom the judge had a financial relationship. This same statement was found by the grand jury to be false and led to Judge Nixon's conviction on one count of perjury.

Article II deals with Judge Nixon's statement to the grand jury that he had nothing whatsoever, officially or unofficially, to do with Drew Fairchild's case, never had a thing to do with it at all, never talked to anybody, including the State prosecutor, about the case. This statement was also found to be false by the jury and led them to convict the judge on a second count of perjury.

Article III charges Judge Nixon with undermining the integrity of the judiciary, disobeying the law, and bringing disrepute on the courts by concealing his conversations concering the Drew Fairchild case through a series of false or misleading statements during his interview with prosecutors, and his grand jury testimony. A total of 14 false statements, 7 in the interview and 7 in the grand jury testimony, including those addressed in the first 2 articles, are specifically set forth in Article III.

Mr. Speaker, for purposes of debate only, I yield such time as he may consume to the gentleman from California [Mr. EDWARDS].

Mr. EDWARDS of California. Mr. Speaker, the distinguished chairman of the Judiciary Committee has given you a chronology of the events in this case, beginning with Judge Nixon's conviction, and an outline of the committee's action.

I would like to explain in more detail what this case is about and what our subcommittee did.

Following the referral of House Resolution 407 to the Subcommittee on Civil and Constitutional Rights, the subcommittee, assisted by talented special staff, conducted a careful and independent inquiry into Judge Nixon's conduct.

Judge Nixon is only the second Federal judge in our Nation's history to be convicted of a crime and imprisoned while holding judicial office. The crime for which he was convicted, lying to a grand jury in testimony under oath, is particularly serious because a judge must bear the awesome responsibility of swearing witnesses, judging credibility, and finding the truth in cases that come before him.

Despite our concerns about the seriousness of the convictions, at the outset we determined not to rubber stamp the jury's verdict.

We ignored the fact of his conviction.

We started from scratch.

In 7 full days of hearings we heard live testimony from all relevant witnesses, including Judge Nixon himself.

At all stages of our proceedings, Judge Nixon was treated with fairness and courtesy.

He was afforded every opportunity to present evidence and to cross-examine witnesses without limitation.

Judge Nixon had very able counsel, and virtually every request of Mr. Stewart's was granted.

The facts of this case are very complicated. I shall try to simplify them.

In 1979, Judge Nixon asked Hattiesburg Attorney Carroll Ingram to investigate the possibility of Judge Nixon making an oil investment with Wiley Fairchild, a rich Hattiesburg businessman.

Before the deal was finalized, Wiley Fairchild's son Drew, one of the managers of the Hattiesburg Airport, was implicated and later arrested for conspiracy in smuggling a ton of marijuana through the Hattiesburg Airport on August 4, 1980.

The Drew Fairchild drug smuggling case and Judge Nixon's alleged involvement in influencing its outcome are fundamental to this impeachment inquiry.

After hesitating for several months, Carroll Ingram told Wiley Fairchild that Judge Nixon would like to invest with him and Wiley agreed.

In March 1981 Wiley deeded to Judge Nixon three mineral royalty interests. The price set by Wiley was $9,500 and Nixon ultimately gave Wiley three promissory notes for this amount.

For reasons which are disputed all the documents were backdated to reflect an execution date of a year earlier, February 25, 1980.

There is no doubt that Wiley gave Judge Nixon a sweet deal. Within a relatively few months, royalties started coming to Nixon, totaling more than $60,000 by the time of his trial.

In late 1983, the FBI in Pascagoula, MS, received anonymous phone calls alleging that this oil deal between Wiley and Judge Nixon was a crooked deal designed to get Judge Nixon's help in Drew Fairchild's drug case, and in March 1984 the anonymous caller came forward and identified himself to the FBI and agreed to cooperate with the FBI.

He was Robert Jarvis, who had been an employee of Wiley's at the time the oil deal was made.

Jarvis told the FBI that the oil deal papers had been signed by Wiley and Judge Nixon after the drug bust but had been backdated to reflect execution before the drug bust.

Jarvis alleged that the backdating was to make it appear that Judge Nixon had not gotten the oil deal in connection with Drew Fairchild's criminal case.

Because of this information the Federal investigation of Judge Nixon began in April 1984 and attorney Reid Weingarten of the Public Integrity Section of the Justice Department was put in charge.

On April 19, 1984, Reid Weingarten and an FBI agent interviewed Judge Nixon in his chambers in Biloxi, MS. Judge Nixon consented to the interview being recorded.

In that interview Judge Nixon told the interviewer that he had never discussed the Drew Fairchild case with anyone, knew nothing about it, and had done nothing to influence it.

Your subcommittee found seven false or misleading statements by Judge Nixon in that interview. These are charged in article III of the impeachment resolution.

In May 1984 the Justice Department requested that a special Federal grand jury be empaneled to investigate the handling of the Drew Fairchild case, the Nixon-Fairchild oil deal, and whether there was any connection between the two.

The special grand jury was empaneled in Hattiesburg on July 18, 1984. Judge Nixon voluntarily appeared and testified.

Midway through the testimony Weingarten asked, "Did [Forrest County District Attorney] Bud Holmes ever discuss the Drew Fairchild case with you?" And Nixon replied, "No, not to the best of my recollection. I think I would recall it if he had."

This statement your subcommittee found to be false, and it is charged in article I of the impeachment resolution.

This false statement was also the first perjury count for which Judge Nixon was convicted and sentenced to 5 years in prison.

Toward the end of the testimony Weingarten said, "All right, Judge, do you have anything to add?"

Judge Nixon made a long statement. Midway through it, he said:

> Now, I have had nothing whatsoever officially or unofficially to do with the Drew Fairchild criminal case in Federal Court or State court. * * * I have never handled any part of it, never had a thing to do with it at all and never talked to anyone, State or Federal, prosecutor or judge, in any way influence anybody with respect to this case.

This statement your subcommittee found to be false, and it is charged in article II of the impeachment resolution.

This false statement was also the basis for count IV in the criminal case where Judge Nixon was convicted of perjury.

Your subcommittee also found additional statements in Judge Nixon's grand jury testimony which we deemed to be false, and they are included as charges in article III of the impeachment resolution.

After hearing testimony from a number of witnesses, including Bud Holmes and Wiley Fairchild, the grand jury returned a four-count indictment on August 29, 1985 against Judge Nixon. Count I alleged the acceptance of an illegal gratuity from Wiley Fairchild. Counts II, III, and IV alleged perjury before the grand jury.

At the conclusion of Judge Nixon's trial the jury returned guilty verdicts on counts III and IV, not guilty on counts I and II. He was not convicted on the illegal gratuity count.

Judge Nixon was sentenced to concurrent terms of 5 years' imprisonment on each of the two perjury counts that I have previously described.

The conviction and sentence were affirmed on appeal, and the Supreme Court declined to review Judge Nixon's case. More recently Judge

Nixon has petitioned that his conviction be vacated in a section 2255 motion, which I believe is a habeas corpus petition.

This too has been denied in a 59-page opinion by Chief Judge John F. Nangle on the U.S. District Court, Eastern District of Missouri.

On November 26, 1984, Wiley Fairchild pleaded guilty to an illegal gratuity charge relating to the oil deal with Judge Nixon and was sentenced to 2 years imprisonment with 22 months suspended.

On July 11, 1985, Drew Fairchild was sentenced to 6 months imprisonment and 2½ years probation on the drug charge.

The specific details of the statements of Judge Nixon's which the subcommittee deems to be false and which are the basis for the three impeachment articles are outlined in the addendum to my statement which I request be included in the RECORD and which has been provided to each member.

The false statements alleged in the three articles focus on Judge Nixon's deliberate concealment of his conversations with two men, Wiley Fairchild and Bud Holmes.

Bud Holmes was the local district attorney while all of this was going on, and had conversations with Nixon about the case that are detailed in the addendum.

Bud Holmes was indicted by the same grand jury for obstruction of justice because he had concealed from the grand jury a certain phone call from Judge Nixon to Wiley Fairchild about the Drew Fairchild case. Holmes pleaded guilty to criminal contempt and was sentenced to a $10,000 fine and 1 year in prison, which he didn't serve.

You will read in the addendum the details backing up each of the charges in the impeachment resolution, such as:

Wiley's meeting with Nixon when Wiley told the judge he was upset about the way Bud Holmes was handling Drew's drug case.

Wiley's complaint to Nixon that Holmes was blackmailing him.

Nixon's telling Holmes about Wiley's complaint.

Holmes telling Nixon a deal had already been worked out to help Drew.

A telephone call to Wiley from both Nixon and Holmes about Drew's case.

Carroll Ingram's testimony that Nixon told him that Wiley had asked Judge Nixon to speak to District Attorney Holmes about Drew's case.

The committee is confident that the documentation supplied to you clearly supports each and every charge of the impeachment resolution.

This pattern of lies, concealment and deceit on the part of Judge Nixon led the committee, by clear and convincing evidence, to the unavoidable conclusion that he must be impeached.

The vote in subcommittee was unanimous, 8 to 0. The vote in the committee was 34 to 0, with 1 member absent.

Accordingly, we recommend that the House of Representatives adopt these articles of impeachment and that pursuant to article I, section 2 of the Constitution, Judge Walter L. Nixon, Jr., be tried by the U.S. Senate.

REGARDING THE IMPEACHMENT OF JUDGE WALTER L. NIXON, JR., MAY 3, 1989

RELEVANT DATES

February, 1979: Judge Nixon asked Carroll Ingram to see if Wily Fairchild would allow Nixon to invest with him in oil deals.

Aug. 4, 1980: Drug bust at Hattiesburg airport. Drew Fairchild implicated.

Feb. 25, 1981: Jarvis prepared oil deal papers.

March, 1981: Papers signed for Nixon's purchase of interests in three wells for $9500.

Dec. 23, 1982: Drew's case "passed to the files," made inactive, at Bud Holmes' request.

November, 1983: Robert Jarvis placed anonymous phone calls to F.B.I. alleging that oil deal was made to get Nixon to help Drew.

March, 1984: Jarvis identified himself to F.B.I. and repeated charges. Also claimed papers were backdated one year to make it appear deal was signed before the Drew's oil bust.

April 19, 1984: Reid Weingarten of the Public Integrity Section of U.S. Justice Department interviewed Judge Nixon about the matter.

July 18, 1984: Special federal grand jury empaneled in Hattiesburg to investigate matter.

July 18, 1984: Judge Nixon voluntarily appeared to testify before grand jury.

July 18/19, 1984: Wiley Fairchild testified before grand jury.

July/Sept., 1984: Bud Holmes testified before grand jury.

November, 1984: Wiley Fairchild pled guilty to illegal gratuity charge. Appeared again before the grand jury and described his contacts with Judge Nixon concerning the Drew Fairchild case.

January, 1985: Carroll Ingram told Weingarten about phone call from farm.

February, 1985: Holmes vaguely admitted to grand jury that phone call had been made, but tried to cover it up.

March 29, 1985: Holmes indicted from obstruction of justice for concealing phone calls and four perjury counts.

June, 1985: Bud Holmes pled guilty to contempt. Reappeared before the grand jury, apologized for covering up the phone call and described Nixon's involvement in the Drew Fairchild case.

July 11, 1985: Drew Fairchild sentenced in federal court to six months imprisonment and 2½ years probation for his involvement in the drug conspiracy.

August 29, 1985: Grand jury indicted Judge Nixon on four (4) counts.

Sept. 18, 1985: Wiley Fairchild sentenced in federal court on illegal gratuity count to 2 years, with 22 months suspended.

Dec. 11, 1985: Bud Holmes sentenced to one year plus $10,000 fine.

January, 1986: Judge Nixon's trial began. By this time he had received over $60,000 in royalties.

February 9, 1986: Jury returned verdicts of guilty against Judge Nixon on perjury counts III and IV.

April 30, 1987: Fifth Circuit affirms convictions

January 19, 1988: Supreme Court denies petition for Writ of Certiorari.

March 23, 1988: Judge Nixon begins serving his five-year sentence.

KEY INDIVIDUALS INVOLVED IN THIS CASE

Judge Walter L. Nixon, Jr.: Chief Judge, Southern District of Mississippi. Presently serving two concurrent terms of five years imprisonment on two prejury counts.

Wiley Fairchild: Wealthy businessman and oil well investor in Hattiesburg, Mississippi who sold Nixon interests in three oil wells and was an important prosecution witness.

Drew Fairchild: Wiley's middle-aged son who was one of the managers of the Hattiesburg airport and who was arrested for marijuana smuggling.

Bud Holmes: At that time the local District Attorney handling Drew's case. An old friend of Judge Nixon's. An important prosecution witness.

Carroll Ingram: Wiley's attorney in Hattiesburg and personal friend of Judge Nixon. He was asked by Nixon to ask Wiley if he would allow Nixon to participate in some oil investments.

Robert Jarvis: Employed by Wiley at time oil deal was made. Prepared papers for oil deal. Later, while no longer employed by Wiley, told F.B.I. that Wiley made oil deal in order to obtain Judge Nixon's help in Drew's drug case.

Reid Weingarten: U.S. Justice Department Public Integrity Section lawyer who investigated and prosecutied Judge Nixon's case.

INTRODUCTION

[This material is provided by Rep. Don Edwards, Chairman of the Subcommittee on Civil and Constitutional Rights.]

The three proposed Articles of Impeachment allege a total of 14 false statements by Judge Nixon, seven in an April 1984 interview with federal investigators and seven in his July 1984 testimony before the grand jury. Articles I and II focus on Judge Nixon's grand jury testiomy that led to his perjury convictions. Article III includes the testimony set forth in Articles I and II, as well as other statements made by Judge Nixon in the interview and to the grand jury that the Subcommittee believes are false.

Each of the 14 false statements alleged in the Articles is, in one form or another, a categorical denial by Judge Nixon of any knowledge of or involvement in a state criminal drug smuggling prosecution of Drew Fairchild. Drew is the son of Wiley Fairchild, a prominent Mississippi businessman who afforded Judge Nixon a lucrative investment. The state prosceutor in the Drew Fairchild case was Paul H. (Bud) Holmes, a long-time friend of Judge Nixon. Carroll Ingram was Wiley Fairchild's attorney and also a close friend of the Judge.

During the interview and in his grand jury testimony Judge Nixon denied that he ever talked about or discussed the Drew Fairchild case with Bud Holmes. Judge Nixon also denied that Wiley Fairchild ever mentioned his son or the drug case. However, the Subcommittee heard testimony from Messrs. Fairchild, Holmes and Ingram that Judge Nixon did, in fact, talk about the Drew Fairchild drug case with Mr. Fairchild and Mr. Holmes, and that the Judge influ-

enced the handling of the case. Even more important, in contrast to his interview statements and grand jury testimony, Judge Nixon himself now admits that he spoke with Wiley Fairchild and Bud Holmes about Drew Fairchild and the drug case.

The facts presented to the Subcommittee can be briefly summarized as follows:

I. IN HIS APRIL 1984 INTERVIEW WITH FEDERAL INVESTIGATORS JUDGE NIXON DENIED ANY INVOLVEMENT IN OR KNOWLEDGE OF THE DREW FAIRCHILD DRUG CASE

Judge Nixon was advised prior to and during the interivew that the investigation was examining Judge Nixon's investment with Wiley Fairchild and the unusual handling of the Drew Fairchild case. The interview was tape-recorded with Judge Nixon's full consent. During the interview Judge Nxon denied several times, and in the broadest possible terms, any knowledge or or participation in Drew Fairchild's case:

Q. Did he [Wiley Fairchild] have anything on his mind that he wanted with you——

Judge NIXON. You'd have to ask him because he's never asked——

Q. I mean, did——

Judge NIXON. Anything that or demanded anything. Of course, anything to do with his [Fairchild's] son's case absolutely had nothing whatsoever, 'cause I don't, I'm not even aware of really what that's about. I think I read something in the paper one time about it since then.

Q. Did you——

Judge NIXON. But if you can——

Q. Detect anything——

Judge NIXON. If you can detect or know of anything at all where I ever had any connection with his son's case or the disposition of it or handling of it or anything to do with it, I sure wish you'd tell me, and I'll—

Q. I, well, I——

Judge NIXON. Because there has——

Q. I can assure you, we have no information to that effect——

Judge NIXON. There has, because there has been nothing.

Q. No, I, I guess what I'm asking you is whether or not you detected anything untoward from either——

Judge NIXON. Abso——

Q. Mr. FAIRCHILD——

Judge NIXON. Absolutely not. If I had, I'da pulled back immediately and wouldn't have had a darn thing to do with it.

Q. From the time of that bust until basically me talking to you about the case——

Judge NIXON. Uh-huh——

Q. You've had no connection, no knowledge of it, no participation in——

Judge NIXON. Correct——

Q. The Drew Fairchild case?

Judge NIXON. Absolutely, except something I read in the paper. It was either an editorial or state, or, or news article or something, a few years ago, I think——

* * * * *

Q. Do you recall any knowledge of the case, meaning the Fairchild case, while you were dealing with Wiley Fairchild?

Judge NIXON. No.

Q. And he certainly never brought it up?

Judge NIXON. Not to my recollection. I think I would recall that.

* * * * *

Q. Does he [Drew Fairchild] work with his father?

Judge NIXON. I have no idea. Didn't even know he existed, except from what I read about that and what you just told me. Absolutely no.

* * * * *

Q. I mean, I, our earnest desire is to wrap this end of it——

Judge NIXON. I understand——

Q. Completely, and often times judges are victimized by others——

Judge NIXON. Yeah, well, I don't——

Q. I mean, you're a savvy guy. You know that this happens.

Judge NIXON. Well, I don't know about that part of it, but all I know is ah nothing was done or nothing was ever mentioned about Wiley Fairchild's son, and I defy anybody to, and I say defy, I don't mean (unintelligible), but I challenge anybody to show any connection or anything I've ever done in connection with Wiley Fairchild's son's case I certainly would (unintelligible) to begin with. And if I even suspected something like that was going on, I certainly wouldn't have ah invested or have any dealings, absolutely.

* * * * *

Q. Okay, so I'm—Just to complete the picture——

Judge NIXON. That's what I was, that's what I wanted to ask you, what allegation—I've never heard, you know, never had the [Drew Fairchild] case never heard about the case except what I told you, and ah certainly had nothing to do with it.

* * * * *

Judge NIXON. I understand, but regardless, what connection have I had with ah Fairchild's son's case? Isn't that the bottom line?

Q. It, it basically——

Judge NIXON. I mean——

Q. Could well be the bottom line.

Judge NIXON. Yeah, what, what——

Q. And that's why——

Judge NIXON. Could I have conceivably done?

Q. Well, that's why I had to ask you——

Judge NIXON. To influence the case? Ah, I certainly didn't do a thing in the world. I don't know a thing about—But what could I have done?

Q. Well, I mean, I don't know what you could have done. I mean it——

Judge NIXON. As United States District Judge.

Q. If someone wanted to use their imagination, I suppose they, they could think of things, and, and I, that's why we ask you the question did Bud Holmes ever talk to you about the case?

Judge NIXON. Oh, no.

During the April 1984 interview Judge Nixon did not reveal his meeting with Wiley Fairchild in which Mr. Fairchild had complained that he was being "blackmailed" by Bud Holmes in connection with Drew's case. Judge Nixon did not disclose his visit to Bud Holmes' farm and subsequent telephone conversation with Wiley Fairchild concerning Drew's case. Nor did Judge Nixon reveal his later telephone conversation with Carroll Ingram concerning Drew Fairchild. Instead, Judge Nixon repeatedly and categorically denied any knowledge or involvement whatsoever concerning Drew Fairchild and the drug case.

II. IN HIS JULY 1984 GRAND JURY TESTIMONY UNDER OATH, JUDGE NIXON AGAIN DENIED ANY INVOLVEMENT IN OR KNOWLEDGE OF THE DREW FAIRCHILD DRUG CASE

In the summer of 1984 a special federal grand jury was empaneled in Hattiesburg to investigate possible criminality associated with the Fairchild-Nixon investment and the handling of the Drew Fairchild drug prosecution. Judge Nixon appeared voluntarily and testified under oath on July 18, 1984, the first day the grand jury was convened. Judge Nixon retained counsel prior to his grand jury appearance, and was represented by counsel at the time of his testimony.

Judge Nixon was convicted of making a false declaration before the grand jury,[1] felony and a form of perjury, for the following testimony before the grand jury:

Q. The grand jury has heard evidence that the prosecutor, the state prosecutor, who eventually handled the case was an individual named Bud Holmes. Is he a friend of yours?

Judge NIXON. Very good friend of mine, long time friend, yes.

Q. Did he ever discuss the Drew Fairchild case with you?

Judge NIXON. No, not to the best of my recollection. I think I would recall if he had.

The jury also found Judge Nixon guilty of making a second false declaration based on the following grand jury testimony:

Q. All right. Judge, do you have anything you want to add?

The WITNESS. Yes, I do.

I want to say this. I—Here (indicating) are your notes too, copies of your instruments, rather.

I came here voluntarily and am very happy to cooperate with this grand jury and give them all the information that I have and that I could. And I have always thought everyone should do that, and that goes for the grand jury that's sitting at this time. I have nothing at all to—had nothing to hide or nothing to withhold and I brought everything that you asked me to bring.

And I want to say this. That I've been told and led to believe and read in the newspaper and heard on the news media so much about this is an investigation of the Drew Fairchild criminal case. Now, I have had nothing whatsoever officially or unofficially to do with the Drew Fairchild criminal case in federal court or state court. I don't need to reconstruct anything with reference to that. I've told you that from the beginning.

I have never talked to anyone about the case, any federal judge or state judge, federal prosecutor or state prosecutor, and I never handled any aspect of this case in federal court. As you said, Judge Cox handled it. I don't know where—someone told me maybe Judge Russell handled one of the other defendants also and—but I never handled any part of it, never had a thing to do with it at all, and never talked to anyone, state or federal, prosecutor or judge, in any

---

[1] 18 U.S.C. Section 1623 provides that "Whoever under oath in any proceeding before or ancillary to any court or grand jury of the United States knowingly makes any false material declaration . . . shall be fined not more than $10,000 or imprisoned not more than five years, or both." In order to convict Judge Nixon of this form of perjury, the jury was required to find beyond a reasonable doubt that Judge Nixon's grand jury testimony was false, and that Judge Nixon knew his testimony was false. See *United States* v. *Nixon*, 816 F.2d 1022, 1029 (5th Cir. 1987). In addition, to establish this offense, the false statements must be material to the grand jury's investigation. At Judge Nixon's trial the question of materiality was resolved out of the presence of the jury by the trial judge. On appeal Judge Nixon did not challenge the correctness of the trial court's ruling that the subject matter of Judge Nixon's statements to the grand jury was, as a matter of law, material to the grand jury's investigation. 816 F.2d at 1029.

way influence anybody with respect to this case. Didn't know anything about it until I read that account in the newspaper. Didn't even know Mr. Fairchild had a son when I was dealing with him in the business transaction.

So I want to say that because I understand that's what this is all about. The investigation is apparently, if the news media is correct, and if I understand it correctly, that's what this is about, the Drew Fairchild criminal case.

The Committee learned, through its independent inquiry, that this closing statement to the grand jury was not spontaneous, but was prepared in writing by Judge Nixon prior to his grand jury appearance.

In addition to the foregoing grand jury testimony that was the focus of criminal charges and led to his convictions, Judge Nixon described to the grand jury his meetings with Wiley Fairchild as follows:

Q. If the first meeting [with Wiley Fairchild] produced the deal, what would the other meetings have been for?

Judge NIXON. I met with him several times. One time he told me that he thought he was over—maybe overcharging me for these and would maybe put me in another later. He mentioned something about the name of a well was—I don't know, remember when this was—it had something to do with the name School in the property. But he never did and there never was any mention of it.

And, as I say, I don't know of any reason I would have met with him after the transaction was finalized in the first part of 1981, but I can't say for sure. It's possible.

You're asking me about—I—don't like to keep repeating it—but three or four years ago, and I'm trying to reconstruct this to the best of my recollection and knowledge.

As he did in the interview, in his grand jury testimony Judge Nixon did not reveal his meeting with Wiley Fairchild in which Wiley complained he was being "blackmailed" in connection with Drew Fairchild's drug case. Nor did the Judge reveal his visit to Bud Holmes' farm, the telephone call from the farm to Wiley Fairchild about Drew's case, and his later conversation with Carroll Ingram about Drew Fairchild.

III. THE TESTIMONY OF WILEY FAIRCHILD, BUD HOLMES AND CARROLL INGRAM CONCERNING JUDGE NIXON'S KNOWLEDGE OF AND INVOLVEMENT IN THE DREW FAIRCHILD CASE

Drew Fairchild's drug prosecution generated a great deal of negative publicity in Hattiesburg. It was a source of embarrassment and humiliation to Wiley Fairchild, who was concerned about his family's reputation. Wiley Fairchild, heard rumors circulating in Hattiesburg that Drew's case had never been disposed of because his father had paid someone a bribe. In addition, Wiley Fairchild felt he was being extorted in connection with his son's case because of the treatment of Robert Royals, Drew's co-manager at the airport and a participant in the smuggling conspiracy. Wiley Fairchild testified that Mr. Royals told him that Bill Porter had said Wiley should "get off his money" to help Drew, who had his "tail in a crack."

Convinced that Bud Holmes and possibly others were "blackmailing" him in connection with his son's case, Wiley Fairchild sought help from Judge Nixon. Mr. Fairchild testified that he telephoned Judge Nixon and, when the Judge was unavailable, left a message asking the Judge to stop by the W.R. Fairchild Construction Company office in Hattiesburg. Wiley Fairchild specifically wanted Mr. Holmes to take care of his son's case as promised, and sought out Judge Nixon because of the Judge's previous offer of help—"If I can ever help you I will and if I can't, I'll just tell you I can't"—and because he knew Judge Nixon and Mr. Holmes were very good friends.

Judge Nixon visited Wiley Fairchild's office in Hattiesburg for a fifteen or twenty-minute meeting. Wiley Fairchild cannot recall when this meeting occurred, although he testified at Judge Nixon's trial that it occurred before he learned his son's case had been passed to the file. At the meeting, Wiley Fairchild told the Judge he was being blackmailed by Mr. Holmes and possibly Carroll Ingram concerning the handling of Drew's drug case. Mr. Fairchild emphasized the unfairness of his son's predicament compared to the treatment of Robert Royals. Wiley Fairchild told Judge Nixon, ". . . if they will go ahead and prosecute Bob Royals they won't hear a damn word out of me. He's guilty and my son's guilty, but I just don't like them picking on my son because I got money." Mr. Fairchild does not recall Judge Nixon's response to his blackmail allegations, other than that the Judge may have "grunted a little something or another."

Judge Nixon met with Bud Holmes shortly after hearing of Wiley Fairchild's complaints of blackmail in connection with Drew's case. Mr. Holmes believes that this occurred on May 14, 1982.

According to Mr. Holmes, he and Judge Nixon had a couple of drinks at the District Attorney's office and then drove to Mr. Holmes' farm outside Hattiesburg. Mr. Holmes testified that during the drive Judge Nixon said that Wiley Fairchild had "asked me [Nixon] if you [Holmes] and I weren't good friends, and I told him, yes, you know, we were. And he said, well, would you mind putting in a good word for my boy?" Mr. Holmes testified that Judge Nixon expressly said he did not want Mr. Holmes to do anything wrong, embarrassing, or against his oath of office, but that he [Nixon] was "just saying that Mr. Fairchild asked me to put in a good word."

Mr. Holmes testified that he reacted to these statements for his friend Judge Nixon by asking, "What is it you want? You want an apology? I don't know. What does the man want?" When Judge Nixon reiterated that he was simply "putting in a good word" and not asking Mr. Holmes to do anything, Mr. Holmes responded, ". . . hell, I'm District Attorney, I'll pass it to the files." Judge Nixon then told him, ". . . I'm not asking you to do that. Now I'm not asking you to do anything now."

Bud Holmes testified that after they arrived at the farm, he and Judge Nixon continued to talk about the Drew Fairchild case. Mr. Holmes told Judge Nixon about the oral pleas agreement already negotiated with Bill Porter, calling for probation and a fine in exchange for Drew's cooperation. Mr. Holmes testified that after hearing the terms of Drew's plea arrangement, Judge Nixon asked if Wiley Fairchild knew of the deal, and said he wished to telephone Mr. Fairchild and tell him about the arrangement. Mr. Holmes testified that Judge Nixon then telephoned Wiley Fairchild.

Wiley Fairchild confirmed that he received a telephone call from Judge Nixon around seven o'clock one night. Mr. Fairchild had been drinking that evening but remembers the call because of its significance. Mr. Fairchild testified that Judge Nixon said, "Wiley, you know that man we was talking to this evening? . . . I'm in his house, and everything (is) going to be taken care of to your satisfaction." Thereafter, according to Mr. Fairchild, Bud Holmes got on the line and said, "Wiley, when this man asks me to do something, I don't ask no questions, I just go ahead and do it."

In his trial testimony Wiley Fairchild specifically recalled that Judge Nixon was on the phone first. Mr. Fairchild testified that this call made him very happy because it meant that his son's case was "done away with once and for all." The next thing he recalled about his son's case was that it was passed to the file.

Mr. Holmes' recollection of the phone call in his trial testimony was similar to Wiley Fairchild's—that Judge Nixon placed the call and told Mr. Fairchild, "I'm out at his farm and he tells me your son isn't going to jail, and I just wanted to call and tell you that." According to Mr. Holmes, Judge Nixon then went on to thank Wiley Fairchild for the profitable oil investment opportunity. Mr. Holmes testified that he then took the phone and told Mr. Fairchild he would pass the case to the file, adding that Judge Nixon should get the credit for helping Drew.

Carroll Ingram learned of Judge Nixon's conversations with Bud Holmes and Wiley Fairchild concerning the Drew Fairchild case from all three participants—Wiley Fairchild, Bud Holmes and Judge Nixon himself. Mr. Ingram testified that in the fall of 1982, Wiley Fairchild told him that he (Fairchild) had asked Judge Nixon to talk to Bud Holmes about Drew's case, that Judge Nixon had talked to Mr. Holmes and that the results were "positive" such that "Drew Fairchild's case was going to be okay."

Mr. Ingram testified that Judge Nixon told him that he (Nixon) had talked to Bud Holmes about the Drew Fairchild case because Wiley Fairchild had asked him to do so. Judge Nixon told Mr. Ingram that Mr. Holmes said he would consider this request and that Drew's case "was okay, that there was not anything going to happen in Drew Fairchild's case."

Following his meeting with Judge Nixon and the telephone call to Wiley Fairchild from the farm, District Attorney Holmes let Drew Fairchild's case "just sit" until he passed the case to the file in late 1982 at the end of Judge Weldy's term. Mr. Holmes told the Subcommittee that he planned on sweeping Drew's case "under the rug" in part because of his discussion with Judge Nixon and promise to Wiley Fairchild. Mr. Holmes testified that while Judge Nixon did not specifically ask him to pass the case to the file, the Judge's "putting in a good word for Drew . . . caused enough influence on me to go ahead and do what I did." Mr. Holmes repeatedly testified, both at trial and before the Subcommittee, that but for Judge Nixon's intervention he would not have passed the case to the file in December 1982.

IV. JUDGE NIXON'S POST-INDICTMENT TESTIMONY

In both his April, 1984, interview with law enforcement authorities and his July, 1984, grand jury testimony under oath, Judge Nixon made no mention of his meeting with Wiley Fairchild where Wiley complained of being "blackmailed" in connection with Drew's case, his conversation with Bud Holmes concerning Drew's case, his subsequent telephone call to Wiley Fairchild from Mr. Holmes' farm, and his later conversation with Carroll Ingram concerning

Drew Fairchild. It was only during his testimony at his criminal trial, after Mr. Holmes, Mr. Ingram and Wiley Fairchild cooperated with the government, that Judge Nixon finally acknowledged his participation in these events.

Judge Nixon admits that he met with Wiley Fairchild at the offices of Fairchild Construction Company, although he claims to have done so not at Wiley's specific request. Rather, Judge Nixon contends that he simply stopped by the Fairchild office to "keep in touch" with Wiley Fairchild and to discuss the progress of his investment. Judge Nixon also concedes that Wiley Fairchild raised the subject of "blackmail" in connection with Drew's case, and complained about the disparate treatment between his son's case and the non-prosecution of Robert Royals, the co-conspirator. Judge Nixon claims that when confronted with Mr. Fairchild's allegation of "blackmail," he did not probe more deeply because he was "not a law enforcement officer" or Mr. Fairchild's attorney. According to Judge Nixon, Mr. Fairchild's complaints were "nonsense", but at the same time he was "shocked" by Mr. Fairchild's story.

Judge Nixon insists that Wiley Fairchild did not ask him to do anything in connection with Drew's case. Nevertheless, Judge Nixon admits that "he had the impression" Mr. Fairchild wanted the Judge to speak with Mr. Holmes, and Judge Nixon relayed Mr. Fairchild's complaints to Bud Holmes that very same day, purportedly because Mr. Fairchild's blackmail concerns were "weighing on my [Nixon's] mind."

Judge Nixon denies meeting Mr. Holmes at the District Attorney's office, and contends he did not drive with Mr. Holmes to the farm. However, the Judge admits meeting with Bud Holmes at the farm and speaking with Mr. Fairchild on the telephone. Judge Nixon contends that he did not "discuss" the facts of Drew's case and specifically told Mr. Holmes he did not want to discuss the case, but it is undisputed that Drew's case was the subject of his conversation with Mr. Holmes. Judge Nixon claims that Holmes was on the telephone, suddenly handed him the phone and said, "here, talk to Wiley Fairchild." Judge Nixon admits that during this telephone conversation Wiley Fairchild told him, "I'm glad you mentioned that matter to Bud . . . I'm satisfied."

Judge Nixon disputes the date of his meeting with Wiley Fairchild, his visit to Bud Holmes' farm and his telephone call with Mr. Fairchild. Both Bud Holmes and Wiley Fairchild have repeatedly placed these events as occurring before Drew's case was passed to the file, and Carroll Ingram testified that his conversation with Wiley Fairchild about these events took place before Drew's case was passed to the file. In contrast, Judge Nixon contends that these events took place in March 1983, after Drew's case was passed to the file, such that his dialogue with Bud Holmes and Wiley Fairchild could have played no role in the handling of the Drew Fairchild drug prosecution.

At trial, Judge Nixon vigorously and repeatedly denied having been in Hattiesburg on May 14, 1982, the date Mr. Holmes believes the phone call may have taken place. Judge Nixon claimed that he was in Biloxi preparing for an asbestos trial. However, Judge Nixon's testimony was proven to be false during post-trial proceedings. Dental records confirmed that the Judge received treatment in Hattiesburg on May 14, 1982. Judge Nixon urged the Subcommittee to accept his explanation that his testimony concerning May 14, 1982 was simply an "honest mistake" rather than deliberately false testimony.

□ 1500

Mr. BROOKS. Mr. Speaker, I yield 8 minutes to the gentleman from Wisconsin [Mr. SENSENBRENNER].

Mr. SENSENBRENNER. Mr. Speaker, both the Subcommittee on Civil and Constitutional Rights and the full Judiciary Committee unanimously adopted and reported out House Resolution 87. This overwhelming support for House Resolution 87 is indicative of the weight of evidence supporting the articles of impeachment against Judge Walter Nixon.

The subcommittee conducted 7 full days of hearings during which nine witnesses testified, admitted, and reviewed over 100 exhibits and also accepted proffers and affidavits of several other witnesses in lieu of live testimony. In addition, the subcommittee afforded Judge Nixon and his counsel unlimited opportunity to participate exhaustively in the hearings. After this thorough, objective, and definitive review of the facts, the weight of the evidence against Judge Nixon was substantial and it became quite obvious that he could not remain a Federal judge.

Articles I and II of the articles of impeachment reflect the false statements made by Judge Nixon to the grand jury and which were the basis for his conviction on two counts of perjury. In his appearance before the grand jury on July 18, 1984, Judge Nixon testified under oath that District Attorney "Bud" Holmes never discussed the Drew Fairchild case with him. Moreover, in a lengthy statement offered at the conclusion of his testimony, Judge Nixon told the grand jury that he "had nothing whatsoever, officially or unofficially, to do with the Drew Fairchild criminal case in Federal court or State court, * * * never talked to anyone about the case, any Federal judge or State judge, Federal prosecutor or State prosecutor," and "never talked to anyone, State or Federal, prosecutor or judge, to in any way influence anybody with respect to this case." However, in direct contrast to Judge Nixon's grand jury testimony, the evidence at trial established, through Nixon's own testimony, that he was, in fact, involved in the Drew Fairchild case through meetings first with Wiley Fairchild and then "Bud" Holmes, followed by a telephone conversation between Judge Nixon and Fairchild from Holmes' farm.

Article III is an omnibus article which incorporates most of the false or misleading statements made by Nixon to investigators and the grand jury, including the two false statements specified in articles I and II. It alleges that Nixon raised substantial doubt as to his judicial integrity, undermined confidence in the integrity and impartiality of the judiciary, betrayed the trust of the people of the United States, disobeyed the laws of the United States, and brought disrepute on the Federal courts by consistently concealing his conversations with Fairchild and Holmes. Our hearings have produced clear and convincing evidence that Judge Nixon lied to the law enforcement authorities during the investigation of the criminal case as well as to the Federal grand jury. By deliberately attempting to conceal his relationships with Wiley Fairchild and "Bud" Holmes, Judge Nixon thwarted the entire fact finding process by defining the "truth, the whole truth, and nothing but the truth" as only that which was convenient for Judge Nixon to disclose at that particular time.

Why did Judge Nixon lie? In order to understand the answer to that question, we must examine the impropriety of Nixon's financial dealings with Wiley Fairchild. And although the committee did not propose articles specifically alleging these dealings to be impeachable offenses, it does not mean we ignored their impropriety. It is necessary to examine those dealings in order to understand why Judge Nixon intentionally concealed and lied about his dealings with Wiley Fairchild.

First, we found Judge Nixon soliciting a lawyer who practiced before him to put him into a profitable oil deal with that lawyer's client. The resulting oil deal was extremely questionable and his conduct regarding it unethical. He received a sweetheart deal—not available to the public: Over $70,000 in oil royalties on an initial investment of only $9,500, with no cash up front; with favorable interest rates 5 percentage points lower than banks were charging; with oil deeds that were backdated and did not become effective until the wells actually produced; with a purchase price three times less than what the wells were worth in any arm's length transaction. Judge Nixon failed to report the transaction on his financial disclosure for 1980, even though he claims the agreement was reached then. Even when he mentioned oil royalties on his 1981 disclosure statement, he failed to disclose that the royalties and loans came from Wiley Fairchild. It wasn't until the Judicial Ethics Committee forced that disclosure and compelled him to disclose his relationship to Fairchild that any potential litigant would have even known of that relationship.

And what did Judge Nixon do in that regard? Did he recuse himself from cases where Wiley Fairchild was a party? No! He violated several canons of judicial ethics and continued to grant favorable rulings to Fairchild

in two civil cases during the time he was soliciting and participating in the oil deal with Wiley Fairchild.

Therefore, once we understood the shady nature of his deal with Fairchild, we began to see why Nixon lied in the interview and the grand jury about his conversations with Fairchild and "Bud" Holmes. Throughout both proceedings he consciously concealed his conversations with Fairchild and Holmes regarding the prosecution of Fairchild's son. Nixon did play a part in that case in acting as a go-between for his oil patron and the State prosecutor and, by his own admission, purposely concealed it.

Clearly, the judge is not fit to sit upon the Federal judiciary and we must perform our constitutional duty to impeach him. Once the Supreme Court denied certiorari on Judge Nixon's appeal, I sent him a letter requesting that he resign. He has refused to do so, leaving us with impeachment as the only alternative. Let us get on with this task before he returns to the bench.

Mr. BROOKS. Mr. Speaker, I yield 4 minutes to the gentleman from Wisconsin [Mr. KASTENMEIER].

Mr. KASTENMEIER. Mr. Speaker, I thank the chairman of my committee, the gentleman from Texas [Mr. BROOKS], for yielding me this time.

Mr. Speaker, I want to say that the preceding description given the Members about this case by the chairman of the Committee on the Judiciary, the gentleman from Texas [Mr. BROOKS], and by the chairman of the subcommittee who handled the subcommittee in terms of its deliberations all the way through, the gentleman from California [Mr. EDWARDS], and the gentleman from Wisconsin [Mr. SENSENBRENNER], the ranking minority member on that subcommittee, as I am a member of that subcommittee, I can say that the foregoing was an accurate and fair description of this case.

Furthermore, I want to compliment the gentleman from California for his very careful, fair, deliberate, patient treatment of the case of the impeachment of Walter Nixon.

Mr. Speaker, I should make the observation, however, that it is the third judicial impeachment in less than 3 years. I handled the first one, that of Harry Claiborne, a judge in the State of Nevada, in 1986. Last year we had the impeachment of Alcee Hastings, a judge in the State of Florida, handled by the gentleman from Michigan [Mr. CONYERS]. The point I am trying to make is that we have had three impeachments of judicial personnel in just 2 or 3 years.

The burden on the other body is evident. They have not even had their evidentiary committee panels meeting and presume to do so, I believe, in the month of July even though that impeachment was sent over there last year, and whether they will have any difficulty at all with this particular proceeding remains to be seen.

The question I pose is that it is probably time that we look institutionally in terms of Federal discipline and removal of article III judges whether we can continue to rely on the process of impeachment.

□ 1600

I would propose, as I have in this particular bill, that we have a study for the purposes of the future of the removal process, whether we can change the process without constitutional amendment, and if a constitutional amendment is required, do we need to go that route. Is there any way in which we can provide disincentives or incentives in terms of retirement of these judges voluntarily.

These three cases are very much alike. All three of these judges have been subject to criminal trials, despite the case of one being exonerated. All three have declined to retire, to yield up their judgeship, forcing us into this situation; that is, a full-blown impeachment involving both the House of Representatives constitutionally and the Senate.

We have to find, I think, some answer, since the Federal Judiciary today is at nearly 900 article III judges and is growing. It is no longer a small community of a couple of hundred judges, it is a large community.

As I understand it, there may be one or two cases on the horizon which may even come to this particular standing for us as a challenge for us in the future. While I would hope not, there is a distinct possibility that we will again be importuned in the near future, and it would be our duty to consider this proceeding.

Therefore, I suggest to the membership in due course we would like a study commission on the future of impeachment under the Constitution.

Mr. BROOKS. Mr. Speaker, for purposes of debate only, I yield 6 minutes to the distinguished ranking minority member, the gentleman from New York, Mr. HAMILTON FISH.

Mr. FISH. Mr. Speaker, I thank my friend, the chairman of the Judiciary Committee, for yielding time to me.

Mr. Speaker, I would like to commend the gentleman from California [Mr. EDWARDS] and the gentleman from Wisconsin [Mr. SENSENBRENNER], as well as the other members of the Subcommittee on Civil and Constitutional Rights for their capable direction of the investigation into the allegations against Chief Judge Walter L. Nixon, Jr. Through this distressing process, they worked closely together in a bipartisan effort to conduct a thorough, fair, and objective review of the facts.

I applaud the efforts by the subcommittee to provide Judge Nixon and his counsel with wide latitude to participate in the hearings. The 7 full days of hearings indicate the seriousness with which the subcommittee approached this matter.

In the recent letter sent by Judge Nixon's attorney to the Members of the House of Representatives, Judge Nixon requests that any action by the House of Representatives be postponed until the Fifth Circuit hears the argument concerning his section 2255 motion. It is this request that I wish to address.

My colleagues, let us remember that Judge Nixon was convicted on two counts of perjury on February 9, 1986, and sentenced to concurrent terms of 5 years imprisonment on each count. The conviction and sentence were affirmed on appeal to the Fifth Circuit, and a rehearing en banc was denied. The U.S. Supreme Court denied certiorari. Judge Nixon thereafter filed with the District Court a motion to vacate his conviction and sentence pursuant to 28 U.S.C. 2255.

The standard applied to section 2255 hearings is essentially the same as for hearings held on a writ of habeas corpus. The petitioner is entitled to postconviction relief only if he establishes a jurisdictional or constitutional error or an error of law which is so fundamental that it inherently results in a complete miscarriage of justice or in a proceeding inconsistent with the rudimentary demands of fair procedure. The petitioner has the burden of proof.

The five grounds raised by Judge Nixon in his section 2255 petition were as follows:

First, the Government's failure to disclose favorable materials before trial;

Second, the Government's knowing use of false testimony;

Third, the Government's failure to disclose statements of witnesses as required by the Jencks Act;

Fourth, the Government's creation of a perjury trial during the grand jury proceedings; and

Fifth, the Government's prosecutorial abuse and misconduct.

U.S. District Court Judge John F. Nangle conducted 2 days of hearings in August, 1988, during which he heard the actual testimony of Wiley Fairchild and other witnesses called by Nixon. On December 19, 1988, Judge Nangle issued a 59-page opinion in which he concluded Judge Nixon's motion was without merit. This decision has been appealed to the Fifth Circuit Court of Appeals. The Fifth Circuit has advised Judge Nixon that it will hear argument in June 1989.

Mr. Speaker, for the following reasons, I submit it is neither wise nor prudent to delay the impeachment

proceedings any further to await the Fifth Circuit's action on this matter.

First, the issues in the section 2255 proceeding simply are not dispositive of the substance of the Articles of Impeachment in H. Res. 87. For instance, whether a witness was given improper inducements by a prosecutor (such as is alleged by Judge Nixon but which Judge Nangle ruled was without merit) goes to the question of the fairness of the criminal trial. That is a question for the courts to resolve, not Congress. The only issue before Congress is whether, as alleged in the Articles, Judge Nixon lied to investigators and to the grand jury. The Articles of Impeachment are based on Judge Nixon's own words, not those of others—first before investigators and the grand jury and second in his own criminal trial. The Articles of Impeachment were crafted in such a way as to avoid reliance upon the other witnesses in the trial, such as Wiley Fairchild and Bud Holmes, and thus impeachment would still be appropriate whatever the ultimate result of the Fifth Circuit.

Second, the issue in the section 2255 proceeding concerning the recantation of Wiley Fairchild's testimony is also not dispositive of the Articles of Impeachment. Wiley Fairchild's testimony has changed concerning the date a conversation might have occurred between Wiley Fairchild and Judge Nixon. However, Judge Nixon is charged in the articles with lying about the fact of that conversation, not the date of it. Therefore, even if one accepts the recanted version of Wiley Fairchild's testimony, Nixon would still be guilty of lying about it occuring at all. He would be guilty of the false statements alleged in the articles of impeachment.

Third, the section 2255 petition filed by Judge Nixon is not an exclusive avenue of appeal. The statute allows for motions to be filed under section 2255 as long as the petitioner is incarcerated and so long as the petitioner alleges new grounds for relief. Thus, postponing action by the House now does not guarantee this would be the last section 2255 petition filed by Judge Nixon. Additionally, if the Fifth Circuit rules against the judge and affirms the district court, Judge Nixon will no doubt ask the House of Representatives for another delay while an appeal is pending before the Supreme Court.

In conclusion, Mr. Speaker, it is not in the interests of justice to postpone action on House Resolution 87 because of Judge Nixon's section 2255 petitions. The House Judiciary Committee has been excruciatingly patient in waiting not only for all the avenues of appeal to be exhausted, but also for the district court to rule in the section 2255 proceeding. Further delay serves no purpose. The House of Representatives needs to act on House Resolution 87 as soon as possible, especially to prevent Judge Nixon from returning to the bench in November 1989, when he will be eligible for parole.

As a convicted felon, Judge Nixon would be allowed to sit as a judge in a State which has forbidden him from practicing law. I urge my colleagues to prevent that incredible situation from occurring and urge you to vote for impeachment of Judge Nixon.

Mr. BROOKS. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New York [Mr. SCHUMER], a member of the committee.

Mr. SCHUMER. Mr. Speaker, first, on this unhappy occasion, I think Members on both sides of the aisle want to commend the chairman of our subcommittee, the subcommittee on which I used to sit, the gentleman from California [Mr. EDWARDS] for his leadership on what proved to be a tremendously difficult issue for the subcommittee. He was judicious, he was careful, he was fair, he was thorough, he was really exemplary, and I think the gentleman from California [Mr. EDWARDS] deserves all of the credit in the world.

Our subcommittee held numerous hearings and spent hours and hours debating the issues before us. The decision that we have come to did not come lightly, and Chairman EDWARDS gave Judge Nixon every opportunity to present his version of the facts.

When I first reviewed the case I was not convinced that the judge's conviction was meritorious and, in fact, I had to spend days and days wrestling in my mind with what we should do by not impeaching a judge who had been convicted of crimes in our courts. But the subcommittee did not accept Judge Nixon's conviction on its face, my colleagues. In other words, we did not just look at the record and make our judgment.

□ 1610

The subcommittee reviewed the conviction de novo and what we found the deeper and deeper we looked, with the help of our able counsel, was that the article of impeachment was on all fours with the judge's misconduct.

In other words, ladies and gentleman, many of us started out extremely skeptical. It is a case where some of the charges were dropped and the only conviction was for perjury.

Perjury, of course, is a very difficult, difficult thing to decide; but as we looked and examined all of the records and in fact found many things that were not in the record it became very clear to us that this impeachment was meritorious.

My colleagues, in conclusion, impeachment is a grave issue. In this case it is deserved.

Mr. Speaker, I urge my colleagues to follow the thoughtful lead of the gentleman from California [Mr. EDWARDS], chairman of the subcommittee, and vote to impeach Judge Nixon.

Mr. BROOKS. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Florida [Mr. JAMES].

Mr. JAMES. Mr. Speaker, today the House of Representatives is being asked to take the required next step in removing Walter Nixon from his privileged position as a U.S. district judge. Judge Nixon is only the second Federal judge in U.S. history to be convicted of crimes while in office. The first, Harry Claiborne, was impeached by the House and removed from office by the Senate in 1986.

It's been well over a year since Judge Nixon exhausted his appeal to the U.S. Supreme Court and the Judicial Conference certified to this House that impeachment may be warranted. It is now time to move forward without any further delay.

Judge Nixon was convicted of perjury; he lied to a Federal grand jury. There is no crime more heinous to the integrity of the judicial process than perjury.

How can we expect the American people to have any trust in the honesty and impartiality of a judge who has been convicted of and imprisoned for perjury? They cannot. Judge Nixon must be impeached.

Since his indictment in 1985, Judge Nixon has not presided over any cases. Yet since his conviction in February 1986, he has received over $286,000 in salary which he continues to draw even while in prison.

As a result of his crime of deceit, he was suspended from the practice of law in Mississippi and Louisiana, yet he has told the Judiciary Subcommittee on Civil and Constitutional Rights that he intends to return to the bench when he is released from prison, which will be in just a few months. We cannot allow this to happen.

The articles of impeachment approved by the Judiciary Committee were carefully crafted and considered after many months of independent investigation, document review, and testimony. The committee intentionally crafted articles which deal only with actual false statements made by Judge Nixon. The falsity of these statements can be proven by simply reviewing what Judge Nixon told investigators and the grand jury prior to his indictment, and comparing it to his testimony at trial, and before the House Judiciary Subcommittee.

Let me provide an example: Judge Nixon told investigators in April 1984 that he knew of no reason he would have met with Wiley Fairchild after February 1981, and that Mr. Fairchild never brought up the subject of his son's drug-smuggling case. Yet when Judge Nixon testified at his trial and before the House Judiciary Subcom-

mittee on Civil and Constitutional Rights he said he did meet with Wiley Fairchild after February 1981, and Mr. Fairchild had brought up the subject of his son's case, claiming that "Bud" Holmes, and possibly others, were blackmailing Wiley Fairchild in the handling of the case.

Simply by comparing and contrasting Judge Nixon's own words, you can see that his statements are inconsistent. The case is as simple as that. Judge Nixon lied—and he lied repeatedly and intentionally. Although the process of impeaching a Federal judge is cumbersome and even distasteful, we must proceed with due haste. It is our constitutional duty.

Mr. BROOKS. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Speaker, I thank the chairman of the Committee of the Judiciary for this opportunity to speak on this important issue.

To judge a judge or not to judge a judge, that is the question before us. The impeachment proceedings as outlined in the Constitution are the sole means by which America, our Nation, can look to the questions of the conduct of a Federal judge.

So that duty, falling upon us, is being exercised here today, but not isolatedly not without precedent, not without evidence but through a proceeding which allowed for the careful consideration of the issues as was outlined heretofore and was carried out by the subcommittee and the full Committee on the Judiciary.

But there is an aspect of this that the public should know that has been mentioned but should be made clear in the CONGRESSIONAL RECORD. That is this: That no matter what judicial proceedings, courts of law, or other methodologies in which the judge in this case or other judges in other impeachments were first considered, like a trial in criminal court, the subcommittee in this case, as in previous impeachments, was able to set aside the results of a judicial proceeding and begin to analyze this case and the facts therein on its own, as was mentioned, de novo from the beginning, as if a judicial proceeding had never occurred at all.

That is to the everlasting credit of the procedures that we follow here in the House in impeachment proceedings and to the everlasting credit of this particular subcommittee which saw its duty and did it notwithstanding the court's results.

That is important for the people of our Nation to recognize that we, in the following of our own guidelines, take pains to protect the rights of the person targeted for impeachment.

There is one other facet to all of this that must be recognized by the public, that we did not reach down into the circuit where this judge was plying his judgeship and bring him to our court, as it were, on our own. He was first judged by his peers, not only in a court of law, but judged by his judicial peers. It is their inquiry, their suggestion, their referral to the House of Representatives, to the Congress of the United States which resulted in this hour of impeachment here and now.

So he was judged by judges, his peers, and they said to us in the House of Representatives, "Do what you will under the constitutional duty that befalls upon you."

Judge Nixon must be impeached.

Mr. BROOKS. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Illinois [Mr. HYDE].

Mr. HYDE. I thank the distinguished chairman.

Mr. Speaker, I just listened with great interest to my subcommittee chairman, the gentleman from Wisconsin [Mr. KASTENMEIER], discuss quite properly the complexities and the cumbersomeness of having to impeach Federal judges, to remove them from the bench, in appropriate situations.

We have had three similar situations confront us in the space of the last couple of years.

I just have a benign suggestion to the upper chamber, the other body, which has the constitutional responsibility to provide advice and consent on these various nominees: I think, and I suggest this with great respect, if they would spend more time on the character of the nominees rather than their ideology perhaps the quality of justice might be improved.

Mr. Speaker, I yield back the balance of my time.

Mr. BROOKS. Mr. Speaker, I move the previous question on the committee amendment in the nature of a substitute and on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The SPEAKER pro tempore. The question is on the resolution, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 417, nays 0, not voting 17, as follows:

[Roll No. 50]

□ 1638

Mr. BERMAN changed his vote from "nay" to "yea."

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore (Mr. HOYER). Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

Mr. FRENZEL. Mr. Speaker, because of a conference on the budget I was obliged to miss the vote on rollcall No. 50. Had I been present, I would have voted "yea" to impeach Judge Nixon.

PERSONAL EXPLANATION

Mr. BUECHNER. Mr. Speaker, I also was in attendance at the joint House-Senate conference committee, and, had I been in attendance at rollcall No. 50, I, too, would have voted "yea" for impeachment.

PERSONAL EXPLANATION

Mr. SLATTERY. Mr. Speaker, on May 10, I was unavoidably absent for vote No. 50, adoption of the resolution to impeach Federal District Court Judge Walter L. Nixon of Mississippi. I was absent due to a meeting of the House-Senate conferees on the fiscal year 1990 budget resolution. Had I been present, I would have voted "yea," in favor of the impeachment of Judge Nixon.

APPOINTING MANAGERS AND PROVIDING CERTAIN AUTHORITIES AND PROCEDURES FOR THE TRIAL OF THE IMPEACHMENT OF WALTER L. NIXON, JR.

Mr. BROOKS. Mr. Speaker, I offer three privileged resolutions (H. Res. 150, H. Res. 151, and H. Res. 152), and I ask unanimous consent that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the resolutions.

The Clerk read as follows:

H. Res. 150

Resolved, That Mr. Brooks, Mr. Edwards of California, Mr. Cardin, Mr. Sensenbrenner, and Mr. Dannemeyer, Members of the House of Representatives, are appointed managers to conduct the impeachment trial against Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi.

H. Res. 151

Resolved, That the managers on the part of the House of Representatives in the matter of the impeachment of Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi, are authorized to do the following in the preparation and conduct of the impeachment trial:

(1) To employ legal, clerical, and other necessary assistants and to incur such other expenses as may be necessary, to be paid from amounts available to the Committee on the Judiciary under clause 5(f) of Rule XI of the Rules of the House of Representatives, House Resolution 103, One Hundred First Congress, agreed to March 21, 1989, or any other applicable expense resolution, on vouchers approved by the Chairman of the Committee on the Judiciary.

(2) To send for persons and papers, and to file with the Secretary of the Senate, on the part of the House of Representatives, any subsequent pleadings which they consider necessary.

(3) To take such other actions as are necessary to the preparation or conduct of the trial.

H. Res. 152

Resolved, That a message be sent to the Senate to inform the Senate that Mr. Brooks, Mr. Edwards of California, Mr. Cardin, Mr. Sensenbrenner, and Mr. Dannemeyer have been appointed managers for the trial of the impeachment of Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi.

Mr. BROOKS (during the reading). Mr. Speaker, I ask unanimous consent that the resolutions be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas [Mr. BROOKS] is recognized for 1 hour.

Mr. BROOKS. Mr. Speaker, these three resolutions are the customary resolutions necessary in order for the House to proceed with the impeachment trial of Judge Walter L. Nixon.

The House must appoint managers for the conduct of the impeachment trial in the Senate, advise the Senate of the appointment of those managers, and authorize those managers to expend funds, to employ staff, send for persons and papers, and to take such other actions as are necessary for the conduct of the trial. The managers for the trial will be DON EDWARDS, the chairman of the subcommittee that handled the matter, JIM SENSENBRENNER, the ranking minority member of the subcommittee, BILL DANNEMEYER, BEN CARDIN, and myself.

These three resolutions accomplish those objectives. I would point out to my colleagues that these are the resolutions which are customarily adopted by the House, subsequent to an impeachment.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the resolution.

There was no objective.

The resolutions were agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PAYMENT OF CERTAIN EXPENSES FROM AMOUNTS AVAILABLE TO THE COMMITTEE ON THE JUDICIARY AND RELEASING CERTAIN MATERIALS RELATING TO COMPLAINTS AGAINST ALCEE L. HASTINGS

Mr. BROOKS. Mr. Speaker, I offer two privileged resolutions (H. Res. 153 and H. Res. 154) and I ask unanimous consent that they be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the resolutions.

The Clerk read as follows:

H. Res. 153

Resolved, That expenses referred to in paragraph (1) of House Resolution 13, One Hundred First Congress, agreed to January 3, 1989, may be paid from amounts available to the Committee on the Judiciary under House Resolution 103, One Hundred First Congress, agreed to March 21, 1989, or any other applicable expense resolution for the One Hundred First Congress.

H. RES. 154

Resolved, That all papers, documents, and record of proceedings, relating to the matter of certain complaints against United States District Judge Alcee L. Hastings, and transmitted to the House of Representatives under section 372(c) of title 28, United States Code, but not previously released under section 372(c)(14) of such title, are, to the extent ordered by the Chairman of the Committee on the Judiciary, released under such section 372(c)(14).

Mr. BROOKS (during the reading). Mr. Speaker, I ask unanimous consent that the resolutions be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas [Mr. BROOKS], chairman of the Committee on the Judiciary, is recognized for 1 hour.

Mr. BROOKS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the first resolution relates to funding for the impeachment trial in the Senate of Judge Alcee Hastings. This resolution merely clarifies the managers' spending authority.

The second resolution provides authorization for the release of certain materials submitted to the House of Representatives pursuant to the judicial discipline statute. Under that law, materials submitted to the House are confidential unless the House specifically authorizes their release by resolution. The House passed such a resolution in the 100th Congress. This resolution provides the same authorization for the 101st Congress. The Senate committee charged with responsibility of receiving evidence in the Hastings impeachment has requested the conditional release of some of this material. The House managers have no objection to this.

Mr. Speaker, I move the previous question on the resolutions.

The previous question was ordered.

The resolutions were agreed to.

A motion to reconsider was laid on the table.

INTRODUCTION OF THE COOPERATIVE PRODUCTIVITY AND COMPETITIVENESS ACT OF 1989

(Mr. FISH asked and was given permission to address the House for 1 minute and to include extraneous matter.)

Mr. FISH. Mr. Speaker, the Cooperative Productivity and Competitiveness Act of 1989—H.R. 2264, which I have introduced would allow American companies to jointly operate manufacturing and production facilities without fear of violating the Federal antitrust laws.

Since 1981, our Nation has suffered a net loss of 700,000 manufacturing jobs—many of them to foreign competitors. We cannot continue to allow the loss of 100,000 manufacturing jobs a year. Flexible, cooperative production facilities can help us regain those jobs.

My bill responds to the need for America to compete in the rapidly changing high technology marketplace, which includes such areas as superconductivity, high definition television, robotics, and computer-aided design and manufacturing.

In recent years, Congress has taken a series of legislative steps aimed at reforming the Federal antitrust laws to increase America's ability to compete with Japan and with the European Common Market. Joint production ventures would be a giant step in this important legislative evolution. The passage of the Export Trading Company Act in 1982 and the National Cooperative Research Act in 1984 encouraging joint research and development are earlier examples of this trend.

Joint production will allow American companies—both large and small—to pool their resources and talents in a more efficient way. American companies would be given the flexibility to cooperate along the lines of the Japanese corporate production model, without sacrificing American individuality of initiative. By allowing American companies to jointly manufacture products, but then separately distribute and market those products, the proconsumer aspects of the antitrust laws are preserved.

Relaxation of antitrust barriers to our competitiveness has been favorably commented on by our Secretary of Commerce and the Attorney General of the United States.

The text of H.R. 2264 follows:

H.R. 2264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Cooperative Productivity and Competitiveness Act of 1989".

SEC. 2. AMENDMENTS.

(a) TERMINOLOGY.—The National Cooperative Research Act of 1984 (15 U.S.C. 4301, et seq.) is amended by striking the term "joint research and development venture" each place it appears and inserting in lieu thereof "joint research, development, or production venture";

(b) DEFINITION.—Section 2(a)(6) of the National Cooperative Research Act of 1984 (15 U.S.C. 4301(a)(6)) is amended—

(1) in subparagraph (D) by striking "or",

(2) in subparagraph (E)—

(A) by striking "(E)" and inserting "(F)", and

(B) by striking "and (D)" and inserting "(D), and (E)",

(3) by inserting after subparagraph (D) the following:

"(E) the production or manufacture of any product or process in a jointly owned or operated facility, or", and

(4) in the matter following subparagraph (F), as so redesignated, by inserting "development, or production,", after "the conducting of research,".

(c) EXCLUSIONS.—Section 2(b) of the National Cooperative Research Act of 1984 (15 U.S.C. 4301(b)) is amended—

(1) in paragraph (1) by striking "conduct the research and development that is" and inserting "carry out",

(2) in paragraph (2)—

(A) by striking "production or" in each place it appears,

(B) by adding ", distribution, or sale" after the word "marketing" in each place it appears, and

(C) by inserting ", copyrighted work, know how," after "patents", and

(3) in paragraph (3) by striking "other research and development activities" and inserting "any other joint research, development, or production venture activity".

(d) TECHNICAL AMENDMENTS.—(1) Section 3 of the National Cooperative Research Act of 1984 (15 U.S.C. 4302) is amended by striking "research and development markets" and inserting in lieu thereof "research, development, or product markets", and

(2) Section 6 of the National Cooperative Research Act of 1984 (15 U.S.C. 4305) is amended—

(A) in the heading by striking "Research Development, or Production", and

(B) in subsection (a) by inserting "(or, with respect to a venture involving the production of any product or process, not later than 90 days after the effective date of the Cooperative Productivity and Competitiveness Act of 1989") after "Act".

ADVANTAGES OF COMBINED CHILD SURVIVAL FUND AND HEALTH ACCOUNT IN FOREIGN AID AUTHORIZATION

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, today I am introducing a bill which will help streamline the Foreign Assistance Act of 1961 by combining the child survival fund and health accounts into one functional account. Joined by my colleagues, Congressmen TONY HALL and FRANK WOLF—leaders in the Congress on child survival activities—we are proposing an authorization level of $300 million for the combined functional account.

The low cost and effective child survival activities which have become known by the acronym of GOBI include growth monitoring of a child's development, oral rehydration therapy for victims of diarrhea, the promotion of breast feeding by mothers, and immunization of children against the common but preventable childhood diseases such as pertussis, diphtheria, tetanus, measles, polio, and tuberculosis. Child survival activities have a proven track record and, while we still have much work to do, the accomplishments to date are encouraging:

More than 50 percent of children in developing world are vaccinated against the major childhood diseases. This is up from less than 5 percent in

1974. Such immunizations have resulted in the saving of 1.5 million children's lives per year.

Twenty-five percent of the families in the developing world use oral rehydration therapy and an estimated 750,000 deaths from this common illness are prevented each year.

Mr. Speaker, as a matter of fact, I had the privilege of participating in two immunization days in Central America in 1985 and 1987. Remarkably, in 1985, a cease-fire in the civil war in El Salvador was accomplished and well over 200,000 children were immunized in 1 day. I have personally witnessed the phenomenal effects of ORT—a dose which can literally save the child's life in only a matter of hours and costs only pennies. A scientific combination of salts and minerals, ORT has become known as a miracle worker in the health field.

While the health account provides as much as 33 percent of funds for child survival activities, the health account helps fund primary health care, water and sanitation projects, and insect or organism-borne disease treatment and control, such as malaria. The health account has contributed much to the research and testing of vaccines for common diseases in the developing world and improved solutions for oral rehydration treatments.

In order to help our colleagues understand how the level of funding for the combined functional account was derived, Mr. Speaker, I would like to take a moment to "walk through" the figures for the two currently separate accounts. The high water mark for the international health and child survival spending was in fiscal year 1987 and I would like to start at that point.

Mr. Speaker, in fiscal year 1987, the Agency for International Development spent $184.5 million from numerous accounts on child survival activities and $100.9 million from the health account on nonchild survival activities, for a total of $285.4 million. In fiscal year 1988, the total spending level decreased to $266.9 million—$169.9 million in child survival activities, $73.6 million from the health account and $23.4 million from the Development Fund for Africa in nonchild survival health projects. The funding, unfortunately, has remained about the same since fiscal year 1988.

The $300 million level for a combined child survival and health account is derived from the fiscal year 1987 health spending at roughly $100 million and an increase from $184.5 million to $200 million for child survival activities. Congressman HALL has a bill, H.R. 1616, of which I am a cosponsor, which sets the global level of funding for child survival activities at no less than $200 million. We are reflecting that priority in this new bill.

My colleagues may be as surprised as I to learn that the global spending for child survival activities has actually decreased since fiscal year 1987 even though there has been overwhelming support for this project both in the Foreign Affairs Committee and the full House of Representatives. The funding for the activities has been spread over as many as seven accounts, making the accounting for spending levels very confusing and often misleading. The child survival fund itself has only provided 39 percent of the funds of the global activities, with the health account providing as much as 33 percent.

As you know, Mr. Speaker, the House Foreign Affairs Committee has been diligently working to rewrite, streamline and generally clean up the Foreign Assistance Act of 1961. During markup of the revised bill, I plan to offer an amendment similar to the bill we are introducing today. I believe a combined child survival/health account will help meet the objectives of the rewrite by reducing the number of functional accounts, cutting a number of earmarks, setting a priority for scarce foreign aid dollars and streamlining the funding for child survival activities.

During markup in the Subcommittee on Human Rights and International Organizations, my colleagues supported my amendments which delineated two of the basic authorities for economic assistance. Those amendments established as priorities assistance for improved health conditions, preventive care programs, and self-sustaining primary health care systems, and promotion of child survival activities.

These two priorities are essential to combating the most widespread killers of children and their mothers. It has been estimated that of the approximately 15 million deaths of children as much as half are due to preventable illnesses such as measles, polio, diphtheria, pertussis, tetanus, tuberculosis, and dehydration caused by diarrhea. In addition, up to one-half of all infant mortality in the developing world occurs in the first 28 day of life. These are lives which can be saved through effective primary maternal, prenatal, and neonatal health care systems.

Mr. Speaker, a combined child survival/health account will provide a coherent, clearly defined funding mechanism for these important life-saving interventions. I would ask that my colleagues support this legislation and work to incorporate this objective in the rewrite of the foreign assistance authorization bill.

INTRODUCTION OF LEGISLATION ADDRESSING INEQUITY IN MEDICARE PHYSICIAN REIMBURSEMENT

(Mr. OWENS of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OWENS of Utah. Mr. Speaker, I am today introducing legislation which addresses a serious inequity in the system of Medicare physician reimbursement. Under the present formula, Medicare reimburses physicians a different amount, depending on their geographic location around the country. Studies have shown that Medicare makes substantial differences of payments for the same surgery and care, depending on where the physician lives, disparities which cannot be justified by differences in the cost of providing care. Our current system is completely out of whack, and doctors and their elderly patients in Utah in various regions around the country, are being discriminated against. As a result, quality care for senior citizens in Utah and in many other States is being jeopardized. We must do something, about that gross unfairness, and that something is, to pass my bill.

The 1988 Physician Payment Review Commission [PPRC] study showed that all of the prevailing charges in Utah are below the national mean. The data demonstrates that Medicare prevailing fees in Utah are substantially lower than in most areas of the country. In fact, for some services, Utah is dead last. Utah's Medicare allowable fees are extremely low for both surgical procedures and office visits. For example, the Utah payment for a pacemaker insertion is $680 while the national average is $1,228—almost double. Utah ranks 12th from the bottom out of 117 Medicare geographic localities that were surveyed. There is no rational explanation for these differences in reimbursement from State to State.

The PPRC has stated that approved charges vary extensively from one locality to another. Three- and four-fold differences in charges for particular procedures are common. It is difficult to believe that physicians in other parts of the country receive up to three times the Medicare reimbursment of Utah physicians for identical Medicare procedures. These differences extend far beyond justifiable differences in the cost of practice. The Utah Medical Association's data indicates that the actual costs of practice, including malpractices insurance, employee expenses, office rent, and supplies are not substantially lower in Utah. In some cases, Utah's costs are higher.

The greatest impact of these unrealistic Medicare payments is felt by our elderly and disabled citizens. The PPRC also concluded that Geographic variations in prevailing charges are substantial, and stated that wide variation in charges unrelated to difference in cost of practice could mean access

to care and beneficiary financial protection might be compromised in areas where prevailing charges are low. Access to quality health care is crucial and is being jeopardized in Utah because of the inequities in the national system. Reforms must be instituted to enhance the ability of Medicare to provide financial access to health services and financial protection for beneficiaries for the cost of those services. Payments to physicians are a means for achieving that objective. When provider payments are not adequate, the elderly can't get access to care, or the care they get is reduced in quality. There must be a special geographic adjustment based on the relative costs of practicing in different areas.

Medicare is a national health insurance program, and thus, physicians and their elderly patients should be provided equal protections. The present fee schedule is even more offensive to Medicare beneficiaries and taxpayers when we consider that every citizen in the United States contributes to Medicare. All Americans, regardless of their place of residence, are subject to the same Federal tax and Social Security payment schedules; all Medicare enrollees pay the same amounts for part B—physician—coverage. However, enrollees who live in certain parts of the country receive a disproportionate amount of Medicare money for the same services. Therefore, taxpayers in some parts of the country are subsidizing citizens living elsewhere. Utahns are exporting their tax dollars to pay for more expensive medical care in other States.

As Congress searches for ways to curb soaring health costs, and as we currently undergo a radical overhaul of the way the Federal Medicare Program pays physicians, measures must be taken to insure fairness to physicians practicing in areas such as Utah and access to quality health care for our elderly. We cannot allow these inequitable geographical disparities to continue; we must unlock Utahns from a system that threatens the availability of quality care.

I thank my colleagues in the House for their efforts to develop a Medicare system that is both rational and fair and urge my colleages as the debate on physician payment reform continues join with the Utah delegation in remedying the significant inequities that exist.

CONGRESSIONAL ETHICS

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HOYER. Madam Speaker, I commend to everyone in this House one of the more trenchant statements you will read on the subject of ethics.

Last week, a former Member of this House, Otis Pike, delivered a statement before the bipartisan task force on ethics which is written with all his special wit and genius.

I am going to insert his testimony in the record for you all to read, but let me expound on Otis' point.

We all should be proud of our service in our institution. At every juncture, we should tell the public that.

This body is the most democratic legislative body in the world. It is large and unwieldy. But it is also representative of the American people and all that is good, and some that is bad, about them.

While the public's view of Congress may never be high, it seems to have sunk to historic lows lately.

Who is to blame? We are. Not because we are any less ethical than before. But we have repeatedly berated this body.

Mr. Speaker, I believe we are a group of talented people, from every part of America, every class, every ethnic group.

Congressman PIKE's observative are cogent, timely and well worth heeding.

TESTIMONY OF FORMER REPRESENTATIVE OTIS G. PIKE OF NEW YORK, 1961-79, BEFORE SPECIAL HOUSE TASK FORCE ON ETHICS, MAY 3, 1989

I expect my presence here today is a waste of your time and my own. You will not agree with what I have to say and if you did you wouldn't act on it for it would be politically unwise. Nevertheless, I appreciate the opportunity to get strong feelings long held off my chest.

"Ethics" has replaced mom, the flag and apple pie as something one must not only be for these days, but appear to be doing something about. We may not be able to define it: we aren't sure whether the word is singular or plural, but we know it when we see it. Ethics is, or are, "in" and must have their, or its, day. So did the pursuit of witches in New England and heretics in Spain, both embraced by gentlemen so positive that they were uniquely qualified to oversee the morals of others that they had no qualms about inflicting excruciating pain on those others. Always, of course, in order to make them better people and the world a better place.

In the book "Congress and the Nation" vol. 1, published by Congressional Quarterly and covering the years 1945-64, the word "ethics" can not be found in the index. It is not in the Constitution. That is not to say that the Government does not constitutionally regulate morals. It requires businesses to close on Sunday: then changes its mind. It decrees that booze is unlawful; then changes its mind. It establishes red light districts, moves them, then closes them. It makes gambling illegal—and conducts lotteries.

When you legislate ethics, then, you are shooting at a moving target. Any body that can spend 10 or 20 years pondering what to do about easy issues like acid rain or where to dump nuclear waste may not be able to give enough lead to targets that have puzzled all the religions of the world for millenia.

Take a concept like "conflict of interest". At one end of the spectrum it is easy. Pure black. You don't take bribes. You go to jail if you do. It has been a crime since before there was a Congress. It gets grayer. You don't take a political contribution in exchange for a promise to do something. The old "quid pro quo" test. How about a promise to consider something? To keep the door open? To answer the phone? Do you take political contributions from PACS that want something? They wouldn't exist if they didn't want something. At the other end of the spectrum it is almost pure white. Your job is conflicts of interest. Do you consider, first, on any given issue your conscience, your country, your district, your party, or the next election? The easy answer is that you never let self-interest interfere with the common good. Easy answers are best couched in elegant words that mean whatever you want them to.

If you have an account in a savings and loan, is it in your self-interest to bail them out? Yes. Should you vote on it? Yes. If you own stock in a savings and loan, should you vote for their bailout? I say "no", but I'm not sure. I would be surer if it were a 1,000 shares than if it were 10. If you had to paint a portrait of ethics, you would need many shades of gray.

So, to mix a couple of metaphors, you take this fast moving gray target and try to write rules that will hit it. That is the easy part.

Then, you ask an institution that was wholly designed to accommodate partisans to enforce those rules without being partisan, you are asking pigs to fly. On July 30, 1979, there was a recorded vote on a motion to table a resolution calling for the expulsion of Representative Charles C. Diggs, Jr. (D-Mich.). The vote was 205 to 197. The resolution to expel was partisan, the motion to table was partisan, the vote was partisan. In essence, Republicans voted 10 to 1 to expel, Democrats voted 3 to 1 not to. That's partisan.

In their proceedings against Jim Wright, I believe the ethics committee did the very best they could; did their darndest to be judicious. No one, however, can look at the pattern of votes on the various allegations without seeing some partisanship. If the matter ever reaches the floor of the House, anyone who believes that Democrats and Republicans will vote the same way believes that donkeys and elephants, at least, can fly.

I believe that the morals and ethics of Congress are high. Democratic ethics are no higher than Republican ethics and Republican ethics are not higher than Democratic ethics. A wholly political institution, however, will never make wholly non-political decisions in tough cases.

That is by no means the worst part. You were not sent here to peek through the windows of each other's private lives. You weren't even sent here to appear ethical. You were sent here to write laws and resolve problems. Your preoccupation with each other's ethics is preventing you from doing your jobs. It is taking too much of your time and worse, it is creating an atmosphere and an institution in which suspicion, bitterness, personal dislikes and private vendettas make cooperative efforts in writing laws increasingly difficult. That is serious.

The founding fathers didn't write into the Constitution any requirement that legislators, presidents or judges be ethical. They had enough faith in the people to elect good officials. They did write in provisions for removing bad ones. We have less faith in the people now, which is fair, for after a genera-

tion of legislating ethics they have a lot less faith in us. In 1965 a Lou Harris poll found that the public approved of Congress 64 to 25. In 1987 a poll by U.S. News and World Report showed that a majority of those polled believed that many or most Government officials took bribes.

Unhappy with our 64 to 25 favorable rating, we went to work. In 1968 the Congress broke with the system that had worked fairly well for 179 years and wrote its first financial disclosure law. We hoped the public would hold us in higher esteem if we stripped, financially, in public. We were rewarded by being held in the same lofty regard as other strippers and instead of applause heard only the ancient and endless cry of the voyeurs, "Take it all off."

1976 was a terrible year. Congressman Wayne Hayes (D-Ohio) put a girl friend of minimal secretarial skill on the payroll, married someone else, and the girl friend blew him away in the Washington Post. It was juicy. Andrew J. Hinshaw (R-Cal.) was convicted on two counts of bribery. Henry Helstoski (D-N.J.) was indicted for taking bribes to introduce immigration bills. Allan T. Howe (D-Utah) was found guilty of soliciting sex from two undercover policewomen posing as prostitutes. A steady dribble of leaks from the Justice Department named seven Congressmen as having gotten large gifts from a South Korean businessman named Tongsun Park. Former Representative Jim Hastings (R-N.Y.) was indicted for having taken kickbacks from his staff. The law enforcement authorities had acted in every one of those cases, but the outcry was loud. We had to get in the act too.

The Congress had passed a code of conduct for Federal employees in 1958. Charley Bennett wrote it and it was just grand. Eleven sentences. In 1977 a committee headed by David Obey (D-Wisc.) wrote infinitely more comprehensive rules of behavior that had only one salutory effect of which I am aware. They drove me out of Congress and enabled me to earn a refreshing amount of money. The key word is earn. Charley Bennett's 11 lines turned into a code so tangled that Mr. Obey recently referred to it as a "thicket" and so confusing that he recently accused the Ethics Committee of not understanding their own rules.

Have they made the House a more ethical place? They have not. In the 10 years before 1977, 12 Members of Congress were indicted and convicted or pleaded guilty to serious crimes. Three pleaded guilty to misdemeanors. In the 10 years after 1977, 17 Members of Congress pleaded guilty to or were convicted of serious crimes and two were allowed to take counseling on sex offenses. The charges against the 19 post-ethics transgressors ran the gamut from driving offenses through sex offenses to very serious charges of accepting bribes. They included members of both political parties. They had one thing in common. With one exception, every convicted criminal who had been here in 1977 had voted for the ethics code. The one exception was on the committee that wrote it. All of the charges were prosecuted by Federal or local prosecutors who are always delighted to bring charges against Republicans or Democrats alike with even-handed non-partisan fervor.

Are the rules ethical? Well, yes, but they are largely political in heritage. They were created because of public revulsion at the Watergate, Wayne Hays, and other congressional scandals. The concept that unearned income is ethical but earned income must be limited reverses the ethics of Horatio Alger and at least the Democratic Party. It was a political decision, made necessary by the fact that there were already so many millionaires in Congress that they couldn't have passed the bill if they had limited unearned income. They treated rich people better than poorer people, which is a peculiar ethical fixation.

For political reasons, proper loopholes were created for important people. The majority leader of the House and the chairman of the Rules Committee and some other mavens had written books, so book royalties were exempt. Since leaving Congress, undefeated and unindicted, I have made some money writing a syndicated column. Earned money, thus unethical. If I had taken the identical columns, bound them into a book and collected royalties on them I could have rendered the same words ethical. Nonsense.

Members of Congress should be able to write books or teach or farm or practice law or medicine or engage in any lawful activity in which they engaged before coming to Congress. They should disclose where their money comes from and trust the people to judge their behavior. You are not going to get, or deserve, the esteem of the public by treating yourselves as second class citizens or by treating wealthy Members better than non-wealthy Members.

There are very fundamental reasons for this. Your rules are not bad because they are political rules, politically enforced or because they are incomprehensible or because you are so preoccupied with them that you can't get around to doing your jobs. It is worse than that. All over America thousands of good and honorable people look at the environment you have created here and decide they would never be interested in entering that environment. They take pride in their own morals and ethics; they value their privacy; they do not undress in public.

There is a gentle book that has been on the best seller list for a long time. It is "All I Really Need To Know I Learned in Kindergarten", by Robert Fulgham. The title story reminds us that we learn the rules by which we conduct our lives very early. We bring them with us to Congress. We tell the truth about our allies and our opponents. We don't cheat or steal or take bribes or tolerate people who do. We serve our country when our country needs us and carry our ideals and loyalties and ethics in our hearts and not on our sleeves.

No one learns his ethics in Congress. No one needs to be told by his colleagues what is right and fair and honorable. There are more than enough criminal statutes by which to prosecute those who violate the standards of our society.

Ethics is not as great a problem with Congress as is courage. Your ethics rules have emasculated you. Not all of you: a few are still willing to stand up and say you deserve a pay raise or vote against a defense bill or for a tax increase or vote against Israel when you are convinced she is wrong or say "no" to any powerful lobby. But most of Congress. This was the inevitable result of the earned income limitation. When you cut a Member off from the honorable work he did before he came here, made him burn his bridges, made him have to keep his job to feed his family you sapped his courage. He has to get re-elected. This makes him less courageous—and less ethical.

This Nation was built by men who couldn't, and wouldn't have lived by your rules. They were terrible men who drank, caroused and gambled. Some kept mistresses; some were worse. They connived and made deals and some grew rich in office. Robert Morris of Pennsylvania, who the old text books called the financier of the Revolution was asked to get ammunition for Washington's Army. He did, through his own trading company and wrote, "There has never been so fair an opportunity for making a large fortune since I have been conversant in the world." Daniel Webster said the birthplace of the Revolution was a tavern in Boston. The marines were born in a tavern.

You can talk about ethics forever and pass more rules and reveal yourselves until all of your and your spouse's finances, food, drink, sex, religion, clothing, vacations and the hours and minutes and place of your arising and retiring are public records. You will never be held in high regard or deemed ethical while you say you can't balance a budget unless a constitutional amendment makes you; while you accept gloriously optimistic economic projections rather than deal with real ones; while you write a Gramm-Rudman bill and then spend days finding ways to get around it; while you let one man make $550 million a year while thousands sleep in the streets.

Former Ways and Means Committee Chairman Wilbur Mills (D-Ark,) could have been booted out of Congress. He was an alcoholic and he fell for a stripper named Fanne Foxe; he chased her right up on the stage. His ethics might have been deemed a trifle too shabby for a Member of this institution, but he would never have tolerated the fun and games and smoke and mirrors and moving costs off-budget and from year to year and annual deficits and growing debt that have transferred us from the biggest creditor to the biggest debtor nation in the world.

I will close with the words of Abigail Adams, who at the birth of our Nation said, "We have too many high sounding words, and too few actions that correspond with them."

HDTV

The SPEAKER pro tempore (Mr. TALLON) Under a previous order of the House. The gentleman from Illinois [Mr. LIPINSKI] is recognized for 5 minutes.

Mr. LIPINSKI. Mr. Speaker, for the past several weeks, we have been hearing and reading about a new technology called HDTV. This technology, although difficult to develop, is quite simple to understand. HDTV is a television which will show high-resolution pictures on large, extra wide screens and will produce the crystal-clear sound of a compact disk.

The fact that this technology is possible should not surprise any of us. But what has gotten, and should get, our attention are two facts. HDTV was first developed in this country, but the United States is far behind Japan and Europe in developing a marketable set. I believe the people of this country have grown sick and tired of the same old story. The United States develops a new technology, and then for various reasons, mostly economic, fails to turn that technology into a marketable, exportable product. Instead, the Japanese use this technology and,

with private and public cooperation, turn it into a consumer product which is, in turn, imported by the United States. This has happened with the VCR and is now happening with HDTV.

The problem does not lie with the ingenuity, intelligence, or efforts of American scientists and engineers, but with American policy. The problem has been, and remains, that this country does not foster long-term development of new technology. For too long, our technology has been far ahead of our policy.

When will this change? Will it take the introduction of a working high-definition television set to the U.S. marketplace to make this administration realize that it has waited too long? That day may not be too far off, but I am afraid it will be a 10 o'clock wake-up call for an 8:30 appointment with reality.

As Members of Congress, we still fall prey to reacting to dramatic events and changes, and are sometimes slow to react to equally important, yet slowly building, problems. There is no denying that Japan has taken the lead in many high-technology fields. But when did this happen? Why didn't we realize Japan was surpassing us? In the area of high technology, there unfortunately was no *Sputnik*. However, the historical example of our space program illustrates the problem we face today and the policy steps we need to begin to take. In 1956, the United States had the technology to launch a satelite into space. Yet on October 4, 1957, the Soviet Union became the first country to do so. The reason we did not launch one earlier was because President Eisenhower did not want to use a military rocket to send a satellite into space. Obviously the realization that the Soviet Union also had the technology changed his mind and on January 30, 1958, we sent our first satellite into space using a military rocket; the same one that was available to us in 1956. In the space industry then, as in the HDTV industry today, our policy was far behind our technological abilities.

This country must begin to realize that the playing field will never be even. Our responsibility now is to ensure an environment that fosters long-term investments for all domestic industries. As a nation, we must decide which industries are vital to our continued well-being and growth, and we must proclaim to our competitors that we are in these industries, and we are going to stay. No company can make this statement, only a country can. Right now both Japan and Europe are supporting the HDTV industry. This cooperation between government and private business will give these industries the staying power needed to develop a successful product. I hope that this administration can follow Japan's and Europe's lead and support our own domestic HDTV industry. But more importantly, this country must begin to change its attitudes toward assisting private businesses in areas that are vital to this Nation. The antitrust laws in effect today once served an important purpose, and they still do when one domestic industry competes with another. But, with the global economy that exists today, these laws must be reevaluated.

HDTV may never become popular with consumers. If it will or not I do not know. But, I do know that the development of HDTV will also lead to advances in fields such as microcircutry and other enabling technology that this country cannot afford to miss. I hope my colleagues will join me in supporting all efforts aimed, not at protecting, but at fostering our vital industries.

□ 1650

ASIAN-PACIFIC AMERICAN HERITAGE WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. HORTON] is recognized for 5 minutes.

Mr. HORTON. Mr. Speaker, I would like to reflect for a few moments on "Asian/Pacific American Heritage Week." I feel it is important to mention that today, May 10, is Golden Spike Day, the anniversary of the completion of the Transcontinental Railroad which could not have been constructed without the contributions of Asian/Pacific Americans.

On June 30, 1977, I had the unique honor and pleasure as the chief sponsor to introduce House Joint Resolution 540 and later House Joint Resolution 1007, which for the first time in this Nation's history asked the Congress and the people in the United States to set aside a period in May as Asian/Pacific American Heritage Week. More than 12 years ago a woman came to my office and told my administrative assistant and me a very compelling and persuasive story. Today, I share the origin of this landmark bill:

The celebration of Asian/Pacific American Heritage Week each year has a very deep and personal place for Jeanie Jew and her family. Their story began sometime in the last century in the 1800's when a young man, M.Y. Lee, left Toishan, Canton, China, to find a better life in America. Mr. Lee was one of the first Chinese pioneers to build the Transcontinental Railroad. He later became a prominent California businessman. When the Chinese were having difficulties in Oregon, Mr. Lee traveled to Oregon and was killed during that period of unrest. It was a time of anti-Chinese and anti-Asian sentiments. The revelations about Mr. Lee and the story of Asian-Americans led this one woman to believe that not only should Asians understand their own heritage but that all Americans must know about the contributions and histories of the Asian/Pacific American experience in the United States. The creator of the idea for a heritage week is Jeanie Jew, the granddaughter of M.Y. Lee, that early pioneer.

The dates included in the original resolution was the week beginning May 4. After careful research, Mrs. Jew and Ruby Moy, my administrative assistant, selected May 10, "Golden Spike Day," the date celebrated as the joining of the Transcontinental Railroad and which is one of the inclusive dates celebrating Asian/Pacific American Heritage Week. The other date selected was May 7, 1843, which marked the first arrival of the Japanese in the United States. Mrs. Jew turned a personal tragedy in her family's history into a positive force. Asian/Pacific American Heritage Week is now celebrated by all Americans.

Ruby Moy, my administrative assistant, holds the highest professional position to a Member of Congress. She is a second generation Asian-American. I have taken steps to try to set an example by having a high representation of minorities in my congressional office.

In 1977, Ruby cofounded the Congressional Asian/Pacific Staff Caucus, an organization which collectively worked for the establishment of the first heritage proclamation and yearly supports efforts to perpetuate its recognition. The caucus, a group of professional staff members of Asian descent, discusses and reviews legislation and issues of concern to Asian/Pacific Americans from time to time.

Issues of special concern to the Asian-American community include hate-violence sentiment, imposition of ceilings in institutions of higher education, refugee assistance, and the need for high-level policy positions in Government among other matters. Members of Congress will in the future be working with groups to discuss these matters more fully.

Sometime ago, Jeanie Jew discussed another matter with Ruby and me—the idea of a commemorative stamp. After more than 10 years, this is a fitting occasion to request the U.S. Postal Service issue a postage stamp commemorating America's Asian/Pacific American heritage. These stamps may depict heritage week, individuals, events, subjects or places that are significant in Asian/Pacific American history in the United States. As a senior member of the House Post Office and Civil Service Committee, I plan to urge the Citizen Stamp Advisory Committee to consider issuing a stamp at the earliest possible date.

I hope my colleagues will join me in supporting this stamp and in recognizing the contributions of Asian/Pacific Americans especially during Asian/Pacific American Heritage Week.

EAST-WEST TRADE AND HUMAN RIGHTS ENHANCEMENT ACT OF 1989

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. PEASE] is recognized for 5 minutes.

Mr. PEASE. Mr. Speaker, today I am introducing the East-West Trade and Human Rights Enhancement Act of 1989. Generally, this bill would authorize the President to grant nondiscriminatory tariff treatment—most-favored-nation [MFN] status—to imports from cooperatives in Communist countries. This treatment would be contingent upon the co-ops abiding by internationally recognized worker rights provisions.

At the same time, my bill would retain our Jackson-Vanik leverage on freedom of emigration. By withholding MFN treatment on a countrywide basis, we maintain an effective stick, which we could use, for example, if the Soviet Union fails to meet emigration targets and refuses to abolish the exit visa requirements and other devices that prevent Soviet Jews and others from emigrating.

To date, the United States response to the substantial economic, political, and human rights changes taking place in nonmarket economies in general, and the Soviet Union in particular, has been marked by extreme caution and a wait-and-see attitude. This policy has been a prudent approach in dealing with an empire whose future development is best characterized by widespread uncertainty. However, excessive caution does not always imply prudence; on the contrary, missed opportunities may be the result of an overly cautious, nonevolving policy toward nonmarket economies. Nevertheless, any initiatives dealing with these countries must be based on a modest and incremental approach, not on grandiose schemes advocating vast changes. I believe that now is the time for the United States to begin to use its economic leverage—that is, prospects for expanded trade and improved access to the American marketplace—to test and stretch the practical parameters of perestroika and glasnost. For this reason, I have developed what I believe is a measured and appropriate response to the historical events now occurring in much of the Communist world.

Though currently only representing a very small fraction of GNP—approximately 1 percent in the Soviet Union—the cooperative movement in Communist countries, especially the Soviet Union, is one of the missed opportunities to which I am referring. Many Soviet economists predict that within 10 years cooperative production will account for 10 to 15 percent of Soviet national income.

Economically, the Soviet law on cooperatives, passed in May 1988, has been Mikhail Gorbachev's boldest piece of legislation to date, and certainly the most intriguing by Western standards. Soviet citizens are now free to join and leave cooperatives. They can be employed by both a state-run enterprise and a cooperative. Furthermore, cooperatives may actually own property and assets and lease or loan their assets at their discretion. There are no apparent ceilings on the earnings, profits, and size of cooperatives, and they are being encouraged to compete with state industries for government contracts. Also, foreign currency for export sales may be kept by the cooperatives to further their own development.

Most importantly, however, the Soviet co-op reforms go to the heart of what differentiates the East from the West—they allow for more personal freedom and they diversify and alter patterns of ownership in society. To say that such reforms transcend economics would certainly be an understatement. Economic freedom and private ownership often precede the establishment of political freedoms, civil liberties, respect for basic human rights, and even democracy. Hungary's economic and political development, which I have witnessed first hand on several occasions over the last decade, is beginning to bear this fact out. So too are the remarkable changes taking place in Poland.

Viewed in this light, a major goal of my legislation is to lend encouragement and tangible support, admittedly small at the outset, to cooperative reform movements occurring in the East and especially in the Soviet Union, where such reforms and enterprises are meeting substantial internal resistance. Provided that these co-ops protect the same worker rights we value in this country, and to which most Communist countries are bound under international law, it is in our interest to see such businesses succeed.

As the United States pursues new commerical possibilities with nonmarket economies, limited extension of favorable tariff treatment to be afforded under my bill is preferable to the extension of loan guarantees or commercial credit. America ought not subsidize economic development in Communist countries. To do so postpones the economic reckoning that Gorbachev and other proponents of perestroika-style changes must address squarely through price reform, greater productivity, and reduced military spending.

The recent sweep of surprising developments in the Soviet Union, in much of Eastern Europe, and China commands our attention and presents unprecedented opportunities to achieve a more stable, integrated global economy and a more peaceful planet. The fundamental challenge for America is to find policy instruments that allow the United States to tangibly reward Perestroika-style reforms while retaining substantial leverage for the United States to encourage additional economic, political, and foreign policy changes. U.S. policy tools for dealing with nonmarket economies should be geared interactively to regain flexibility, to retain basic human rights principles, and to restrain taxpayer obligations. I believe that the East-West Trade and Human Rights Enhancement Act of 1989 is a step in the right direction toward fulfilling these policy goals.

More specifically, the key aspects of this legislation are as follows:

First, the President would be given the discretionary authority to extend nondiscriminatory tariff treatment [MFN] to exports from the cooperative sector of any Communist country, provided that that sector of the economy adheres to basic internationally recognized worker rights.

Second, existing U.S. trade law defines internationally recognized worker rights as: Freedom of association; the right to organize and bargain collectively; the prohibition of forced or compulsory labor; the establishment of a minimum age for the employment of children; and acceptable conditions with respect to minimum wages, hours of work, and occupational safety and health—taking into account a country's level of economic development.

Third, after a 3-year grace period, adherence to worker rights provisions would be added to existing emigration practice conditionally, as defined in the Trade Act of 1974, for eligibility for MFN status on a countrywide basis for Communist countries. Thus, Communist countries that now enjoy MFN treatment—Yugoslavia, Poland, Hungary, and China—would have to meet worker rights requirements in order to continue receiving this treatment. Incidentally, Poland already seems to be making significant progress in this regard. Furthermore, those Communist countries currently not receiving MFN status would also have to abide by worker rights provisions within 3 years in order to obtain such favorable tariff treatment.

Fourth, compliance with the above conditions would be monitored by a nongovernmental organization, the U.S./Nonmarket Economy Cooperative Enterprise Foundation, consisting of U.S. cooperative and private sector experts and selected Government officials. More broadly, the functions and responsibilities of the foundation will include: Certifying whether or not

participating cooperatives in Communist countries are upholding internationally recognized worker rights as well as basic principles of democratic governance; encouraging the creation of economically viable cooperative enterprises in nonmarket economies; increasing the economic linkages between the U.S. private sector and cooperative enterprises within Communist countries; creating an ongoing exchange program between U.S. cooperatives and other private businesses and the cooperatives in Communist countries; and, fostering knowledge of the cooperative sectors both in the United States and in Communist countries by holding conferences and seminars on subjects of mutual importance.

Fifth, the Foundation would be funded by levying a 5- to 10-percent special duty—above the prevailing MFN rate, but much lower than existing schedule 2/Smoot-Hawley tariff rates—on all imports from certified cooperatives in Communist countries. After deducting a reasonable handling fee to U.S. Customs, the remaining duties would go into a trust fund to finance the operation of the Foundation.

Startup funding for the Foundation would come from a Federal loan not to exceed $1,750,000 to be repaid over time. Once this loan has been repaid, the future expenses of the Foundation would be paid out of its income. For example, foodstuffs from the Soviet Union currently enter the United States market at a 30-percent tariff—schedule 2/Smoot-Hawley—rate. Under my bill, the tariff rate could be reduced, say, to 10 percent—a 20-percent cut, but still 5 percent above prevailing MFN rates. A portion of the lower customs duties would then be earmarked for a trust fund to pay a handling fee of the U.S. Customs Service and to finance the operations of the Foundation.

These summary remarks highlight why I have introduced this legislation and how the procedural and administrative aspects of this bill will work. The issues surrounding East-West trade, however, and more specifically, Soviet-United States Trade, are unlike any other. Though small in terms of trade flows, the emotions and political significance surrounding U.S. trade relations with nonmarket economies are great. For many obviously important reasons, the Soviet-United States trade relationship substantially transcends and, in many ways, eclipses mere economic concerns. Recognizing this reality, I anticipate at least four common questions that will inevitably arise from the introduction of the East-West Trade and Human Rights Enhancement Act of 1989.

Question 1: Is this an attempt to foil a Jackson-Vanik waiver for this year?

Answer: Certainly not. However, it is an attempt to broaden the parameters of the debate surrounding United States-Soviet Trade and the Jackson-Vanik amendment, both in terms of the granting of MFN and human rights conditionally.

Historically, when trading with Communist countries, MFN treatment has been characterized by an all or nothing approach. My bill would give the President more flexibility in tailoring U.S. Trade and Human Rights policies to significant changes in nonmarket economies. Such flexibility is sorely needed if we are to incrementally respond to developments in the Soviet Union, Eastern Europe, and elsewhere. Furthermore, this bill emphasizes both a carrot and stick approach. Should positive changes continue to occur in nonmarket economies, carrots, while small for now, will be an increasingly important part of U.S. relations with such countries which have traditionally relied on the stick.

Question 2: Will this bill jeopardize United States grain sales to the Soviet Union and other nonmarket economies?

Answer: Absolutely not. My bill deals exclusively with imports produced by cooperative within the Soviet Union and other Communist countries. It would not affect U.S. exports to any Communist country.

Question 3: Why introduce this legislation now?

Answer: As the debate over a Jackson-Vanik waiver intensifies, some hard-line interest groups will deny any United States interest in expanding trade with the Soviets no matter what. Others will continue to argue that the Jackson-Vanik amendment properly makes the EBB and flow of Jewish emigration from the Soviet Union both the starting and ending point of any United States policy innovation. In contrast, my bill offers the President the opportunity to still respond, albeit in a small, incremental manner, to the striking changes taking place in many nonmarket economies while simultaneously lending tangible support to cooperative movements in Communist countries—which I believe is in our and their best interests—and keeping a stick with which to prod Soviet authorities on emigration practices should they they not live up to the expectations of codified reforms. Indeed, this legislation with the additional flexibility it provides should be welcomed by the President as he tackles such important and difficult issues. If this year passes without any serious and positive response from the United States with regard to United States-Soviet trade, we may be missing important and historic opportunities.

Question 4: Why shouldn't worker rights conditionally be applied to any exports from Communist countries, like the Soviet Union, and not just to exports from their cooperatives?

Answer: Although very recent developments in proposed labor legislation indicate that they are moving in the right direction, it is probably too much too soon to require the Soviet authorities, for example, to suddenly abandon long-established labor laws and practices in State-run enterprises and to accept free and independent trade unions. They need to see in the cooperative sector that with greater worker rights will come greater productivity and genuine economic growth, but that such changes need not require political suicide.

It is time to begin to reexamine and broaden the debate surrounding United States-Soviet trade, in particular, and United States trade with nonmarket economies in general. If anything, I hope that my bill contributes to a much-needed policy review and public discussion. Some will advocate no change, while others are perfectly comfortable, at this historic juncture, to largely cede official United States policy to a relative handful of United States companies that are racing in unbridled fashion to negotiate joint ventures in the Soviet Union and elsewhere.

The East-West Trade and Human Rights Enhancement Act of 1989 tempers our greatest hopes for an end to the cold war with reason and measured, positive action. It seeks to encourage and build upon what Gorbachev and other Communist reform leaders have begun. For this reason, it merits your attention and consideration.

□ 1700

AN INSULT TO THE UNITED STATES OF AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. INHOFE] is recognized for 60 minutes.

Mr. INHOFE. Mr. Speaker, I thought it would be very appropriate to call to the attention of this House an experience that I had recently. I served on the Select Committee on Narcotics and Drugs and recently went down to participate in a conference with the Andean Parliament in Quito, Ecuador. I think we all know the Andean Parliament and the five countries that are represented that are responsible for 100 percent of the growth of the coca leaf as well as the manufacturing and production of cocaine that is used in this country.

When we had our meetings, the drug committee with the five nations, I observed that the meeting was not held in the very famous Parliament building in Quito, Ecuador, but instead was up in the mountains some distance away. Upon inquiring, I found that they did not want to have it in the Parliament building because there was

a mural that was very controversial that had been placed in that Parliament building in Quito that was very insulting to the United States of America, and they did not want us to know that, No. 1, it was still there and, No. 2, what it was all about.

I made some inquiries and found that they had locked up the parliament building for the time of our visit down there, and prevailed upon a photographer and some one of the Marines in the detachment to go with me to try to get in and take a look at the very controversial mural. We were able to get in, and we took a picture.

To give everyone a little bit of history, I am not sure whether this is always the case, but up until last August, the President of Ecuador, Febres-Cordero, who was very pro-American, and is so pro-American, or was so pro-American, that he would not even allow Daniel Ortega or Fidel Castro to land an airplane in Ecuador. However, when he went out of office and they anticipated the inauguration of the new President, Rodrigo Borja, who is a leftist, they had him come in and prepare for the inauguration by painting a mural that is as high as the ceiling is in these Chambers. The mural was painted by Oswaldo Guayasamin, who is not just a leftist but a Communist who is a sympathizer and very close personal friend of Fidel Castro, and the mural that was painted depicted and characterized the United States of America as a skeleton in a Nazi helmet with the American flag and a swastika on the helmet. This is in the chambers of the parliamentary building. The building that is shown is the last thing that a young person in Ecuador will see before they turn off the television at night; there is the United States of America.

When Secretary of State Shultz went down to the inauguration, he refused to go in because it was so insulting to the American people.

I went and found at that time that in the previous year we had given Ecuador $33 million of foreign aid and that we are anticipating increasing that by over 10 percent to $37 million this coming year, and it seems to me that it is certainly inappropriate for us to be giving money with all the needs that we have here in the United States, with the shortfall we have in our budget, with the huge deficits that have been piling up, to be giving not just an increase but a sizable increase in foreign aid to a country that openly, willfully insults us every day of the year.

I would like to point out the portrait that we have over here on the far left, they did take off, as some type of a condescending effort, I suppose, the American flag, and replaced it with "CIA."

I want to read what Oswaldo Guayasamin said in defending his mural. He said, "Repression is represented by a German helmet with the word 'CIA' written on it, as the CIA is the executor of violence and repression in our countries. American intervention in Ecuador and Latin America particularly and throughout the world is violent. The mailed fist, the brutal hand of the American Government, is this institution called CIA."

I want to also show the House the actual picture that we took that was showing how America is characterized in this country that is dependent upon us for foreign aid. I noticed that we have here in the Chambers the gentleman from New York [Mr. SOLOMON], who served with distinction for a number of years on the Committee on Foreign Affairs, and I would like to ask him if such a change of presidency in countries very often results in this type of change in their policy toward us and, second, how many other countries are there out there that we are giving foreign aid to that are insulting us on a regular basis?

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. INHOFE. I am happy to yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, the gentleman from Oklahoma [Mr. INHOFE] is to be commended for bringing this issue to the attention of the House. I might point out that the Foreign Affairs Committee will soon begin marking up the foreign aid bill for fiscal years 1990 and 1991, and we may well be dealing with the issues of Ecuador when that bill reaches the floor. I can think of any number of amendments that could be offered.

Mr. Speaker, our Congress and our Government, as well as every other government, function in a political atmosphere. And just as political parties have honest differences of opinion, so nations and governments will have honest disagreements over policies. It is the responsibility of diplomats to deal with those disagreements and to work out compromises. All of this is a normal part of life. But what has happened in Ecuador, is not normal—or acceptable.

Last summer, the new President of Ecuador was sworn into office in the legislative chamber of the Parliament building. That chamber was—and remains—dominated by a newly painted mural, which as the gentleman from Oklahoma has told us, contains a grotesque, skeletal face wearing a Nazi-like SS helmet, emblazoned "CIA."

Evidently the artist, who was commissioned by Parliament to do a mural depicting the history of Ecuador, at first painted an American flag on the helmet. Protests from our Embassy and State Department resulted in the artist replacing the flag with the "CIA" lettering. In diplomatic parlance, this kind of progress is hailed as a demonstration of maturity and restraint.

But the fact is that this gratuitous insult to America and the American people still remains in place. The American people wonder if this is the thanks we get after providing Ecuador with more than $800 million in foreign aid. The American people wonder if this is the thanks we get for welcoming 76,000 Ecuadorian immigrants over the past 20 years. The American people wonder if this is the thanks we get for being Ecuador's largest trading partner. We provide the largest markets for Ecuador's two largest export items: petroleum and seafood.

I am told that decisions about this mural are Parliament's call. The President of Ecuador can no more tell Parliament what to do than our President can come here and start telling us what to do. The law does not give the President arbitrary powers in either country.

And so I appeal to the Ecuadorian Parliament to get rid of this offensive and gratuitous insult to the American people. And I can assure the members of Parliament in Ecuador that if the United States Congress has to act on this matter, we will not be as polite as the United States Embassy in Quito or the State Department have been.

I am convinced the Ecuadorian people no more want this so-called modern art hanging in their Parliament Building than we do. And just as our Congress responds to the voice of the American people, I hope the Ecuadorian Parliament listens to the voice of the people it represents. This is something more than a diplomatic disagreement; it is a callous and calculated attempt by the Parliament of Ecuador to offend our country.

□ 1710

To answer the gentleman's question, no, it is not typical, because when we have a change of administration generally we all have our political beliefs, we all have our philosophy, but at least they contain it and we negotiate with each other over our feelings, and you do not put a display like this out there.

I will tell the gentleman one thing, there is a foreign aid bill coming before this House before too long. I will be glad, with the gentleman, to sponsor amendments to cut that $37 million perhaps to zero, and then let the Parliament in Ecuador think about that for a while. I will be glad to work with the gentleman, and I commend him for bringing it to our attention.

Mr. INHOFE. I appreciate that very much, and I plan to appear and I hope the gentleman will appear with me at the appropriate committees to accommodate this.

I think if the American people were aware of what we are doing, that people are insulting us, and even in the country of Ecuador you are probably not aware of this, but in the polling that has taken place only 40 percent of the people agree with the policy of the country. Here is what one of the largest newspapers said only in February of this year, and I am interpolating this now, "It is not appropriate for Congress to have permitted aggressive reference to a foreign country in its august halls. The President of Congress has chosen an inappropriate time to protest because he complains when his visa was denied."

That is an incident where our own Ambassador merely gave him a limited visa, and now they are saying that he did that as a protest gesture, as if we did not have the right to protest.

I appreciate the fact the gentleman will join with me, and I think we should not limit it to Ecuador, but any of the countries that openly insult us. They should not be entitled to our foreign aid.

PERSONAL EXPLANATION

The SPEAKER pro tempore. (Mr. TALLON). Under a previous order of the House, the gentleman from New York [Mr. ENGEL], is recognized for 5 minutes.

Mr. ENGEL. Mr. Speaker, I was unavoidably detained for rollcall vote No. 45 passage of H.R. 1385 to concur in the Senate amendment to the Martin Luther King, Jr., Federal Holiday Commission Extension Act due to an injury to my foot. Because of this problem, I am forced to use crutches and could not get from my office to the Capitol before the vote was closed. Had I been present, I would have voted "yea".

REELECTION RATES OF HOUSE INCUMBENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, today I am placing in the RECORD immediately following my remarks an excerpt from a recent study by the scholars at the Congressional Research Service entitled "Reelection Rates of House Incumbents," by David Huckabee.

This study looks at elections going all the way back to the beginning of Congress in 1789. It effectively refutes the arguments, recently appearing in the press, that current Members of Congress have "stacked" the election system in their favor.

The CRS study concludes that turnover in the House, throughout our two centuries of existence, has depended more on deaths, resignations, and retirements than on defeat at the polls. There has also been a slow but steady growth in the percentage of Members seeking reelection over the years. Today, more Members make a career out of service in the House than they did in the early days when much of their time was devoted to their occupation of earning a living as private citizens.

Even so, in the election of 1790, 41 incumbents ran for reelection and 38 won—93 percent. In 1792, 45 Members ran and 45 were reelected—a remarkable 100 percent. In 1866, a year of political combat and intense division, 133 Members ran and 85 percent were reelected.

At the height of the Depression, in 1934, 388 Members ran, and 325 were reelected.

In the years after World War II, voters consistently reelected 85 to 90 percent of House Members running for reelection.

Mr. Speaker, the high percentage of reelected Members in this or any recent Congress is nothing new. It has been that way for 200 years.

REELECTION RATES OF HOUSE INCUMBENTS: 1790–1988

INTRODUCTION

The 98 percent rate of return for House incumbents seeking reelection in 1988, brings renewed interest in the topic of incumbent reelection success. David Broder, in the Washington Post, wrote soon after the 1988 election that "the Constitution envisaged the House as the most sensitive barometer of changes in political mood, but the 'incumbent lock' makes it no barometer at all." He attributed high incumbent return rates to non-competitive districts, the campaign finance system, and congressional rules and procedures that favor the majority party.[1] Julie Rovner observed in Congressional Quarterly after the 1988 election that the increasing success rate of incumbents could be explained in part by Members' great success in helping their constituents. Rovner quoted William A. Galston, a University of Maryland political scientist, who said there is an increasingly "perfect technology of constituent service" which, Rovner said, "has enabled incumbents to get themselves reelected by helping constituents navigate through an ever-more-complicated federal bureaucracy."[2] Stuart Rothenberg, noted in an article summarizing the 1988 election in Public Opinion, that "Members of the House are now less vulnerable politically than members of the Soviet Politburo."[3]

There have been numerous scholarly articles written to explain why incumbents are so successful in their reelection endeavors.[4] This report does not add to the literature seeking to explain why incumbents are so often reelected. Instead, it presents new data on incumbent reelection rates for the years prior to 1946, and supplements existing data sources for the post-1946 period. What emerges from this examination of data from the pre-1946 period is a refinement of our understanding of congressional turnover. Incumbents who have sought reelection apparently have always been relatively successful. More specifically, the proportion of incumbents running for reelection who were returned to office has rarely dropped below 70 percent (only seven times, 1842, 1854, 1862, 1874, 1890, 1894, 1932) and often has exceeded 80 percent (73 of 100). Incumbent return rates exceeding 90 percent were experienced in the early Congresses (every election from 1790–1810) and since 1968 (except for the post-Watergate 1974 election). Resignations, deaths, and retirements apparently account for much of the difference in return rates for the entire House between the 19th and 20th centuries.

What does appear to have changed over time is the percentage of incumbents seeking reelection. For most of the 19th century, this percentage was in the 60–70 percent range. With the trend towards careerism that emerged in the late 19th century and accelerated in the 20th century, this percentage rose to the 85–95 percent range.

Most sources of data on incumbent reelection rates base their figures on information from Congressional Quarterly and National Journal and do not report information prior to 1946. In this report, all the 1946–1984 data, except for the information pertaining to open seats, are from a table in Vital Statistics on Congress, 1987–1988.[5] The source for all data prior to 1946 is a computer file from the Inter-university Consortium for Political and Social Research entitled the "Roster of United States Congressional Office-holders and Biographical Characteristics of the United States Congress, 1789–1984 Merged Data" (hereafter referred to as the Roster file).[6] The Roster file was used for this report because it is a "machine readable" biographical source for data on all Members of Congress. There are other published sources of summary statistics on House incumbency on a Congress-by-Congress basis,[7] but the Roster file has the potential for producing detailed data that other sources cannot. Data for 1986 and 1988 were derived from Congressional Quarterly.[8]

Table 1 presents incumbency data in a form similar to that reported in "Vital Statistics on Congress: 1987–1988." The data, with some exceptions, are similar to data which can be derived from earlier Congress-by-Congress studies such as those of Morris Fiorina.[9]

[9] Fiorina, Historical Change in House Turnover. The authors presented several sets of data derived from Polsby, Nelson W. The Institutionalization of the U.S. House of Representatives. *American Political Science Review*, vol. 68, March 1968. p. 146. Polsby's source for data from 1790–1924 is: Rice, Stuart A. *Quantitative Methods in Politics*. Alfred A. Knopf, Inc. Boston. 1928. pp. 296–297. Rice describes in detail the method used to compile his table (p. 294–302). It involved reading 12,000 biographies of Members in order to properly code them in each Congress, and then comparing the coding sheets Congress-by-Congress to determine the proportion of first term Members.

TABLE 1.—HOUSE INCUMBENTS REELECTED, NOT RENOMINATED, OR DEFEATED: 1790–1988

Election year [1]	Open seats [2]	Total (percent) who ran for reelection [3]	Not renominated	Defeated in general election	Won reelection	Percent winning reelection [4]	Percent of House reelected [4]
1790	24	41 (63.1)	0	3	38	92.7	58.5
1792	60	45 (69.2)	0	0	45	100.0	69.2
1794	37	68 (64.8)	0	2	66	97.1	62.9
1796	37	69 (65.1)	1	4	64	92.8	60.4
1798	37	69 (65.1)	0	4	65	94.2	61.3
1800	46	60 (56.6)	0	3	57	95.0	53.8
1802	68	74 (69.8)	0	4	70	94.6	66.0
1804	38	104 (73.2)	1	5	98	94.2	69.0
1806	43	99 (69.7)	0	2	97	98.0	68.3
1808	46	96 (67.6)	0	6	90	98.8	63.4
1810	52	90 (63.4)	0	6	84	93.8	59.1
1812	46	97 (67.8)	0	13	84	86.6	58.7
1814	69	113 (62.1)	0	15	99	87.6	54.4
1816	104	78 (42.7)	1	11	66	84.6	36.3
1818	72	111 (60.7)	3	7	101	91.0	55.2
1820	69	117 (62.9)	4	16	97	82.9	52.1
1822	86	127 (68.3)	0	12	115	90.5	61.8
1824	65	148 (69.5)	0	17	131	88.5	61.5
1826	61	152 (71.4)	0	16	136	89.5	63.8
1828	63	150 (70.4)	2	28	120	80.0	56.3
1830	68	145 (68.1)	0	15	130	89.7	61.0
1832	105	135 (63.4)	2	25	108	80.0	50.7
1834	64	176 (73.3)	1	33	141	80.1	58.8
1836	92	149 (61.8)	1	26	122	81.9	50.6
1838	83	159 (65.7)	1	38	120	75.5	49.6
1840	85	157 (64.9)	2	25	130	82.8	53.7
1842	133	90 (37.2)	1	31	58	64.4	24.0
1844	88	135 (60.5)	3	23	109	80.7	48.9
1846	107	116 (52.0)	0	15	101	87.1	45.3
1848	108	122 (53.0)	3	21	98	80.3	42.6
1850	102	130 (56.0)	4	29	97	74.6	41.8
1852	115	119 (51.3)	5	30	84	70.6	36.2
1854	97	137 (58.5)	2	47	89	65.0	38.0
1856	76	158 (67.5)	2	37	119	75.3	50.8
1858	78	156 (66.7)	4	34	118	75.6	50.4
1860	64	110 (63.2)	5	22	81	73.6	46.5
1862	79	103 (56.6)	4	29	70	68.0	38.5
1864	49	133 (73.1)	3	32	98	73.7	53.8
1866	50	133 (72.7)	8	12	113	85.0	61.8
1868	92	146 (61.3)	4	19	123	84.3	51.7
1870	78	165 (67.9)	9	36	120	72.7	49.4
1872	121	171 (70.4)	8	37	126	73.7	51.8
1874	93	199 (68.1)	12	71	115	57.8	39.4
1876	79	213 (72.9)	12	47	154	72.3	52.7
1878	90	203 (69.3)	9	32	162	79.8	55.3
1880	63	230 (78.5)	11	30	189	82.2	64.5
1882	118	207 (70.6)	15	43	149	72.0	50.8
1884	78	247 (76.0)	12	46	189	76.5	58.1
1886	79	246 (75.7)	21	28	197	80.1	60.6

[1] Prior to 1900 several States held elections in odd years as well as even years. Odd year elections were combined with the next highest even year election in this report. (For example, elections held in 1885 were combined with those held in 1886 in this report.)

[2] The open seat category was derived by subtracting the number of Members who ran for reelection from the House size.

[3] The total running for reelection category includes those Members who sought renomination, but who were not renominated.

[4] For information about the denominators used in these calculations see the methodology section.

Sources: Prior to 1946, all the data were obtained from the Roster of United States Congressional Office-holders and Biographical Characteristics of Members of the United States Congress, 1789–1984 Merged Data. ("The Roster file"). The data were originally collected by Carroll McKibbin and the Inter-University Consortium for Political and Social Research. The Roster file is a machine readable computer data tape. The table was compiled from variables 44 and 83 of the Roster file.
For the period from 1946 to 1986, all data except the information pertaining to open seats were obtained from: Ornstein, Norman J., Thomas E. Mann, and Michael J. Malbin, Vital Statistics on Congress, 1987–1988. Table 2–7 House Incumbents Reelected, Defeated or Retired 1946–1986. Washington, Congressional Quarterly Inc., 1987. p. 56. Data for 1988 were obtained from Congressional Quarterly Weekly Report, v 46, Nov. 12, 1988, p. 3270.

AMERICA'S BEDTIME STORY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, I have recently read some stories pertaining to the sale of more of America's assets, our movie studios—and also read of opportunities which can help America regain strength in the electronics market and training of our work force.

The items I read are linked together—so it brought the following story about "America's Bedtime Story" to mind.

The story goes: Once upon a time there was a magic tinsel town called "Hollywood, USA." All good young boys and girls dream of living there, making movies and playing roles of their heroes and acting out their dreams.

The grand masters of the town were the studio owners who searched and found the boys and girls everywhere, some at the famous Schwab Drug Store where starlets were discovered, and some driving trucks, but they were all found.

Their agents built them up so much—so famous that some boys and girls became beautiful like gods and goddesses—and seeing them become beautiful, more young boys and girls worked, and saved and found their way to "Hollywood, USA" so they too could act out their dreams.

Then one day the "Wicked Witch of the East" captured Hollywood—and the young boys and girls were told—you must dream my dream—do as you are told—you cannot be a god or goddess—you must be working class and owe allegiance to me, to the company—the "Wicked Witch of the East"—and not to America or your dreams.

Say what I say, act what I wish and if you obey and are good—you can be on our TV—perhaps even HDTV. And, if you are very very good, we will let you star on our home VCR's.

The tale ends—goodnight America—now it's time to turn out the lights.

I told you this apocryphal bedtime story to show how important the magic of Hollywood and films are to our lives and—how that special magic in turn affects our trade deficit and business life through our communications and electronics industry.

We literally will be turning out the lights for our industries if we passively let the studios and HDTV along with the double deck VCR slip through our fingers. Slip nothing. We are all but gift wrapping and handing it to them.

Jonathan Yardley assessed the importance of Hollywood in a recent review in the Washington Post called "Tinseltown Imagings." He said, a book he was reviewing by "focusing on how Hollywood not merely manufactures dreams but fixes them in the national psyche gets uncomfortably close to the American bone."

In 1964, Marshall McLuhan who is known as the spokesman for the electronic age, wrote that "the electronic media are subtly and constantly altering our perceptual sense."

He declared "that down through the ages the means by which man communicates have determined his thoughts, his actions, his life."

That statement has become familiar to anyone who is a television viewer or movie buff. It is because of this familiarity that we sometimes forget exactly how important the movies are to America. Hollywood is uniquely an American creation.

Hollywood played an important role in the national psyche as our stars and producers made films, and produced entertainment in support of our World War II effort.

As an early player in efforts to warn the American public on the dangers to our system from attack from hostile forces, Hollywood shaped our values and was literally the morale builder and propaganda apparatus for the war effort.

The film industry seared our national conscience with the movie about displaced people in "Grapes of Wrath," which showed the effects of the dust bowl on American lives. It has—and continues to be a primary force for change in this country.

Americans have traditionally been free to choose films to watch in their homes and films have driven the insatiable market for VCR's as they opened up a new vista of home entertainment.

Today those films are a change agent throughout home viewing on a TV network, or through renting a film from the nearest film store.

Approximately one-third of American homes have at least one VCR. In another 2 years the market should reach the saturation point of 73 percent.

Last year 13.6 million sets were sold to replace older VCR's in the United States and, the world market for VCR's is three or four times larger than the U.S. market.

The VCR's make a lot of movie viewing possible. If we sell the studios and their film libraries to foreign interests, particularly the Japanese who produce 97 percent of the VCR's, then we have ensured the need for their hardware and the entrance of their products into future markets to become a hardened fact.

Under these circumstances their hardware will be in the 73 percent of American homes owning VCR's and the VCR, which is Japan's way of keeping dollars flowing to Japan, will continue to be a channel for dollars to leave this country.

Remember the VCR is 50 percent of the electronics export market for Japan and the electronics market is one-third of their total exports. So VCR's are literally the "Sacred Cow" of Japanese electronics exports.

If we reduce that VCR market—we reduce our deficit and can open up the world markets for America. After all, the Americans first developed the VCR—and now we have a double deck VCR in our future—the one from Go Video.

That double deck VCR will interact with a computer becoming the long sought after personal computer TV. It will help our companies to develop on-the-spot training films to educate our work force—as well as many other

wonderful things in the next four generations of electronics.

It is essential to HDTV. Let me remind you Go Video has the patent on the double deck VCR.

Then why the interest in the American studios—is it just the entertainment market alone?

The films we now have are fine, but with the advent of HDTV, there will need to be another standard of film for the high resolutions of HDTV. That will come from Hollywood—the film studios. Some studios are already using HDTV production equipment.

Who will own the studios? Certainly not the Americans. The HDTV standards will be predicated upon Hollywood film standards. Whoever controls Hollywood controls the standards, and is the arbiter of our dreams—and the stories of our culture.

If they control the studios—what affect will they have on the TV networks, who mostly depend upon Hollywood for their films.

The film library for the VCR's is controlled by Hollywood. At present, there are seven or eight film libraries in the world which we own. We are selling them to foreign interests, and that is not in America's interest.

So, even the choice of films for Americans to watch—our classics, and "Oldies and Goldies" will be in the hands of foreigners.

One step more, is who decides what is made—who stars—and how it is played, how it is said? If something is objectionable, regardless of how slight it may appear, who decides whether or not to buy the story and to produce a film?

Another important question is—who will interpret our culture—Americans—or foreign owners of studios? Will they make classics such as "Yankee Doodle Dandy," "Gone With the Wind," or "The Sound of Music" with American fervor?

It is ironic that foreign owners have the rights to the songs that Americans have hummed and danced to, and the music that got us through our troubled times which include World War I, the Depression, and World War II.

It would seem to me that these films and music are part of our national culture, as is the recent film "War and Remembrance" which was shown on TV this week.

According to a New York Times story, "Hollywood Takes to the Global Stage," the business was "owned and operated by Americans primarily for audiences in the United States." Now, "Hollywood is going global."

It stated the reason for selling was the following:

"Driven by economic, technological, and cultural factors, movie and television studios are aggressively selling their products in fast-growing and increasingly profitable foreign markets."

"At the same time, foreign companies and investors, recognizing Hollywood's unrelenting international dominance of the industry, are starting to snap up studios and production companies in the United States. They believe that owning a piece of Hollywood is the best way to get in on the industry's growth—growth that has been strong internationally and in the United States, the world's largest entertainment market."

What is happening is "the foreign markets interest American producers and the U.S. market interests foreign companies."

Regardless of their interest, I believe the movie industry, which has the largest pool of talent in the world, should remain in American hands.

Buyers of the studios include the Australians who want to build a worldwide entertainment presence. They purchased United Artists, the movie studio founded by Charlie Chaplin, Douglas Fairbanks, and Mary Pickford.

I further question the selling of a studio to some of the other prospective buyers now in the market. C. Itoh, the big Japanese trading company, is involved in the business.

C. Itoh is the company which broke the Cocom agreement, and helped Toshiba sell our sensitive technology to the Soviets. It is one of the companies involved in the Libyan poison gas plant complex. How will this company interpret a film—and who will do its bidding in making a film?

Even Nippon Steel wants a studio.

There is an important point to this addition to the fact that the interpretation of our culture should be in our hands for editing and presentation.

The fact is that what we do with the studios affects the whole electronics industry through HDTV, television, VCR's, and camcorders.

People will be buying the double deck VCR for home editing of films taken on their camcorders—or for developing training films in industry.

The HDTV will affect our mobile phones and other electronic markets. This industry will be a major consumer of semiconductors, as will the VCR. In fact, they are known as the semiconductor hogs because they use so many.

Those products will affect the opportunity for us to once again be viable in the semiconductor industry. They will also affect the R&D to help revitalize the consumer electronics industry—and it will affect the applications for defense.

In recent testimony before the Committee on Science, Space, and Technology, Jules A. Bellisio, division manager of Digital Signal Processing Research, testified that "In the advertising industry, the electronic processing of HDTV signals is already replacing the editing of 35 mm films as a way to produce printed material because of the very significant productivity improvements, even though HDTV work stations cost hundreds of thousands of dollars.

The market for HDTV globally is estimated to be between $40 to $150 billion in 10 years.

It has been targeted by Japan as its next major consumer electronics push and is part of a complete system to provide information in an improved manner.

By the turn of the century it is estimated that at least 175,000 jobs will be created. Bellisio further pointed out that "technology will make possible universal communications highways."

Dr. Russell Means of MIT stated before the same committee that "Electronics communication is the fundamental economic infrastructure of the information age."

He compared the "communication highways" and what they will do in shaping America to the "national system of roads, rails and canals." He also stated that "with the use of the terminology 'high resolution systems' that we have an opportunity to leapfrog ahead of thinking of our competitors in Japan and in Europe."

So therein is the motivation for our bedtime story that our electronics industry, the film studios, HDTV, the television networks, our telephone system, and the VCR's are all locked into a communications highway.

Our electronics industry that employs 2.6 million people will be affected and the indirect employment is over 7 million people. Our film industry is a world leader and supplies the films for our home viewing, as well as the television networks. The VCR's allow us to extend films on television into our homes, to teach and to develop programs for education.

They all affect the semiconductor industry—and probably most of all, who will represent us in films, who will interpret our culture.

Should we turn out the lights as the bedtime story suggests—or should we move to maintain our culture? The studios are part of our communications industry—and they are certainly more than 50 percent of developing an American image.

We can either turn out the lights and end the story or we can reject this fairy tale—and once again be the proud producer of the products that America is known for. With our ingenuity and the spirit of the American people—we can do anything.

If we shaped an upstart nation to be the leader of the free world, we can do it again. The challenge is ours to accept. I will be first in line to sign up.

HOLLYWOOD TAKES TO THE GLOBAL STAGE

(By Richard W. Stevenson)

LOS ANGELES.—United Artists, the movie studio founded by Charlie Chaplin, Douglas

Fairbanks and Mary Pickford, is being acquired by Australia's Qintex Group. International receipts from "The Accused," the Paramount Pictures film for which Jodie Foster recently received an Academy Award, just surpassed domestic box-office revenues. Columbia Pictures Television is co-producing a pilot for a CBS science-fiction series with HTV, a British commercial broadcaster.

Once a business owned and operated by Americans primarily for audiences in the United States, Hollywood is going global.

Driven by economic, technological and cultural factors, movie and television studios are aggressively selling their products in fast-growing and increasingly profitable foreign markets. At the same time, foreign companies and investors, recognizing Hollywood's unrelenting international dominance of the industry, are starting to snap up studios and production companies in the United States. They believe that owning a piece of Hollywood is the best way to get in on the industry's growth—growth that has been strong internationally and in the United States, the world's largest entertainment market. In an illustration of its confidence in the growth of the business around the world, Gulf and Western said a week ago that it would sell its financial services subsidiary and concentrate on its Paramount Pictures and publishing subsidiaries.

"The foreign markets interest American producers and the U.S. market interests foreign companies," said Charles B. Slocum, an analyst at the Writers Guild of America/West, the union for screenwriters. "What you end up with is companies in all countries looking outside their borders."

The growth of foreign markets is changing some of the industry's economic equations and beginning to influence creative decisions. The international appeal of American television programming has become such an important financial consideration that many producers decide whether or not to make a show based on its potential foreign sales. And with increasing numbers of movies grossing more from foreign box-office revenues than domestic ones, studios are starting to cast stars based on their international visibility. Paramount, for example, cast Sean Connery as Harrison Ford's father in the upcoming "Indiana Jones and the Last Crusade" partly because he is a major box-office draw in Europe and other parts of the world.

Foreign acquisitions in Hollywood, for all the attention they generate, so far remain relatively limited in scope. But that could change if big Japanese companies decide to enter the business. The Sony Corporation, which came into the American entertainment market last year with its purchase of CBS Records and is distributing American-made films on a limited basis in this country, has made no secret of its interest in acquiring a studio. Other Japanese corporations, including the Nippon Steel Company, also see Hollywood as a potential area of expansion beyond their declining industrial businesses.

And acquisitions are by no means the only international relationships being forged. Foreign concerns and American producers are quietly linking up through financial deals, joint ventures and co-productions that are also contributing to Hollywood's increasingly international character.

The combination of foreign ownership and growing international markets is "arguably as fundamental a change for the industry as the advent of color," said Christopher Skase, the chairman of the Qintex Group of Australia, which has agreed to pay $600 million to acquire United Atists and its film library from the MGM/UA Communications Company. "It's a quantum leap in the nature and scale of the business."

The globalization of Hollywood is part of the broader worldwide consolidation of the media and entertainment industries. In an era when corporations in many industries believe biggest is best, media and entertainment companies are trying to expand by crossing national borders and becoming more integrated. Broadcasting companies, for example, want to own the production companies of the programs they show, and producers are buying television stations and movie theaters.

Globalization is also coming at a time when worldwide demand for entertainment programming—"software," to use the computer jargon now popular in Hollywood—is expected to rise rapidly.

"There is much more market potential worldwide," said Rupert Murdoch, who bought the 20th Century-Fox Film Corporation in 1985 as an Australian and later became an American citizen. "There are improvements in living standards, new developments in technology, increases in leisure time and deregulation of broadcasting."

For Hollywood, the emergence of new and larger foreign markets and the increased revenues they bring have been greeted with glee, even though the question of foreign ownership is viewed more warily. The entertainment industry has always welcomed financing from almost anyone willing to provide it. But in the last decade, many people in the creative community have been uneasy about the absorption of many studios and production companies into larger corporate entities; they fear that artistic considerations will be sacrificed on the altar of market research and net income. Those same people worry that control of production will be that much further removed from their hands by foreign owners.

"It is weighing heavily on a lot of people's minds," said one top Hollywood deal maker, who asked not to be named.

So far, the Australians have been the most aggressive in making acquisitions in the United States, although the British have not been far behind. It seems a natural fit: the common language and the rapid growth in those two nations' domestic media industries are spurring demands for more programming.

In addition to the Qintex Group's deal to acquire United Artists, the parent company of Australia's Network 10 broadcasting concern last month bought a controlling stake in Barris Industries. Once known as the maker of "The Gong Show," Barris has more recently been run by Jon Peters and Peter Guber, who made "Rain Man" and other hit films.

An Italian financier, Giancarlo Parretti, last year took control of the Cannon Group, once a high-flying maker of the low-budget films that has fallen on hard times. Mr. Parretti then acquired a French film company, Pathé Cinema, and wants to buy more entertainment companies. Earlier this year he bid unsuccessfully for New World Entertainment Ltd., the maker of the hit television show "The Wonder Years."

Britain's Television South P.L.C. last year bought MTM Entertainment, the production company co-founded by Mary Tyler Moore.

But it is the possible arrival of the Japanese that really has Hollywood buzzing. Rumors continue to sweep the industry that Sony wants to buy MCA Inc., the parent of Universal Studios, or Columbia Pictures. Nippon Steel, which is already building a theme park in Japan with MCA, has sent executives here to study the entertainment business.

Some of the Japan's largest companies, including C. Itoh & Company, the huge trading company, are financing American films for big studios and independent producers, while others, including Dentsu Inc., the advertising agency, are looking for ways to gain a toehold in the business.

The international deals most in favor now—and those that seem most likely to expand quickly—are agreements between American and foreign companies to co-produce television programs. While most of the action is with companies from Western Europe, the Soviet Union's state programming arm last week agreed with MGM/UA Television to make a four-hour mini-series about a joint Soviet-American flight to Mars. It is scheduled to be shown in this country on NBC in 1990 or 1991.

The growing pace of foreign investment in Hollywood is coming at a time when sweeping changes in European media, particularly television, are driving home the importance and financial potential of foreign markets. And demand for programming from the United States is up sharply.

The major change has come with the deregulation of broadcasting, which has allowed commercial television networks to spring up across Europe to compete with staterun outlets. Technology is also changing the European market; in Britain, for example, viewers can now receive a signal beamed directly to their home via satellite. All the new broadcasting outlets have created heavy demand for relatively inexpensive programming to fill the air waves, and American shows and movies are popular and cheaper than making original programming.

Although the French, in particular, have been pushing in European Community quotas on the importation of television programming, European trade ministers last week agreed on vaguely worded rules that require broadcasters to have a majority of European programming "when practicable." Most American producers do not believe that rule will have any significant effect on the market because of the vagueness of its wording.

And that would be welcomed because international considerations seem to become more compelling to Hollywood every day. International film distribution revenues are steadily catching up with demestic distribution revenues. Of total worldwide film distribution revenues. Of total worldwide film distribution revenues of $3 billion last year, $62.5 percent came from the United States, compared to 67 percent in 1985.

In television, sales of programming to foreign broadcasters last year were $1.3 billion, up 30 percent from 1967. That is expected to reach $2.3 billion next year, according to Security Pacific Merchant Bank.

The growing markets are all over the world, with new opportunities created by the spread of technology ranging from satellites to cable and videocassettes. And new geographical markets continue to open to American movies and television shows, particularly in Asia.

"There are more and more opportunities coming about because of the changes abroad," said Martin S. Davis, the chairman of Gulf and Western Inc., the parent of Paramount Pictures. "It's not just Western

Europe. You have to think about being anywhere there's a screen."

The changing environment is having an impact even on American companies not involved in foreign acquisitions. Spurred partially by worries of possible takeovers by foreign media and entertaiment concerns, Time Inc. and Warner Communications Inc., parent of the Warner Bros. Studio, agreed to merge and form a presumably takeover-proof communications giant.

Foreign media or entertainment companies wishing to join in what most think will be a worldwide boom in the sale of programming during the 1990's have little choice but to link up with Hollywood. That is because only Hollywood makes films and television programs that are consistently successful all over the world.

"Japanese films, for example, can be very artistic, but they don't have an international marketability," said Toshihiro Nagayama, the chief executive of the CST Communications Company, a joint venture of three large Japanese companies—C. Itoh, Suntory Ltd., and Tokyo Broadcasting Systems Inc.—that has invested in American films produced by MGM/UA. "There's a demand from every corner of the world, including Japan, for American products."

American film companies took in $1.13 billion in revenues from the distribution of films abroad last year, up from $800 million in 1985 and $1.05 billion in 1987.

Part of Hollywood's global advantage is obviously its uninterrupted reign as the industry's capital. The biggest and most experienced pool of creative and production talent is here and the world's most extensive technical facilities are here.

"Electronic communications can provide some geographic diversification, but a service industry such as the entertainment industry depends on people being able to perform their services in person," Mr. Slocum said. "There are more geographic constraints on developing a script, casting a movie and discussing set designs than on manufacturing cars, television sets or clothing."

Hollywood has some built-in economic advantages, too, when it comes to playing on the world stage. The very size of domestic market—box-office receipts in the United States last year were $4.46 billion, representing slightly more than one billion admissions—helps producers spread the cost of making a film over a much larger base than producers whose home markets are smaller. That means American producers, even if they never get a dime from foreign markets, can afford to spend more on production. And higher budgets mean more of the things that draw people to theaters: big stars, stunning sets and locations, special effects and strong writing and production talent.

American studios and production companies also have the world's most extensive film and televsion libraries, which can provide a steady steam of revenues even if current projects flop. And major American studios have powerful marketing and distribution systems to get films into theaters and on the air all over the globe.

"There are only seven major film libraries and studios in the world," Mr. Skase of Qintex said, referring to the Walt Disney Company, Paramount, MGM/UA, Warner Bros., 20th Century-Fox, Universal Studios and Columbia Pictures. "Because it has taken 50 or 60 or 70 years to create those companies, it is reasonable to assume that there won't be an eighth or a ninth or a tenth."

For most of the foreign companies that have made acquisitions in Hollywood, the allure has been both to find a vehicle for participating in industrywide growth and to own a source of programming for existing broadcast outlets. That was one reason why Northern Star Holdings Ltd., the parent company of Australia's Network 10, jointed forces with the Westfield Capital Corporation to buy a controlling stake in Barris last month. The price was $34.5 million.

Australia's Lowy Family, which controls Network 10's parent, "decided we ought to have a base in the U.S. and global entertainment business." said William A. Carrick, president of Network 10's United States operation.

"Building on the creative talents of Jon Peters and Peter Guber, we want to build a worldwide entertainment business in a rational and measured way," he said. Moreover, he added: "If you're in the television business, you need a steady supply of products. So it makes an enormous amount of sense to our Australian television network" to be linked with an American program producer.

As part of its deal to buy the Barris stake, Network 10 will be able to show all of Barris's movies and television programs, which Mr. Carrick said will expand to include more television movies and mini-series.

Many film makers can now command higher, prices in selling the international rights to show their movies on television. The foreign markets, are growing even more important economically to makers of American television programs.

The major American television networks, hurt by declining ratings and soft advertising demand, have been holding the line on the fees they pay producers for programming, even though production costs are up. Producers have also been hurt by weak demand for reruns, which generate the real money in television.

Increased revenues from abroad are allowing producers to reduce or eliminate the deficits they incur from the difference between the cost of production and what the network pays for the program. Some studios now have a policy of not making shows when foreign revenues will not cover all or most of the deficit.

"It's a very major part of the decision to make or not make a pilot or a series," said Colin P. Davis, the president of MCA TV International.

Twentieth Century-Fox decided two years ago not to make a series called "Rags to Riches" for economic reasons. New World Television later agreed to make the show for NBC, largely because it believed the show had more foreign potenital than Fox saw. (The show was later canceled by NBC.) Some industry executives see the day approaching when a show could be made in the United States primarily for distribution abroad, with sales in this country seondary.

For now, though, American tastes still call the tune in entertainment, a situation that is not likely to change in the near future.

"American culture is the only true mass world wide culture," said Sharon L. Patrick, head of the communications and entertainment practice at the consulting firm of McKinsey & Company.

BUYING A PIECE OF TINSEL TOWN—SOME HOLLYWOOD ACQUISITIONS BY FOREIGN INVESTORS

SAVINGS AND LOAN BAILOUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS of New York. Mr. Speaker, the savings and loan association scandal is still very much an important item on the agenda of the decisionmakers here in Washington. If Members look at television or listen to the radio, they would not believe it was still an item proceeding through the decisionmaking processes.

I would like to associate myself with the remarks of the previous speaker in terms of the tremendous role that the media plays in shaping the thinking of the American people. Our culture, our values, our thinking is shaped by the media. The fact that the television stations choose not to deal in any great depth with the savings and loan scandal is of great concern to me. The fact tion radio talk show hosts are ignoring this matter of the expenditure of $157 billion, at a minimum, of the American taxpayers' money is of no concern. It does not arouse a great deal of interest and discussion. It is quite baffling. The Harris Poll shows that the majority of the American people do know something about the savings and loan association scandal. They do not want their taxes to be spent for this bailout. Maybe the American people really know some things that Congressmen do not know, because this Congress, the process is moving systematically, and in some cases much too rapidly.

The other body, the Senate, passed a bill with only 3 days of debate and, of course, it is now in the House. It has gone to the Subcommittee on Financial Institutions supervision, regulation and insurance, and the Committee on Banking, Finance, and Urban Affairs has now passed the President's bill with amendments, and that has now been referred to the Committee on Ways and Means and the Committee on the Judiciary, who I do not

think are going to spend that much time on it.

So we will have it on the floor of Congress probably by the end of this month or the first of next month. Yet there is very little discussion of this monumental bill. This is not just another bill. This is a bill which has an authorization proposed of $157 billion. I do not think there has been a single item in peacetime, ever, to have a price tag of $157 billion.

I am not here because I am a member of the Committee on Banking or a member of the Committee or of the Committee on the Judiciary. I am here because, first of all, I am a concerned taxpayer and I do not like the idea of $157 billion of the taxpayers' money being spent to bail out banks, providing welfare for the banks, subsidizing banks, intervening in the public sector. Never before has there been a proposal that the public sector be called upon to bail out the private sector, and certainly not in such great amount. I think the Chrysler bailout was less than $2 billion and that was a loan. That was supposed to be repaid, and the Chrysler loan was repaid. New York City was loaned money to bail out New York City at the time when they had a financial crisis. That was a loan even though it was to a public entity, it was a loan. New York City paid back the loan. Now we have a situation where more than 400 savings and loan banks have absconded with the money, dissipated the money in various ways. It is just not there. It is gone. The taxpayers are being asked to replace it. This is not a loan. It is a giveaway. It is a giveaway which will involve generations to come. Not just now, but people to come; $157 billion bailout in obligations the President is asking Members to assume, and they say much of that will be a matter of bonds that will be sold and they will be paid back. It is an obligation that has to be assumed. One thing we know, the interest on $157 billion in bonds must be paid by the taxpayers. What we do not know is how much of the principal will have to be paid because if the savings and loan banks continue to fail, they will not be able to pay back any of the money. If the liquidations of the assets do not produce any revenue, any money, then that money has to be made up by the taxpayer. We are talking a minimum of $157 billion, and the chairman of the Committee on Banking, Housing, and Urban Affairs [Mr. GONZALEZ] estimates it might go as high as $335 billion.

Are we going to let this proceed routinely? I am here not only as a concerned taxpayer, but I am here, an empty-handed Congressman. For 7 years I have been here in Congress. For 7 years I have had to go back to my constituency and tell them we cannot do anything about problems which are most important to the constituents, we cannot get help from the Federal Government because they have a deficit. The deficit is a primary preoccupation. We must not spend any more money for education, although education is really at the center of the Nation's national security effort. If we do not have educated people to run our complicated weapon systems then they will blow up on us. We will have more and more accidents like the ones we have been experiencing. If we do not have educated people to build the weapon systems, the B-1 bombers will continue to fall out of the sky the way they are. We will be calling on new appropriations to help fix the problem of the B-1 bomber; $2 billion some Member proposed. I think they should be junked because they are obsolete, but we continue to make the wrong decisions. If we do not have more educated people in the pipeline at every level, as technicians, mechanics, scientists, theoreticians, the space program will continue to bog down and have tremendous difficulties.

So we have been draining our resources that are directed at problems that are critical. Certainly education, I serve on the Committee on Education and Labor, I know of some of the problems most of the school systems in this country are either inadequate or they are collapsing totally. Our best school systems are inadequate when they compare to international systems, when they are held up to international standards. When we compare the performance of our best students in the area of science and biology, those students do not measure up to students in other industrialized nations. A recent math and science comparison showed that students in Korea were at the very top. Students in the United States were at the very bottom. Only two other countries were below the United States. When they make comparisons with respect to geography, we get the same kind of problem. Our students in the best schools, our best students are not able to meet international competition. Our students in the worst schools are getting absolutely no significant education. Students in the worst schools get no education relevant to the modern society.

There are systems, like the system in Chicago, on the verge of total collapse. There are systems like the system in New York which is a two-part system. We have some of the best schools in the Nation, about one-quarter of our schools, and the other 75 percent are in total disarray and collapse. States must do more. They are doing a great deal. I think our State has been very generous in helping. The city government is taxed to the point where it will not be able to do much more in education, and like entities across the country like local school boards across the country, the only way we will get help with modernizing our school systems is to look to the Federal Government for a tremendous imput of new capital and new expenditures.

We cannot have a modern system able to meet the modern standards and competition of this modern age without more help from the Federal Government for education. The government, Federal Government, now boasts that it spends only 6 percent of the total expenditure for education. When Members look at all the expenditures by the State governments and city governments and the Federal, our Federal expenditure is only 6 percent. We boast about that, and education is really a local responsibility. Why should the Federal Government get involved? I think that kind of thinking is quite obsolete, and only guarantees we will have more difficulty in our competitive area, competing in the industrial and commercial area, and only guarantees we will have more difficulty with the space program and more difficulty with military hardware also.

So instead of putting the money where it needs to go, we are about to put $157 billion into a proposition which buys nothing. What do we get out of it? Nothing. Even the Sergeant York gun, a bad investment, at least there was steel and some metal that could be melted down when the Sergeant York fiasco was over and they decided finally Sergeant York was no good, but there was something to see, and some dreamer's vision of a better weapon.

What do we have to show after we spend $157 billion to bail out the savings and loan banks? What do we have to show? Absolutely nothing. Even the B-1 bomber was a dream that went bad. The MX missiles that are obsolete, we can all at least quarrel about the wisdom of one weapon system or another, and have steel and hardware, that is bad enough when there are bad decisions made in those areas. Here we have a savings and loan association scandal, the biggest rip-off in the history of the Nation, and we will have nothing to show. No collateral for the American people. This process is going forward, and the House, as I said before, the Committee on Banking, Finance and Urban Affairs, is all finished up. It will be coming to the floor soon.

□ 1740

This will be coming to the floor soon. There are several dozen Members of the House who have signed a letter to the Speaker asking that a task force be set up composed of the chairman of the Committee on Ways and Means, the chairman of the Committee on the Judiciary, the chairman of the Committee on Energy and Commerce, and a few other Members to

take a hard look at this bill and this process, to slow it down. We say that we do not need to move so rapidly. We do not need a stampeding process.

The same Members have asked, when this comes to the floor, for a minimum of 10 hours of debate. In the past, the more important a bill is, the less time we have to debate it on this floor. We are not so much in need of time; we have not spent that much time on important matters in this House this year. We have plenty of time. We had 10 hours of debate on the base closings bill. We should have far more time on this. We should have a minimum of 10 hours of debate when we have to face the consideration of a $157 billion authorization.

Before we even get to the floor, where is the discussion? We should have far more discussion taking place. As I said before, the television and the radio have not discussed it fully, but even here in Washington, where is the public debate? Where are the conservatives on this very important issue with respect to an intervention by the Government into the private sector?

The Government is being asked to pour in enormous amounts of money to bail out the private sector. Where are the conservatives? Where are the experts at the Heritage Foundation and the Brookings Institute and the Hoover Institute? Where are the laissez faire economists? Where are all the economists who insist that the best thing to do with the economy is to leave private industry alone and not touch it? Where are all the people, now that we are about to pour in $157 billion of the taxpayers' money to bail out the private sector, to subsidize the banking industry? Where are all the people who call for laissez faire economics?

When it looks like we are going to have socialism through the back door, it seems we are always worried about socialized health care and other forms of socialism, but here we come through the back door, in the hallmark, the palaces, the tower of capitalism, and through the banks we are going to start socialism, we are going to have a national banking system buttressing the banks with taxpayers' money.

Where is the debate on this? Where is the discussion? I would like to hear an explanation from people who know about business and who know more about economics on what we are doing and where this is going to go.

Are we going to eventually end up in a situation where many of the corporations that were discussed by the previous speaker, corporations that are being bought by foreign governments, at some point will be bought back? Are we going to be here in the House with a bill proposing to buy them back? Are we going to buy them back from the foreign governments because it is our patriotic duty to do it?

Where is this intervention into the private sector going? Where are the authors of Gramm-Rudman-Hollings with respect to the fact that this bill that is proposed of $157 billion is going to be discussed and negotiated without any consideration of this year's budget?

They say it is off budget, so being off budget, we do not have to discuss it. Being off budget implies that it is going to come from some part of the money that is not in the U.S. Treasury. But it all comes from the U.S. Treasury, it all comes from the pockets of taxpayers. How can we not discuss a $157 billion commitment in the budget process?

Do we have some guarantee, or do we have some honest discussion about the impact of this year's budget, the budget that become effective on October 1, or are we going to have to pay interest on the bonds that are sold that early? Certainly by next year, when we consider the budget for the next fiscal year, we are going to have to discuss at least the impact of the interest payments. But there is no discussion because it is going to be off budget.

How are we going to deal with Gramm-Rudman-Hollings, seeking to put some kind of parameters or controls on spending? How do we deal with that when we have a $157 billion obligation and they call it off budget? Do they have a new kind of Gramm-Rudman-Hollings to apply off budget? What is the impact of this expenditure?

As we talk about the interest costs or some of the principal that will have to be absorbed as our plans go awry and we do not see the money being generated in any other way, is that going to come into the process and be applied against all the nondefense expenditures? When we get cuts in the fall, are we going to do as we do now with defense on one side and nondefense on the other side so that each one has to take a cut of 50 percent? The defense side seldom takes the same cut, but let us assume we have a 50-percent cut in the nondefense programs; will the S&L programs be thrown in with the nondefense programs so that the cut on all other existing programs, nondefense programs, is going to have to be greater to compensate for about $4 billion in interest costs per year that the S&Ls will take?

Are we ready to close down Washington? Are there no more decisions Congressmen can make after we make this kind of obligation? We proceed with this bill as if it was just another bill and yet it will set the parameters for everything we do that is important in the next 4 years at least, probably within the next 10 years. To take a $157 billion hit, to have the process endure that kind of absorbtion of a new obligation of that kind means that there will be no money for new initiatives. If the President wants to be the education president, as he says, where will he get the money for new initiatives in education? Certainly he did not propose any new funding for education this year.

Once we have had the impact of the scandal, once we have seen the impact of the savings and loan association bill out here, there will be no money for education initiatives or any other kind of initiatives unless we make drastic cuts somewhere else. Even if we are able to make cuts in defense as a result of the thaw in the cold war, as a result of our common sense beginning to prevail over the nonsense that has prevailed in decisionmaking about overseas bases, with $150 billion having been spent on overseas bases, we have to remember that most of those bases are located in Japan and Germany. Germany and Japan are our competitors in the commercial sector.

As the previous speaker said, large amounts of our country are being bought up by the Japanese. They have the money partially because we are paying for their defense. We have been doing this for quite a while. Any sophomore in high school can demonstrate the stupidity of continuing to pay for the defense of German and Japan while they are competing with us in the commercial sector.

□ 1750

However, Mr. Speaker, we go on doing it. Somebody is making a lot of money out of it somewhere. I do not know where or how, but we are locked into it, not by some kind of animal instinct. There must be something in it somewhere for somebody. I cannot understand it, but it continues to go on.

If we decide to come to our senses, and we stop spending that $150 billion unnecessarily and save money in the defense area, is that money going to be available to put into new initiatives in education? To make a better deal for catastrophic health care for senior citizens? Is it going to be available to take care of women, infants, and children's programs? Is it going to be available to increase the amount of money we spend on Head Start? Or are we going to have to take any savings made in the defense sector and move them over to cover the costs of the savings and loans bailout?

Mr. Speaker, these are critical questions, and nobody wants to duscuss them. Well, where are the conservatives? Now is the chance for the conservatives to come to the aid of their country it seems to me and defend us from this intervention which is so costly.

This is a very costly intervention. In the 7 years that I have been here I

have heard a lot about big spenders, about big spending. Here is the biggest spender of all. The President is the biggest spender of all in proposing this $157 billion bailout. The biggest piece of spending that is taking place yet, and where are the budget study groups and all the people who worry so much about extra pennies going into school lunches? Where are the people who debate endlessly about having cuts on welfare programs and welfare reform, where you squeeze people down to the point where they can barely survive? Where are all those people now that we are about to give welfare to the banks to the tune of $157 billion?

Mr. Speaker, I think it is important to note that this is a very complicated subject. It is a very complicated enterprise. It is easier to confuse people, and part of the problem may be that our people are confused to the point where they do not ask their Congressmen any questions, so we do not bother to bother ourselves about the situation.

There have been some developments which throw some light on what is going on, and I would like to share some of that tonight. I think that it is very important that several dozen Members are studying the situation closely. These are the persons, Members of Congress, who have called for a discussion in the Democratic Caucus. They have also called for the task force to be set up which goes across committees. These same Members have called for a minimum of 10 hours of debate when the bill comes to the floor. I think that is important.

I think it is important also that members of the Committee on Banking, Finance and Urban Affairs, like the chairman himself, have issued statements showing that they have great disagreement with the estimates that are being made by the President. Whereas the President's bill estimates the total obligation to be about $157 billion, the chairman of the Committee on Banking, Finance and Urban Affairs, the gentleman from Texas [Mr. GONZALEZ] estimates that it may be closer to $335 billion.

Another member of the Committee on Banking, Finance and Urban Affairs, the gentleman from New York [Mr. LAFALCE], recently issued a report which throws a great deal of light on the subject. This is as a result of deliberations in the subcommittee and, later on, his participation in the process of the markup at the committee level.

The gentleman from New York [Mr. LAFALCE] states that: "We are losing sight of what should be some of our primary goals in this legislation, and those goals are to minimize the taxpayer costs and to insure an equitable sharing of the burden. Judged by these two standards the President's plan simply does not measure up. The cost estimates in the President's plan," the gentleman from New York [Mr. LAFALCE] says, "the cost estimates for necessary case resolutions are deceptively low."

The gentleman from New York [Mr. LAFALCE] explains that, "While the administration maintains that the cost of its plan will be approximately $90 billion at that time, now it's 157, and the analysis of the Banking Committee staff indicates that the total cost before subtracting the estimated revenues will be approximately $335 billion including the costs of the financing of corporation bonds, Federal savings and loan corporation notes, assistance agreement guarantees, future assistance, and purchase of zero coupon bonds."

The gentleman from New York [Mr. LAFALCE] argued that the administration has not added into its picture; the picture of the cost interest, interest that will accrue over time on the additional debt that is being incurred. Additionally, the U.S. taxpayer is the ultimate backstop for costs associated with all of the past deals.

Mr. Speaker, there were great deals made in 1988, and the costs for all of those deals the U.S. taxpayer will have to take care of. The Bank Board acknowledge in 1988 that there were 515 insolvent thrifts. Losses they acknowledged at that time total $22 billion. Private economists estimated that it was about $60 billion. As the Bank Board raised its losses, of course we knew that the losses were even greater. At the year end in 1988 there was a flurry of deals where financiers and Wall Street investment bankers were given sweetheart deals and giveaways. It is estimated that the Bank Board, its proposed liquidations and selloff of these institutions, will obligate us to the tune of $40 billion in future payments.

Mr. Speaker, those payments must also be figured into the cost, which is what the gentleman from New York [Mr. LAFALCE] is saying. To continue with the statement of the gentleman from New York [Mr. LAFALCE]:

"The bonding mechanism that the President has proposed is both fiscally irresponsible and morally reprehensible." There are the words of the gentleman from New York [Mr. LAFALCE], a member of the Committee on Banking, Finance and Urban Affairs. "The bonding mechanism is both fiscally irresponsible and morally reprehensible and will significantly increase the cost to the American taxpayers."

What is he saying? He is saying that the President and the Congress are passing the costs on to our children and granchildren, and in the process they are crafting a plan with far higher costs than would otherwise be necessary. Essentially the gentleman from New York [Mr. LAFALCE] said that Congress, and the President have decided to use bonding to cover the cost of present and past expenditures even though the difference in costs between direct appropriations and bonding would amount to as much as $150 billion over 30 years.

Translated into lay English what the gentleman from New York [Mr. LAFALCE] is saying is that, if we were to go ahead this year and next year and take the responsibility, put the obligation on the budget, raise taxes to pay for it, pay it off, we can save $150 billion over a period of 30 years.

To continue with the statement of the gentleman from New York [Mr. LAFALCE]:

"Point three: The taxpayer contribution is significantly understated in the President's plan. Taxpayer contributions, significantly understated. The industry contribution is overstated, and other legitimate sources of income, such as the States, are not taxed."

The gentleman from New York [Mr. LAFALCE] charged that the plan is based on the idea that healthy thrifts will remain healthy and be able to refund the FSLIC, the Federal Savings and Loan Insurance Corporation, but the gentleman from New York [Mr. LAFALCE] says that a few of these institutions may make it. Further, he adds that, if interest rates are higher than the Bush administration now projects, our deposit growth in the S&Ls is lower. The taxpayer will fill in the void. Greater cost to the taxpayer.

Point four from Mr. LAFALCE's statement:

"Efforts to draw in private capital to help minimize the resort to taxpayer funds are inadequate. The President is not calling upon the private sector to bail out its own colleagues. The President is not calling on the private sector to keep capitalism healthy. He's not saying that we want to avoid socialism of the banking industry. He's not building into this plan incentives or some kind of mandates and obligations for private industry to take care of the problem."

After arguing for years against accounting gimmicks and sleight of hand capital standards, the gentleman from New York [Mr. LAFALCE] said, "The President is now in the anonymous position of warning that we cannot wipe the slate completely clean in one quick blow without doing unnecessary damage to viable institutions and increasing taxpayer costs."

He is saying we cannot wipe the slate clean in one quick blow without doing unnecessary damage. If we wipe the slate clean in one or two quick blows, we will eliminate a large part of the costs for the taxpayers.

The gentleman from New York [Mr. LAFALCE] also adds that it was primarily State-chartered institutions with

broad powers and lack of supervision that caused this crisis. Under the dual banking system the gentleman from New York [Mr. LAFALCE] insisted that States should have obligations as well as rights.

□ 1800

The whole issue of State responsibility is one that also is not being discussed and should be put on the table in fairness to the American people.

One article that appeared in USA Today on Wednesday, May 3d, is entitled, "S&L Bailout; Money Goes From the Rust Belt to the Sun Belt." It is a very short item. I am going to read the item, but I will ask that it appear in the RECORD.

[From USA Today, May 3, 1989]

S&L BAILOUT: MONEY GOES FROM RUST BELT TO SUN BELT

Northern taxpayers will foot most of the more than $100 billion bill for the nation's savings and loan bailout, although most failing S&Ls are in the Southwest.

Thirty-six states and the District of Columbia will pay more than they take in from the bailout, while 14 states will receive more than they pay.

This means the Rust Belt will subsidize the Sun Belt. The per-capita cost for Connecticut, for example, will be $479, while New Mexico will receive $2,728 per person. Washington, D.C., will lose $471 per person, and Arkansas will gain $2,357 per person.

How much some states will gain or lose:

Biggest winners:	*Billions*
Texas	$31.0
Arkansas	5.6
New Mexico	4.0
Louisiana	2.8
Arizona	2.5

The money will flow into their States to bail out their banks.

Biggest losers:	*Billions*
California	$7.6
New York	6.4
Michigan	3.2
Pennsylvania	3.2
Ohio	3.1

Source: Cleveland State University.

Now, these poor depressed Rust Belt States are going to be forced to bail out the Sun Belt States, just one other interesting phenomenon taking place from this historical bailout.

I think it is also hard for people to comprehend what happened when we had our leaders continuing to insist that this is not a matter of thievery. In most cases people did not steal the money. These are leaders who made those statements.

On the other hand, there are analyses that show that in 80 percent of the failing banks, fraud is the problem. Fraud is the major problem in 80 percent of the failing banks.

Why do we keep insisting that there are no crooked deals involved here? Why do we keep insisting that bookkeeping errors and sloppy management could result in a situation where billions and billions of dollars are lost? Why do we insult the intelligence of the American people by saying that banks hire people who do not know how to keep books? Banks do not hire people who do not know how to keep books. You do not get into a bank unless you know how to keep books. Banks do not hire accountants who do not know how to do accounting.

If the books are kept in a sloppy manner, if the books and records are inadequate, it is because somebody has prepared that setup. They have allowed it to happen in order to cover up something.

So the assumption is whenever a bank goes bad, whenever a bank fails, the first assumption should be that incompetence and fraud are the same. The first assumption should be that investigations should go forward.

The first assumption should be that the bank as an institution is guilty until proven innocent.

The first assumption should be to go in and as you look for the fraud, look for the crookedness, as you put the pressure on, you might find it possible to recover a much greater percentage of the money.

People do not understand how honest, forthright bankers in savings and loan associations, which are usually situated in communities where they have some connection with the local people, they are upstanding citizens, at least they seem so, they do not understand how we can have this massive fraud, this massive thievery. They do not understand what I mean when I say we are faced with a phenomenon where we have a network of racketeering enterprises, a network of racketeering enterprises that rip off the American people. They use the fact that the taxpayers' deposits up to $100,000 per person per institution are guaranteed by the Government. They use that fact. They abuse it. They misuse it and they rip off the American people, a network of racketeering enterprises.

If you read the New York Times, we should be grateful for the New York Times Sunday Magazine, April 23, 1989, there is an article by Alan Pusig. Alan Pusig was a star reporter at the Dallas Morning News. The title of the article is "Fast Money and Fraud, Bloated Deals on Condo Corridor Wreck a Dallas Savings and Loan Association."

If you read this, you will see how it was done in one place. You can see how a house painter, a man named D.L. Faulkner, a former house painter, in the article it says he could barely read and write, but he understood one thing. If you get control of the decisionmaking in a savings and loan association with millions of dollars, then you can use that control to become a multimillionaire, and Mr. Faulkner became a multimillionaire.

In the process, many people were involved, those who estimated the land at too high a cost, those who presided over the transaction, the title search companies, everybody along the way was in on the deal and many of them knew that they were doing things wrong, but as long as the ultimate product was going to be the production of a large amount of money to cover the deal, the ultimate product was the savings and loan that was going to make the loan, everybody chimed in. They got their cut, and not only Mr. Faulkner became a multimillionaire, a lot of other people became millionaires.

If you read the New York Times article by Mr. Alan Pusig and how they turned it over, how they used their influence, and then when they had milked one savings and loan association dry, they used the connections with savings and loan associations in other parts of the country to pull in from other parts of the country the money that they had and they also milked them and were the cause of their failure.

If you read the article, I think Mr. Pusig is a very clear writer. He makes a very complicated process clear to a layman, and you have some better understanding why this was not a problem created by incompetence, not a problem created by simple people who got overwhelmed by the collapse of the oil economy. It is a problem created by cold-blooded calculating racketeers. Racketeering enterprises have produced this crisis.

So I think the article, which I will not submit for the RECORD, I will just repeat that is the New York Times Sunday magazine of April 23, 1989. The title of the article is "Fast Money and Fraud, Bloated Deals on Condo Corridor Wreck a Dallas Savings and Loan Association."

As I said before, in closing, this is a monumental bill. There is nothing like it in the history of the country. I think Teapot Dome, the Watergate and a number other scandals are small stuff when you compare them with what is involved here.

We are assuming obligations which will go on and on for a long time. We are spending tremendous amounts of money, interjecting them into the private sector, taking them, literally highjacking the taxpayers, because the taxpayers have nothing to say about this, taking the money away from them and putting it into the hands of bankers who have not been made to pay.

If you had greater prosecution, all those owners of the savings and loan associations, all the people involved would be put on the spot and forced to make good, and the revelations would reveal who the guilty parties are, we could sue and get some of the money back. If we had greater investigations and prosecution, we could pinpoint where the independent accounting

agencies went wrong. You could pinpoint where the local accounting agencies or the staff went wrong. You could pinpoint guilt and force many of the people to pay back large sums of money, either through a civil suit process or a criminal prosecution process, and more money could be recovered.

Certainly if you read the article in the New York Times Sunday magazine, you will understand that poor people, the average American taxpayer was not in on the deal. They were not part of the criminal conspiracy.

□ 1810

They were not part of the racketeering enterprise. There are people and groups that can be identified as groups. Accountants ought to be made to pay more; independent accountants involved should be make to pay some part of this cost; as groups, the real estate dealers, as groups, the title search people, the people who gave the land estimates, the condo builders, and there are whole groups of people who still have millions of dollars as a result of what they made out of these racketeering enterprises, and they should be made to pay.

As we go forward and this bill is brought to the floor of the House, I hope that the debate will be enlarged. I hope that the conservatives will consider their responsibility to explain their position. I hope that the authors of Gramm-Rudman-Hollings will come and explain to us what the impact of this bill will be on their basic approach and philosophy, what they intend to do about the off-budget item, the $157 billion cost, and I hope that most of all the American people will have the help of radio and television to fully throw the spotlight on this monumental obligation of their taxpayer money.

Mr. Speaker, I hope that we will not be a part here in Washington of continuing an enterprise which has a great question mark over it, an enterprise a large part of which I consider to be a racketeering enterprise. We want no part of it. We must throw light on it. We must have the maximum debate here in Congress.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GALLEGLY) to revise and extend their remarks and include extraneous material:)

Mr. INHOFE, for 60 minutes, today.

Mr. HORTON, for 5 minutes, today.

Mr. SCHIFF, for 15 minutes, on May 11.

(The following Members (at the request of Mr. TORRES) to revise and extend their remarks and include extraneous material:)

Mr. PEASE, for 5 minutes, today.

Mr. ENGEL, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. OWENS of New York, for 60 minutes, on May 15, 16, 17, and 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. GALLEGLY) and to include extraneous matter:)

Mr. CRANE.
Mr. YOUNG of Alaska.
Mr. MCDADE.
Mr. MICHEL.
Mr. SMITH of Vermont.
Mr. PORTER.
Mr. BUECHNER.
Mr. WHITTAKER.
Mr. HORTON.
Mr. DUNCAN.
Mr. MCEWEN.
Mr. GRADISON.
Mr. MARLENEE.
Mr. BARTON of Texas.
Mr. FRENZEL.

(The following Members (at the request of Mr. TORRES) and to include extraneous matter:)

Mr. BONIOR.
Mr. FASCELL.
Mr. MAZZOLI.
Mr. HAMILTON.
Mr. DELLUMS.
Mr. COLEMAN of Texas.
Mr. RANGEL in two instances.
Mr. STALLINGS.
Mr. MATSUI in two instances.
Mrs. SCHROEDER.
Mr. TALLON.
Mr. ACKERMAN in three instances.
Mr. LAFALCE.
Mr. SKELTON.
Mr. MAVROULES.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 65. Joint resolution designating June 12, 1989, as "Anne Frank Day," to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.R. Res. 135. Joint resolution to designate the week beginning May 7, 1989, as "National Correctional Officers Week."

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 68. Joint resolution to designate the month of May 1989, as "Trauma Awareness Month."

ADJOURNMENT

Mr. OWENS of New York. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 11 minutes p.m.) the House adjourned until tomorrow, Thursday, May 11, 1989, at 10 a.m.

OATH OF OFFICE—MEMBERS, RESIDENT COMMISSIONER, AND DELEGATES

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1984 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

> "I, Craig Thomas, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Members, Resident Commissioner, and Delegates of the 101st Congress, pursuant to the provisions of 2 U.S.C. 25:

Hon. CRAIG THOMAS, At-large, Wyoming.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1150. A communication from the President of the United States, transmitting amendments to the requests for appropriations for the Department of Defense—Military for fiscal year 1990, pursuant to 31 U.S.C. 1107 (H. Doc. No. 101-63); to the Committee on Appropriations and ordered to be printed.

1151. A letter from the Director, the Office of Management and Budget, transmitting the cumulative report on rescissions and deferrals of budget authority as of May 1, 1989, pursuant to 2 U.S.C. 685(e) (H. Doc.

No. 101-64); to the Committee on Appropriations and ordered to be printed.

1152. A letter from the Director, Defense Security Assistance Agency, transmitting the Army's proposed letter(s) of offer and acceptance [LOA] to Bahrain for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

1153. A letter from the Chief of Legislative Affairs, Department of the Navy, transmitting notification that the Department intends to offer for lease a naval vessel to the Government of Mexico; pursuant to 10 U.S.C. 7307(b)(2); to the Committee on Armed Services.

1154. A letter from the Secretary of Education, transmitting a copy of final regulations—fund for the improvement and reform of schools and teaching, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1155. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Saudi Arabia for defense articles and services estimated to cost $200 million (Transmittal No. 89-14); pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1156. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed letter(s) of offer and acceptance [LOA] to Bahrain for defense articles and services estimated to cost $93 million (Transmittal No. 89-12), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1157. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Saudi Arabia for defense articles and services estimated to cost $300 million (Transmittal No. 89-15), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1158. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed letter(s) of offer and acceptance [LOA] to Egypt for defense articles and services estimated to cost $51 million (Transmittal No. 89-16), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1159. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to the Coordination Council for North American Affairs for defense articles and services estimated to cost $44 million (Transmittal No. 89-13), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1160. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed letter(s) of offer and acceptance [LOA] to Pakistan for defense articles and services estimated to cost $14 million or more (Transmittal No. 89-17), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

1161. A communication from the President of the United States, transmitting a report on development since the last report of November 9, 1988, concerning the national emergency with respect to Nicaragua, pursuant to 50 U.S.C. 1641(c) and 1703(c) (H. Doc. No. 101-62); to the Committee on Foreign Affairs and ordered to be printed.

1162. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend section 18 of the Export Administration Act of 1979, as amended, to authorize appropriations for fiscal year 1990, pursuant to 31 U.S.C. 1110; to the Committee on Foreign Affairs.

1163. A letter from the Comptroller General, transmitting a report, "Actions Needed to Correct ADP Internal Control Weaknesses" (GAO/IMTEC-89-11); pursuant to 31 U.S.C. 3512(c)(3); to the Committee on Government Operations.

1164. A letter from the Secretary of Interior, transmitting a copy of the onshore oil and gas leasing report, fiscal year 1988, pursuant to 30 U.S.C. 226 nt.; to the Committee on Interior and Insular Affairs.

1165. A letter from the President, Legal Services Corporation, transmitting copies of the Corporation's fact book for 1987-1988, pursuant to 42 U.S.C. 2996g(c); to the Committee on the Judiciary.

1166. A letter from the Chief Judge, U.S. Claims Court, transmitting a certified copy each of the report of the hearing officer and the report of the review panel (Re: "La Paz Enterprises, Ltd") pursuant to 28 U.S.C. 2509; to the Committee on the Judiciary.

1167. A letter from the Deputy Assistant Secretary of Defense (Environment), transmitting a report on the Department's environmental restoration program for fiscal year 1988, pursuant to 10 U.S.C. chapter 160, section 2706; jointly, to the Committees on Armed Services and Energy and Commerce.

1168. A letter from the Secretary of Transportation, transmitting the 10th annual report on administration of the offshore oil pollution compensation fund, pursuant to 43 U.S.C. 1824; jointly, to the Committees on Interior and Insular Affairs and Merchant Marine and Fisheries.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AKAKA:

H.R. 2299. A bill to amend the Energy Policy and Conservation Act with respect to the strategic petroleum reserve; to the Committee on Energy and Commerce.

By Mr. DORNAN of California:

H.R. 2300. A bill to amend title 10, United States Code, to establish a more equitable method by which courts may treat the retired or retainer pay of a member of the Armed Forces as joint property for purposes of ordering the payment of a portion of that pay to spouse or former spouse of the member; to the Committee on Armed Services.

By Mr. FAUNTROY:

H.R. 2301. A bill to designate the Anthony Bowen Landmark Building—formerly the Anthony Bowen Y.M.C.A.—in Washington, the District of Columbia as a national historic site, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. GEKAS:

H.R. 2302. A bill to amend titles XVIII and XIX of the Social Security Act to repeal the requirement of nursing facilities to provide for training of nurse aides; jointly, to the Committees on Ways and Means and Energy and Commerce.

H.R. 2303. A bill to amend titles XVIII and XIX of the Social Security Act to waive the nurse aide training requirement for nurse aides employed before July 1, 1989; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. HORTON:

H.R. 2304. A bill to amend the Immigration and Nationality Act to permit aliens who have served in the Armed Forces for at least 4 years after enlistment abroad to enter the United States for permanent residence as special immigrants; to the Committee on the Judiciary.

By Mr. MARTIN of New York:

H.R. 2305. A bill to require the Commissioner of Customs to provide certain facilities and equipment at the port of entry at Trout River, NY; to the Committee on Ways and Means.

By Mr. OWENS of Utah (for himself, Mr. BILIRAKIS, and Mr. WEISS):

H.R. 2306. A bill to provide that former Presidents shall be nonvoting members-at-large of the House of Representatives; to the Committee on the Judiciary.

By Mr. PEASE (for himself, Mr. ARMEY, Mr. VENTO, Mr. ATKINS, Mr. MORRISON of Connecticut, Mr. BUSTAMANTE, Mr. FAUNTROY, and Mr. LIPINSKI):

H.R. 2307. A bill to condition the granting of nondiscriminatory treatment—most-favored-nation-treatment—and other commercial benefits to nonmarket economy countries on the satisfactory implementation by those countries of internationally recognized worker rights, to provide special tariff treatment for products of cooperative enterprise in certain nonmarket economy countries, and for other purposes; jointly, to the Committees on Ways and Means and Foreign Affairs.

By Ms. PELOSI (for herself, Mr. STARK, and Mr. WAXMAN):

H.R. 2308. A bill to amend title I of the Employee Retirement Income Security Act of 1974 to require that continuation of certain health insurance coverage for 29 months be offered to those with a disability at the time of termination of employment; to the Committee on Education and Labor.

H.R. 2309. A bill to amend title XXII of the Public Health Service Act to require that continuation of certain health insurance coverage for 29 months be offered to those with a disability at the time of termination of employment; to the Committee on Energy and Commerce.

H.R. 2310. A bill to amend the Internal Revenue Code of 1986 to require that continuation of certain health insurance coverage for 29 months be offered to those with a disability at the time of termination of employment; to the Committee on Ways and Means.

By Mrs. SCHROEDER (for herself and Mr. MARTIN of New York) (both by request):

H.R. 2311. A bill to authorize certain construction at military installations for fiscal years 1990 and 1991, and for other purposes; to the Committee on Armed Services.

By Mr. SMITH of New Jersey (for himself, Mr. HALL of Ohio, and Mr. WOLF):

H.R. 2312. A bill to amend the Foreign Assistance Act of 1961 to authorize appropriations of $300,000,000 for each of the fiscal years 1990 and 1991 for development assistance for health and child survival activities; to the Committee on Foreign Affairs.

By Mr. SOLARZ (for himself, Mr. LEACH of Iowa, Mr. FALEOMAVAEGA, Mr. CLARKE, Mr. BLAZ, and Mr. LAGOMARSINO):

H.R. 2313. A bill to express the sense of the Congress with respect to the assassina-

tion of Colonel James Rowe in the Philippines, and to authorize the transfer to the Republic of the Philippines of two excess naval vessels; to the Committees on Foreign Affairs.

By Mr. SUNDQUIST:

H.R. 2314. A bill to provide that for taxable years beginning before 1980 the Federal income tax deductibility of flight training expenses shall be determined without regard to whether such expenses were reimbursed through certain veterans educational assistance allowances; to the Committee on Ways and Means.

By Mr. WHITTAKER:

H.R. 2315. A bill to preserve rural rail service through improved procedures for abandonment and line sale proceedings before the Interstate Commerce Commission; to the Committee on Energy and Commerce.

By Mr. WYDEN (for himself and Mr. DEFAZIO):

H.R. 2316. A bill to amend the Internal Revenue Code of 1986 to provide for the early termination of the temporary increase in the Federal unemployment tax; to the Committee on Ways and Means.

By Mr. YOUNG of Alaska:

H.R. 2317. A bill to amend the Arctic Research and Policy Act of 1984 to improve and clarify its provisions; to the Committee on Science, Space, and Technology.

By Mr. MARTIN of New York (for himself, Mr. BONIOR, Mr. ARMEY, Mr. BATES, Mr. BERMAN, Mr. BLILEY, Mr. BOEHLERT, Mr. BROOMFIELD, Mr. BUNNING, Mr. BUSTAMANTE, Mr. COMBEST, Mr. CRAIG, Mr. FAZIO, Mr. FISH, Mr. FRANK, Mr. GILMAN, Mr. HORTON, Mr. HYDE, Mr. INHOFE, Mr. LOWERY of California, Mr. MCCLOSKEY, Mr. MCEWEN, Mr. MCGRATH, Mr. MADIGAN, Mr. MOLINARI, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. ORTIZ, Mr. OXLEY, Mr. PASHAYAN, Mr. PORTER, Mr. QUILLEN, Mr. ROBERTS, Mr. ROGERS, Mr. SABO, Mr. SHAW, Mr. SKEEN, Mr. SOLOMON, Mr. SPENCE, Mr. STUMP, Mr. TALLON, Mr. WILSON, Mr. DORNAN of California, Mr. DICKS, Mr. SMITH of Texas, Mr. BLAZ, Mr. BUECHNER, Mr. BURTON of Indiana, Mr. CALLAHAN, Mr. COLEMAN of Texas, Mr. DAVIS, Mr. DELAY, Mr. DEWINE, Mr. DREIER of California, Mr. EMERSON, Mr. GALLO, Mr. GIBBONS, Mr. GINGRICH, Mr. HASTERT, Mr. HUNTER, Mr. IRELAND, Mr. LAGOMARSINO, Mr. LENT, Mr. LEWIS of California, Mr. LIVINGSTON, Mr. MANTON, Mr. MICHEL, Mr. MILLER of Ohio, Mr. MINETA, Mr. MORRISON of Washington, Mr. PAXON, Mr. ROWLAND of Connecticut, Mr. SAXTON, Mr. SENSENBRENNER, Mr. SHUSTER, Mr. ROBERT F. SMITH, Mr. STANGELAND, Mr. SWIFT, Mr. UPTON, Mr. VANDER JAGT, Mrs. VUCANOVICH, Mr. WEBER, Mr. WOLF, Mr. YOUNG of Florida, Mr. YOUNG of Alaska, Mr. FIELDS, Mr. COELHO, Mr. HEFLEY, Mr. HERGER, Mr. HUTTO, Mr. KASICH, Mr. MCDADE, Mrs. MARTIN of Illinois, Mr. MURPHY, Mr. PACKARD, Mr. PARRIS, Mr. RITTER, Mr. ROBINSON, Mr. SCHAEFER, Mr. SHUMWAY, Mr. SKELTON, Mrs. SMITH of Nebraska, Mr. SOLARZ, Mr. WYLIE, Mr. SMITH of New Hampshire, Mrs. SAIKI, Mr. RICHARDSON, Mr. RIDGE, Mr. NEAL of North Carolina, Mr. MURTHA, Mr. SHAYS, Mr. RHODES, Mr. SCHUETTE, Mr. THOMAS of California, Mr. KYL, Mr. LEWIS of Florida, Mr. BEILENSON, Mr. MCMILLAN of North Carolina, and Mr. FASCELL):

H.J. Res. 264. Joint resolution proposing an amendment to the Constitution of the United States repealing the 22d article of amendment thereto; to the Committee on the Judiciary.

By Mr. TAUZIN (for himself, Mr. JONES of North Carolina, Mr. DAVIS, Mr. WATKINS, Mr. SMITH of Florida, Mr. HEFNER, Mr. TRAXLER, Mr. LEHMAN of Florida, Mr. DYMALLY, Mr. FUSTER, Mr. FASCELL, Mr. CALLAHAN, Mr. COBLE, Mr. CONTE, Mr. HORTON, Mr. GRANT, Mr. MANTON, Mr. DE LUGO, Mr. KOLTER, Mr. FOGLIETTA, Mr. TALLON, Mr. HUGHES, Mr. STUDDS, Mr. AKAKA, Mrs. UNSOELD, Mr. DORNAN of California, Mr. CLEMENT, Mr. FAZIO, Mr. HUTTO, Mr. LIPINSKI, Mr. BORSKI, Mr. BOSCO, Mr. BRENNAN, Mr. HOCHBRUECKNER, Mr. LAUGHLIN, Mr. LAGOMARSINO, Mr. LENT, Mr. BATEMAN, Mr. SHUMWAY, Mr. WELDON, Mr. MILLER of Washington, Mr. YOUNG of Alaska, Mr. QUILLEN, Mrs. SAIKI, Mr. ENGLISH, Mrs. COLLINS, Mr. SOLARZ, Mr. THOMAS of Georgia, Mr. PICKETT, Mr. SAXTON, Mr. BAKER, Mr. HATCHER, Mr. GOSS, Mr. LANCASTER, Mrs. LOWEY of New York, Mr. HUBBARD, Mr. PALLONE, Mr. LEWIS of Georgia, Mr. AUCOIN, Mr. WILSON, Mr. ORTIZ, Mrs. BENTLEY, Mr. INHOFE, Mr. DYSON, Mr. CARPER, Mr. FIELDS, Mr. WYDEN, Mr. TOWNS, Mr. HERGER, and Mr. SISISKY):

H.J. Res. 265. Joint resolution designating the period of August 4, 1989 through August 4, 1990 in commemoration of the bicentennial of the U.S. Coast Guard; to the Committee on Post Office and Civil Service.

By Mrs. VUCANOVICH (for herself and Mr. BILBRAY);

H.J. Res. 266. Joint resolution to require the display of the POW/MIA flag at Federal buildings; to the Committee on Government Operations.

By Mr. DURBIN (for himself, Mr. LEACH of Iowa, Mr. SYNAR, Mrs. UNSOELD, and Mr. WALSH):

H. Con. Res. 115. Concurrent resolution expressing the sense of the Congress regarding the blockade of Nepal by India; to the Committee on Foreign Affairs.

By Mr. OWENS of Utah (for himself, Mr. NIELSON of Utah, and Mr. HANSEN):

H. Con. Res. 116. Concurrent resolution expressing the sense of Congress regarding the problem of geographical variations under the current Medicare physician reimbursement system; jointly to the Committee on Ways and Means and Energy and Commerce.

By Mr. SKELTON:

H. Con. Res. 117. Concurrent resolution to commemorate the volunteers of the United States and the Hugh O'Brian Youth Foundation; to the Committee on Post Office and Civil Service.

By Mr. SOLOMON:

H. Con. Res. 118. Concurrent resolution expressing the sense of the Congress that the Panama Canal treaties be abrogated, and other matters; jointly, to the Committees on Foreign Affairs and Merchant Marine and Fisheries.

By Mr. BROOKS:

H. Res. 150. Resolution appointing managers for the trial of the impeachment of Walter L. Nixon, Jr., a judge of the U.S. District Court for the Southern District of Mississippi; considered and agreed to.

H. Res. 151. Resolution providing certain authorities to the managers on the part of the House in the matter of the impeachment of Walter L. Nixon, Jr., a judge of the U.S. District Court for the Southern District of Mississippi; considered and agreed to.

H. Res. 152. Resolution providing that a message be sent to the Senate informing the Senate of the impeachment of Walter L. Nixon, Jr., a judge of the U.S. District Court for the Southern District of Mississippi; considered and agreed to.

H. Res. 153. Resolution authorizing the payment of certain expenses from amounts available to the Committee on the Judicary under any applicable expense resolution for the 101st Congress; considered and agreed to.

H. Res. 154. Resolution releasing certain papers, documents, and records of proceedings relating to the matter of certain complaints against U.S. District Judge Alcee L. Hastings; considered and agreed to.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

80. By the SPEAKER: Memorial of the Legislature of the State of Kansas, relative to apartheid in South Africa; to the Committee on Foreign Affairs.

81. Also, memorial of the Legislature of the State of Minnesota, relative to transportation of coal; to the Committee on Public Works and Transportation.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

EXTENSIONS OF REMARKS

BLACKS IN THE FOREIGN SERVICE: AN HISTORICAL PERSPECTIVE

HON. CHARLES B. RANGEL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. RANGEL. Mr. Speaker, I want to share with you and the Members of the House an excellent review of blacks in the Foreign Service by Ambassador Terence A. Todman. Mr. Todman's remarks were made at an open forum during the celebration of "Black History Month." His account provides a brief but concise history of the contributions of black Americans to our Nation's Foreign Service. He concentrates on those diplomats who worked at the senior levels and had the highest visibility. I commend this speech for your perusal:

REMARKS BY AMBASSADOR TERENCE A. TODMAN ON BLACKS IN THE FOREIGN SERVICE: AN HISTORICAL PERSPECTIVE

In keeping with the objectives of Black History Month, I would like to give you a brief account of some of the Black American men and women who, through their work in the U.S. Foreign Service over the years, have contributed immeasurably to the accomplishment of American aims and the greatness of our country. All Americans particularly those of us engaged in foreign policy, should know of this group so that we can better appreciate how much our country has to gain when it draws more fully on the rich diversity of our people. The overall thrust of my remarks apply to other minorities and women as well but for this particular occasion, details about them will not be included.

Black Americans have been engaged at one time or another in all aspects and at all levels of work critical to our government's operation. Mostly they have as secretaries, clerks and support staff but in many cases as officers depending on what the system permitted. Quite a story could be told about how much each has contributed, whether in Civil Service or Foreign Service, to the functioning of our organization. But that would take more time than we have now. Therefore my remarks will focus on some of those diplomats who, working at the senior levels, have had the highest visibility and the best opportunities to influence American policy to a particular country or area at a given time.

Due to the particular circumstances in this country, there was little or no participation by Blacks in the American foreign policy machinery before the end of the civil war. However, following emancipation the situation changed. Blacks who had helped to get President Ulysses S. Grant elected exacted the right to have some influence on foreign policy. Frederick Douglass, the noted abolitionist, fought successfully for U.S. recognition of Haiti and to get President Grant to appoint Ebenezer Don Carlos Bassett, a Yale graduate and principal of the Colored High School of Philadelphia, to be the first Minister Resident and Consul General to Haiti in 1869. Bassett thus became the first Black truly in the United States Foreign Service. He was followed in that post by numerous distinguished American Blacks, including Frederick Douglass himself.

In response to further lobbying, President Grant appointed another Black, James Milton Turner, a Missouri educator and politician, as Minister Resident and Consul General to Liberia in 1871. Turner thus became the first black American to hold that position, starting a succession of appointments of Blacks to Liberia and Haiti.

Once the first steps had been taken successfully, other Blacks were appointed as Consuls and served throughout the world. For example, between the 1880s and the early 1900s, John E. W. Thompson served in charge of our mission in Santo Domingo; Richard T. Greener was Consul and Commercial Agent in Bombay and Vladivostok; William Henry Hunt served in Madagascar, France, Guadeloupe, the Azores, and Liberia; James Weldon Johnson the noted poet, teacher, lyricist and composer, served as Consul in Venezuela, Nicaragua, and the Azores. In 1908 there were 11 blacks serving, often in difficult places and successfully handling important issues on behalf of the U.S. Government. More were added until the 1920s. However, the number of Blacks in the Service declined dramatically after passage of the 1924 Rogers Act, which merged the consular and diplomatic services and required passing a special written examination to enter the Foreign Service, regardless of merit or abilities. Since the quality of Blacks certainly could not have changed to that degree, there must have been something wrong with the examination or the entrance process.

An important milestone was reached in 1925 when Clifton R. Wharton, a lawyer from Baltimore, became the first Black to pass the foreign sevice examination and enter the career directly as a Forreign Service Officer. Wharton served at various posts in Africa, the Canary Island, and Portugal before being appointed in 1958 as Minister to Romania. He thus became the first Black to head a mission at this level outside of Africa or Haiti. In 1961, President Kennedy appointed Wharton as Ambassador to Norway making him the first Black American to be an Ambassador to a non-black country.

Following the trail blazed by Wharton there were such persons as William C. George who served in Las Palmas, Copenhagen and Montreal; Benjamin C. Good who served in Kabul, New Delhi, Santiago, and Jakarta; Rupert Lloyd, who served in Paris, Budapest, Karachi and Lyon; and James Parker, who served, among other places, in Barcelona and La Paz. Prominent professionals in the state Department in those years were Clinton E. Knox who served as Chief of Research for Northern and Western Europe, later as First Secretary at USNATO in Paris, Deputy to the Ambassador in Honduras, Ambassador to Dahomey and Ambassador to Haiti. There was also Dr. Ralph J. Bunche who was Director of the Division of Trusteeship Affairs before going to the United Nations in 1947, to begin the outstanding work which won him a Nobel Prize. I joined the group in 1952 with an assignment on the India-Ceylon-Nepal desk followed by service in UN Affairs, then to India and later specialization as an Arabist and assignment to Tunisia before getting caught in the sub-Saharan Africa circuit for a while.

History was made in 1949 when President Truman raised the legation in Monrovia, Liberia to the rank of Embassy and appointed Edward R. Dudley, a New York lawyer and politician, as Ambassador. This was the first time that diplomatic relations were established at the embassy level with an African country and the first time a Black American was appointed as Ambassador. Since then six Blacks have served as ambassador to Liberia.

Other turning points came in 1958 when the position of the Assistant Secretary of State for African Affairs was created and, one year later, when John H. Murrow, a professor of Romance languages, was appointed as Ambassador to Guinea. This made Murrow the first Black ambassador to any country outside of Liberia. That appointment accentuated a tendency to send Black Americans primarily to Africa which continues to this day.

In the career service in those days, the picture was not bright. At the beginning of the 1960s there were only 17 blacks out of a total of 3,732 FSOs. That was changed under President Kennedy, with active intervention by Secretary of State Dean Rusk. The EEO Program was established and instructions were given to recruit blacks and other minorities. Blacks were named to the Board of Examiners and to Promotion Boards. In 1963 a Foreign Affairs Scholars Program was started through a Ford Foundation Grant to train black university students for foreign affairs. Of the 154 participants in the program, 17 passed the written foreign service examination, six joined the State Department and one entered USIA.

A 1964 Agreement between the State Department and USIA to include most USIA career officers as part of the foreign service brought the State Department such broad-gauged, experienced professionals as O. Rudolph Aggrey, W. Beverly Carter, John Reinhardt, Horace Dawson and Arthur Lewis, all of whom rendered brilliant service as Ambassadors and at other senior levels. It also brought many other officers who served outstandingly in non-ambassadorial positions. Several senior black AID officials also served with distinction as ambassadors including Samuel C. Adams, Charles J. Nelson, Charles A. James, and Robert W. Kitchen among others. Infusions like those from USIA and AID were vital since the State Department has consistently failed to recruit, train, and promote anywhere near a reasonable number of Blacks.

Under the Foreign Service Act of 1964, with its provisions for the appointment of FSRs, a program was started to recruit a minimum of 20 minority representatives at the junior level each year. Only a few were recruited in the first years and many of

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

those lasted only a short while. To compensate for this, another program was started in 1969 to recruit FSRs at the mid-career levels. However, the results so far have been minimal largely due to insufficient effort by those responsible for recruiting and to resistance within the Department.

As we entered the 1960s there were two serving Black Ambassadors: one in Liberia and the other in Guinea. That was also changed by President Kennedy. He made several appointments including Clifton Wharton to Norway, as mentioned earlier; Mercer Cook, a university professor, as Ambassador to Niger; and Carl T. Rowan, a distinguished journalist, as Ambassador to Finland.

President Lyndon Johnson followed with seven black ambassadorial appointments including Hugh Smythe, a sociologist and anthropologist, to Syria and later to Malta; Patricia Harris, noted lawyer, educator, and later cabinet member, as Ambassador to Luxembourg, making her the first black woman ambassador; Franklin Williams, lawyer and civil rights leader, to Ghana; and Elliot P. Skinner, a distinguished anthropologist, to Upper Volta.

President Richard Nixon continued along similar lines but at a reduced pace with the appointments of Samuel Westerfield to Liberia; Clarence Clyde Ferguson to Uganda; Jerome H. Holland to Sweden; Theodore R. Britton to Barbados and Grenada; David Bolen to Botswana, Lesotho, and Swaziland; and me first to Chad, later to Guinea and then to Costa Rica.

Very few blacks were appointed as Ambassadors by President Gerald R. Ford.

There was a major turn around under President Jimmy Carter, with strong inputs from Secretary of State Cyrus Vance. Three black women were named: Mabel Smythe, widow of former Ambassador Hugh Smythe and herself a distinguished educator, historian, and Africanist, to Cameroon; Ann Holloway, an educator and civil rights leader, to Mali; and Barbara Watson, Administrator of the State Department's Bureau of Security and Consular Affairs, to Malaysia. He appointed Andrew Young as Ambassador to the United Nations, and Donald McHenry as his deputy and later to succeed him as Ambassador. Ulric St. Clair Haynes, Jr., a lawyer with overseas experience in government and business, was appointed Ambassador to Algeria. Wilbert LeMelle, an educator, to Kenya; and Walter C. Carrington, a lawyer and Africanist, to Senegal. President Carter also made several non-African career appointments, including Rudolph Aggrey to Rumania; David Bolen to the German Democratic Republic; Maurice D. Bean to Burma; William B. Jones to Haiti; and Richard Fox Jr., to Trinadad and Tobago. He also appointed me first as Assistant Secretary of State for Latin American Affairs and later as Ambassador to Spain.

President Ronald Reagan's appointments of Blacks from the career service included; Ronald Palmer to Malaysia and then to Mauritius; Howard K. Walker to Togo; George E. Moose to Benin and later to Senegal; Irvin Hicks to The Seychelles; Edward R. Perkins to Liberia and more recently to South Africa; Arthur Lewis of USIA, to Sierra Leone; and me to Denmark. He also appointed Dr. Melvin Evans, former governor of the Virgin Islands and member of Congress, to Trinadad and Tobago, retired Rear Admiral Gerald Thomas to Guyana and later to Kenya; John A. Burroughs to Malawi and later to Uganda; Cynthia Perry, an educator and former Associate Peace Corps Director, to Sierra Leone; and Leonard Spearman, an educator, to Rwanda. Alan L. Keyes, a former FSO, was named Assistant Secretary for International Organizations Affairs.

The focus has been largely on ambassadorial appointments because that is the level at which one has the greatest possibility to influence policy. For example, there is no doubt that Ambassador Andrew Young's approach to issues, his style, actions, and public statements made an important difference in what our country did and how we were perceived worldwide. The outstanding background and keen intellect which Ambassador Ulric Haynes took to Algeria enabled him to play a key role there as an intermediary in the arrangements for the release of the American hostage who were held by Iran, although he has received little or no credit for his actions. It would not be immodest to say that I made some difference at critical moments in U.S. relations with Guinea, Costa Rica, the Caribbean Basin countries, our Latin American policy, Cuba, Spain, and Denmark in my various assignments.

Black ambassadors have served under extremely difficult and demanding situations and acquitted themselves admirably. Some examples are: Clinton E. Knox in Dahomey during uprisings and the overthrow of the government; Hugh Smythe in Syria during the "six-day war" and the surrounding events; Franklin Williams in Ghana with a *coup d' etat* occurring shortly after his arrival; Jerome Holland in Sweden during constant, violent demonstrations against U.S. actions in Vietnam; O. Rudolph Aggrey in Romania and David Bolen in East Germany during times of tension in our relations with those two communist countries. Other black Americans would serve equally well in critical situations and stand ready to do so. Unfortunately, far too few are ever given that opportunity.

At present in the State Department there are only 252 Blacks among the 4,166 Foreign Service Officers and only 17 Blacks among the 714 senior officers. There are just six Black American Ambassadors at posts, all in Africa; six DCM's similarly situated; and five Principal Officers with wide geographic assignments in their cases. In USIA, which has responsibility for telling America's story abroad, there are only six Blacks among the 166 at the executive or senior level and 54 among the 747 total commissioned FSIO's. In AID, which helps other countries along the path to progress, there are 142 Blacks among the 1823 officers in the Foreign Service and only 15 of the 280 at the senior level. The Foreign Commercial Service of the Department of Commerce has one Black among its 19 senior officers and three Blacks among its 181 total. In the Foreign Agricultural Service of the Department of Agriculture there are no Blacks among the 14 senior officers and only four among the 104 total. The record of other U.S. Government agencies with personnel assigned abroad is equally deplorable. Unfortunately, the figures are just as bad for other minorities and almost so for women.

It may well be that the situation described above derives less from hostility and negative attitudes than from neglect, unawareness or a simple lack of concern. Whatever the reason, the consequence is totally out of keeping with the noble ideals of our great country and our position as the leader of the free world. It is particularly unfitting for the State Department and other agencies involved in foreign affairs which should set the best examples. Worst of all, it deprives our country of the contributions which could be made by many who are now almost automatically excluded.

Here at the State Department, apart from the matter of numbers, there are serious problems regarding the perception and roles of Blacks, other minorities and women. Certainly as far as Blacks are concerned, many have the impression that they were not wanted in the first place; that they are not made to feel welcome; that they are not guided or trained in Foreign Service ways and work; that they are not given appropriate assignments; and that they do not have a fair chance for promotion. Whether these views are justified or not, they are part of the reality with which the Foreign Service must deal.

Notwithstanding the sympathetic attitudes of many of the top levels of management, the problem of under-representation can only arise from what must be considered largely as a failure to conduct well-targeted, serious, sustained recruitment of minorities for the career service at any level, combined with serious under utilization of those already in the service. Whatever excuses may have existed for this before, none can be justified now when so many Blacks, although victimized by an uncaring educational system, have shown outstanding ability and accomplishments in the professions, politics, economics, business, agriculture, trade, journalism, research, the military and all other areas of interest for foreign affairs purposes. They have demonstrated complete loyalty, integrity, industry and full commitment to our security and to human rights, equality, political freedom democracy and economic progress which are basic aims of American family policy. They know that American actions in foreign affairs affect their lives and they are ready, willing and able to serve our country in that area, as in others.

The figures mentioned and particularly the sentiments they produce, pose serious challenges to the top leadership, to the central personnel system, to the minorities and to the Department and the Foreign Service as a whole. There are challenges to the leadership of the Department, including at each bureau, not only to set forth sound principles and guidelines but also to establish and utilize a structure and procedure for regular follow-up to ensure that they are implemented. Without this, at best intentions are likely to produce little concrete results. Actions from the top can set the tone and help to create an understanding in the Department and outside that Blacks and other minorities are indeed welcome and appreciated.

There are challenges to those in the central personnel system to make extra efforts and devote additional resources to recruitment to bring more Blacks and other minorities from throughout our country into the Service at all levels. Once people from these groups are brought in, the systems should press all bureaus and all areas to help secure the kind of training and working assignments which will best utilize and develop their abilities without undue focus on ethnic considerations. As better use is made of those already in the Service, the job of recruiting will be greatly facilitated.

There are challenges to Blacks, as well as to other minorities and women to recognize that ours is a tough, competitive demanding Service which places special premiums on

hard work, dedication, initiative, creativity and good personal relations. For a minority, it is not enough to be as good as you are, they expect each member to carry a fair share of the burden and then a little more. At the same time it is comrprised of some of the finest, most considerable people I know. The fact that you are here shows that you have what it takes for exceptional performance. The fundamental interests of the United States, which you are engaged to protect and promote, demand and deserve no less than the very best.

There are challenges to all of us in the State Department and the Foreign Service, especially in the middle and upper ranks, to take time from our preoccupations and our extremely busy schedules and reach out to those who are new to the system. This applies, of course, to all new entrants, but is needed especially for minorities and women. We are called on to avoid the myths and stereotypes which can block real understanding. We must accept that clones of ourselves, if they can be found, are not necessarily the best for meeting the diverse and constantly changing needs of our times. It is up to us to extend a hand which all newcomers are looking for in the hope that it will clasp theirs; that it will point the way and guide them through difficult moments; and that it will give them a pat on the shoulder for a job well done.

There could be no more favorable climate for dealing with our challenge than that which is being created by the new administration. For example, when President George Bush was asked at his first news conference about the meaning of the recent Supreme Court decision on set-asides, he reaffirmed his belief in "affirmative action" and made clear that he "will not read into (the Courts decision, a mandate to stop trying . . . on equal employment and on affirmative action generally." Likewise, in his budget message to Congress the President pledged that he "will work to knock down the barriers left by past discrimination and to build a more tolerant society that will stop such barriers from ever being built again." Those words have been matched by his actions in a number of his senior appointments at the White House and elsewhere.

The direction set by the President's inspiring examples should give us the resolve and courage to meet the challenges ahead. The stakes are high, for as the President said, "while America has its eyes on the future, the world has its eyes on America." That places a special responsibility on us in the foreign policy establishment to put our own house in the condition that reflects the best of what our great country stands for. As we succeed in finding, welcoming and utilizing more of the enormous talent present in the black and other minority communities, we will also be making an important contribution to the achievement of our national objectives.

LEGISLATION TO MAKE FORMER U.S. PRESIDENTS EX-OFFICIO MEMBERS OF THE HOUSE OF REPRESENTATIVES

HON. WAYNE OWENS

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. OWENS of Utah. Mr. Speaker, in order that our country might more effectively utilize the wisdom and unique experiences of our former Chief Executives in determining public issues of the day, I am introducing today a bill to make former U.S. Presidents ex-officio Members of the House of Representatives.

This bill would grant former Presidents all the rights and privileges of the House of Representatives except salary and the power to vote.

Due to the nature of their jobs, American Presidents gain special insights and experience in office. Senator CLAIBORNE PELL in introducing a similar bill stated:

At this time in our Nation's history when we find ourselves exercising the leadership of the free world, adoption of this resolution would be of special value because the wisdom and experience of those who have occupied our Presidency is unique to those few men who had this awesome responsibility.

After a President's term is over, we do not have an adequate mechanism to utilize their unique expertise. Some have gone off to the speakers circuit, while others have returned to the practice of law. Presidents Theodore Roosevelt and Calvin Coolidge, for example, became syndicated newspaper columnists.

I have discussed this proposal with Presidents Nixon, Ford, and Carter, and they have expressed support for it. When a somewhat similar bill was introduced in 1963, it had the support of then former Presidents Hoover and Truman, as well as noted Presidential scholars. In letters to Senator PELL, President Hoover wrote, "I think it would be an invaluable aid to legislation to utilize the services of our younger former Presidents," and President Truman wrote, "I had always hoped that some sort of an approach could be made to the situation set out in your bill."

Since 1789, there have been a number of bills and constitutional amendments in Congress to make former American Presidents ex-officio Members of the Senate. I have consulted a number of well-known constitutional authorities, including Laurence Tribe, Lloyd Cutler, and Philip Kurland, and they have been favorable to the proposal. In addition, they have offered their opinions that a statute is adequate; a constitutional amendment is not necessary since the former Presidents would have no power to vote.

A memorandum from CRS indicated that many other nations provide an official position for former heads of government. For example, in Great Britain, Prime Ministers, upon leaving office, return to the House of Commons or go to the House of Lords. A recent study comparing former Presidents and Prime Ministers notes:

The outgoing President has ordinarily concluded his political career while the typical Prime Minister continues in active involvement in the affairs of state, often for many years. The President does not, and is not expected to, aspire to further public office, while the Prime Minister is highly likely to have a seat in the House of Commons or to accept a peerage.

Since the House of Representatives is the place of the people, as Thomas Jefferson noted, it is only appropriate that we give former Presidents a forum to participate in ongoing consideration of many issues, to consult with us, and to give the country the benefits of their extraordinary experiences.

TRIBUTE TO SUICIDE PREVENTION SERVICES OF SACRAMENTO COUNTY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to the Suicide Prevention Services of Sacramento County and to recognize May 7 through May 13, 1989 as Suicide Prevention Week.

It is shocking to note that suicide is the eighth leading cause of death in the country today and the second among our young people. The Suicide Prevention Services of Sacramento County [SPS] and other trained paraprofessional organizations like them, have proven to be an effective method of intervention for suicidal individuals.

Since 1968, SPS has been serving my community, staffing telephones around the clock, 24 hours a day, 7 days a week, to provide help for those in crisis. In 1988 alone, the SPS averaged 2,000 calls per month. This corps of trained volunteers are an exemplary role model for the value of voluntarism and the success of people helping people.

In addition to its crisis intervention hotline, the SPS provides professional and community education through a speaker's bureau, youth suicide prevention services, counseling for survivors of suicide and a data collection program. it is most laudable to note that the SPS is able to accomplish this variety of important services with only 4 full-time paid staff and a corps of 80-plus volunteers.

Mr. Speaker, I salute the staff and volunteers of the SPS and commend them for their outstanding services to the citizens of the city and county of Sacramento, the State of California, and the Nation. The SPS is a tribute to the spirit of voluntarism and I know my colleagues join me in wishing them a future of continued success.

PAYING TRIBUTE TO IVAN AND RHODA TANTLEFF

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. ACKERMAN. Mr. Speaker, I rise today to honor two outstanding individuals of the

Seventh District in New York, Ivan and Rhoda Tantleff, and their tireless contributions to the Hollis Hills Jewish Center and the entire Hollis Hills community. On Saturday, May 13, 1989, the Hollis Hills Jewish Center will be holding its annual dinner dance, which will mark its 41st anniversary and pay tribute to Ivan and Rhoda Tantleff as the 1989 "Couple of the Year."

Ivan Tantleff has been a lifelong resident of the Hollis Hills community. He has attended the Hollis Hills Jewish Center since he was a child, taught by the Reverend Frank Strassfield. Ivan, along with his two sons, Alan and Edward, all were bar mitzvahs at the Hollis Hills Jewish Center. Ivan was a member of the first graduating class of Martin Van Buren High School in Hollis. He went onto New York University were he graduated in 1962 from the school of commerce, accounts, and finance. He was graduated from Brooklyn Law School in 1965 and followed in his father's footsteps as a practicing attorney.

Ivan is the current vice president of community affairs at the Hollis Hills Jewish Center. He previously served an important role as vice president of legal affairs, were he proved to be invaluable during the renovation of the HHJC. Ivan also has been the chairperson of the annual dinner dance for the past 3 years; therefore it is fitting that he be honored at this years event. He is also a member of the Center's Mens Club, and is active with Mercaz, an organization dedicated to conservative Judaism in Israel.

In the Hollis Hills community Ivan is similarly active. He volunteers as an arbitrator once a month at small claims court in Queens County. He also coaches the law team at Van Buren High School, which in 1986 won the State tournament for the first time in the school's history. He also is a board member of the Jamaica Estates-Holliswood Ambulance Corps.

Rhode Tantleff is also a native New Yorker. She attended Queens College, where she studied to become a paralegal. She has been working with Ivan as an office manager for over 10 years. Along with Ivan, she has been dedicated to serving her community and the Hollis Hills Jewish Center. She is a member of the HHJC Sisterhood and active with the Overseas Recruitment Training Program.

The Tantleffs have two wonderful sons, both of whom are continuing in their parents' commitment of community involvement. Alan is a recent graduate of Cornell University and now works for Prudential Life, and Edward is studying at Brooklyn Law School and will soon carry on the family tradition as a practicing attorney.

Mr. Speaker, it is always a pleasure to pay tribute to such fine citizens. Rhoda and Ivan Tantleff are shining examples for everyone throughout this great Nation to follow. I ask that all of my colleagues in the House of Representatives join me in congratulating Rhoda and Ivan on their past achievements and wishing them the best of luck in their future endeavors.

FATHER ROBERT F. DRINAN TALKS ON HUMAN RIGHTS

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. FASCELL. Mr. Speaker, our former colleague from Massachusetts, Robert F. Drinan, S.J., who is now a professor of law at the Georgetown University Law Center, published an eloquent treatise in last month's edition of America entitled, "International Human Rights and the Bush Administration." Father Drinan, who was a leading spokesman for human rights in the Congress and continues to be an active supporter of this noble cause, makes an excellent case for the need for the Bush administration—indeed, for any administration—to champion human rights as in integral element of our foreign policy.

I heartily concur with his recommendations and I want to take this opportunity to share the article with our colleagues.

The article follows:

INTERNATIONAL HUMAN RIGHTS AND THE BUSH ADMINISTRATION

(By Robert F. Drinan)

A new and dramatic dimension was added to U.S. foreign policy when President Gerald Ford signed a bill that withholds all economic and military aid from those nations that engage in a pattern of gross abuse of internationally recognized human rights. The Carter Administration used and emphasized that law in unprecedented—and possibly some unwise—ways.

The Reagan Administration tried at first to neglect the human-rights component added to U.S. foreign policy by the Congress over the objection of the State Department. But in the mid-1980's, the Reagan Administration came to like the law—at least as applied to Communist nations.

The Bush Administration inherits almost 15 years of theory and practice as to how strong the United States should be in making the observance of internationally recognized human rights a visible and even a dramatic part of the way the United States treats its friends and foes in the family of nations. George Bush has no track record in dealing with this issue, which played little if any role in the Presidential campaign. But international jurists and nongovernmental organizations specializing in human rights have an agenda and a consensus that is specific and solid.

On Dec. 8-10, 1988 academics and the major nongovernmental organizaions involved in human rights conducted a symposium on "The Next Administration and Human Rights" as part of the bicentennial of Georgetown University in Washington, D.C. The 200 conferees arrived at a list of recommendations with little controversy. This list expresses the consensus of the ever more numerous and influential groups of activists and academics working on behalf of those human rights that are now a part of customary international law

A parallel list of recommendations has been prepared by the Lawyers' Committee for Human Rights and a dozen law firms working *pro bono.* This 61-page document, along with the Georgetown statement, has been forwarded to the Bush Administration.

Among the firmest recommendations agreed upon by the human-rights communities here and abroad is the urgent necessity for ratification of the major human-rights treaties by the United States Senate. In 1979 President Jimmy Carter, alone among all Presidents, urged the ratification of four of the major treaties adopted by the United Nations, all of which have now entered into force as a part of international law. The U.S. Senate held extensive hearings on the treaties but did not vote on their ratification. Opposition to the treaties was almost nonexistent. Virtually all religious groups, including the U.S. Catholic Conference, urged adoption of the treaties, as did the American Bar Association and many civil rights groups.

The Reagan Administration never followed up on the initiative of the 1970's in the area of human rights. After years of procrastination the Reagan Administration did, however, cooperate with the Senate in the long-delayed ratification of the genocide treaty.

Specialists in international human rights are prepared to conduct a massive campaign of education on the treaties if the Bush Administration is interested. President Carter sent a package of four complicated treaties to the Senate for ratification accompanied by many reservations and understandings. The preparatory work done by the State Department under President Carter was excellent, but the Senate could have been overwhelmed at the immensity of the four treaties proposed for ratification: the international covenant on civil and political rights; the covenant on economic, social and cultural rights; the American Convention on Human Rights, and the International Convention on the Elimination of All Forms of Racial Discrimination.

There is some feeling that perhaps the Bush Administration could select one treaty for ratification, such as the International Convention on the Elimination of All Forms of Racial Discrimination. If that goes well, the other major human-rights covenants could be proposed.

One of the major reasons for ratification is to prevent further embarrassment to U.S. officials. The United States is the only major nation that has not ratified the principal United Nations treaties on human rights. The Convention on the Elimination of All Forms of Racial Discrimination has now been ratified by 129 nations. The credibility of the United States in denouncing apartheid is seriously weakened by its failure to ratify this treaty, which emerged and became world law precisely because of the existence of apartheid.

There is some apprehension and fear in the Senate and elsewhere that ratification of United Nations treaties might subject U.S. citizens to trial in foreign nations, impose fines on the United States for its conduct in foreign nations and prompt embarrassing complaints around the world concerning the way in which the United States treats its blacks and minorities. There is a deep feeling of xenophobia in the U.S. psyche. That feeling was one of the many reasons why the Reagan Administration withdrew from the jurisdiction of the International Court of Justice after Nicaragua sued the United States in that tribunal for mining the harbors of Managua.

If the Bush Administration refuses to propose the ratification of any of the human-rights covenants, there is little that the Congress or the country can do about it. One of the deeper frustrations of human-rights academics and activists during the Reagan years was the deafness on the part

of the Reagan White House and State Department to any talk about ratifying the treaties.

Human-rights specialists have recommendations for the Bush Administration that are less comprehensive than the adoption of the four major covenants for human rights. On Dec. 10, 1979, the United Nations by a unanimous voice vote adopted the Convention Against Torture and other cruel, inhuman or degrading treatment or punishment. Although the Reagan Administration never committed itself to urge the ratification of this treaty, it did some useful work along those lines. The Treaty Against Torture could be ratified with a minimum of difficulty. Its provisions would have little if any impact on the United States since in the recent past torture has not been an evil in this country. But ratification of the document by the U.S. Senate would proclaim a message to those 40 nations where torture is still a serious problem.

Nongovernmental groups involved in human rights have multiplied in the last decade. Units such as Helsinki Watch, Asia Watch, Americas Watch and others have sensitized the world to the abuses in human rights in those nations to which the United States grants significant benefits. A coalition of these groups helped to defeat President Reagan's first nominee for the position of Assistant Secretary for Human Rights and Humanitarian Affairs, Dr. Ernest Lefever.

That same coalition, now greatly strengthened, is prepared to work for the confirmation of an articulate spokesperson for human rights in the Bush Administration. Ways to strengthen the machinery for human rights in the State Department and other Federal agencies are numerous in the agenda prepared for the White House by human-rights activists and academics. The annual reports on human rights required by Congress must be improved and separated from ideology. The Bureau of Human Rights should be upgraded, its work more publicized and its status made more independent.

Another recommendation on which there is little dissent is the generation-old proposal that there be created a United Nations High Commissioner for Human Rights. This idea, long pending in the United Nations, won the support of the Reagan Administration. The hope is that the United Nations High Commission on Human Rights, like the United Nations High Commissioner on Refugees, could focus world attention on actual or threatened violations of human rights—as in Cambodia, Chile or Zaire.

More important than any new initiatives in the area of human rights is the attitude and tone toward human rights that the Bush Administration will adopt. The Carter Administration spoke openly and often to the world about human rights. Some foreign governments probably resented the criticism, but the dissidents, refuseniks and human-rights activists everywhere agree that the emphasis on human rights by the Carter Administration made a difference. It put the United States almost for the first time on the side of the oppressed and not the oppressors. It helped to restore democracy in Argentina, Brazil and elsewhere. It added a new and welcome dimension to the United States' foreign policy.

That approach was generally lacking in the Reagan Administration. The White House in the 1980's tended to merge ideology with human rights: It protested abuses only when they were carried out by governments aligned with Moscow. Actions by Congress and by human-rights groups, however, often induced the Reagan White House to be more activist toward human rights than it might otherwise have been.

The potential for education and enforcement in the field of human rights in the Bush Administration is almost incalculable. Even if the White House takes little initiative, the energy and thrust of nongovernmental organizations here and abroad may be such that the new Administration will simply be required to go forward. The Congress and the country have become concerned in the last generation that the United States should not be aligned—or even appear to be aligned—with oppressors or dictators of the right or of the left. The U.S. public wants the Federal Government to protect its interests overseas, but it also desires that the United States' ideals be proclaimed and vindicated.

In many ways the advancement of human rights has always been a part of the United States' foreign policy. One could say the containment of Communism—the core of U.S. foreign policy since World War II—is a way of preserving and protecting the human rights of people who are or who may be subjected to totalitarian tyranny. In 1974, Congress institutionalized that policy and decreed in Section 502B of the Foreign Assistance Act that the United States shall not give aid to nations that flout those basic human rights whose protection became in 1976 a part of international law. The Carter Administration and the Reagan Administration differed in their approach to Section 502B. Despite those differences, however, there is a deep consensus in Congress and in the country that the United States should be in the business of defending and enforcing those human rights—and educating people about those rights—that are now, for the first time in the history of the world, under the protection of international or world law.

The new reverence given to human rights in international law was the creation, largely, of the United States. It was President Harry S. Truman who agreed to the United Nations Charter in 1945 in San Francisco and the U.S. Senate that ratified it by an overwhelming vote. The United States seems to have forgotten its commitment to international human rights in the controversy over racial segregation in the 1950's. This country was distracted in the 1960's by the struggles over civil rights and Vietnam. The United States rediscovered its devotion to international human rights in the 1970's. Now for 15 years the United States has sought—enthusiastically but sometimes erratically—to carry out what international law and U.S. aspirations expect of a nation whose very existence has been grounded for 200 years in a dedication to human rights.

What will the United States think and do about human rights in the 1990's? That depends to some extent on the Bush White House. But perhaps more importantly it depends on how Americans believe their country should deal with nations that withhold from their people those fundamental rights that, always inherent in every human being, are now recognized and guaranteed by international law.

The United States more than any other nation gave the leadership that led to the formation of the United Nations and the emergence of more than 20 major treaties on human rights from that organization. In a sense, the United States transmitted the moral and spiritual principles underlying its own institutions to the family of nations. Consequently, the United States has a daunting moral and political responsibility to enhance the transcendence of human rights. With the right leadership, the United States in the 1990's could make the observance of internationally recognized human rights a reality of the human family.

MILLS SET A STANDARD OF PARLIAMENTARY EXCELLENCE

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MAVROULES. Mr. Speaker, Tuesday, May 2, 1989, marked the first time in 24 years that the name of Francis E. Mills did not appear on the ballot for Town Moderator in the town of Danvers, MA, which is located in the Sixth Congressional District that I represent. I have had the privilege of working with Frank Mills through the years. Frank Mills is a longtime administrator at Boston College and a friend to many of us in the Massachusetts delegation. His retirement ends a 23-year political institution in our system of local government and I know the good people of Danvers will miss his service.

Mr. Speaker, I would like to include a recent editorial from the Danvers Herald, which also highlights this distinguished career of public service and dedication.

The editorial follows:

[From the Danvers Herald, Mar. 2, 1989]

MILLS SET A STANDARD OF PARLIAMENTARY EXCELLENCE

Danvers is 237 years old and Frank Mills has wielded the gavel at Town Meeting for the last 23 of those years. The venerable Town Moderator set a standard of parliamentary excellence for all who will follow.

Mills presided over his last Town Meeting Monday night in Michael Armento Auditorium at the high school. Few can remember when Mills was not moderator. His retirement at age 73 is a milestone in local government.

Frank Mills was a political activist before the term became trivialized. He didn't carry signs or march in protest. Mills' activism was rooted in the democratic process.

Mills is a true believer of the unique democracy born in Philadelphia when men named Jefferson, Adams and Franklin sat down to create a document that set a country free and created a fledgling world leader.

Few men respect the laws of nation, state and community as deeply and sincerely as Frank Mills. He is not a lawyer, but he has been a diligent practitioner and staunch defender of the laws that men have made to rule themselves by.

Mills ruled Danvers Town Meeting with a velvet gavel for nearly a quarter century. He conducted Town Meeting as the people's business, which it was intended to be.

An expert in parliamentary procedure, Mills ran a tight ship at Town Meeting. He rarely let the democratic process get out of hand. There were occasions when Mills would have preferred to let his heart rule his gavel, but he almost always resisted the temptation.

Meeting members ruled out of order by Mills did not always agree with his interpre-

tation of Roberts' Rules, but they usually found him to be right. And Mills prided himself in letting everyone participate in Town Meeting, but not to excess. His meetings were swift and tight. He left no room for demagoguery.

It was not apathy that permitted Mills to go unchallenged as moderator for the 22 years following his initial victory. He was knowledgeable, tough, compassionate and—above all—fair. An opponent would have been hard-pressed to make a credible case against Mills, so no one did.

Francis F. Mills was an exemplary public servant. He will be succeeded, but not soon replaced in the hearts and minds of Danversites who know and respect government as our forefathers in Philadelphia believed it should be practiced.

IN SUPPORT OF THE RADIATION VICTIM COMPENSATION BILL

HON. WAYNE OWENS

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. OWENS of Utah. Mr. Speaker, today, together with six of my colleagues from involved Southwestern States, I am introducing the radiation victim compensation bill. This legislation would redress an outstanding national obligation to citizens in our region, who were unjustifiably and involuntarily sacrificed to advance our Nation's position during the cold war.

They are either the heirs of Colorado Plateau uranium miners who were unwittingly exposed to extraordinary levels of radiation in underground uranium mines, where ore for the Government's nuclear developments was mined during the 1950's, or they are the heirs and family members of fallout victims from the Government's nuclear testing in Nevada during this same era.

Both classes of victims have presented their cases to the judiciary system. In both cases court opinions were issued that the deaths and injuries were caused by the radiation exposures, and that Government officials knew of the risks and failed to act. However, because the courts also found that the Federal decisions to disregard these people's lives and safety were premeditated, Federal sovereign immunity laws were applied to bar their claims. Indeed it is because their deaths and injuries were deemed intended, or, in other words, a policy decision of the United States, that they have gone uncompensated.

They are the victims of the cold war who, unlike other war victims, could have chosen to live or work elsewhere had they been informed.

Both the Ninth and Tenth Circuit Courts of Appeals struggled in these cases with the unjust result imposed by applicable Federal sovereign immunity laws. The ninth circuit stated:

We agree with the district court that this is the type of case that cries out for redress, but the courts are not able to give it; Congress is the appropriate source in this instance.

This legislation would respond to these judicial recommendations with a national apology and modest, but long overdue compassionate payments, similar to those provided for victims of the Texas City disaster and Japanese-Americans who were unjustly interned during World War II. I invite you, Mr. Speaker, and my colleagues in the House of Representatives to join in resolving this outstanding national obligation.

H.R. —

A bill to provide jurisdiction and procedures for claims for compassionate payments for injuries due to exposure to radiation from nuclear testing

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Radiation Exposure Compensation Act".

FINDINGS

SEC. 2. As a result of testimony received before various committees of the Senate and the House of Representatives, the Congress finds that—

(1) fallout emitted during the Government's above-ground nuclear tests in Nevada exposed civilians who lived in the downwind affected area in Nevada, Utah, and Arizona to radiation that generated an excess of cancers among these civilians;

(2) the health of the civilians who were unwitting participants in these tests was put at risk to serve national security interests of the United States;

(3) radiation released in underground uranium mines that were providing uranium for the sole use and benefit of the nuclear weapons program of the United States Government exposed miners to massive doses of radiation that produced an epidemic of lung cancer and respiratory diseases among these miners;

(4) the United States should recognize and assume equitable and compassionate responsibility for the damages sustained by these civilians and provides herewith a procedure to make partial restitution to these individuals for the burdens they have borne for the nation as a whole; and

(5) Congress recognizes that the lives and health of uranium miners and of innocent citizens who lived downwind from the Nevada tests were sacrificed to serve the national security interests of the United States, and Congress apologizes to these citizens and their families on behalf of the Nation.

TRUST FUND

SEC. 3. (a) There shall be established in the Treasury of the United States, a trust fund known as the "Atmospheric Nuclear Testing Compensation Trust Fund" (hereafter in this Act referred to as the "Trust Fund" or the "Fund"), which shall be administered by the Secretary of the Treasury, and shall consist of—

(1) the sum of $100,000,000, appropriated to the Fund under subsection (e), and

(2) any amount credited to such Fund under any other provision of law.

(b) Amounts in the Fund shall be invested in accordance with section 9702 of title 31, United States Code and any interest on, and proceeds from any such investment shall be credited to and become a part of such Fund.

(c) Amounts in the Fund shall be available only for disbursement by the Board under section 6.

(d) The Fund shall terminate not later than the earlier of the date on which an amount has been expended from the Fund which is equal to the amount authorized to be appropriated to the Fund by subsection (e), and any income earned on such amount, or 15 years after the date of the enactment of this Act. If all of the amounts in the Fund have not been expended by the end of that 15-year period, investments of amounts in the Fund shall be liquidated and receipts thereof deposited in the Fund and all funds remaining in the Fund shall be deposited in the miscellaneous receipts account in the Treasury.

(e) There are authorized to be appropriated to the Fund $100,000,000. Any amounts appropriated pursuant to this section are authorized to remain available until expended.

BOARD OF DIRECTORS OF THE FUND

SEC. 4. (a) There is established the Atmospheric Nuclear Testing Compensation Trust Fund Board of Directors (hereafter in this Act referred to as the "Board"), which shall be responsible for making disbursements from the Fund in the manner provided in this section.

(b) The Board shall have exclusive jurisdiction to hear claims and make decisions concerning compassionate payments to be paid out of the Fund to claimants who present claims as provided pursuant to the provisions of this Act. Such claims shall be made against the United States for the personal injury or death of an individual, if such injury or death is due to exposure to radiation resulting from an above-ground nuclear test at the Nevada test site during the periods described in section 7 or as a result of employment as a uranium miner as described in section 8.

(c) The Board shall be composed of 7 members appointed by the President, 5 of whom shall be appointed upon the recommendations of several States as follows:

(1) one member shall be appointed upon the recommendation of the Governor of the State of Utah;

(2) one member shall be appointed upon the recommendation of the Governor of the State of Nevada;

(3) one member shall be appointed upon the recommendation of the Governor of the State of Arizona;

(4) one member shall be appointed upon the recommendation of the Governor of the State of Colorado; and

(5) one member shall be appointed upon the recommendation of the Governor of the State of New Mexico.

(d)(1) All recommendations to be made by the various States as specified in subsection (c) shall be made within 60 days after the date of enactment of this Act.

(2) All appointments to be made pursuant to this Act shall be made by the President within 90 days after the date of enactment of this Act.

(e) All members of the Board shall be appointed for terms of 3 years and may be reappointed.

(f) The first meeting of the Board shall be called by the President and shall be held within 120 days after the date of enactment of this Act.

(g) At the first meeting of the Board the Board shall select a chairman from among its members. The Chairman shall serve as such for his term and may be reselected as chairman if he is reappointed to the Board by the President.

(h) Four members of the Board shall constitute a quorum for voting purposes but a lesser number many conduct meetings.

(i)(1) A vacancy on the Board resulting from the death or resignation of a member prior to the expiration of the term for which such person was appointed shall be

filled in the same manner as the original appointment. A member appointed to fill such a vacancy shall be appointed only for the remainder of his predecessor's term but may be reappointed.

(2) All decisions to certify claims obligating funds must be made by a majority of the Board.

(j) The principal office of the Board shall be in the State of Utah. Whenever the Board deems that the convenience of the public or of the parties may be promoted, or delay or expense may be minimized, it may hold hearings or conduct other proceedings at any other place it deems necessary of appropriate.

POWERS AND ADMINISTRATIVE PROVISIONS

SEC. 5. (a) The Board is authorized to obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.

(b) The Board is authorized to enter into agreements with the General Services Administration for the procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Board in such amounts as may be agreed upon by the Chairman and the Administrator of General Services.

(c) The Board is authorized to procure supplies, services, and property, and make contracts in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts.

(d) The Board is authorized to enter into contracts with Federal or State agencies, private firms, institutions, and agencies for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

(e) The Board or, on the authorization of the Board, any member thereof, may, for the purpose of carrying out the provisions of this Act, hold such hearings and sit and act at such times and places, and request the attendance and testimony of such witnesses and the production of books, records, memoranda, papers and documents as the Board or such member deems advisable. Subpenas may be issued to any person within the jurisdiction of the United States courts, under the signature of the Chairman, or any duly designated member, and may be served by any person designated by the Chairman or any such member. In case of the failure of any witness to comply with any subpena, or to testify when summoned under authority of this section, the provisions of section 102 through 104, inclusive, of the Revised Statutes (2 U.S.C. 192 et seq.), shall apply to the Board to the same extent as such provisions apply to the Congress.

(f) The Board, or on the authorization of the Board, any member thereof, may, for the purpose of carrying out this Act, have such printing and binding done, enter into contracts and other arrangements to such extent or in such amounts as are provided in appropriation Acts, and make such expenditures as the Board or such member deems advisable.

(g) The Board may acquire directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality, information, suggestions, estimates, and statistics for the purpose of this Act. Each such department, bureau, agency, board, commission, office, establishment or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates and statistics directly to the Board, upon request by the Chairman.

(h) The Chairman of the Board is authorized to appoint, terminate, and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of such personnel as he deems necessary, at rates not to exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of such title.

(i) Upon request of the Board, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Board or to detail any of the personnel of such agency to the Board, on a reimbursable basis, to assist the Board in carrying out its duties under this section, unless the head of such agency determines that urgent overriding reasons will not permit the agency to make such facilities, services, or personnel available to the Board and so notifies the Chairman in writing.

(j) The Board may use the United States mails in the same manner and under the same conditions as departments and agencies of the United States.

(k) Any member of the Board may administer oaths or affirmations to witnesses appearing before the Board or before such member.

(l) The Board may expend funds made available for purposes of this Act for printing and binding notwithstanding any other provision of law.

DUTIES OF THE BOARD

SEC. 6. (a) The Board shall make all decisions regarding awards to be made each year from the Trust Fund established pursuant to this Act and make certifications to request that the Treasury of the United States make disbursements from such Fund.

(b) Every official act of the Board shall be entered of record, and its hearings and records shall be open to the public. The Board is authorized to make such rules as are necessary for the orderly transaction of its proceedings.

(c) The Board shall hear specific claims made against the United States in accordance with the provisions of chapter 5 of title 5, United States Code, pursuant to the provisions of this Act, and the Board shall make specific findings and awards. Any such findings and awards shall be considered final actions subject to judicial review by the United States Claims Court. The court may reverse or modify the determination of the Board if the court finds that such action was clearly erroneous.

(d) The Board shall certify to the Treasury of the United States the awards be paid to claimants.

DETERMINATION OF COMPASSIONATE PAYMENTS FOR CERTAIN CLAIMS RELATING TO OPEN AIR NUCLEAR TESTING

SEC. 7. (a)(1) Any individual who resided in the affected area, as defined in this Act, for a period of at least 1 year during the period beginning on January 21, 1951, and ending on October 31, 1958, or resided in the affected area during the period beginning on June 30, 1962, and ending on July 31, 1962, and contracted a specified disease, as defined in this Act, resulting in personal injury or death, shall receive a damage award in the amount of $50,000, or the heirs of such individual shall receive a damage award in the amount of $50,000 on behalf of the estate of any such deceased individual, by filing a claim against the United States for such personal injury or death. Such claim shall be filed with the Board in accordance with the provisions of this subsection by, or on behalf of individuals described in paragraph (2).

(2) Upon a finding by the Board that such claim meets the requirements of this Act, the United States shall be irrebuttably presumed to be liable for the individual's injury or death, as the case may be, and the Board shall award the amount of compasssionate payment described in paragraph (1).

(b) The Board shall complete its determination of an award on each claim under subsection (a) not later than 12 months after the date such claim is heard by such Board.

(c) For purposes of this section, the term—

(1) "affected area" means: in the State of Utah, the counties of Washington, Iron, Kane, Garfield, Sevier, Beaver, Millard, and Piute; in the State of Nevada, the counties of White Pine, Nye, Lander, and Lincoln; and that part of Arizona that is north of the Grand Canyon and west of the Colorado River; and

(2) "specified disease" means leukemia (other than chronic lymphatic leukemia), multiple myeloma, and cancers of the thyroid, lung, female breast, stomach, colon, esophagus, and urinary tract.

DETERMINATION OF COMPASSIONATE PAYMENTS FOR CLAIMS RELATING TO URANIUM MINING

SEC. 8. (a)(1) Any individual employed in a uranium mine located in Colorado, New Mexico, Arizona, or Utah during the period beginning January 1, 1947, and ending on December 31, 1961 who—

(A) was exposed to 100 or more working level months of radiation if the individual was a nonsmoker, or

(B) was exposed to 250 or more working level months of radiation if the individual was a smoker, and who developed lung cancer or other serious respiratory disease, shall receive a damage award in the amount of $100,000, or the survivors of such individual shall receive a damage award in the amount of $100,000 on behalf of the estate of any such individual, by filing a claim with the Board against the United States for such injury or death. Such claim shall be filed in accordance with the provisions of this subsection.

(2) Upon a finding by the Board that such claim meets the requirements of this Act, the United States shall be irrebuttably presumed to be liable for the individual's injury or death, as the case may be, and the Board shall award the amount of the compassionate payment described in paragraph (1).

(b) The Board shall complete its determination of the compassionate payment under subsection (a) not later than 12 months after the claim is heard by the Board.

CLAIMS NOT ASSIGNABLE OR TRANSFERABLE

SEC. 9. (a) No claim cognizable under this Act shall be assignable or transferable.

(b) Payments made to individual claimants pursuant to the provisions of this Act shall not be subject to any tax under of the Internal Revenue Code of 1986 or any other provision of law.

(c) Payments made pursuant to the provisions of this Act shall be considered to be in full settlement and discharge of all claims against the Government of the United States by the parties to such claim.

TIME FOR FILING CLAIMS

SEC. 10. A claim to which this Act applies shall be barred unless the claim is filed—

(1) within 2 years after the date of the enactment of this Act, or

(2) within 2 years after the date on which the specified disease is discovered, or should have been discovered,

whichever is later.

ATTORNEY FEES

SEC. 11. Any attorney or agent fees awarded shall be paid out of the awards hereunder, and no attorney or agent on account of services rendered in connections with each claim shall receive in excess of 10 per centum of the amount paid, any contract to the contrary notwithstanding. Whoever violates the provisions of this Act shall be fined a sum not to exceed $5,000.

INSURANCE CLAIMS NOT AFFECTED BY AWARDS OF DAMAGES

SEC. 12. An award of damages made in accordance with this Act shall not be considered as any form of compensation or reimbursement for a loss for purposes of imposing liability on any individual receiving such an award, on the basis of such receipt, to repay any insurance carrier; nor shall such an award or a claim to which this Act applies affect any claim against an insurance carrier.

FEDERAL TORT CLAIMS ACT NOT APPLICABLE

SEC. 13. The provisions of chapter 171 of title 28, United States Code, commonly referred to as the Federal Tort Claims Act, shall not be deemed to apply to any action brought pursuant to the provisions of this Act.

LIABILITY OF THE UNITED STATES

SEC. 14. Notwithstanding any other provision of law, respecting the provisions of this Act relating to claims, the United States—

(1) shall be liable in the same manner and to the same extent as a private individual under like circumstances, and

(2) shall not have any immunity or defense regarding a claim based upon an act or omission of an employee in the Government, exercising due care, in the execution of a statute or regulation, or based upon the exercise or performance or the failure to exercise or perform a discretionary function or duty of the Government.

SEVERABILITY

SEC. 15. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of the Act shall not be affected thereby.

CONGRESSIONAL SALUTE TO DARYL I. SALLADAY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to an outstanding individual in my community who deserves to be recognized for his dedication and service to the public. May 1, 1989, marked the end of Daryl I. Salladay's 33 years of service as a Federal employee and it is an honor to share with you and my colleagues the stellar career of this remarkable public servant.

Mr. Salladay has spent the entire span of his career serving his country. After a short stint in military service, Daryl began his civil career working for the Sacramento District Corps of Engineers, serving the people of my home district with dedication and professionalism. Daryl has served in leadership positions for 21 years as a supervisory civil engineer with corps' engineering and planning divisions and has participated in planning for many major projects including the New Melones Dam and Reservoir, Merced County Streams, the Stockton Deep Water Ship Channel in California and the Little Dell Lake project in Utah.

In 1986, the citizens of Sacramento faced the disaster of flooding. However, thanks to the around-the-clock efforts of Daryl and the corps, our community was protected from this near calamity. Due to Daryl's expertise and experience in guiding the American River flood control studies, the groundwork has been laid toward building a consensus on the future of flood control in the Sacramento area. As the assistant chief of the planning division in the Sacramento District Corps of Engineers, Daryl continued to set an example of excellence. In recognition of his many achievements and devotion to the principles of responsible public service, Daryl was honored with the 1988 Meritorious Civilian Award.

Mr. Speaker, I, and all who have had the privilege of knowing Daryl I. Salladay, hold his technical expertise in water resources planning in the highest regard. Daryl I. Salladay is to be commended for his outstanding contribution to the city and county of Sacramento, the State of California and the Federal Government of the United States. I take great pride in saluting Mr. Salladay and know that my colleagues join me in extending best wishes to him in his retirement.

WARNINGS AND CHALLENGES FROM SENATOR BIRCH BAYH

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. ACKERMAN. Mr. Speaker, I rise to lend my strongest support to the ideas of our able colleague, Birch Bayh, the former Senator from Indiana.

When Senator Bayh graced the other body, he was a champion for the Constitution. The thoughts he expresses today declare that his commitment to the never-ending causes in that noble document has not diminished.

Senator Bayh issues us both ominous warnings and vigorous challenges. I share his words with you so you may be stirred, as I was.

[From Newsweek magazine, Apr. 17, 1989]

LET'S TEAR OFF THEIR HOODS

(By Birch Bayh)

When the voters of Metairie elected David Duke to the Louisiana Legislature, they sent a shock wave across the country. Newspapers everywhere carried front-page stories expressing disbelief that the president of the National Association for the Advancement of White People and former imperial wizard of the Ku Klux Klan could actually win an election. It was almost as if the returns from the 81st District of Louisiana had resurrected the Klan, like Lazarus, from the dead. To those who are startled to hear that the KKK is alive and well, one can only ask, Where Have You Been?

Have no doubt about it, the Klan—which lynched helpless black Americans, murdered civil-rights workers, burned its crosses and spread its divisive venom of prejudice across the land—has not disappeared. It continues to hawk its poison to any one who will listen. To make matters worse, the Klan today has been joined by other harbingers of hate such as the Skinheads, the Aryan Nations, Posse Comitatus, The Covenant, the Sword, and the Arm of the Lord. White Aryan Resistance (WAR) and the strident right-wing political cult of Lyndon LaRouche. Although the legal ties which bind these seemingly disparate groups together may be somewhat tenuous, similarities are undeniable. Bigotry and prejudice based on religion, race, ethnicity and sexual orientation as well as transgressions upon basic constitutional rights guaranteed all Americans permeate the spectrum of today's right-wing extremism. And this philosophy of hate is having an impact in community after community across the country.

During the last five years, the National Institute Against Prejudice and Violence, a nonprofit watchdog group, has catalogued these hate-filled acts, provided counsel to communities confronted with such activities and tried to inform a complacent public of the evil which lurks in all too many neighborhoods. A collection of these isolated incidents, when viewed from a national perspective, presents a truly alarming picture:

Ridgedale, Mo.—State trooper slain by a member of The Order extremists.

San Francisco, Calif.—Community Holocaust Memorial desecrated.

Bull Shoals Lake, Ark.—Officials uncover huge military cache at camp of Covenant, Sword, Arm of the Lord.

Reno, Nev.—Black man allegedly shot to death by two adolescent Skinhead supporters.

Beverly, Mass.—Swatikas and Nazi slogans scrawled on Temple B'nai Abraham.

Houston, Texas—"Death to Arabs" spraypainted on Islamic mosque; attempted burning of cars.

Coeur d'Alene, Idaho—White supremacists bomb a federal building, a business and a home.

Similar incidents have occurred in hundreds of other communities across America. Last year the Anti-Defamation League reported a 41 percent increase in acts of anti-Semitic harassment, threats and assaults over 1987. The New York City Police Department recorded 550 incidents motivated by race, religion, ethnic background or sexual orientation in 1988, a 100 percent increase in two eyars.

These senseless acts are not the dying vestiges of discrimination perpetrated by older Americans. Many of the Skinheads are not old enough to vote. Duke himself is still in his 30s—hardly a graybeard. Surveys conducted by the institute disclose that similar acts of prejudice are occurring on the antion's campuses. Over 20 percent of all minority students interviewed reported being harassed on at least one occasion; many reported multiple experiences. Incidents were reported on 174 different campuses. Among them: the dorm room of five Asian women students was broken into and vandalized with the letters KKK painted on their door (Macalester College); the words "Death Nigger" were carved on the office door of a counselor (Purdue University); an anti-

apartheid shanty was doused with gasoline and set on fire while two students sat inside (Johns Hopkins University); arson destroyed a black fraternity house (University of Mississippi).

Some of those incidents are the result of hostile, organized group activity, and some result from the latent bigotry which lies in the souls of all too many human beings. Unfortunately, there has been perilously little leadership at the highest levels of government urging Americans to follow a higher road, to think more noble thoughts. Regardless of the motivating factors involved, the number of these incidents of violence and prejudice continues to increase throughout the country. This is a record of shame.

Perhaps some good can come from the Duke election if we stop treating David Duke as an isolated example, an aberration of our political process. Let us recognize that Duke is one of a large and growing number of Americans who espouse prejudice and bigotry and who, if left uncontested, will divide and destroy our nation. The David Dukes of America do not live only in Louisiana. They exist in every region of our republic.

Let us use the Duke election as a catalyst to stimulate vigilance from each of us. Let each of us vow to stand up and speak out against those purveyors of hate and prejudice. Let us expose these right-wing haters as traitors to the American cause. Let us tear off their hoods, eradicate their brotherhoods and leave them naked in the light of day. Then must Americans insist that they, together with their thoughts and values, be sent to the alley with the rest of the garbage, rather than to the state legislature as heroes.

A TRIBUTE IN MEMORY OF MILDRED E. DOYLE

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. DUNCAN. Mr. Speaker, funeral services were held Tuesday in Knoxville for Mildred E. Doyle. Miss Doyle was the superintendent of Knox County Schools from 1946 to 1976.

Miss Doyle was one of the finest women I ever knew. She loved people, especially her children. She was active in politics and was a leading vote getter in Knox County at a time when few women were elected to high office. Mildred was a staunch Republican and was not afraid to let anyone know where she stood. She also was a great athlete and participated actively in sports for many years.

Mildred Doyle was a close personal friend and political ally of my father and the entire Duncan family. She was a great superintendent and a great lady, and she will be missed by many people.

The Knoxville News-Sentinel on Monday had a lead editorial and a column that I would like to have reprinted in the RECORD:

MILDRED E. DOYLE

An entire generation of adults educated in Knox County can associate their schooling with the name of Mildred E. Doyle.

Her death Saturday morning at age 84 is a personal loss for everyone educated under her tutelage as superintendent of Knox County Schools for 30 years as well as a loss to this community.

One can easily cite the accomplishments—and there were many—during her years in office. She presided over a system that was growing into its modern shape, from 17,000 students in 1946 to more than 27,000 in 1976, from one- and two-room schools to the construction of more than 40 new school buildings during her years in office. She was a driving force to get an alternative school, established in 1980, so suspended or expelled pupils from throughout East Tennessee could continue their education. During her tenure, 750,000 students passed through the county schools.

Doyle became head of the school system with little fanfare long before most women moved toward equality with men in executive positions. She also named other women to administrative positions, many for the first time in Knox County.

Yet, despite the successes, despite her hold on the superintendency and her heavy involvement in Knox County Republican politics, the one feature that stands out for those who walked the halls of the county's schools is an unmistakable style and personality: the red hair, the gravel voice, the frankness, the temper, the laughter, the warmth.

There also was the knowledge down deep that whatever differences one had with her, Mildred Doyle cared sincerely about children and their education. The 10-12 hour work days were routine. If she once admitted to being "a little bit autocratic," she was quick to take the unpopular stand for what she believed was best for the schools, whether it brought her into conflict with students and parents or members of the old Knox County Court.

Perhaps her finest compliment came from the man who defeated her in 1976 for reelection, Earl Hoffmeister, present superintendent of Knox County Schools. "Everyone's goal in education is to leave it better than we found it," Hoffmeister said, "and she certainly has done that."

One can add that education in Knox County is better because of Mildred E. Doyle.

MILDRED DOYLE'S CARING LEFT TOUCH ON THE LIVES OF HER MANY CHILDREN

(By Sam Venable)

According to newspaper accounts of her death, Mildred Doyle had no children.

That proves you shouldn't believe everything you read in newspapers.

Midred Doyle had thousands of children. Hundreds of thousands, actually. During the 30 years she served as superintendent of the Knox County school system, fully three-quarters of a million youngsters came under her care.

And you better believe we were "her" kids in the truest sense of the word.

She was the no-nonsense, quick-tongued mother hen who supervised our education, planned our meals, refereed our games, guarded our safety and guided our overall development from the moment we entered first grade till we exited with a high school diploma 12 years later.

Looking back on her life, which ended Saturday after 84 years, I found it difficult to imagine that virtually no one in today's student body has had contact, direct or otherwise, with this woman. Lord, I must be getting old myself.

But try this quiz on anyone who went through the county system between 1946 and 1976: Ask them to form the image of a signature in their mind. An important signature. A signature they associate with growing up and going to school.

A few—history buffs and insurance agents, I suspect—might recall the bold script of John Hancock on the Declaration of Independence. But the vast majority will remember the flowing "Mildred E. Doyle"—with the "E." and the "Doyle" connected—from the front of a report card, an attendance form, a certificate or any other piece of official school correspondence. It's one of those things you never forget.

Indeed, none of us will forget Miss Doyle.

Oh, and before some high-handed copy editor deletes the "Miss" from her name so my words conform to modern newspaper style, I caution against it. She was "Miss Doyle." Period. Some things are simply not meant to be changed.

In an era when female educators remained quietly in the classroom, Miss Doyle commanded the office of superintendent as none before her or since.

A politician? You better believe it. She was a master of the game, a staunch Republican to the soles of her feet. Mildred Doyle was comfortable and effective in any setting—an emotional public hearing, a heated school board meeting or a smoke-filled chamber behind some locked door at the courthouse.

But this was not politics for politics' sake. It was politics for the children of Knox County, a mission she guarded as nothing less than a sacred trust.

Mildred Doyle was to county schools what Andy Holt was to the University of Tennessee. Both were as plain as faded bib overalls, but their ability to extract dollars for education could make a riverboat gambler slink off in embarrassment.

Not every decision Miss Doyle reached was popular. Still, she rarely minced her words, no matter what the cost.

"The one thing you've got to do is say what's right," she once observed, "and not what the people want to hear."

One pronouncement a lot of children didn't want to hear was her order for Saturday classes. This was a decision she made in February 1960 after schools had been closed so many times because of snow. The only way to get back on schedule was double up on off-days.

Naturally, we kids protested.

Give up our Saturdays? No sleeping late? No cartoons? Aaaargh! The very thought was heresy. From Halls to Karns, Mount Olive to Mooreland Heights, the battle cry of "Mildred Doyle should be boiled in oil!" rang through the halls.

Oddly enough, we survived this cruel blow to our tender psyches. Even more amazing, we grew into adults—one might venture so far as to daresay educated adults—who learned to appreciate what a caring professional had touched our lives.

No children of her own? Baloney. She had us, all 750,000 of us, and we loved her for it.

Mildred Doyle was not boiled in oil. Thank God.

QUESTIONS CONCERNING FINANCIAL AID

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, May 10, 1989, into the CONGRESSIONAL RECORD:

QUESTIONS CONCERNING FINANCIAL AID

Federal student aid, the primary means by which the government helps low- and middle-income students afford higher education, is again under scrutiny. The financial aid program is designed to ensure all students the opportunity to pursue continued education after high school. As a country, we have a responsibility to provide a strong education to our children. Instituted in 1965 as part of the Higher Education Act, financial aid now provides postsecondary assistance to nearly six million students. The program is expensive, last year costing almost $9 billion.

Despite federal assistance, the rising cost of postsecondary education has made it increasingly difficult for many students to afford higher education. Since 1980, costs have risen 40% above inflation, while federal assistance has increased only 3% above inflation. The shift in emphasis from grants to loans has also hurt the students the government wants to help most. Grants awarded to students have stagnated while loans, once used mostly by middle-income people, are now often the only source of aid even for low-income students.

Many poorer students face large debts upon graduation and often cannot repay their loans. The default rate has risen dramatically, with the highest rates among students in schools traditionally serving low-income students, such as community colleges, trade schools, and historically black universities. In 1966, 7% of those receiving loans defaulted. Today, more than 14% default, at a cost to the government of $1.5 billion a year—over 40% of the annual budget for student loans.

An easy solution to these problems would be a dramatic increase in federal funding. Congress, however, has hesitated to increase financial assistance for several reasons. First, federal budget deficits have made it difficult to increase any spending program while others are being cut. Second, waste in student aid programs, both in overpayments and defaults, should be corrected before the program is increased. Finally, not everyone agrees on federal priorities in education, with some arguing that expanded programs for younger students would better benefit our students and our country.

Faced with these difficulties, Congress has attempted to curb waste and excess costs. Since 1985 the IRS has withheld tax refunds of defaulters. New rules have also been instituted to force banks and other lenders to make a greater effort to collect their student loans before collecting on the government guarantees. Although such efforts will help, more changes will be needed to address the long-term financial difficulties of the program.

Several proposals have been offered recently which would overhaul the student assistance program. Perhaps the most prominent, and most controversial, would link national service to student financial aid. Aid would be provided only to students who serve in the military, reserves, or a civilian "national service" corps. For two years of service, students would receive $20,000 for civilian duty and $24,000 for military duty (or $2,000 for every year spent in the reserves). This money would be provided to the students in the form of a voucher which could be used for postsecondary education or a down payment on a first home.

Advocates of this program argue that it would provide a pool of motivated, low-cost workers for the country, while instilling in them a sense of civic responsibility. Critics, however, question the overall costs of such a program—students would receive at least $20,000 as opposed to the average financial assistance today of about $12,000 over four years. The Pentagon also is concerned that such a program would drain off recruits after only two years of service, hindering military preparedness.

Another proposal would exclude from the student assistance program schools which have student loan default rates higher than 20%. Over one-fourth of participating schools have rates at 20% or higher, and the majority of them are for-profit vocational and trade schools. Advocates argue that many such schools are established simply to take advantage of students and the government. Yet caution is needed before changes are made that could prevent lower-income students from pursuing higher education opportunities.

A third proposal is based on social insurance. Students would receive financial assistance and, in return, a small portion of each paycheck a student received after graduation would be automatically placed in a trust to finance future assistance to other needy students. Paycheck deductions would continue until retirement, and the amount taken from each paycheck would be based on the ability to pay. This would allow students greater leeway in determining what career they pursue after graduation, and the program could include debt forgiveness for students who become teachers or work in social benefit efforts. The largest drawback of this proposal is its large start-up cost of several billion dollars.

A final proposal would make financial student assistance a federal-state matching aid program. The state would cover higher education costs beyond federal assistance for needy high school graduates who attended state-run schools. Students in private institutions would receive an equivalent sum. Once again, the main problem is cost. Total state costs each year could exceed $1 billion.

Federal student aid today is complex, costly, and confusing. Congress should work to find a way to decrease the default rate in order to free up funds for student aid. Grants to college students could be increased on the theory that the mix of aid has been allowed to swing too far toward loans in recent years. Debt repayments should be made more manageable, by basing repayment on income and allowing debts to be paid over extended periods. Other alternatives for reforming the student aid program need to be explored, although I am wary of changes such as national service that would significantly alter the structure of this popular program. Student aid is not cheap, but I do not know of a better social investment than that of the education of ambitious young people.

COMMUNITY IS UNDER ATTACK

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. STOKES. Mr. Speaker, I would like to bring to my colleagues' attention the following article entitled, "Community Is Under Attack." The article was published in the Cleveland Call and Post and written by a highly respected minister and a longtime friend, Dr. Otis Moss, pastor of Olivet Institutional Baptist Church.

Dr. Moss is an outstanding minister and Black leader in Cleveland. Dr. Moss has devoted over 20 years of direct involvement in the Civil Rights Movement, as a religious leader and community activist. During his career, he has also been a consultant to Government officials on moral and social issues facing the Nation.

"Community Is Under Attack" focuses on recent incidents involving the black community in Cleveland. The tragic images of which Dr. Moss refers are indicative of other scenarios taking place in every community all across our Nation. Black communities in every city in America are suffering from the ravages of drugs, violence, and poverty.

Mr. Speaker, I strongly urge my colleagues to read Dr. Moss' timely and thought-provoking commentary.

The article follows:

COMMUNITY IS UNDER ATTACK

(By Dr. Otis Moss)

The African American Community is under multiple attack but there is hope.

There are the attacks of historic systematic racism dating from 1619 (first slave ship) to the present. There is the internal attack of African Americans killing African Americans. This viciousness, violent, aggressive and homicidal process within our community is an ever present threat to our survival. The easy access to guns and drugs has released a "killer squad" of young men and women who make the risks of being killed in our own community greater than Vietnam over a decade ago.

There is the attack of multiple external invasions. Examples: 1. Indictments of Black officials and leaders. 2. Indictments of two Black male educators. 3. The focused news article series on one of the foremost business leaders of the Black Community. 4. The Feckner Case with its colossal blunders pain and high costs to the Black community. 5. The volatile politicization of school transportation (busing). 6. The violent racists attacks on the homes and lives of African Americans. 7. Fire bombings, shootings and vandalizing on an increasing basis. 8. The purging of thousands from the voter rolls. 9. The "legal dismantling of Affirmative Actions plans from state to state. 10. The loss of political gains in Chicago. 11. The inability to focus properly on the mayor's race in Cleveland. 12. The vicious attack on Dr. Julian Earls. 13. The 7.2% decline of male enrollment in higher education. 14. The gigantic increase of Black males in the prison population. 15. The subtle and not so subtle calls for the deratification of home rule and the refederalization of Washington, D.C. This is not a com-

prehensive list of the incessant attacks on African Americans.

How can an individual, group, organization or group of organizations respond effectively, forcefully, morally and spiritually to these type of jack hammer blows? How can any individual or group manage or master this kind of reign of multiple terrors without committing countless errors? How can we respond to each specific attack without being shallow, flippant and irresponsible? How can we respond to vitriolic attacks without becoming bitter? How can we respond to ugly violence without becoming ugly like it or worse? This is our profound moral challenge.

First, in the words of a Black leader some three score and ten years ago, "We must close ranks." When Mable Gant was burned, when Feckner sold drugs, when the home of Mr./Mrs. White was vandalized with all types of racist graffiti, when those young men were shot without provocation, no one asked the victims if they were Baptist, A.M.E., Pentecostal, Protestant, Catholic, Muslim, Democrats or Republicans. They were all African Americans, human beings and children of God. We must close ranks for God's sake, for our sake, for our children's sake and for the sake of our community, Black and white. The last three decades of daily struggles, deaths, assassinations, abandonment and disillusionment have left their scars and stress but also their stars, heroes, heroines, strengths and promises. Let us close rank around our strength, our hope, legacy, promises and our future.

Secondly, we face a greater threat of becoming traumatized and morally frozen, with everyone seeking his or her own election returns in an atmosphere of diminishing hope, service, commitment, sacrifice and spirituality. We need a series of meeting focusing on the the need for non-violence, drug-free homes, work places, schools and housing units. In short we need a moment of spiritual regeneration and racial reconciliation.

Thirdly, we must show special concern, support and compassion for those among us under serious and dangerous attack. We do not have such surplus of genius in any age group or race that we can dismiss it with the slight of hand like Adolph Eichmann sending his victims to the gas chambers with the slight movement of his hand. The most vicious form of slavery is the celebration of the wounding of our sisters and brothers. We must practice praying for and with each other. We need a revivial of renewal of values. Former president, Lyndon Johnson, after more than 30 years in Washington, D.C. and the agonies of Vietnam, said he was going back to his home community in Texas where people "know when you are sick and care when you die." If we do not care about each other in our suffering, we are an "endangered species."

In conclusion, I have a colleague in the ministry who played high school basketball. The coach sent him in a game to replace an injured teammate. The ball was passed to him in a fast action maneuver after he was shaken up by two players from the opposite team, he caught the ball and started dribbling rapidly toward the "wrong" goal, the crowd started yelling no! no! but he thought they were saying go! go! and rushed toward the goal and "scored" a shot in the wrong basket, helping his opponents win the game! More than 30 years later he still takes a little "heat" for scoring in the wrong hoop.

We are being hit from so many directions in the African American community that we find ourselves in a blinding state of semi-consciousness, politically and economically scoring points for the opposing team. Every time crack, cocaine, heroin and other drugs are bought and sold in our community we score a point for the "other" team and reduce our own options. Every time we practice political and economic homicide on a brother or sister we score a point for those who are enemies to our own progress.

VALLEY HIGH SCHOOL REPRESENTS NEVADA IN NATIONAL BICENTENNIAL COMPETITION

HON. JAMES H. BILBRAY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. BILBRAY. Mr. Speaker, this week, in our Nation's Capital, over 950 young people from 44 States have gathered to participate in the National Bicentennial Competition on the Constitution and Bill of Rights. I am proud to announce that a team from Valley High School, Las Vegas, in my congressional district is representing Nevada. These young scholars have worked hard to reach the national finals by winning the district and the State competitions and I would like to wish them the best as they compete for the national title.

The members of the Nevada team are: Dustin Ackerman, Brad Allen, Travis Anderson, April Anstett, Chad Antrim, Shonna Clutters, Jane Conn, Daniella Eilat, Robin Evans, Hoberigh Fischer, Garet Griffin, Tylla Gudim, Holly Hyte, Gideon Jolley, Steve Kim, Debbie Mannino, John Michaelson, Niurka Oquendo, Andrea Prather, Elyse Pressler, Marjorie Sarmiento, Keren Speck, David Stein, Robert Vandorick, and Heidi Weber.

Along with the students, their teacher, Ms. Celile Rizzo, deserves much of the credit for the success of the team to date. As well, Ruth Joseph, the district coordinator, and Phyllis Darling, the State coordinator have worked hard to help their team reach the finals.

The National Bicentennial Competition on the Constitution and Bill of Rights is the most extensive educational program in the country developed to educate young people about the Constitution and Bill of Rights. With the support of Congress, the active involvement of Representatives and Senators, and the efforts of thousands of civic and education leaders, the program achievements over the past 2 years have been dramatic: 1,022,320 students have studied the curriculum; 14,381 teachers are teaching the course; 420 congressional districts and the 5 territories have fully functioning programs; 393 U.S. Representatives are participating in their districts; and 92 U.S. Senators are supporting the program in their States.

The program provides students with a specially designed 6-week course of study designated to provide upper elementary, middle, and high school students with a fundamental understanding of the Constitution and Bill of Rights and the principles and values they embody. Students complete the instructional portion of the program with a test designated to measure their constitutional literacy and receive a certificate of achievement signed by their U.S. Representative.

High school participants then enter a nationwide series of competitions at the congressional district, State, and national levels. Students testify before a panel of experts at a simulated congressional hearing designed to measure understanding and capacity to apply principles being learned to historical and contemporary events. Each year, the National Bicentennial Competition culminates in 3 days of intensive competition among classes from almost every State in the Union.

Mr. Speaker, the need to educate our young people about the Constitution and bill of rights is well documented. Studies have found that only slightly more than half of students surveyed were able to identify the original purpose of the Constitution. Nearly one-third thought he could adjourn Congress when he saw fit. Indeed, another survey conducted on behalf of the Hearst Corp. suggested that over half of Americans thought that the Marxist credo "from each according to his ability, to each according to his need" can be found in the Constitution. Most alarming was the finding that a greater proportion of today's students display antidemocratic attitudes than did students in 1952.

The benefits of this educational program are clear and it is making a difference among the over 1 million students who have studied the program. A recent study has shown that the National Bicentennial Competition Program has increased the constitutional literacy of our young citizens. Students in classrooms all over the country are debating the issues that concerned the Founding Fathers and demonstrating how the Constitution's basic principles apply to them today with an extraordinary level of understanding.

The preservation of our freedom and our Nation depends upon our young people, the decisionmakers of tomorrow. We have much to gain from educating them about the Constitution, the Congress, and the continuing responsibilities of citizenship. I am proud to have students from my congressional district in the national finals and I commend each of them and their teacher for their hard work.

TRIBUTE TO NATIONAL DRINKING WATER WEEK, MAY 1-7, 1989

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. RANGEL. Mr. Speaker, I rise to speak on the occasion of National Drinking Water Week. In this age of increased environmental awareness and concern for the safeguarding of our natural resources it is important that we the American public be cognizant of the need to conserve one of our most precious resources, our drinking water. Too often we take something like water for granted. Like the old saying goes "you don't miss your water til your well runs dry," you don't miss your water til there is a water crisis such as a drought or an environmental disaster like the Alaska oil-spill.

Currently the city of New York is experiencing a drought emergency which highlights the need to make people aware of conservation efforts. I want to strongly encourage my fellow New Yorkers to take part in the activities that the city and State have planned for National Drinking Water Week. They should also exercise diligence in efforts to conserve our ever scarce resource, drinking water. By each of us doing our part individually to conserve water usage and by avoiding wasteful water practices, we will be able to ensure an adequate supply of drinking water for all.

PERSONAL EXPLANATION

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. ACKERMAN. Mr. Speaker, I regret that a family commitment prevented me from being present Tuesday evening, May 9, 1989. Had I been present, I would have voted "no" on rollcall 47, the Dannemeyer amendment; and "yes" on rollcall 48, final passage of H.R. 7, the Perkins Act amendments.

THE MEXICAN DEBT NEGOTIATIONS

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. COLEMAN of Texas. Mr. Speaker, the largest commercial banks in this country are the largest private creditors of Mexico. They have also been the slowest to act in negotiating debt reduction packages with that country—our neighbor.

It is not bank-bashing to suggest that these banks have a responsibility to the American taxpayer to negotiate in good faith with the Mexicans. Many if not all of the major creditor banks have already set aside reserves against at least a 25-percent discount on their bad loans. This House should insist on putting bank shareholders ahead of publicly funded contributions to the multilateral banks in looking for a solution to this problem.

Last year, Mexico paid foreign bankers $6.5 billion in interest. Mexico simply cannot bankrupt its economy to raise a similar amount of funds this year. The banks can afford such a write-down, and we should insist on it. I am submitting three articles on recent trends in these negotiations, from the Economist, the New York Times, and the Wall Street Journal, and commend them to your attention.

[From the Economist, Apr. 29, 1989]

OF BANKS, BORROWERS AND BRADY

Commercial banks must be encouraged to take the pain of reducing third-world debt. They can afford it.

When the debtors in Latin America have suffered, their creditors have prospered. The big provisions that many international banks made against their sovereign debts in 1987 have barely touched dividends or careers. But real incomes in the most heavily indebted Latin American countries are now lower than at the start of the decade. Their political fabrics are fragile. The danger is that steps taken towards democracy could all too easily be violently reversed if banks keep thinking that their debt problem will work itself out painlessly.

The banks, anyway, are no longer in a position of command, as they have been in the endless reschedulings since 1982, when Mexico first ran out of money. The new debt field-marshal is the International Monetary Fund. The Fund showed its primacy earlier this month, when it promised Mexico a loan of $3.6 billion. This happened before the country started talks with its bankers, which it did only this week. The IMF's move broke a tradition that it should make its loans conditional on an agreement between the debtor country and its banks. The break suggested that the Fund might lend to countries, such as Mexico and Costa Rica, which have met its targets but still cannot raise money from banks.

The debt-reduction ideas sketched out by the American treasury secretary, Mr. Nicholas Brady, will put more pressure on the banks. He suggested that the IMF and World Bank should lend to indebted countries to help them buy back their bank debts at a discount, and also guarantee interest and principal on long-dated bonds that banks could accept in lieu of such debts. This idea needs tightening up. The guarantees should be available only the envisaged debt swaps will cut deeply into the debtor's interest bill, thus leaving little chance that the guarantees would be called.

There are two reasons for this proviso. One is that the World Bank's AAA credit rating would take a knock if its guarantees were ever used—thus making the financing of new development projects more expensive. The others is that western taxpayers should not have, effectively, to bail out banks by paying the interest on World-Bank-guaranteed bonds that their borrowers are still too cash-strapped to service.

MEXICAN BARGAINING

In 1988 Mexico paid its foreign bankers around $6.5 billion in interest—or an almost unsustainable 30% of its export earnings. The figure must fall by at least $2.5 billion if foreign banks are not to be paid more than 20% of Mexico's export revenue this year. Mexico is now trying to get this relief by way of debt-reduction rather than by raising an extra $2.5 billion of new money.

In most past reschedulings, banks have lent fresh, short-term money in order to get repaid the interest on their existing (often overdue) loans, thus preserving their book value. If Mexico gets its way, this practice will stop. It wants banks to lend it new money for five or six years, rather than for one or two years as in the past. The extra risk involved in lending for so long will deter banks from lending enough to pay themselves all the interest due to them. So they will no longer be able to kid themselves and their accountants that their Mexican loans are worth their face value.

These tough Mexican terms on accepting new money should make the idea of swapping discounted bank loans for World-Bank-guaranteed bonds that much more attractive to the lending banks. However, to reduce Mexico's debt to a sustainable level, they will have to accept discounts of around 40% on their Mexican loans—compared with a discount of almost 60% in the secondary market at present. That will mean income losses both for British and for American banks: the discounts will go beyond the provisions they have already made against these loans. They should take such losses in their stride: with rare exceptions, they are strong enough to do so. The alternative, if Mexico fails to clinch a deal, will be much less interest: for a time, perhaps, none at all.

The Bank of England currently recommends provisions of at least 20% against Mexican loans for British banks. The way the tax system works in the United States means that American banks with provisions against Mexican loans of 35% could accept discounts of around 30% before they lost income, provided they have large offsetting foreign earnings.

If the banks go for debt reduction in a big way in Mexico, they cannot be expected to cover Mexico's (and other countries') external deficits, or even to provide much project finance. The World Bank and, with luck, the equity markets will have to be the main sources of development money. Provided they are seen to be lending to an economically virtuous Mexico, other heavily indebted countries should conclude that they are better off with an official IMF and World Bank debt-reduction scheme than with unilateral default.

TALKS ON MEXICAN DEBT GET OFF TO A SLOW START

(By Jonathan Fuerbringer)

The crucial negotiations between Mexico and its commercial bankers on debt reduction have started slowly, according to participants, because the bankers have objected to the size of Mexico's proposal and are still uncertain about what incentives they will get from the International Monetary Fund and the World Bank.

And the commercial banks have rejected Mexico's request for interim financing until there is agreement on a broad debt package, Treasury Under Secretary-designate David Mulford said yesterday in testimony before the Senate Finance Committee.

The Mexican talks are the first since the United States and its allies endorsed a new third-world debt strategy, proposed by Treasury Secretary Nicholas F. Brady, that emphasizes debt reduction along with new lending. The outcome of these talks, which began in mid-April, will give the first indication of how successful debt reduction can be.

The Administration goal is to reduce the developing nations' bank debt of $350 billion by $70 billion, or 20 percent, over three years.

$4 BILLION PROPOSAL

Participants in the talks say Mexico has asked for a total package of new loans and debt reduction of $4 billion a year over six years.

Under the Mexican proposal, there would be two forms of debt reduction: First, the principal would be reduced through the swap of existing loans for new securities at around 50 percent of the face value. The interest on these securities would be at market levels. Second, the interest would be reduced through a similar swap of loans for securities in which the interest rate would be cut in half.

The Mexicans also want new loans from the banks and would like to have some of the interest they now owe added to their outstanding principal, which reduce annual payments.

"The Mexicans want a lot of money and the banks think they are asking for more

than they need," said one banker involved in the negotiations.

$100 BILLION DEBT

Mexico is negotiating with a bank advisory committee that includes 15 of the more than 300 banks with loans to that country. Mexico's outstanding debt is about $100 billion, of which about 75 percent is owed to banks.

The meetings are being held at the law offices of Shearman & Sterling in New York and are led by William R. Rhodes, a Citibank executive.

"Its a very tedious process," one banker said, referring to the numbing details that must be worked out.

"The conceptions are simple, the execution isn't," another banker said.

John S. Reed, the chairman of Citicorp, which is the lead banking company in the negotiations, convened a special meeting in New York on Tuesday to work on a formal response to Mexico. Although not unusual, his involvement signals the importance of the negotiations. The regular negotiating meetings continued yesterday.

Even reaching an agreement among the commercial bankers will be difficult because of the differing interests involved. Some banks, for example, just want to want to get rid of their Mexican loans. Others are interested in reducing size of the loans outstanding, while still others want to reduce the annual interest payments.

Some bankers think that the pace of the talks so far bodes ill for the Brady plan. But one banker was not as worried about the progress of the talks. "This is the normal kind of procedure of an negotiation," he said.

The important factor in any final package will be the guarantees the I.M.F. and the World Bank offer to help assure the continued payments of principal and interest if the banks accept the debt reduction. These guarantees, in effect, are incentives for debt reduction.

But one problem is that the banks involved in the talks are not clear what these incentives will be.

"Nobody knows," one banker said. "Mexico, the World Bank, the I.M.F.—they can't tell you what you can do."

[From the Wall Street Journal, May 3, 1989]

CRUCIAL TALKS ON LATIN DEBT BOG DOWN, DIMMING OUTLOOK FOR BRADY'S STRATEGY

(By Peter Truell)

WASHINGTON.—Mexico and Venezuela are slipping into a familiar, slow pattern in talks with bank creditors, dimming the outlook for Treasury Secretary Nicholas Brady's Third World debt strategy.

Even the Treasury seems eager to scale back expectations for the strategy, which emphasizes debt- and debt-service reduction over continued lending. Mexico and Venzuela are widely regarded as the two leading candidates for the new approach.

This week, Treasury Undersecretary-designate David Mulford acknowledged in a speech here that debtor countries and commercial banks don't appear close to any agreement regarding debt reduction. "The parties appear rather far apart," he said.

Some bankers are much gloomier. "The [Brady] strategy isn't going anywhere," said a senior officer at a large New York bank who is closely involved in the management of billions of dollars of loans to Latin America. Many such bankers say debt- and debt-service reduction can't easily meet Latin American countries' credit needs, and that new loans will remain the key to dealing with Third World debt problems.

RECONVENING TALKS

Today, Mexican officials are expected to reconvene in New York with the committee of bank creditors with whom Mexico negotiates debt arrangements. The banks will be responding to Mexico's debt-restructuring proposals. The chairmen of several big U.S. banks were set to meet late yesterday in New York to discuss the Mexican talks.

The banks say that Mexico is asking for too much in seeking about $4 billion—either in loans or reduced interest payments through debt reduction—for this year.

Last week, senior U.S. bankers involved in the Mexican negotiations visited the Treasury to make their case, bankers said. The bankers also don't like Mexico's request for an advance before the negotiations are completed. A Treasury spokesman wouldn't comment on the meeting.

Several big banks have aproached the Mexicans privately, outside the creditors' committee, to seek their own deals with the country, according to sources on both sides of the negotiations. Meanwhile, the banks are engaging in a sustained campaign to wear down Mexico's demands. They contend that Mexico's economic projections—and particularly its oil-price forecasts—are too conservative, and have led to overblown demands for money.

SCALING BACK

Citicorp Chairman John S. Reed and his chief debt negotiator, William Rhodes, flew to Washington late Monday to talk with Mexican Finance Minister Pedro Aspe. Their apparent mission was to get him to scale back his propsoals. Citicorp declined to comment on the meeting.

Mr. Aspe said in a speech here Monday that his country seeks to foster private investment. He listed steps it has taken to improve its economy, including liberalizing trade regulations, bringing down inflation, improving tax collection, and turning a 7% budget deficit in 1982 to a projected 7% budget surplus in 1989 despite falling prices for oil, Mexico's largest export.

"Now, it is time for the [industrialized country] governments to recognize their promises" to ease the debt burdens of countries such as Mexico, Mr. Aspe said, "and for banks to recognize losses that are already recognized by the market."

The banks, united behind Citcorp in the Mexican negotiations, are in no mood to do so. They are eager to push Mexico into accepting a settlement similar to one they negotiated with Brazil last year.

SWAPPING DEBT

In the Brazil settlement, banks agreed to swap billions of dollars of debt for equity in Brazilian companies. The swaps—in which banks would trade outstanding debt for local currency that was then used to buy into local companies—helped spur that country's soaring inflation rate.

But Mr. Aspe argued here Monday that Mexico only will agree to swaps if they involve privatizing publicly-owned concerns, because such arrangements wouldn't involve printing new local currency or issuing more domestic debt.

Venezuela also is making little progress with its banks. It met with its bankers Friday in New York. It still is discussing with them a proposed $600 million bank loan originally proposed months ago. * * *

THE RURAL RAIL SERVICE PRESERVATION ACT OF 1989

HON. BOB WHITTAKER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. WHITTAKER. Mr. Speaker, virtually every American school child learns in history class that the railroads were the sinews that literally bound this Nation together as it expanded across the continent. Having seen maps of the Nation's rail system over time, from about 1830 to 1890, I can say that the system went from a few strands of steel along the eastern seaboard to a veritable spaghetti bowl of rail lines covering virtually the entire Nation. All of this was accomplished in barely over 50 years, a period that included the national upheaval of a civil war.

Proud and indeed awed as we should be by this amazing achievement, we also have to recognize that in the 20th century, and most particularly in the last two decades, the Nation's rail system has suffered such a severe shrinkage that it might be called an implosion. In my own State of Kansas, for example, roughly one-third of the lines that were in service at the end of the 1970's are now abandoned.

Part of this destruction of our infrastructure was the direct result of heavy-handed Federal regulation, principally by the Interstate Commerce Commission. Most of that particular problem was cured by enactment of the Staggers Rail Act in 1980. But giving the railroads the chance to price their services in a more market-oriented fashion could not undo the past destruction caused by long-term disinvestment. In fact, in the near term, the pace of rail abandonments actually accelerated after the passage of the Staggers Act, due to the reduced regulatory obstacles to showing a financial need for abandonment of a particular line.

But after several years of restructuring, the railroad industry seemed to be headed for an equilibrium of sorts. Although there were still a number of lines being shed by major carriers, an increasing number of those were being bought by short line or regional railroad entrepreneurs. These new operators, who generally had lower operating costs, and were more closely tied to and aware of community needs, helped keep rail service alive in many areas where it would have died. From the early 1980's until late 1987, the rise of these smaller railroads was one of the success stories of American industry.

Part of the financial underpinning for the new smaller railroads was the ability of major rail carriers to sell lines without having to pay the very high labor protection or severance benefits required in some types of transactions that are subject to ICC regulatory approval. But in late 1987, a Federal court ruled that the refusal of the selling railroad to pay labor protection could be considered to give rise to a so-called major dispute under the Railway Labor Act. In everyday terms, this meant that the work force of the selling railroad could hold the proposed line sale hostage to their own demand for labor protection,

and threaten a strike if that demand went unmet.

Since 1987, a number of court rulings have been issued on this subject, not all of them favoring the same side. And just a few weeks ago, the original case was argued before the U.S. Supreme Court. But the litigation has produced enough uncertainty to hamper if not totally prevent proposed line sales. As a result, the pace of abandonments has quickened. For example, more rail lines were abandoned in the first 8 months after the first court decision than in all of the previous year.

The areas hardest hit by these abandonments are rural and smalltown America. Often, rail service is a community's last hope for maintaining an existing industrial base or attracting new business. As we focus increasingly on rural development in the United States, it simply does not make sense to waste this precious and irreplaceable asset—the rail infrastructure built up at great cost and sacrifice during one of the most productive eras of our Nation's history.

While the railroad industry awaits a Supreme Court decision, on the legal standards governing line sales, the Nation continues to lose more of its rail infrastructure—rail lines that cannot be replicated in today's economic environment. To forestall this continuing attrition in an irreplaceable resource, I am today introducing the Rural Rail Service Preservation Act. This bill seeks to break the current line sale stalemate by assuring rail labor fair and immediate bargaining rights with the buyer of a rail line, as well as a generous severance benefit and hiring preference for displaced employees. On the other hand, the management of both the buying and selling railroads will be assured that the transaction will not be hamstrung by prolonged labor disputes over the effect of the transaction on employees.

The bill also seeks to correct some procedural abuses in the abandonment process—abuses that have arisen through regulatory short cuts sometimes taken by railroads and condoned by the ICC. First, the bill triples the current 30-day protest period now allowed to local communities who might wish to oppose an abandonment application. This provides a reasonable opportunity to evaluate the carrier's justification for the proposed abandonment and to decide whether a formal protest to the ICC is warranted.

Next, the bill reins in the regulatory laxness that has crept in through the ICC's overuse of the exemption process. The bill forbids the use of exemptions in abandonment matters. This is intended to halt the practice of some railroads—the habit of not complying with certain ICC requirements—such as advance notice of possible abandonments on system maps—on the assumption that the ICC will merely waive or exempt the transaction from such a requirement after the fact. Of course, a local community may never know that the exemption even existed, but its right to be heard on the proposed abandonment may nevertheless have been effectively eliminated by this procedure.

To allow more effective participation by local shippers and communities in the abandonment process, the bill makes a local hearing on the abandonment a matter of right in all cases involving lines 15 or more miles long, unless there is good cause for the ICC's dispensing with the hearing. The bill also addresses another abuse of the abandonment process—the application for an ICC abandonment certificate on a contingency basis, that is, as a carrier option to be exercised or not as the carrier may later decide. This produces tremendous uncertainty in the local communities affected, as they try to make alternative plans for transportation and land use. In at least one case where the carrier received a certificate but then changed its mind, a community's entire redevelopment plan was disrupted. To avoid this kind of situation in the future, this bill sets a 2-year lifetime on abandonment certificates issued by the ICC. A railroad must use or lose a certificate in that period, unless the case is prolonged by judicial review of the Commission's decision.

The bill also addresses the need for long-term local planning when an abandonment is threatened. It strengthens the current requirement in ICC regulations for advance notice of abandonments through the so-called system diagram maintained for each carrier's lines at the ICC. In this way, shippers and communities will be protected from short notice or exempt filings that undercut the regulations and the affected parties' entitlement to due process.

Finally, the bill addresses an abuse of the ICC's jurisdiction in railroad restructuring matters. In some instances, trackage rights or leases of lines among related rail carriers have been used to defeat the legitimate collective bargaining rights of the affected employees. Of course, some trackage or lease arrangements have legitimate business purposes. For that reason, the bill does not impair the ICC's authority to approve such transactions, but under this legislation, the Commission must first find that avoidance of collective bargaining agreements is not the principal purpose of the transaction. In this way, railroad employees can be protected against abuses of the regulatory process.

Through its comprehensive approach to the substantive standards and the regulatory procedures governing railroad line sales and abandonments, the Rural Rail Service Preservation Act will help maintain as much of our dwindling rail infrastructure as possible. I urge my colleagues to support the prompt enactment of this much needed legislation.

SUPER 301

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. CRANE. Mr. Speaker, last year when Congress considered the Omnibus Trade and Competitiveness Act of 1988, you may recall that I, along with several of my colleagues, fought to defeat its passage.

Although there are a number of problems with the new trade law, the Super 301 mechanism is potentially the most dangerous. For the United States to demand that other countries remove their trade barriers when we refuse to remove our own is truly a recipe for disaster. In effect, it is an attempt to force our trading partners, our best customers, to help us cure our deficit problems, when in fact, our own irresponsible overspending is the real cause of our fiscal dilemma. While inciting the ire of our trading partners, I am convinced that Super 301 will not achieve improved access for U.S. business.

I commend to the attention of my colleagues, the following article by Claude Barfield, which questions the wisdom of the Super 301 amendment.

WRONGHEADED U.S. TRADE POLICY

(By Claude Barfield)

Over the next few months, under a mandate from Congress, the Bush administration will be forced to conduct an exercise in futility and folly in the trade policy area.

The impetus for this misguided action is the Super 301 amendment to the 1988 trade act, which deals with unfair trade practices. Super 301 requires the U.S. trade representative by April 30 to identify, and thereby indict, a group of "priority" countries that "maintain a consistent pattern of import barriers and market distorting practices." The trade representative then must quantify the impact of the individual major barriers on U.S. exports and open negotiations with these countries to force them to eliminate all of the barriers within three years or face U.S. retaliation.

More than any other single provision of the 1988 Omnibus Trade Act, the Super 301 amendment symbolizes the perverse wrongheadedness of the trade act. It highlights the persistent refusal of Congress to admit that our trade problems and deficit stem from internal macroeconomic failures and the emergence of new economic competitors, not from the unfair trade practices of our rivals.

Defending their action at the time, Reagan administration officials noted the president retained the discretion at the end of the Super 301 process not to retaliate if he found that such action would adversely impact the U.S. economy or jeopardize national security. What this defense ignored is that the Super 301 process itself is likely to harm relations with some of our major trading partners.

There is both hypocrisy and gall in the Super 301 directive that the trade representative drag other nations to the negotiating table with a set of terms and deadlines unilaterally dictated by the United States.

The provision is hypocritical because the United States, with its steel, automobile, sugar, textile and machine tool quotas, its huge agricultural subsidies, and its leaky semiconductor cartel with the Japanese, is itself now vying for top honors in "maintaining a consistent pattern of import barriers and trade distorting practices."

And it is galling because, by expecting other nations supinely to submit to our demands, the Super 301 process makes no provision for the United States to place its own trade distorting practices on the bilateral negotiating table.

Moreover, the 1988 act expands the list of U.S.-defined unfair practices to include such hopelessly vague matters as export targeting, violations of workers' rights and the "toleration" by other governments of anticompetitive practices by private corporations.

Compounding the problem is that the document upon which the trade barriers are to be based, the National Trade Estimate Report, is without economic or statistical

foundation. The truth is that it is impossible to calculate with any accuracy the impact of individual barriers on U.S. exports.

In the unlikely event that a nation submits to the demands of Super 301, it will face another trap. Burried inside this provision is the economic nonsense of the Gephardt amendment. For a nation to prove that its alleged barriers are being removed, it must show an increase in U.S. imports annually over a three-year period—a stipulation that belies the fact that trade flows are determined overwhelmingly by macroeconomic policies and currency values, not differential trade barriers.

Finally, aggressive implementation of Super 301 will badly undercut U.S. leadership in the Uruguay Round of the General Agreement on Tariffs and Trade just as the negotiations are entering their most crucial period.

What should be done? The best and boldest course is for the president to announce that while bilateral talks will be undertaken, no nation would be under the dictates of Super 301. He should assure them publicly that he stands ready to invoke the escape clause if negotiations proceed in good faith.

The president also could take advantage of a "safety in numbers" strategy and publish the entire list of 40-odd nations now identified in the trade barriers report, stating that detailed prioritizing is impossible. Bilateral negotiations then could proceed as needed, just as they do today when differences must be ironed out.

The worst course would be to identify a small number of countries and launch full-scale Super 301 actions. This extraterritorial assertion of the authority of U.S. law is likely to trigger both nationalist defiance and an increase in protection all around.

The United States is in a difficult position, but it has only itself to blame. We can only hope that the Bush administration and Congress will not risk major disruption of the international trading system merely to demonstrate that the United States is the Rambo of international trade.

BLACKFOOT HIGH SCHOOL REPRESENTS IDAHO IN NATIONAL BICENTENNIAL COMPETITION ON THE CONSTITUTION

HON. RICHARD H. STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. STALLINGS. Mr. Speaker, from May 1 through May 3, in our Nation's Capital, over 950 young people from 44 States have gathered to participate in the National Bicentennial Competition on the Constitution and Bill of Rights. I am proud to announce that a team from Blackfoot High School in my congressional district represented Idaho. These young scholars worked hard to reach the national finals by winning the district and the State competitions and I would like to congratulate them on a fine performance.

The members of the Idaho team are as follows: Tyler Anderson, Holly Barrett, Becky Bendixen, Kollette, Bowman, Kevin Briggs, Sandy Case, Kristi England, Tricia Evans, Jeff Haddock, Darren Hall, Brett Hamm, Wayne Hamon, Brandi Hawley, Tim Hong, Robert Jones, Janis Manwaring, Pam Mecham, Brady Mickelsen, Rakael Pope, Axel Roos, Sheri Slater, Bryce Stoutmeyer, Kevin Tanner, Brendon Taylor, and Rebecca Wadsworth.

Along with the students, their teacher, Joan Thompson, deserves much of the credit for the success of the team. In addition, Dr. Particia T. Whitefield, the district coordinator, and Dr. George D. Gates, the State coordinator, have worked hard to help their team reach the finals.

The National Bicentennial Competition on the Constitution and Bill of Rights is the most extensive educational program in the country developed to educate young people about the Constitution and Bill of Rights. With the support of Congress, the active involvement of Representatives and Senators, and the efforts of thousands of civic and education leaders, dramatic program achievements over the past 2 years have come to include the following: 1,022,320 students have studied the curriculum; 14,381 teachers are teaching the course; 420 congressional districts and the five territories have fully functioning programs; 393 U.S. Representatives are participating in their districts; and, 92 U.S. Senators are supporting the program in their States.

The program provides students with a 6-week course of study designed to provide upper elementary, middle, and high school students with a fundamental understanding of the Constitution and Bill of Rights and the principles and values they embody. Students complete the instructional portion of the program with a test designed to measure their constitutional literacy.

High school participants then enter a nationwide series of competitions at the congressional district, State, and national levels. Students testify before a panel of experts at a simulated congressional hearing designed to measure understanding and capacity to apply principles being learned to historical and contemporary events. Each year, the National Bicentennial Competition culminates in 3 days of intensive competition among classes from almost every State in the Union.

Mr. Speaker, the need to educate our young people about the Constitution and Bill of Rights is well documented. Studies have found that only slightly more than half of students surveyed were able to identify the original purpose of the Constitution. Nearly half of those surveyed thought the President could appoint Members of Congress and one-third thought he could adjourn Congress when he saw fit. Indeed, another survey conducted on behalf of the Hearst Corp., suggested that over half of Americans thought that the Marxist credo "from each according to his ability, to each according to his need" can be found in the Constitution. Most alarming was the finding that a greater proportion of today's students display antidemocratic attitudes than did students in 1952.

The benefits of this educational program are clear and it is making a difference among the over 1,000,000 students who have studied the program. A recent study has shown that the National Bicentennial Competition Program has increased the constitutional literacy of our young citizens. Students in classrooms all over the country are debating the issues that concerned the Founding Fathers and demonstrating how the Constitution's basic principles apply to them today with an extraordinary level of understanding.

The preservation of our freedom and our Nation depends upon our young people, the decisionmakers of tomorrow. We have much to gain from educating them about the Constitution, the Congress, and the continuing responsibilities of citizenship. I am proud that students from my congressional district participated in the national finals and I commend each of them and their teacher for their hard work.

INTRODUCTION OF A BILL TO AMEND THE IMMIGRATION AND NATIONALITY ACT

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. HORTON. Mr. Speaker, since the days of the great Roman Empire, there has been an almost universal belief that, if an individual serves honorably in the armed forces of a nation, they should have the right to live in that nation. I am sure my colleagues in the House will be shocked to realize that this is not always the case when it concerns the United States.

The provisions of this legislation are simple. After an individual serves honorably in the Armed Forces of the United States for 4 or more years, they and their families will be granted special immigrant status upon the recommendation of the executive department under which they served.

This bill is directed primarily toward nationals of the Republic of the Philippines who are today treated differently than other enlisted personnel. This is due to the fact that Filipino nationals often enlist in the United States Navy within the territorial jurisdiction of the Philippines. These enlistments are usually carried out under the terms of the military base agreement entered into between the United States and the Republic of the Philippines on March 14, 1947. All other aliens who want to serve in this country's Armed Forces must enlist in the United States after being admitted for lawful permanent residence. Filipinos enlisting under the military base agreement, however, are enlisted without having acquired an immigrant visa and obtain no immigrant status of any kind. This bill would simply treat Filipino's fairly for their dedicated service in the United States Armed Forces.

I remind my colleagues that one of the brave Marines who sacrificed his life in the Marine barracks in Beirut was a Filipino national who was not eligible for permanent residence status in our country. Mr. Speaker, our Filipino comrades in arms are worthy enough to live and serve with our American Armed Forces abroad—they are certainly worthy of living in our Nation after their service. I urge my colleagues in the House to join me in support of this legislation.

TRIBUTE TO DR. JOHN MADER

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. BONIOR. Mr. Speaker, it is a great pleasure for me to rise today to bring to the attention of my colleagues the accomplishments of Dr. John Mader, an outstanding educator and friend, on the occasion of his retirement as superintendent of the St. Clair County Intermediate School District [ISD].

After earning his various degrees from Western Michigan University, Florida State University, and Michigan State University, John spent several years teaching at the collegiate level in Alabama, Mississippi, and Michigan. He spent 6 years as the director of special education for Washtenaw County, MI, and then took over the position of hospital schools director for the University of Michigan Hospital in Ann Arbor.

It was this vast talent and experience both as an educator and an administrator that John brought to his current position as superintendent of the St. Clair County ISD 20 years ago.

Under his direction, the ISD has grown to meet the needs of an expanding community, and today includes 28 elementary schools, 23 secondary schools, and St. Clair Community College. The total enrollment at all levels currently exceeds 31,000 students. Twenty years later, John still takes a personal interest in every student and makes sure each one has the facilities and the attention needed to realize his or her potential. It is no surprise that his schools have consistently ranked among the top in the Nation.

Mr. Speaker, even though Dr. John Mader plans to retire this summer, I am sure he will continue to be one of our community's outstanding leaders. In the past he has served as president of both the Mississippi Speech and Hearing Association and the Michigan Council for Exceptional Children. His active participation in such community groups as the YMCA, DARES, the United Way, Port Huron schools advisory board, the criminal justice advisory board, and many others, exemplifies his firm commitment to serving others.

In fact, I have learned that his commitment to education will be carried on for years to come by four of his children who have entered the education field and are currently teaching their own classes across the country and in Michigan. His fifth child has shown a firm commitment to our Nation by currently serving in the U.S. military. I am sure that John and his wife Patricia are very proud of them all.

Mr. Speaker, Dr. John Mader has made a difference to thousands of young men and women throughout the Nation and at home in St. Clair County, MI. Thus, it is an honor for me to pay tribute to one of our State's most outstanding citizens and to wish him and his family the best in the years to come.

HONORING CARL F. GERDS, JR.

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. HERTEL. Mr. Speaker, I rise today to honor the retirement of a great public servant, Carl F. Gerds, Jr. Carl's retirement from 38 years of full-time fire service with the East Detroit Fire Department is being celebrated on May 12 in East Detroit.

Carl has dedicated himself to protecting the citizens of the community through his service with the East Detroit Fire Department. He joined the volunteer fire department in July 1948 and began as a regular firefighter in March 1951. Carl served in that capacity until 1959 when he was promoted to sergeant at the East Detroit department. His courageous commitment to firefighting led to the following series of promotions: lieutenant—1966; captain—1974; fire marshal—1976; acting chief—1977; fire chief—1978. Carl Gerds, Jr., honorably served as the East Detroit fire chief for more than 11 years, from February 6, 1978 until his official retirement on April 14, 1989.

Chief Gerds has donated much energy and time to the people of Michigan through his participation in many other community organizations. He has been a life member of St. Peter's Lutheran Church in East Detroit and has been actively involved in its activities. Carl was president of St. Peter's Church, member of the board of education of St. Peter's School, and has served on various church committees. He has led organizational efforts for many church fundraising activities.

Carl has been often recognized for his church and civic contributions by the National Lutheran Fraternities of America, of which he is a past president.

Carl is a truly special person. In addition to his public service and charitable activities, Carl has been strongly committed to his family. He and his wife Dorothy raised three children, Cathy, Carl III, and Gordon.

Carl F. Gerds, Jr., has served the citizens of our Detroit community with distinction. He is known by his coworkers and those who have had the opportunity to serve with him as a man of great integrity and courage. Few public servants dedicate their time to charitable activities with such enthusiasm as Carl.

My dear colleagues, I ask that you join me in congratulating Carl F. Gerds, Jr., for his many years of extraordinary service to East Detroit. On behalf of the citizens of the State of Michigan, I thank Carl for his public leadership as chief of the East Detroit Fire Department and his continued commitment to community service.

RABBI ZOBERMAN REFLECTS ON ISRAEL AT 41

HON. OWEN B. PICKETT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. PICKETT. Mr. Speaker, today, as we celebrate the 41st anniversary of the State of Israel, all Americans share with the Israelis a common hope for peace. Tragically, that has been an elusive goal throughout Israel's existence, but with greater understanding on all sides, history teaches us that progress can be made.

Recently, I read an essay by Rabbi Israel Zoberman of Virginia Beach that dealt with this theme very well. Rabbi Zoberman is the spiritual leader of Congregation Beth Chaverim and the president of the Virginia Beach Clergy Association. I think today is an appropriate time for it to be included in the RECORD.

ON THE ISRAELI-PALESTINIAN EQUATION

Is the gap between the Israeli and Palestinian as wide as we are led to believe? Is there no common ground that can possibly transcend the abyss of pain, alienation, and dehumanization separating the two? I submit that both sides to the long-standing and tormenting conflict share more than they are willing to admit, more than what divides them. Any workable political solution to the crisis, leading hopefully to regional peace, depends on concurring with this optimistic premise and promise.

The Israelis, in spite of four decades of independent experience, are not as secure as they appear. An outpost of Jewish life in a vast stretch of Arab-Moslem sovereignty, they know that the odds do not favor them; that is not a new Jewish condition though the devastating European Holocaust has sharpened its edges, convincing them that the impossible is tragically possible. While Israel rightfully prides itself on being a haven to a people marked by insecurity, it is to learn that true security lies in overcoming distrust and apprehension as much as acknowledging them. As Israel still struggles to survive in an inhospitable environment and given a traumatic past, it finds it difficult to internalize its own newly acquired relative prowess and the fact that it wields influence over the future of another people. It needs to confront an ideological as well as a psychological barrier, not without roots in reality, that regards the Palestinians as deadly rivals for the inheritance of the Land of Israel; all the descendants of Abraham, whether the children of Isaac or Yishmael, ought to find fulfillment and peace within the historical boundaries of a land that for too long has suffered the curse of strife despite its biblical yearning for the blessing of harmony.

The Palestinians too have not been spared history's harsh winds, dispersed as they are. Manipulated, exploited, and abused by colonial rulers and those who should have acted as the Arab brothers they were, rather than turning them into pawns in an all-consuming scheme to deny in word and deed Israel's presence in the matrix of Middle East life. Israel's control, benevolent as it was, of the West Bank and Gaza Strip following the victorious 1967 War which had been imposed on it, served to heighten the Palestinian sense of national identity and raise its expectation for self-rule. No doubt, the continuing uprising, the painful Intifadah, raging now for a second year, has placed Palestinian plight in a world focus with an urgency and sympathy that were priorily lacking, prodding, I believe, the United States to act, cognizant of and contributing to the PLO's emerging proclaimed modified posture that yet need be sustained in action, proving indeed a radical departure from its traditional, vehemently noncompromising stance vis-a-vis Israel.

Israel is challenged to adjust its perspective accordingly and not be blind to developments of immense consequence bearing fresh opportunities not to be missed while properly assessing the risks. But are the Palestinians, who also possess a tenacious will, ready to hear and believe that there is a vulnerable side to those who have a measure of power over their destiny and require reassurance that the outburst of Palestinian vigor and purpose would not be expressed at Israel's mortal expense? It is of critical impact to the eagerly awaited rapprochement process for the Palestinians to draw into a climate of dialog and negotiation the rest of the Arab camp that has failed to respond constructively to the breakthrough precedent set by the 1979 Israeli-Egyptian Peace Treaty that has begged to be the harbinger of a transformed Middle East, once again the birthplace of eternal vision, hope and shalom for humankind.

TRIBUTE TO DR. FRANZ E. HERKT

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. McDADE. Mr. Speaker, today I am pleased to join many of my friends in congratulating Dr. Franz E. Herkt on his years of service to Schott Glass Technologies, Inc. On the occasion of his retirement, Dr. Herkt will be showered with many expressions of the affection and high regard from the people—on both sides of the Atlantic—that have been privileged to work with him.

Our Nation owes a great debt to Franz Herkt. Although a citizen of the Federal Republic of Germany, Dr. Herkt served in the U.S. Navy for over 5 years during which time he demonstrated moral and professional qualities which led to promotions from an enlisted rank to that of lieutenant. His language skill won him many commendations, but it was his initiative, energy, and enthusiasm that set him apart from his colleagues.

I am very pleased that he chose to bring that initiative, energy, and enthusiasm to northeastern Pennsylvania after winning his doctorate degree. Since 1975, Dr. Herkt has been president and CEO and a member of the board of directors of Schott Glass Technologies, Inc. in Duryea, PA.

Schott is a dynamic company which employs over 500 workers and is planning a work force expansion. In 1967 when Schott first started production in our area, the work force totaled fewer than 100. Dr. Herkt has been instrumental in greatly expanding Schott's sales. He is also responsible for establishing a full-fledged research and development facility which will further enhance Schott's ability to manufacture materials used in medicine, aerospace, laser, and fiber optics.

During Dr. Herkt's tenure at Schott, his community service record has also been distinguished. He has supported economic development in northeastern Pennsylvania and has been a significant force in bringing technology into our area.

Dr. Herkt will certainly be missed, and I am pleased to wish him all the best. I am confident that the coming years will be happy ones and hope that he will always remember that he has many, many friends in Pennsylvania.

TRIBUTE TO THE INTERNATIONAL ROTARY CLUB FOR THEIR POLIO PLUS PROGRAM

HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. BUECHNER. Mr. Speaker, I rise today to applaud the efforts of the International Rotary Club in their Polio Plus Program which is designed to remove polio from the face of the Earth. The Rotarians' dedication to this cause manifested itself in my home State of Missouri, as the Florissant Rotary held its first annual World Invitational Fishing Tournament

For centuries, polio was a seemingly insurmountable scourge upon the human race, killing many and crippling many more. Like some diseases today, it was, by most people, dismissed as a fact of life. But for the efforts of a courageous few, it would probably still be stealing our children's lives. Fortunately for all of us however, Jonas Salk and others like him refused to accept the inevitably of this disease. Instead of cursing it, or bemoaning it, or praying for it to pass, they fought polio, and in the end, found the means to defeat it.

I find it heartening that this spirit is still alive today, in the form of groups like the Rotarians, who find it unacceptable that this curable disease still afflicts humanity so many years after the advent of its cure. The Rotary Club has sworn to eradicate polio completely by the year 2000, and have already vaccinated 135 million children.

To paraphrase an old Chinese proverb, "many will curse the darkness, but only an insightful few will choose to strike a match." We should all be grateful for people like the Rotarians who have the courage to rise up against the problems of humanity, in the hope that one day all diseases might be vanquished.

The motto of the Rotary Club is "Service Above Self." Mr. Speaker, I enjoin the Members of this assembly to congratulate the Florissant Rotary Club for personifying that motto.

A HOLLOW ACCORD IN AFGHANISTAN?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MICHEL. Mr. Speaker, Americans have a tendency to forget about a problem once the television cameras have departed from the scene. Nowhere has the truth been more evident than in Afghanistan. We were told that Soviet troops had departed and we quickly lost interest. But have all Soviet troops departed in fact? Our colleague BILL MCCOLLUM says "no," and I believe our colleagues deserve to know what BILL has found out. We just have to get out of the habit of forgetting about a problem once media attention has been directed elsewhere. BILL does a great service in reminding us that the Soviet Union is still playing a role in Afghanistan.

At this point I wish to include in the RECORD, "A Hollow Accord in Afghanistan?" by BILL MCCOLLUM, published in the Washington Times, May 8, 1989.

[From the Washington Times, May 8, 1989]

A HOLLOW ACCORD IN AFGHANISTAN?

(By Bill McCollum)

(Bill McCollum is a Republican member of the House of Representatives from Florida)

It appears U.S. policy-makers have looked the other way, ignoring Soviet involvement in Afghanistan after the "official" Soviet withdrawal.

Conventional wisdom aside, Soviet forces in Afghanistan have not been completely withdrawn. In fact, reliable sources say more than 50,000 Soviet and Soviet-controlled troops remain there. By the autumn of 1988, 6,000 to 7,000 Soviet Uzbek, Tajik and Turkomen elite troops—known as Jowzjanis—had been secretly enrolled in the Afghan army.

Because Uzbeks, Tajiks and Turkomen live on both sides of the Soviet-Afghan border, they are indistinguishable from Afghans. In December, another 4,000 Jowzjanis were brought in, and most of them remain in the Kabul area. Some 20,000 Soviet elite forces—known as the Mongols by the rebels—operated in unmarked KGB uniforms in late 1988. These troops are also Soviet citizens from the Far East who were secretly "donated" by the Soviet Union to the Afghan army.

Since late 1988, they were also reinforced, although the exact number is not known. Another group of Soviet-controlled troops, the DRA, consists of some 20,000 young Afghan males who were taken from their villages in the early 1980s and then trained in the U.S.S.R. In other words, as the "official" Soviet army left Afghanistan, the clandestine Soviet army—better trained and more reliable—tiptoed into Afghanistan with supplies and new equipment awaiting them.

Just last week, sources from the battlefield said that three border guard brigades have reinforced the communist forces in Jalalabad. This is obviously a blatant violation of the accord, because these brigades consist of Soviet-controlled troops, including Jowzjanis and Mongols. The Soviets have also brought in two brigades of special palace guards that include Jowzjanis, Mongols and militia units from neighboring provinces.

Meanwhile, startling new information from mujahideen sources indicate that the Soviet-backed communists may unleash chemical gas attacks once again. They report that full gas protective outfits have been issued to all the communist troops in Jalalabad, and a communist army unit trained in decontamination has been deployed there, where a fierce battle now rages.

Also, sources indicate that the communists are using a new missile or artillery weapon that contains a deadly fuel/air explosive. High altitude bombing continues around the clock, thanks to supplies from Russia and India that land at least 25 times a day in Kabul. The Kabul puppet government is well-fed with Soviet weapons and supervision, due to the loopholes in the accord and U.S. policy-makers' peculiar reluctance to accept the Afghanistan reality.

Some critics blame America for prolonging the fighting because we gave arms to the freedom fighters. Actually, the mujahi-

deen need more weapons, not fewer. After all, the Soviets have "donated" mammoth stockpiles of weapons to the Kabul government, enough to last several Soviet divisions a few years.

The Soviet Union appears to be right on track in its long-term plan of dominating Afghanistan, and thus South Asia. The belief that nations alter their long-range goals when they merely change their short-term tactics is naive.

Revisions of such goals are deep, complex matters, and should be viewed cautiously if they are voiced so readily. A "good" Soviet-American relationship is meaningless if the Soviets don't display "real world" changes in their goal of determination. Soviet President Mikhail Gorbachev's soothing rhetoric just disguises the same foreign policy goals of earlier Russian leaders. Instead of the oafish Russian bear stumbling about, the Soviet Union is more like a sly cat on the prowl.

We need to work with all mujahideen factions to formulate a workable war plan. Sending supplies and equipment and leaving it to the Pakistanis to "advise" the freedom fighters is not enough. We must face the reality of continued Soviet presence, the vicious tactics they are employing, as well as the difficulties posed by current policies within parts of the government of Pakistan.

Pakistan worked in close alliance with the United States to aid the Afghan resistance prior to the fraudulent Soviet withdrawal, but some parts of the Pakistan government now appear interested in achieving hegemony over the region. These elements favor some resistance factions over others, thereby putting the entire resistance effort in grave danger. Furthermore, they have encouraged the use of tactics that preclude quick success in the face of the continued but unrecognized Soviet presence. U.S. policy-makers—in light of these Pakistani manipulations—should make it known that the United States will not tolerate any nation seeking hegemony over the region.

Until the mujahideen totally defeat the Soviet puppet government regime and drive the Soviets out of Afghanistan, no victory for freedom can be claimed.

As long as U.S. policy-makers ignore the reality of the situation, many more freedom fighters will die, and Soviet interests will prevail.

SHOULD THE POSTAL SERVICE RECEIVE OFF-BUDGET TREATMENT

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. GRADISON. Mr. Speaker, in recent years, there has been considerable debate about whether to move the Postal Service off budget. Until now, except for the Social Security trust fund, Congress has resisted the temptation to embark on a course that would render the unified budget meaningless.

Unfortunately, the bipartisan budget agreement, as well as the House and Senate versions of the budget resolution, would take us one more step down this road. As part of the agreement, the President and the leadership agreed to take the Postal Service off budget. In exchange for escaping direct budgetary oversight by Congress, the Postal Service would be expected to absorb $500 million in costs and adopt several unspecified reforms.

Additionally, the Federal deficit would appear to be reduced by roughly $2 billion, but that is only because this entity currently runs a deficit. This raises an interesting question; do we move the agency back on budget when it runs a surplus?

Supporters of off-budget status argue that the agency was once off budget and that, in any event, it does not rely on appropriations from the Treasury. In my view, whether the Postal Service was previously off budget is irrelevant to the issue of whether it should be. The fact is that the Postal Service has always been an agency of the Federal Government and it continues to receive Federal subsidies. Because of the budget agreement, we are now on the verge of granting budgetary independence to an agency of the Federal Government, thereby diluting congressional oversight, while continuing significant Federal subsidies to it.

For $500 million in annual savings, off-budget treatment, with all of its implications, apparently comes cheap. If the budget agreement is implemented, the Postal Service will be a semi-independent Federal agency. It will continue to hold a quasi-monopoly position in its industry as well as complete authority to enforce the private express statutes. It will be largely outside the budgetary supervision of Congress, yet will continue to draw on the taxpayers' pocketbook.

Postmaster General Anthony Frank, writing in the May 2 edition of the Washington Post, argues that all the Postal Service wants "is a fair chance to manage our own affairs." Fair enough, but if the Postal Service wants to operate outside the budgetary supervision of Congress, and it is the judgment of the President and the leadership that this is appropriate, it is only reasonable to eliminate all of its subsidies and statutorily mandated competitive advantages. The price for escaping from budgetary control ought to be complete privatization.

Complete independence for the Postal Service, eliminating all Federal subsidies including those laws that confer monopoly or near-monopoly benefits, would realize substantially more than $500 million in savings. Here are some of the potential savings:

First. Eliminate personnel subsidies: The Federal Government pays all COLA's and most health benefits for postal retirees. A truly independent Postal Service should be responsible for these personnel costs. In 1990, this would save taxpayers approximately $1 billion and would rise to over $2 billion by 1994.

Second. Eliminate revenue forgone: If Congress chose to eliminate preferential mail rates, nearly $500 million in savings could be realized in 1990. If Congress decides to continue to subsidize preferred mailers, at the very least competitive forces ought to be introduced to the process.

Third. Eliminate additional authorizations: The Postal Service has the authority to receive other subsidies through transitional and public service appropriations. Since 1970, when the Post Office Department was transformed into a Government corporation, the Postal Service has had authority to request appropriations to ease its transition to its new status. Although the Postal Service has never tapped this source of potential revenue, it remains on the books. A nearly 20 year transition period is probably sufficient—even for a Government agency. The Postal Service also has authority to request public service appropriations to support post offices in areas that are not self-sustaining—for example, where the salary of the postmaster is in excess of the revenue generated by the post office branch. The Postal Service has not requested these appropriations since 1982 and there is no need to continue their legal authority.

Fourth. Eliminate access to Treasury's credit window: The Postal Service has a $10 billion line of credit to FFB and a $2 billion line to Treasury for emergency purposes. Currently, the Postal Service has approximately $2 billion remaining on its FFB line of credit. A truly independent Postal Service should go to the private credit markets without any Federal guarantee.

Quite clearly, more than $500 million in savings could be realized by fundamentally altering the agency's status. In addition, without being encumbered by the demands accompanying Federal subsidies, the Postal Service would be in a much better position to carry out, in the Postmaster General's words, its "businesslike public service" in an "increasingly competitive communications marketplace."

In an editorial in its April 25 edition, the Washington Post argued cogently against the off-budget scheme:

> The budget is supposed to reflect the government's full impact upon the economy. Taking functions off budget masks that, and exempting some functions from the burden of reducing the deficit only increases the burden on the rest. The postal service says its operations are too vast and at the same time too intricate to be subject to such intrusions. But every agency says the same thing; why not also set up a trust fund and exempt the Pentagon?

Why not, indeed? If we are to reach back to the precedents of off-budget treatment to help solve the deficit problem, why stop there? One could, for example, also argue that because the Government must pay the interest on the public debt, about $169 billion in 1989, that it ought to be off budget as well. After all, interest on the debt is not a discretionary expense and is not subject to the appropriations process.

The potential gimmicks are endless and off-budget treatment for the Postal Service is one of the worst. We will fool no one by this action and Congress will damage once more what little credibility it has left as an honest budgeter. More importantly, the real deficit will not be reduced and Congress will inevitably lose some control over this Government agency. In my view, the costs clearly outweigh any conceivable gain.

For a long time, it has been assumed that the Postal Service performs a function that inherently is a function of Government. Perhaps it is time to test that assumption.

NEWARK'S CAPITAL READING PROJECT

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. PAYNE of New Jersey. Mr. Speaker, it is with great pride that I share with my colleagues in Congress the story of an exciting and ambitious project being undertaken by the schoolchildren of Newark, NJ.

When the Library of Congress designated 1989 as the Year of the Young Reader, our students in the Newark School District responded with youthful eagerness and determination. As part of the year-long celebration, they have pledged to read over 1 million books. Our students have embarked on a long, adventurous journey, placed side-by-side, the books would form a path stretching 215 miles from Newark, NJ, to Washington, DC.

Enthusiasm for our hometown venture, known as Newark's capital reading project, is shared by our entire community. Parents, teachers, school administrators, and students are all working together to attain this impressive goal.

Mr. Speaker, we frequently hear about the serious problems facing our urban areas, problems like drugs, crime, and illiteracy. Too often we overlook the many positive and innovative activities going on in our cities today. The capital reading project is an excellent example of a grassroots effort to enhance the lives of our children.

The multitude of books these students read will open up new worlds to their young and impressionable minds. During the Year of the Young Reader, it is important that we convey to our children the joy, magic, and lifetime rewards that reading brings. Books spark the imagination; they carry us back into history and propel us into the future. Books inspire us, teach us, entertain us and sometimes comfort us.

Mr. Speaker, I know my colleagues join me in offering best wishes to the students of Newark as they pursue the challenge before them.

INTRODUCTION OF COBRA EXTENSION LEGISLATION

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Ms. PELOSI. Mr. Speaker, today I am introducing legislation that will assist disabled Americans in obtaining health insurance coverage at group rates.

The Consolidated Omnibus Budget Reconciliation Act [COBRA] of 1985 required that continuation of certain health insurance coverage be offered to employees who would otherwise lose coverage in an employer's group health plan due to termination of employment or other qualifying events. For most eligible beneficiaries the minimum continuation period is 18 months; for certain other situations, the minimum period is 36 months.

When a worker becomes disabled under provisions of title II of the Social Security Act, he or she is eligible for financial support 5 months after the onset of disability. Health coverage under Medicare is available after another 24 month waiting period. Thus, an individual who is disabled by a severe medical condition faces a 29-month waiting period from the date of onset of disability to the date of becoming eligible for coverage under Medicare.

This legislation would extend the minimum continuation period from 18 to 29 months for individuals who are disabled under title II of the Social Security Act.

This legislation will help improve access to health services and also help protect family financial resources. I urge my colleagues to support this proposal.

UNIVERSITY OF COLORADO SCIENTISTS HONORED FOR INVENTIONS

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mrs. SCHROEDER. Mr. Speaker, I would like to bring to the attention of my colleagues a special Colorado connection with last month's Inventor of the Year Awards, hosted by the Intellectual Property Owners Foundation, April 13, in the Cannon caucus.

One of the four scientists sharing the top award as Inventor of the Year is a University of Colorado graduate, and two medical doctors honored as distinguished inventors of 1989 collaborated while on the faculty of the University of Colorado Medical Center.

David Goeddel, a 1977 Ph.D. in biochemistry graduate of the University of Colorado, was one of four scientists at Genentech, Inc., who shared the $4,000 prize as Inventor of the Year for their creation of t-PA, tissue plasminogen activator, which dissolves blood clots in arteries, a major cause of heart attacks. The invention of t-PA is a good example of how biotechnology can be applied to everyday health care.

The University of Colorado should also be proud of the accomplishments of Drs. Charles A. Chidsey III and Guinter Kahn, who were honored as distinguished inventors of 1989 for their work in developing rogaine topical solution, a baldness treatment that was approved for sale last year by the Food and Drug Administration. Rogaine, like so many discoveries, was the spinoff of an unrelated study into hypertension drugs.

I salute Drs. Chidsey, Kahn, and Goeddel and I salute the Intellectual Property Owners Foundation for honoring their work.

PRESIDENT JIMMY CARTER

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. LIPINSKI. Mr. Speaker, I rise today to pay tribute the fine work of President Jimmy Carter. He has become a one-man traveling White House years after his departure from office. His familiarity with the situation in Panama, his willingness to travel to that country, observe the elections, and to return to brief this indecisive administration is a testament to President Carter's abilities and dedication.

The Republicans have been running against Jimmy Carter for 9 years. Now, in a time of crisis, they run to him. It is to his credit that he has responded to the calls of a candidate who vilified him and who continues to blame him for every problem for which the administration does not have an answer.

Jimmy Carter implemented vital and long-lasting foreign and domestic policies and hammered out historic agreements. The Camp David accords continue to be a model for settlement in the Middle East. The SALT II Treaty has served as a vital check on the arms race and helped lead the way to the historic INF Treaty. The Panama Canal Treaty will help protect the canal from the likes of Noreiga. Jimmy Carter was far-sighted on the issue of energy. In the aftermath of the Exxon oil spill and the rising dependence of our Nation on imported fossil fuels it is clear we need his leadership on energy conservation and renewable energy.

Jimmy Carter understood that the United States must lead the world on human rights and support for democracy. Leadership does not mean policy review and indecision. It is a relief and it is an honor to have President Carter on the job for the White House and the United States of America.

THE PHILADELPHIA MOUNTED PATROL: 100 YEARS OF SERVICE

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. FOGLIETTA. Mr. Speaker, I rise today to pay tribute to the mounted police patrol, who, this year, celebrate 100 years of service to the people of Philadelphia.

In 1858 Mayor Richard Vaux first experimented with the use of mounted officers in an attempt to combat civil disturbances and pursue criminals on horseback. His attempt failed, but just 31 years later it became apparent, again, that a mounted police patrol was needed. The mounted police patrol was originally made up of 98 officers, all formerly cavalrymen. For 60 years, they were a major force; effectively patrolling downtown Philadelphia, its parks and residential districts.

By the mid-1950's, however, many people began to question their effectiveness. One of their bleakest hours may have come in 1952, when the Philadelphia Police Department terminated the mounted patrols on the recommendation of the city government.

But the era of horse patrol did not end here. The Fairmont Park Guard, a division created in 1967, continued to patrol city parks on horseback. Eventually, the police department realized they had made a mistake and reestablished the mounted patrol in 1972.

Today, the mounted police patrol are a small yet highly visible division of the police force dedicated to serving the citizens of Philadelphia. Their major function is to assist other police officers in controlling crowds and escorting officials in parades. They also patrol the 8,700 acres of Fairmont Park, one of the largest urban parks in the world, and serve to expedite traffic in heavily congested areas of the city. The reputation of the force has prompted other cities to extend invitations to train their mounted police on numerous occasions.

This year marks the centennial of the establishment of the mounted patrol, and the Atwater Kent Museum is presenting an exhibit in celebration of 100 years of valued service. Mr. Speaker, I rise to salute the mounted police patrol's hard work and dedication, and wish them at least another century of success in their efforts.

TRIBUTE TO DALE POLLARD

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. SKELTON. Mr. Speaker, there are many heroic acts performed in an instant which call deserved attention to those who perform them. It is uncommon however, that deserved attention is given to those among us who are exceptional citizens simply because of the example they set and the leadership they provide in the way they live their everyday lives. Dale Pollard, a resident of Lexington, MO, is such an exceptional citizen. Deserved recognition has been bestowed upon Dale with the naming of Dale Pollard Drive at the Lake City Army Ammunition Plant in Independence, MO. Few people have streets named after them, it is an honor fitting Dale Pollard. The following summary about the dedicated life of Dale Pollard has been extracted from the Lake City Tracer:

Dale Pollard Drive * * * a special tribute to a special man whose ties to Lake City date all the way back to April 1941 when he began his career here as an Assistant to the Chief Timekeeper for Remington. After fulfilling his military obligation from September 1942 until January 1946, he returned immediately (three days after his discharge) to Lake City on January 21, 1946 as a Grade 2, Government Clerk. Today he is the Civilian Executive Assistant * * * always directly, always leading * * * and always showing us the way! That crisp walk, stern face and tassel of white hair are a familiar sight to all at Lake City, and those who know him best know that beind that stern face there's a twinkle in those eyes. The years have served him and this community well, as he has gone about his business of assisting in the operation of Lake City. Dale Pollard Drive stands as a reminder of 46 years of dedication!"

FRANK GEHRY: WINNER OF PRITZKER PRIZE, HONORED BY UNIVERSITY OF JUDAISM

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. LEVINE of California. Mr. Speaker, I rise today to congratulate my friend and constituent Frank Gehry who was recently awarded the prestigious Pritzker Prize for his outstanding architectural talents. His work will also be recognized by the University Women of the University of Judaism's 23d Annual Author-Artist Luncheon on June 13.

Many of the best examples of Frank Gehry's work may be found in the Los Angeles area. Over the past 25 years, he has left his mark on a wide variety of buildings, from private homes, to skyscrapers, and from museums to factories. His unique style is particularly notable for its artistic, rather than purely functional, treatment of those structures, and shows the strong influences of contemporary artists. Indeed, as the award itself put it, his work "emphasizes the art of architecture."

Christopher Knight's Los Angeles Herald Examiner article which announced Frank Gehry's selection for the 1989 Pritzker Prize, describes both the award and his work in greater detail. I commend it to my colleagues' attention.

The article follows:

FRANK GEHRY WINS 1989 PRITZKER PRIZE

(By Christopher Knight)

Among the manifold pleasures of living in the heart of Hollywood is having the Frances Howard Goldwyn Regional Branch Library as my neighborhood biblioteca.

You see, the Frances Howard Goldwyn Regional Branch Library was designed in 1983-84 by the architect Frank O. Gehry, he of chain-link fencing fame. To those like myself, for whom art is a habit of more than passing fancy, Gehry operates as an artist's architect, which adds distinctive charms to the abundant pleasures of using his buildings.

It's hard to say whether Gehry is exactly thought of as an artist's architect by the six jurors who had the great and good wisdom to bestow upon him the weighty Pritzker Architecture Prize, which is being announced today in Chicago by the Hyatt Foundation, sponsors of the accolade. I suspect he is. The 60-year-old architect, who was born in Toronto but who became a U.S. citizen in 1950 while a student at USC, has never been shy about declaring the importance to his work of contemporary art and artists.

They've helped shape his thinking about how building forms should arise. From the celebrated sculptors Donald Judd and Claes Oldenburg, to any number of artists in the burgeoning milieu of Los Angeles, where Gehry has long based his architectual practice, he has gleaned much insight about space, imagery and visual language.

The Pritzker Prize citation—which will be presented to Gehry at formal ceremonies in Japan later this month, along with a handsome bronze medallion and an even more attractive check for $100,000—is notable for an almost total absence of commentary about the influence of other architecture on his work and for the plethora of references to the visual arts.

As reported by the estimable Bill N. Lacy, secretary to the jury, the citation is rather pointed in its declarations:

Gehry's is "a sophisticated and adventurous asethetic that emphasizes the art of architecture."

His body of work "reflects his keen appreciation for the same social forces that have informed the work of outstanding artists throughout history, including many contemporaries . . ."

His buildings are "juxtaposed collages of spaces and materials . . ."

He works with "a sureness and maturity that resists, in the same way as Picasso did, being bound either by critical acceptance or his successes."

The italics are mine, but the sentiment seems clear. It may be too much to suggest that the jury was trying to send a larger message through its selection of this particular architect, who emphasizes a cross-disciplinary approach. Still, at a time when a high priority is being given to the difficult question of collaboration between architects and artists, the jury has singled out for applause a supremely gifted architect who for 25 years has been happy to raid the minds of artists.

(This year's jury, incidentally, was composed of Giovanni Agnelli, chairman of Fiat in Torino, Italy; J. Carter Brown, director of the National Gallery of Art in Washington, D.C.; Ada Louise Huxtable, former architecture critic of the New York Times; architect Ricardo Legorreta of Mexico City; 1982 Pritzker laureate Kevin Roche of Hamden, Conn.; and Jacob Rothschild, chairman of the board of trustees at London's National Gallery of Art.)

What has Frank Gehry learned from art and artists? I'm not so sure about Picasso, but some things are obvious.

The 1964 Danziger Studio on Melrose Avenue, which was Gehry's first important building, is a sculptural, stripped-down, minimalist form that seems fully of its moment. The hardware store materials for which he is famous—chain-link fence, corrugated sheet metal, plain old two-by-fours—arise from a network of impulses shared by assemblage and pop art. The row of false classical columns that march in front of the "mock court" on the campus of his much-lauded Loyola Law School (1981-84) are a witty popism. The huddled clauster of independent rooms, which collectively make up the celebrated Winton Guest House (1983) in Wayzeta, Minn., forms a tender composition reminiscent of nothing so much as a still-life painting by Giorgio Morandi.

Other relationships to art and artists are more difficult to describe, because more profound. Gehry's own house in Santa Monica—a notorious structure in which the architect started with an ordinary bungalow from the '20s, then built a second structure around it, much to the dismay of certain neighbors—is a case in point.

The kitchen/dining room of the house, an open-plan format that Gehry added on to the original bungalow, stands where the driveway sued to be. (Its floor is asphalt, reminding you of the recent history of the place; you can clean it with a garden hose.) One interior wall of this long room, which is still covered in clapboards, was formerly the exterior wall of the house. So, the living-room window now looks out onto the kitchen/dining room, and vice versa.

I once sat in this disarming room for a very long while before it finally occurred to

me why the place exerted such an extraordinarily vivid presence. Suddenly, I realized I was sitting outdoors and indoors at one and the same time.

Particularly in its domestic spin, this unnerving yet viscerally understandable experience owes a clear debt to Oldenburg-ian wit. Meanwhile, the simultaneity of inside-and-outside space arrives from a deep understanding of the radically disruptive sculpture of Donald Judd, in which the traditional separation is replaced by a seamless unity of interior and exterior.

I see I have managed to ensnare Gehry completely within a web of visual art here. Certainly, had pop art and minimalism never been, his architecture would be rather different than it is. But Gehry is an artist's architect, not an architect's artist. Even though it's hardly my area of expertise, at least a nod must go to architectural precedent and practice in understanding the fundamental importance of his work, and of its worthiness for the highest acclaim.

For what is Frank Gehry's house in Santa Monica but the architectural apotheosis of California's vaunted indoor-outdoor living? To be there is to physically inhabit a disjunctive image, which is neatly framed by the suburban picture window. It may not look it at first, but the Gehry House stands on a firm foundation whose bricks include historic haciendas and suburban tract housing, as well as the rather loftier aspirations of Richard Neutra and Rudolph Schindler.

The house also stands on principles derived from Russian constructivist sculpture and architecture early in the 20th century. But, let's not get into that, except to note that it represents a moment when heady attempts were being made to dismantle barriers between supposedly independent disciplines.

Instead, let's look forward with blissful anticipation to the building of his design for the $100 million Disney Concert Hall on Bunker Hill. And, let's gladly add Frank O. Gehry's name to the distinguished list of 11 previous Pritzker laureates, among them Philip Johnson, Luis Barragan, James Stirling, I.M. Pei and Richard Meier. It fits.

WHERE TO SEE GEHRY'S ART

As Frank O. Gehry's reputation has grown in the last 25 years, he's designed a wide variety of buildings in a diverse geographic area. He's built houses, restaurants, shopping centers, schools, museums, factories, and skyscrapers in cities as far-flung as Ames, Iowa, and Kobe, Japan.

Still, much of Gehry's best work is in L.A. Here is a list of a dozen structures Gehry has designed in the past quarter-century, including renovations of existing buildings:

Danziger Studio and Residence, 7001 Melrose Ave. (1964).

Faith Plating Co., 7141 Santa Monica Blvd. (1964).

Hollywood Bowl Renovation, 2300 N. Highland Ave. (1970-82).

Santa Monica Place, Colorado Avenue at Fourth Street (1973-80).

Gemini G.E.L., 8365 Melrose Ave. (1976-79).

Cabrillo Marine Museum, 3720 Stephen White Drive, San Pedro (1979).

World Savings Bank, 10064 Riverside Drive, North Hollywood (1980).

Loyola Law School, 1441 W. Olympic Blvd. (1981-84).

California Aerospace Museum, Exposition Park (1982-84).

The Temporary Contemporary at the Museum of Contemporary Art, 152 N. Central Ave. (1983).

Frances Howard Goldwyn Regional Branch Library, 1623 Ivar Ave. (1983-84).

Edgemar Shopping Center, 2437 Main St., Santa Monica (1988).

Mr. Speaker, I would like to ask my colleagues to join me in recognizing Frank Gehry's fine work, and congratulating him for being selected for this year's Pritzker Prize.

THE FSX DEAL

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. SMITH of Florida. Mr. Speaker, I take this opportunity to voice the deep reservations I have about the proposed plan to codevelop a fighter plane with Japan, the FSX deal.

While it is true that in the past we have had "kit-form" coproduction with Japan for other weapons systems, we have never taken it to the point of research and development, especially the latter. I honestly believe that we are rushing into this deal before we have had ample opportunity to totally evaluate the cost/benefit ratio.

Some involved in this debate mention the economic benefits that we will derive. As the deal stands presently, United States firms involved in the project stand to gain 40 percent of the economic benefits derived from the program, or approximately $2 billion of the $5.2 billion that Japan is putting into the production end of the project and $480 million of the $1.2 billion that Japan is putting into the development stage of the program. I fail to see how big a dent this $2.480 billion will have in our trade deficit with Japan, a deficit that is upward of $50 billion annually. The bottom line is that this deal does not represent as large a piece of the total economic pie as some would believe.

I am further troubled by certain technology issues associated with this deal. First, I have to question what amount of technology we will receive from the Japanese that we do not already possess. Second, should the Japanese develop some new form of technology, I am troubled by what flowback mechanisms are in existence to ensure that we will benefit from this technology. Finally, I am greatly distressed at the possibility that Japan will gain the technology to threaten the lead that the United States has in the commercial and military aerospace industry.

Until these questions are sufficiently researched and answered, I will continue to harbor the doubts I have expressed. I urge my colleagues to exercise the most careful discretion in trying to reach a decision about the FSX. There is too great a risk to the United States economically and militarily to be hasty in our decision.

TRIBUTE TO THE UNITED BLACK FUND 17TH ANNUAL VICTORY LUNCHEON "EMPOWERING OUR COMMUNITY: TAKING CONTROL"

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. DELLUMS. Mr. Speaker, I once again rise to enthusiastically salute the excellent service provided by the United Black Fund. On June 2, 1989, the United Black Fund will sponsor the 17th Annual Victory Luncheon which celebrates the successful United Way/United Black Fund Partnership Campaign. This year's theme "Empowering Our Community: Taking Control" is not only appropriate, but also timely.

The United Black Fund under the leadership of my good friend, Dr. Calvin W. Rolark, has become a beacon of hope for the citizenry of Washington, DC. The United Black Fund not only funds badly needed programs, but also offers guidance for today's concerns through the workshops offered at the luncheon. I am particularly impressed with the topic selection of this year's workshops, which gives hope to the future.

As we know, substance abuse is a major problem facing our community and the Nation. We, as leaders, are looked upon to stimulate discussion and facilitate answers to the burning questions of today. Therefore, I definitely see the need to examine society's contribution toward substance abuse. Over 20 years ago, the Kerner Commission predicted that as a result of our Nation's policy of benign neglect, our communities would suffer greatly. Our communities are indeed suffering.

It is imperative that we continue the present dialog and continue the actions in ridding our communities of the deadly menace called drugs. It has only been through collective action that we as a people have been able to overcome insurmountable odds in the past. We must continue to be vigilant. To the guests at the luncheon—we have a responsibility to ensure a better nation for our children and their children. I applaud your presence at the luncheon, but also ask that you not give up the struggle—I join you in making this a better world.

EDUCATION: RAISING AMERICA'S GRADE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. PORTER. Mr. Speaker, Secretary Cavazos recently released the Department of Education's State education performance chart.

Despite greater financial commitment to elementary and secondary education, we are making almost no progress in student performance. Although we spent close to $200 billion last year, graduation rates improved less than 2 percent over 1982.

I was surprised to learn that between 1982 and 1988, teacher salaries increased by over 20 percent in real terms. Per pupil expenditures, which are higher here than in Germany or Japan, increased by over 26 percent in real terms. But I wasn't surprised to learn that for that same period, SAT scores improved by only 11 points, and ACT scores improved by 0.4 of a point.

These statistics suggest that more money is not the answer. The answer is accountability. Teachers, administrators, students, parents, and communities must all participate in the educational process. Goals must be set, progress measures, and individuals held accountable.

Mr. Speaker, the Secretary of Education tells us that, "as a nation our educational performance is merely average." I am not willing to settle for average, and neither should this Congress, nor the American people.

CELEBRATING THE 100TH ANNIVERSARY OF GRANT ELEMENTARY SCHOOL

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. BROWN of California. Mr. Speaker, on May 10, 1989, Grant Elementary School in Riverside, CA, is celebrating its 100th anniversary. I ask my colleagues to join me today in saluting the administration, teachers, students, and parents of Grant Elementary on the school's centennial.

The original Grant School was built from the first bond money voted in its district. Six acres were purchased at the corner of 14th Street and Walnut in Riverside for the princely sum of $7,500. The school itself was built for $53,295 and opened in 1889 as Riverside's first major school. The school opened with 400 students, accommodating both elementary and high school students. It was Riverside's first high school and first junior high school. In June 1890, the first Grant School graduates received their high school diplomas. This class consisted of seven students: four girls and three boys.

Grant School's structural design was considered the most outstanding of its time in California. Unfortunately, an earthquake in 1933 resulted in so much damage to the original building that it had to be torn down. The present structure, designed by G. Stanley Wilson, one of the architects of Riverside's historic Mission Inn, was built in 1935 with the help of Work Project Administration funds. Grant School was designated a cultural heritage landmark in 1978, in recognition of its historical significance.

In the past 100 years Grant School has brought pride to its graduates and to the community of Riverside. I join our community in saluting a century of excellence at Grant School.

LEGISLATION AMENDING THE ARCTIC RESEARCH AND POLICY ACT

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. YOUNG of Alaska. Mr. Speaker, I rise today before my colleagues in the House of Representatives to introduce legislation amending the Arctic Research and Policy Act of 1984. The bill is designed to improve and clarify provisions within the act.

For the past 5 years, the Arctic Research and Policy Act [ARPA] has proved to be an extremely valuable mechanism by which scientists and scholars can analyze the growing strategic, economic, and scientific issues unique to the Arctic region. The exploration and development of natural resources along with advancements in military technology during the mid-1980's has clearly transformed the Arctic region into one of the world's most active and vital areas of scientific research for both the United States and the Soviet Union.

Recent events within Alaska have dramatically underscored the need for greater knowledge of the Arctic ecosystem. For example, the Arctic provides the greatest single concentration of food harvested for public consumption; the fishery resources of the North Pacific, North Atlantic, and the Bering Sea. This is merely one of many critical issues which deserve greater attention and analysis.

Since the implementation of the ARPA, significant recommendations have been made by the U.S. Arctic Research Commission, the National Science Board, and the Polar Research Board of the National Academy of Sciences. However, some technical and administrative modifications to the current act are needed to improve its effectiveness. For instance, this legislation offers amendments to the ARPA in order to expand the Arctic Research Commission from five to seven members, and require Federal agencies to actively respond to recommendations put forth by the Commission.

TRIBUTE TO NICOLE SMITH

HON. PETER SMITH

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. SMITH of Vermont. Mr. Speaker, it is with great pleasure that I rise today to recognize a very outstanding citizen of Rutland, VT. I am referring to 14-year-old Nicole Smith, whose alert actions may have saved the life of an elderly woman. Nicole, a very admirable community member, has been selected as the first recipient of my Outstanding Citizen of the Month Congressional Award for the State of Vermont.

Nicole is a student at Rutland Junior High School and she holds a job as a newspaper delivery girl as well. It was during one of her usual early morning deliveries when Nicole noticed that 86-year-old Ruth Conlon had not picked up her newspapers or mail. There are some people who might not have noticed anything out of the ordinary, but Nicole sensed that something was wrong and notified her mother, who in turn informed the police of a possible problem. When the police arrived they found Ruth Conlon on the floor, semiconscious, bruised, and nearly dehydrated. Apparently, she must have fallen, and it is believed that she had been in this condition for about 2 days. If Nicole had not acted as quickly as she did, there is a strong possibility that Mrs. Conlon may have died.

Mr. Speaker, I initiated the Good Citizen of the Month Award to honor those Vermonters whose selfless deeds prove inspirational to society, and I can't think of a more fitting person than Nicole Smith to be the very first recipient of this award. On behalf of the citizens of the State of Vermont, I invite you and my fellow colleagues, to thank Nicole and wish her the best of luck for a bright future.

THE CONDITION OF INTERNATIONAL AVIATION

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. McEWEN. Mr. Speaker, today I would like to share with my colleagues a recent speech which Bob Crandall, chairman and CEO of American Airlines, gave at the American Enterprise Institute Conference. Mr. Crandall discusses the condition of international aviation today, as well as its prospects for the future—he offers criticisms of the problems that may be encountered and possible alternatives to achieve a more dynamic industry. I include Mr. Crandall's entire address for the RECORD:

LET THE MARKETPLACE PREVAIL

Good afternoon, ladies and gentlemen. I'm sorry I wasn't with you earlier today—Dan Kasper tells me some of the discussion was pretty lively. Hopefully, the subject of international aviation will be the basis for a good dialogue this afternoon.

To get that dialogue under way, let me offer this proposition—the international aviation system is in chaos, and it's getting worse! Today, I'd like to suggest some alternative approaches which—utopian as they may sound—are in my judgment perfectly practical and would offer all of us—and the world's travelers—a far brighter future than today's policies seem likely to yield.

In one respect, at least, the aviation story is a good-news tale: Demand for airline seats is strong—very strong! All over the world, more and more people want to fly.

In a service-oriented world hungry for growth, jobs and wealth, you'd think governments would be going all out to exploit that demand by promoting aviation growth—but just the opposite is true. Around the world, aviation is hobbled. Capacity is short. Competition is constrained—and growth is stunted.

There's a distinct similarity between where we are today in international aviation and where we were a dozen or so years ago in domestic aviation. I'm sure many of you remember that world—before we got the regulation monkey off our backs. Carriers would send the CAB pound after pound of specious exhibits, diligently argue points of

minutia—and hope against hope they'd win a little something.

Eventually—sometimes—the omnipotent regulators would actually make a decision, most often a minuscule decision—and the chosen carrier would treat it like a major victory!

Like Des Moines. It took American Airlines 10 years get the right to fly to Des Moines—back in 1976! Since then, we've exited and entered twice—without anyone in Washington even noticing!

International aviation is still in what I call the Des Moines mode. Despite the fact that on many of the world's air routes load factors run in the 70's and 80's, new competitors can't add service. Governments tell airlines where they can fly, when they can fly, what equipment they can use and what they can charge. And more often than not, they say "no" to any new idea!

In today's international aviation world, the really intense issues of competition are things like—

Whether we will or will not put teeny TV's in each seatback;

Whether we will or will not use X or Y brand of caviar;

Whether we should or should not put after shave in the amenities kit;

And, whether our business-class seat is or is not two inches wider than yours!

More and more we are falling into the old airline habit of competing for the right to charge our customers $200 for $100 worth of goods—and cloaking the masquerade in the guise of quality service!

Our Government says it likes competition—but those things, ladies and gentlemen, do not constitute competition! Competition is frequency—competition is price—competition is daily service, everywhere. Competition drives the market, overcomes restraints, tests the limits of the possible—and creates opportunities galore!

If all this is true—and I think it is—how did we get into this mess? And how do we get out of it?

To some considerable extent, we are in a mess because the world's political leaders do not understand aviation's immense economic promise—and have failed to provide the physical environment needed to accommodate growth. Few, if any, governments—including our own—have carefully thought-out aviation policies. The United States of America, ladies and gentlemen, has no national aviation policy. That ought to be a high priority for the Bush administration—and I'm glad Sam Skinner has gone to work on it.

This lack of government policy—around the world—has had many adverse consequences, not the least of which is an acute—and growing—shortage of aviation infrastructure. Take the issue of air traffic control.

The U.S. has had, until recent years, a first-class air traffic control system—it doesn't anymore! Ours is still better than most, but it's woefully inadequate for today's traffic demands—and certainly inadequate for future growth. Abroad the problem is far worse. In Europe, there's Eurocontrol—and lots of country-specific air traffic control systems—together constituting a limited system often crippled by work stoppages about which governments seem unwilling to take decisive action.

There are lots of other constraints as well. There are far too few airports and runways—and the result is that slot controls, and rationing, are in place at many airports around the world.

And that's not all. Huge areas of the Southwest are off limits to civilian aircraft—to accommodate a very few military planes whose use of the space is non-intensive to say the least. In West Germany, our military's extensive use of Frankfurt International Airport is a terrible hindrance to civil aviation, is dangerous, and is a growing diplomatic concern.

With these and other problems so seemingly blatant, have the world's political leaders ever sat down to discuss—let alone solve—the aviation infrastructure crisis? Not to my knowledge. Indeed, most senior political leaders seem blissfully ignorant of the entire subject—which can only mean they haven't focused on aviation's growth potential—and the lost opportunities that untapped potential represents! I'd like to see the Bush administration take the lead in opening their eyes—by acknowledging the critical contribution that aviation makes to the global economy, and by according to the international aviation negotiating process the high-level attention it deserves.

Our problems are also partially a consequence of the fact that international aviation still operates under the terms of a complex web of agreements stemming from the International Civil Aviation Conference at Chicago in 1944—and I think we all must admit that 45 years ago, no one could possibly imagine the world of the 1990's.

Some argue that many old agreements are heavily weighted in favor of the U.S. Since all have been updated many times and since U.S. market shares are underwhelming by any measure, I would disagree. And if the original agreements did favor the U.S., it was because they reflected the economic realities of the times.

There are lots of other agreements which are anything but in U.S. interests—which are, in fact, heavily weighted in favor of our trading partners.

These latter agreements date from the late '70's, when the U.S. government—to its credit—bought into the gospel of deregulation. Washington decided it was so great that we should export it—whether the other guys wanted it or not. The U.S. was right to push liberalization—but wrong to attempt to implement it via agreements which swapped hard rights for soft ones. It would have been better to gain a consensus in favor of greater liberality before giving too much away.

Like it or not, today's agreements are there—and if we want change, we must start from the base they represent. We can neither sweep away the past—nor declare existing agreements irrelevant. Instead, we must find a way to reach new agreements—and we must have a new policy framework to hang them on.

As a first step toward creating that new framework, the U.S. should launch a real effort to achieve a consensus among our aviation partners—a new consensus tipped toward liberalization—and growth! Such a consensus is—first—in everyone's long-term interest, and—second—consistent with the competitive orientation of the deregulated aviation marketplace we advocate domestically.

As a first step, we must find a better way to measure the overall economic impact of civil aviation. We need an economic model that will enable all parties to an aviation negotiation to understand the macro-economic impact of proposed changes.

Consider, if you will, just one of many current discussions. Alitalia would like new U.S. routes, but is unwilling to let any U.S. carrier compete with its monopoly between Chicago and Rome/Milan—despite the fact that our bilateral explicitly permits it. The Italian Government is taking its advice from Alitalia and is clearly worrying more about its flag carrier than about the vigor of the Italian economy. If more people could conveniently travel to Italy, more dresses and shoes would be sold, more hotels would open, more restaurants would spring up, more gondoliers would be employed—and the entire Italian economy would benefit.

And if the Italians want to fly to Miami, to Atlanta—even to DFW—why not let them? What are we worried about? More competition?

In my opinion, we can't get agreement because neither side understands the overall impact of more service between Italy and the United States. Creating such an analytical model is not a trivial task—but neither is it impossible. The impacts are known—it's time they were quantified.

If governments were able to do accurate cost/benefit assessments, I think they would all see that while liberalization will inevitably disgruntle some existing interests, it will—in the long run—do far more good for far more people than today's protectionism. It's called free-market economics.

Second, we should urge all governments—our own included—to worry less about achieving perfectly "balanced" agreements. In any good business deal, all parties are winners—but not necessarily equal winners. The trick is to be sure that no one loses. We ought to stop worrying about a perfect balance of direct aviation benefits in every negotiation. In my view, if economic studies show that both countries will benefit—the deal ought to be done!

We also need to worry more about results and less about principles. For example, some of our trading partners argue that the U.S. should allow cabotage as a way of balancing fifth freedom rights granted—and paid for—long ago. Some U.S. interests, at the other extreme, take the view that cabotage is sacrosanct.

Neither view is realistic. Neither focuses on results. Both are long on principle and short on logic.

Those who argue that cabotage should be granted as a way of redressing ancient wrongs would be unlikely, in their personal lives, to make a voluntary second payment for an asset acquired years ago. And those who argue that cabotage—or any other subject—is non-negotiable—have clearly forgotten that the best way to end a discussion is to begin with the word "never."

The point is that by either making unrealistic demands or starting with an automatic "no," aviation leaders preclude progress.

Let's consider two current situations. First, if we are ever to have a fully developed North American aviation market, we must give the Canadian carriers broader competitive opportunities. Would some limited form of cabotage really be worse than the absurd limitations which constrain us today?

Second, we cannot seem to make any progress in the long-running U.S.-U.K. discussions—the two sets of negotiators say they can't find a balanced agreement. Yet what we have today is anything but balanced. British Airways is getting substantial benefits by using its many points of entry in combination with a code-sharing deal with United—but since it refuses to bless entry by U.S. carriers, and since the U.K. Government takes its cues from BA, U.S. carriers

aspiring to serve Britain are left with no recourse.

Wouldn't we be better off to prohibit code sharing—which is a consumer subterfuge at best—and trade limited cabotage rights . . . which BA wants and would clearly be good for it and for its country . . . for broader entry into the U.K.—which would be good for U.S. carriers, the U.S. and the U.K.?

These are obviously complex questions—and since I have neither perfect insight nor the model needed to evaluate the economic trade-offs, I can't even say precisely what terms I'd be willing to accept. I do know this: We must find some way to break the endless deadlocks that characterize today's environment. We must look at broader measures of gain than we consider today.

There is another step I think the U.S. should take which is of a fundamentally different character—and that's to insist that other governments honor the agreements they've already made.

Again, let me offer an example. Two years ago the U.S. made a deal which gave Swissair access to Atlanta in exchange for the Swiss Government's agreement that U.S. carriers would have the right to do their own ground handling and have their own customer service counters at Zurich and Geneva. Last year, the U.S. promised the Swiss an additional gateway in exchange for a number of things. One of those things, strangely enough—once again—was Swiss Government agreement to let U.S. carriers do their own ground handling and have their own customer service counters at Zurich and Geneva. Swissair hopes to launch service to its new gateway—which is Los Angeles—on November 1—despite the fact that we still don't have our own people or counters in Geneva . . . and won't have by November 1!

The past masters of this game are the Japanese. You've all heard a great deal about how new U.S. carriers can't get authority to serve Japan. The irony is that the original 1952 agreement between Japan and the U.S. permitted either side to designate multiple airlines. But when Washington certified United for Seattle-Tokyo Service in 1978—it took 4 years for the Japanese Government to accept it.

Since then, the U.S. Government has tacitly recognized that Japan will only permit new service in return for new concessions. So in 1985, in exchange for very limited Tokyo authority for American and Delta, the U.S. gave Japan additional routes—as well as permission for all Nippon and Nippon cargo to begin U.S. service.

My complaint is not that we gave so much—but that we got so little! Why not, now that both countries have multiple carriers, create open skies for all the airlines of both countries?

The failure of foreign governments to honor existing agreements puts the U.S. Government in the position of actively sustaining, abroad, the monopolies and duopolies it denounces here at home. It is ludicrous, for example, to get all lathered up about a hub monopoly in Detroit—to pick just one out of the air—while actively sustaining a much more important, much bigger, far more lucrative and vastly more anti-competitive U.S. duopoly in Tokyo.

Competition—a free marketplace—creates far more opportunities—for all—than monopoly ever will. To maximize those opportunities, the Bush administration must convince other countries to live up to the aviation agreements already on the books—and to accept its leadership in working toward a far more liberal international aviation regime.

In that effort, the U.S. faces two special problems. The first is that we will probably have to be among the first to accept win-win agreements in which the other side gets more than we do—because in many cases, others have little left to give. The Scandinavians, for instance, seek additional U.S. rights. since they have little with which to barter, there is little question but that they will get more routes out of any new agreement than we will.

Washington's second leadership problem stems from one of our great strengths—our highly competitive airline industry. What other Government gets so much conflicting advice from its own aviation community?

While these difficulties are real, they are political—and can thus be overcome if those who lead the Bush administration's aviation efforts have both clarity of vision and strength of will—and if the aviation industry will look beyond the end of the next quarter in deciding what to support and what to oppose.

As I said at the outset, airline seats are in great demand—but our marketplace is out of kilter. The aviation industry has far more to offer than it now provides. If the world wants what we can give, the system simply must change—and change dramatically.

To summarize: the Bush administration should take the lead:

First, to create the air traffic control, runway and airport capacity we need to accommodate a truly competitive system.

Second, to revise—slowly but surely—today's constraining agreements in favor of a broadly liberal regime built on a framework of macro-economic analysis . . . balanced but not necessarily equal agreements . . . and practical rather than theoretical underpinnings—in short, a market-driven, deregulated international aviation system.

And finally, to assure strict compliance—by every government—with both the letter and the intent of existing and future aviation agreements.

These steps will, over time, create new opportunities for all. An Optimized international aviation system is essential to world economic growth. We should all do everything we can to free aviation from the fetters of economic protectionism—and the perils of diplomatic dithering! Let the marketplace prevail!

Our country—our industry—and the world—deserve no less!

A TRIBUTE TO CHARLES CLAYBAUGH

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. CARDIN. Mr. Speaker, I would like to call to the attention of my colleagues an outstanding citizen of Baltimore, Mr. Charles Claybaugh.

Mr. Claybaugh has dedicated himself to serving mature citizens in the Baltimore area. With his wife Leona at his side, he has worked tirelessly on behalf of our seniors to make their lives easier and more joyful.

He has been recognized as a leader in the community. Mr. Claybaugh is currently president of the Maryland Senior Citizens Hall of Fame, Inc., and a past president of the Maryland chapter of AARP, as well as past president of the Baltimore County Association of Senior Citizens Organizations [BCASCO].

Chuck Claybaugh has received many honors and accolades for outstanding service to his fellow seniors. I would like to add my voice to theirs, and offer my sincere appreciation and respect for a job well done. I urge my colleagues to join me today in honoring Charles Claybaugh.

VIEWS ON SECTION 89

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. LAFALCE. Mr. Speaker, I recently received a thoughtful letter from Robert P. Fine, Esq., concerning section 89 of the Internal Revenue Code and its impact on employers.

I believe that Mr. Fine's points warrant careful consideration as we seek to find workable solutions to the problems which employers have been having with section 89.

Accordingly, I ask that the letter be printed in the CONGRESSIONAL RECORD. I hope that our colleagues will have an opportunity to read Mr. Fine's remarks as they contemplate this important issue.

Mr. Fine's letter follows:

HURWITZ & FINE, P.C.,
ATTORNEYS AT LAW,
Buffalo, NY., April 24, 1989.

Congressman JOHN J. LAFALCE,
Chairman, Small Business Committee, House of Representatives, Washington, DC.

DEAR CONGRESSMAN LAFALCE: Hurwitz & Fine, P.C. represents a significant number of business entities of varying sizes. We have researched Section 89 of the Internal Revenue Code and urge the repeal of this Code provision.

We commend you on your efforts to address the problems created by this onerous tax measure. For the reasons set forth in this letter, we continue to believe that Section 89, even if simplified by current compromise proposals, will remain burdensome for employers and counterproductive to the achievement of its intended goals.

The currently suggested compromise measure would replace the complex multi-tiered discrimination test in the current law with a "simple" but still multi-tiered structure. While the current law's difficult scheme of "benefit valuation" will be abandoned under the compromise proposal in favor of a test tied to employer-paid premiums, businesses will still be faced with difficult testing concepts making compliance excessively burdensome. Employers will be forced to deal with complicated regulations governing the definitions of highly and non-highly compensated employees, the definition of what will constitute a plan for testing purposes, the treatment of "leased" and "former" employees, and the concept of aggregation where a business operates from more than one location. Employers nonetheless must continue to satisfy the complex, detailed qualification rules governing plan documentation. This is a significant burden for employers in the area of health and group term life insurance, an area in which costs already have escalated dramatically because of rising insurance premiums.

The implementation of discrimination testing and compliance with plan documentation rules will contine to be a costly, time-consuming process even under the compromise proposal. Based upon discussions with our clients and others in the businesss community, we believe that many employers simply will elect the less burdensome alternative of including the excess benefits in income of highly compensated employees rather than extending equivalent benefits to non-highly compensated employees. The proposed revisions, therefore, will not foster the law's goal of facilitating the extension of benefits to previously uninsured members of the labor force.

The compromise proposal apparently contemplates retention of the plan documentation rules. These rules alone constitute an incentive for many small employers to eliminate company-wide health and group term life insurance plans. Since highly-compensated employees will generally be in a better position to demand compensation for the loss of fringe benefits, the retention of Section 89, even in modified form, will result in an increase in discrimination in many businesses.

We have witnessed, over the past several years, a trend of increasingly restrictive nondiscrimination provisions in other areas of employee benefit programs, such as qualified retirement plans. Frequently, we find the employer's response to be an elimination of the benefit program entirely. Thus, the rank-and-file employees actually lose what they most seek.

Finally, those employers who continue to provide group plans may be forced to seek assistance from outside professional advisors to assure compliance. We believe that the cost of complying with Section 89 may outweigh the additional revenue obtained by the IRS. Even if Section 89 is modified, it may be a misallocation of societal resources.

We hope that these views will receive full consideration at the House Ways and Means Committee hearing to be held on May 2, 1989, and at the Senate hearings on May 9, 1989. We urge full repeal of Section 89.

Very truly yours,

ROBERT P. FINE.

JUST SAY NO—TO THE FSX DEAL

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. GAYDOS. Mr. Speaker, last week, the Christian Science Monitor ran a cartoon, showing President Bush, after signing the FSX deal with stars-and-stripes-clad Japanese, saying "Don't worry. We still have our secret decoder ring."

Well, that's about all we have left and it's time we started worrying. Because, Mr. Bush, everything is not "okey-dokey."

We're preparing to give away vital American technology. The F-16 technology that cost the American taxpayers $7 billion will be Japan's for $480 million—one-eighth—of that amount. Now, I have to give credit where credit is due: The Japanese are "smart shoppers."

But we're losing too many markets to Japanese industry in critical areas. We almost lost our steel industry, and our automobile and machinery industries have suffered greatly.

Today, only one American company makes televisions, and I don't have to ask anyone where we are getting our VCR's and stereos.

We've also lost ground in the semiconductor and computer chips industries.

And, here we go again selling our economic future and national security for a night out on the town.

The Japanese say they want the best possible aircraft now for their defense, but the earliest they'll have the FSX is 1997.

They could buy the best fighters in the world, the F-16, today at roughly one-third the cost of developing the FSX, even with our help.

We need to know where to draw the line in agreeing to the demands of our trading partners. At some point, we have to say no more. We must say no to the FSX deal. Because if the FSX deal goes through, there won't be any industry left for the Japanese to conquer.

HONORING ALEX BODNARIUK

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. HERTEL. Mr. Speaker, I would like my colleagues to join me in acknowledging the retirement of Alex Bodnariuk, business manager of the the Roofers' Union, local 149. His wife Delores, and two children, Alex Jr., and Andrew, along with much of the labor community join us in paying tribute to Mr. Bodnariuk.

Having begun his long union career in 1952, Mr. Bodnariuk has been heard saying that he is retiring where most roofers spend their lives, on top. He began his administrative post with local 149 in 1971 and has proceeded to influence many individuals with the local. His peers have described him as a stalwart and stabilizing force in the building trades. He has also been noted as a rare individual in the sense that once his decision is made, after a thorough review, he will not amend the decision. With this strength, Mr. Bodnariuk lets his audience know where he stands.

Through a strong sense of dedication, Mr. Bodnariuk has served as an integral participant of many local councils. Both the Michigan and Detroit Building Trades Councils along with the Michigan Maritime Trades Port Council have benefited as a result of Mr. Bodnariuk's persistence.

Mr. Bodnariuk has made many lives better through his professional efforts. I am sure his retirement will be as rewarding as his career has been.

VOCATIONAL EDUCATION

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MARLENEE. Mr. Speaker, I was pleased yesterday to join over 400 of my colleagues in passing H.R. 7, the reauthorization of the Applied Technology Act, which will provide $1.4 billion in vocational education funding for the next 5 years. As a strong advocate of vocational education, I was delighted to see this strong bipartisan vote of support for H.R. 7.

H.R. 7 was a positive major rewrite of Federal vocational education programs, which streamlines Federal aid and gives more power to the State to allocate the funds according to its needs. The legislation reorganizes the formula under which funds are allocated to school districts and community colleges to focus and target Federal aid to serve the poor, the handicapped, and students with limited English speaking skills.

The bill also provides a new "tech-prep" program in which the Federal Government will provide matching funds to support coordination of applied-technology programs between secondary schools and community colleges. The intent of Congress is to encourage traditional vocational education programs to modernize and become more competitive in the international marketplace.

With the pressing need for deficit reduction, I also commend the leadership of the Education and Labor Committee which had the courage to streamline several programs and agencies that deal with vocational education. Every Federal program deserves strict scrunity, even those with overwelming popular support. Included in H.R. 7 are plans to eliminate most set-aside programs, and to establish a new formula to target the most needy students.

This formula allocates grants to secondary schools according to the following priorities: 70 percent based on the number of poor students; 20 percent based on the number of handicapped; and 10 percent based on the total number of students. For postsecondary schools the priorities are: 70 percent of funds are tied to the number of Pell grant and Bureau of Indian Affairs assistance recipients; 20 percent to the number of vocational-rehabilitation students; and 10 percent to the number of students.

To prevent a major disruption of Federal vocational education funds over the next 5 years, I supported the amendment offered by Republican Representative MARGE ROUKEMA of New Jersey that would extend the "hold harmless" provisions to guarantee local education agencies [LEA's] 80 percent of the previous year's funding for next 3 years. In other words, Mr. Speaker, the Roukema amendment protects schools that experience a drop in student enrollment from losing their vocational education funds over the next 3 years. This amendment provides an adequate safety net for many rural school districts that have a dwindling student body.

In addition, H.R. 7 merges the current five State human resources councils, which were required under a variety of Federal education programs, into one, and consolidates the plan and application requirements, which will reduce paperwork hassles. I'm all for efficiency and eliminating redtape, and I was pleased to see the committee adopt these commonsense measures.

Mr. Speaker, we have created a world in which high school diploma no longer prepares a student for today's job market. The Applied Technology Act recognizes the complex

nature of education today and will go a long way toward improving our vocational technology system. I encourage my colleagues to continue to strongly support vocational education, and I hope that my friends in the other body will endorse this legislation.

HONORING STANLEY I. MINCH

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. CARDIN. Mr. Speaker, on May 24, 1989, Stanley I. Minch will be honored by the Chizuk Amuno Congregation for his outstanding contributions to the Chizuk Amuno Congregation in Baltimore, MD.

Stanley Minch has been executive director of the congregation for 23 years. Under his leadership, Chizuk Amuno has grown into one of the most active synagogues in the area. Thanks to his foresight and vision, the Solomon Schechter Day School was founded.

Stanley Minch is one of the lights of the Baltimore Jewish community. No matter how busy, he will always make time for a friend or a congregant with a problem or question. His understanding, consideration, and respect for his fellow man is well-known, admired and deeply appreciated.

I would like to add my voice to the Congregation of Chizuk Amuno when they honor Stanley Minch for all he has done. Thank you, Stanley.

ANNIVERSARY OF THE STATE OF ISRAEL

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. SCHEUER. Mr. Speaker, after 41 years, Theodore Herzl's vision of the Jewish people reunited in Israel continues to flourish.

The realization of Herzl's dream was a miraculous accomplishment.

No other nation in history has returned to its homeland to renew its language and culture after a separation of 2,000 years.

The State of Israel has brought together the heart, soul, and the aspirations of the Jewish people, and provided a safe haven for persecuted Jews throughout the world.

A citadel of freedom and democracy in the Middle East, Israel offers equal citizenship to Arabs, Jews and Christians alike, and has raised the standard of living for all its citizens.

During Israel's short modern day history, Israel has turned her deserts green and developed high tech industries that compete successfully in markets around the world.

This year was also special for Israel because it marked the 10th anniversary of the Camp David accords and the final phase of Israel's return of Egyptian territory.

Although the Arab world has prevented relations between Israel and Egypt from flourishing, the Camp David accords have ended war between Israel and Egypt and planted the seeds of peace.

In addition, Israel's territorial accommodation with Egypt clearly has demonstrated that Israel can and will negotiate in good faith and follow through with her commitments.

All of the concerned parties agree that the status quo in the West Bank and Gaza is painfully undesirable in the short term and totally unacceptable in the long term.

There is no question, however, that an independent Palestinian State, to which the PLO is committed, would be a destabilizing threat to Israel, where only 20 miles stand between Israel's safety and its destruction.

Prime Minister Shamir's recent peace initiative offers the Palestinians in the West Bank and Gaza free democratic elections to produce a delegation for negotiating with Israel.

If the PLO is committed to peace, then they must state this commitment clearly, allow the bulwark of democracy to work in the West Bank and Gaza and offer their hands of help in changing 41 years of Arab rejectionism to clear recognition of Israel.

In advance of such commitments Israel would be foolish to make major concessions which would threaten her security. Israel actions alone cannot deliver peace.

I look forward to the day when there is peace in the West Bank and Gaza and when Israel will be able not only to coexist with her Arab neighbors but also work with them to solve the problems of the region; to clean up the pollution in the Red Sea, to develop a regional water management plan, and to transform much more of the desert into fertile land for peace.

Israel has made miraculous accomplishments as a young nation of 41 years. To all those in Israel and in the Diaspora who help build the land of Israel, congratulations!

CENTENNIAL CELEBRATION OF SAN DIEGO TRUST & SAVINGS

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. LOWERY of California. Mr. Speaker, it gives me great pleasure in recognizing the centennial celebration of San Diego Trust & Savings. I applaud their outstanding contributions to the growth and development of the city of San Diego. Under the guidance of Mr. Thomas Sefton, San Diego Trust & Savings has been recognized as one of the most charitable businesses in San Diego. This kind arm of generosity not only extends to the needy but also to the San Diego Police Department. Today, it can be said that San Diego and San Diego Trust & Savings have both grown to their positions of prominence together.

In 1889, on May 15, Joseph Sefton opened the doors to the State-approved incorporation, San Diego Savings Bank. Sefton's bank rapidly grew with the city of San Diego and our developing Nation. The panic of 1893 soon swept the country closing multitudes of banks; however, San Diego Savings Bank remained open. It is said that Sefton met the throngs head-on and masterfully turned the tides. In 1923, San Diego Savings Bank added a trust department.

Mr. Speaker, please join me in recognizing San Diego Trust & Savings as they celebrate this historic and well deserved event. They exemplify a fine example of what a business can do for a community. With constant support and involvement, they have assisted in making San Diego, America's finest city.

HEALTH CARE FOR VETERANS

HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. HOCHBRUECKNER. Mr. Speaker, eastern Long Island veterans concerned about the decline in their health care services may rest a little easier now that the House of Representatives has voted for a $216 million funding increase. The Bush administration budget contained no real growth for the newly established Department of Veterans' Affairs [DVA]. The DVA was honored with Cabinet status, but no real growth to offset inflation would have resulted in a significant cut for the DVA. Its precursor organization, the Veterans' Administration, had suffered a decade of neglect that had left it standing in a hole at the beginning of each new budget cycle.

Local vets may also take some comfort in knowing that the decision to close building 11 at the VA Medical Center [VAMC] in Northport has been put on hold. In fact, a congressional hearing will be held there on May 15 to consider health care services to our veterans on Long Island.

The United States has 27 million veterans of the Armed Forces. Of the nearly 2 million veterans residing in New York State, there are 155,410 in Suffolk County, and 177,530 in Nassau County, ranking fourth and second respectively in the State. I share the concern of many Long Islanders that difficult times may be ahead for VA hospitals and the veterans who use them. I am working to prevent any further decline in their health care services.

The House of Representatives on May 4 approved a fiscal year 1990 budget which contains a $216 million increase in spending for veterans' health care programs, a $264 million increase in DVA funding. In fact, the DVA was the only agency to receive an increase above levels reported by the House Budget Committee last week. The House budget resolution calls for a $31.2 billion DVA budget with $11.6 billion for DVA medical services.

I am pleased that the House unanimously approved this budget amendment. Through this vote we in Congress recognize and reverse the previous years of budget-cutting on the backs of veterans. In the past decade—through the Reagan years—health care funding for veterans has fallen by the wayside in several rounds of budget cuts, which caused staffing cuts, restricted eligibility for services, and closed medical centers and hospital wards. This deterioration of veterans' health programs must end. We owe a debt of gratitude to our veterans. With these past budget cuts, the administration reneged on the prom-

ise to provide for the health and dignity of veterans.

In real terms, the DVA budget has remained level since 1977, while demand for DVA health care has increased dramatically. This demand promises to continue rising as the veterans population ages. Moreover, medical costs have risen faster than the general pace of inflation, and the DVA has taken on new responsibilities, such as homeless veterans, and veterans with AIDS.

By October of this year, a severe shortfall in VA health-care funding may occur, according to predictions by the House Veterans' Affairs Committee and DVA officials. The committee estimates a $635 million shortfall for the remainder of fiscal year 1989. This shortfall could reach $1 billion to $1.5 billion in fiscal year 1990 without supplemental funds.

The current DVA funding shortfall has affected virtually every one of the 172 DVA hospitals, 226 outpatient clinics, and 119 nursing homes in the Nation, including the VAMC in Northport. The DVA VMAC has 744 beds, a medical staff of 214, nursing personnel numbering 613, and a total work force of 2,000. In 1988, it had 8,582 admissions and 200,000 outpatient visits. As you may know, the VMAC has reported plans to reduce its operating costs to deal with its share of the DVA budget shortfall by closing building 11.

Currently, Congress is considering the dire emergency supplemental appropriation bill for fiscal year 1989. This bill will provide additional funding for those programs which have depleted their funds before the end of the current fiscal year. Included in this bill is $340 million for veterans' medical services for the remainder of fiscal year 1989.

Mr. Speaker, President Bush's proposed budget for fiscal year 1990 for the DVA raises great concerns about the future availability of veterans' medical services. The Reagan administration's final budget proposal and President Bush's budget proposal for fiscal year 1990 both call for deep cuts in funding for health care employees, medical facility construction, and in the number of veterans who may receive DVA health care. In addition, the Reagan/Bush fiscal year 1990 budget proposals requested no new funding for nursing home construction, even though the number of veterans in need of nursing home care is increasing at an alarming rate. In fact, the DVA's top two priorities for hospital construction-renovation were deleted by President Reagan, and President Bush chose not to correct this shortsighted decision.

With veterans accounting for two-thirds of the American male population over age 65 by the turn of the century—over 9 million veterans—I believe that it is imperative that construction of veterans' nursing homes continues to be a top DVA priority.

I urge my colleagues to approve a full supplemental appropriation for the remainder of fiscal year 1989 to address immediate medical needs and to provide adequate funding for DVA medical services for next year's budget. We must oppose the Bush administration proposed DVA cuts to ensure quality medical services for those who served this Nation.

PERSONAL EXPLANATION

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. McGRATH. Mr. Speaker, I was absent due to illness, yesterday, May 9, 1989, hence missing votes taken in the House of Representatives. However, I would like to go on record that on rollcall votes No. 45 and 48, I would have voted in the affirmative on both occasions.

A SALUTE TO PROFESSOR CHARLES GABRIELE, COMPOSER OF THE "CHRISTOPHER COLUMBUS SUITE"

HON. CRAIG T. JAMES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. JAMES. Mr. Speaker, a noted published and recorded composer, Prof. Charles Gabriele, a resident of Palm Coast, FL, has composed "Christopher Columbus Suite," a musical composition to commemorate the Quincentenary Jubilee, the 500th anniversary of Christopher Columbus' journey to the New World.

This beautiful suite of music contains three parts which can be performed separately or together, as a suite. The segments include: "Queen Isabella Pasodoble," a salute to the historical Queen; "New World Natives," vignettes honoring the natives who Columbus found upon his arrival in the New World; and "Christopher Columbus March," a parade march with words.

Professor Gabriele composed "Christopher Columbus March" in 1976 for inclusion in the American Bicentennial parades and to restore the image and history of Columbus in our classrooms nationwide. He composed the additional segments to create a piece suitable for concerts and Columbus Quincentenary Jubilee events.

This beautiful suite can be mastered by high school and community bands, both here and abroad. Excerpts have been previewed in Italy, Spain, and the United States. The full suite will be world premiered in October 1989.

Professor Gabriele is internationally renowned for his "Concertina for Clarinet" and "Ave Maria for Band and Chorus." His patriotic compositions include "Vietnam Veterans March" and "John Paul Jones March."

The 500th anniversary of Columbus' discovery of the New World will be commemorated in 1992. But the festivities will commence in October of this year and continue through October 1993 as part of the largest worldwide celebration in history.

Although all nations were impacted by Columbus' journey, the impact for Italy, Spain, and the United States was far-reaching and everlasting. Events ranging from school pageants to world fairs will take place across the globe as our world pauses to commemorate Columbus' discovery of America.

I salute Professor Gabriele for his beautiful musical creation; a lasting musical tribute to Christopher Columbus and the discovery of the New World.

HONORING RHODE ISLAND'S SMALL BUSINESS PERSON OF THE YEAR

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. MACHTLEY. Mr. Speaker, I would like to take this time to acknowledge an outstanding citizen in my State of Rhode Island, Mr. William Black.

Mr. William Black has been recognized by the U.S. Small Business Administration as Rhode Island's Small Business Person of the Year. In a State where over 97 percent of the commercial activity is performed by small businesses employing 500 individuals or less, to rise from such competition is quite an achievement.

William Black was educated in Rhode Island, at the University of Rhode Island, for which he received a dual BS/BA degree. As the president of JF Moran Co., based in Warwick, RI, William Black has put his education into making his business a lucrative and lasting career.

The kind of commitment that William Black has thrown into his business has made an impact on small business throughout my State. His understanding of international trade, and the potential of Rhode Island's small businesses to participate in that broader market, has had a marked effect upon the growth of Rhode Island industry.

Small business is essential to Rhode Island. In a State where virtually all of the merchant activity is based in small firms, Rhode Island jobs depend upon the success of the individual entrepreneur.

And as it can be seen from the work of individuals like William Black, the Rhode Island entrepreneur is doing pretty well. In fact, our small businessmen and women are doing remarkably well. In comparison with a national unemployment rate which hovered around 5.4 percent last year, almost 97 percent of the population in my State was employed.

As the newest member of the House Small Business Committee, I am proud to have the opportunity to represent William Black, and the many other talented individuals who have involved themselves with small firms in my State.

As Small Business Week—May 7-13—draws to a close, I hope that Americans will continue to remind themselves of the important contribution the American entrepreneur makes toward the growth and productivity of a strong U.S. economy. It is my hope that we will continue to applaud the efforts of people like William Black who have worked toward the development of independent, competitive, self-made firms.

FSX AGREEMENT WITH JAPAN

HON. MIKE ESPY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. ESPY. Mr. Speaker, under the FSX fighter aircraft agreement with Japan, we are selling America short and sacrificing our long-term competitiveness in the industry.

Japan is a competitive and aggressive country. We should not be subsidizing its development costs for the FSX and, as a result, helping them possibly beat us in research and development of materials, avionics, and system integration.

With the passage of the Omnibus Trade Act in the 100th Congress, we sent a strong message to foreign countries that we would no longer tolerate unfair trade practices. Under this agreement, we are encouraging just that.

We build the best aircraft fighters. We offer the best price. To sell this advantage away to Japan is not in the country's best interest.

We have no guarantee that U.S. companies will receive any of the more lucrative production work. The $480 million that our industries will receive is not a fair price for the technology. Japan needs the aircraft now. It will take them 8 years to build the first FSX. Why not buy from us?

We should push Japan for direct purchase of the United States aircraft or for the extension of coproduction of F-15's, thereby strengthening our bilateral relationship and reducing our annual $55 billion trade deficit with Japan.

If we want America to continue to grow, we must not be so willing to take actions which could damage our long-term competitiveness. Our industries have invested millions of dollars in research and development and will run the high risk of giving away those investment dollars with the production monopoly of the FSX.

We must get serious about these types of trade issues, and we must put the issue of competitiveness at the top of our agenda if we are to have a secure economic future in this country.

HONORING SERVICE TO COUNTRY: DR. EDWARD KRASS

HON. C. CHRISTOPHER COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 10, 1989

Mr. COX. Mr. Speaker, it is my privilege today to recognize a man whose entire life has been dedicated to service to community and country. Dr. Edward Krass, who will be honored on Saturday for his contributions as superintendent of the Santa Ana Unified School District, has contributed to our national well-being in countless ways: as a decorated veteran, a beloved teacher, and an admired education executive.

An officer of the U.S. Marine Corps, Dr. Krass was awarded the Silver Star, the Bronze Star, the Vietnamese Medal of Valor and the Purple Heart. While stationed at Camp Pendleton, one of the most important Marine Corps installations in the Nation, he was instrumental in developing procedures to enhance our national security.

An educator in the Santa Ana district, Dr. Krass' career culminated in his appointment as superintendent in 1985. Under his outstanding leadership, the school district has earned more California School Board Association Golden Bell Awards than any other district in the State. He coordinated the district's effort to cope with a burgeoning student population, successfully led the battle to build the district's first new high school in many years, and worked to foster a healthy relationship between the school district and the community. Recognizing the need for total community support, he expanded the relationship between business and education, a relationship that many consider to be the key to improving educational achievement.

But most importantly, throughout his career as superintendent, assistant superintendent, school principal, activities director, teacher and coach, Dr. Krass has helped shape and improve the lives of thousands of young people. In this, he has helped shape and improve our future.

Mr. Speaker, as Dr. Krass' friends and colleagues recognize his contributions upon his retirement from the Santa Ana Unified School District, so too should our Nation recognize him. I ask my colleagues to do so today. Dr. Krass is truly a public servant in the finest American tradition.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, May 11, 1989, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 12

9:00 a.m.

Armed Services

Readiness, Sustainability and Support Subcommittee

To resume open and closed hearings on proposed legislation authorizing funds for fiscal years 1990 and 1991 for the Department of Defense.

SR-222

Banking, Housing, and Urban Affairs

To hold hearings on the nominations of David Campbell Mulford, of Illinois, to be an Under Secretary of the Treasury, and Robert R. Glauber, of Massachusetts, to be an Under Secretary of the Treasury.

SD-538

Commerce, Science, and Transportation

To hold hearings on the nominations of Phillip D. Brady, of Virginia, to be General Counsel, Department of Transportation, Galen J. Reser, of Virginia, to be Assistant Secretary of Transportation for Government Affairs, and David P. Prosperi, of the District of Columbia, to be Assistant Secretary of Transportation for Public Affairs.

SR-253

9:30 a.m.

Appropriations

Labor, Health and Human Services, Education Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1990 for certain programs of the Departments of Labor, Health and Human Services, Education and Related Agencies.

SD-192

Rules and Administration

To hold joint hearings with the Select Committee on Indian Affairs on proposed legislation to establish a National Museum of the American Indian within the Smithsonian Institution.

SR-301

Select on Indian Affairs

To hold joint hearings with the Committee on Rules and Administration on proposed legislation to establish a National Museum of the American Indian within the Smithsonian Institution.

SR-301

10:00 a.m.

Agriculture, Nutrition, and Forestry

To hold hearings on the nominations of Charles E. Hess, of California, to be Assistant Secretary of Agriculture, Franklin E. Bailey, of Virginia, to be Assistant Secretary of Agriculture, and Alan C. Raul, of New York, to be General Counsel, U.S. Department of Agriculture.

SR-332

Finance

International Trade Subcommittee

To hold hearings to explore the problem of industrialized countries manipulating the value of their currencies to maintain a trade surplus, and to discuss the U.S. response to this practice.

SD-215

Foreign Relations

To hold hearings on the nomination of Donald Phinney Gregg, of Maryland, to be Ambassador to the Republic of Korea.

SD-419

Select on Indian Affairs

Investigations Subcommittee

To continue hearings to examine various matters relating to Indian affairs.

SD-628

10:30 a.m.

Commerce, Science, and Transportation

To hold hearings on the nominations of Michael R. Darby, of Texas, to be Under Secretary of Commerce, and Thomas J. Collamore, of the District

of Columbia, to be Assistant Secretary of Commerce.
SR-253

2:00 p.m.
Select on Indian Affairs
Investigations Subcommittee
To continue hearings to examine various matters relating to Indian affairs.
SD-628

3:00 p.m.
Foreign Relations

HOUSE OF REPRESENTATIVES—*Thursday, May 11, 1989*

The House met at 10 a.m. and was called to order by the Speaker pro tempore [Mr. BONIOR].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
May 11, 1989.

I hereby designate the Honorable DAVID E. BONIOR to act as Speaker pro tempore on this day.

JIM WRIGHT,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

May the gift of memory, O gracious God, ever be with us, and cause us to be grateful for the people who have gone before and on whose values and strengths we continue to build. Though we are aware of our own responsibilities, yet we know deep in our hearts that our efforts and deeds have been guided and blessed by parents and grandparents, by traditions of family and friends and colleagues. For all those whose lives and love have been our blessing, we offer these words of gratitude and thanksgiving. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The Chair recognizes the gentleman from California [Mr. TORRES] to lead the House in the Pledge of Allegiance.

Mr. TORRES led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 71. Concurrent resolution authorizing the 1989 Law Enforcement Torch Run for Special Olympics to be run through the Capitol Grounds.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 128. Joint resolution authorizing a first strike ceremony at the United States Capitol for the Bicentennial of the Congress Commemorative Coin.

The message also announced that the Senate agrees to the amendments of the House to the joint resolution (S.J. Res. 37) entitled "Joint resolution designating the week beginning May 14, 1989, and the week beginning May 13, 1990, as 'National Osteoporosis Prevention Week'."

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House of Representatives of May 4, 1989, the House will stand in recess subject to the call of the Chair to receive the former Members of Congress.

Accordingly (at 10 o'clock and 4 minutes a.m.), the House stood in recess subject to the call of the Chair.

RECEPTION OF FORMER MEMBERS OF CONGRESS

The SPEAKER pro tempore (Mr. BONIOR) presiding.

The SPEAKER pro tempore. On behalf of the Chair and the Chamber, I consider it a high honor and distinct personal privilege to have the opportunity of welcoming so many of our former Members and colleagues as may be present here on this occasion. We all pause to welcome them.

The Chair, at this time, recognizes the distinguished gentleman from Maryland [Mr. HOYER].

Mr. HOYER. Mr. Speaker, unfortunately the Speaker and the majority leader and majority whip are currently at the White House. Save for that single event they would be here. They would be here to welcome and recognize many who have been mentors of those present Members of Congress, many who have made historical contributions to the welfare of this democracy, many who have enhanced both this institution and our democracy. The Speaker would want me to say a special personal thanks for this day to the many Members with whom he served, with whom he labored to uplift the quality of life in this country.

Those Members who currently serve know that we do so as legatees of your prior service as legatees of the commitment and talent and knowledge that Members brought to the ever-expanding experiment in free government, in the creation of a just though yet imperfect society, but one that we believe is more perfect than any other yet tried by man, and one which these former Members, Mr. Speaker, individually and collectively, have enhanced. Indeed, we are pleased to again greet these Members.

There have only been, I think, approximately 11,000 persons who have been granted the privilege by their fellow citizens of serving in this body. As we are so proud to point out, there is only one way to get to the House of Representatives, unlike the U.S. Senate, unlike the Maryland State Senate which I serve and the House of Delegates in Maryland, most probably of the State legislators, only one way, and that is to be given the very high honor of having the faith and trust of our neighbors placed in Members, to speak for them and to serve them in this great democracy.

So to each and every one of the former Members, for those who now serve, we thank everyone.

I see my friend John Rousselot up here. I remember when I came to the Congress as perhaps some other Members did with an image of a Member because of his or her reputation. I came to the Congress, and I have told this to John not believing that John perhaps was the best guy that I was going to be a friend with in the Congress. He and I did not agree on all the issues, but in a very short period of time we became friends and I came to respect his commitment to his constituency and to his country. I think that is what happens with most Members. We differ on the issues. We have a different perspective, we represent different constituencies, but the overwhelming majority of Members with whom we have served, present and past, are Members who have a deep and abiding commitment to serving their constituency honestly and effectively. We ought to take pride in that. The former Members, I think, are probably concerned, as am I, Mr. Speaker, and as many Members of this body are now concerned, with the House of Representatives. It is important that the people of America have a respect and a confidence in the Con-

gress. It is my own personal view that that confidence is currently and has been warranted, merited, by the quality of service given by Members like yourselves. It is important that we all continue to convey that to the American public. We know that Members are doing that, and we thank the Members for that. It is a joint effort that all Members need to be involved in to uphold the strength of our democracy.

So, Mr. Speaker, in conclusion, let me again welcome each and every Member back to the House of Representatives. Their service is appreciated by all Members who currently serve and by all America.

Mr. ANDERSON. Mr. Speaker, will the gentleman yield?

Mr. HOYER. I yield to the gentleman from California, the distinguished chairman of the Committee on Public Works and Transportation.

□ 1010

Mr. ANDERSON. Mr. Speaker, let me say I am concerned. I mean, looking at them, I wonder, were they so much younger when they were here? Now they look so much younger than we do now. Why is that? Did the people elect them much younger in those days?

Mr. HOYER. Mr. President, I should observe that the gentleman from California must be speaking for himself.

Mr. ANDERSON. All right. I do that, too, sometimes.

Mr. HOYER. I thank the Chair.

The SPEAKER pro tempore (Mr. BONIOR). The Chair would note that the gentleman from California looks quite well for his age, and he is doing quite well.

The Chair would also note that when this Member came to this institution 13 years ago, he had the great honor and privilege to serve with Members whom I consider to be some of the giants in the Congress at that time, and at this time the Chair would now like to recognize one of those giants, the Honorable Richardson Preyer to take the chair.

(Mr. RICHARDSON PREYER of North Carolina assumed the chair.)

Mr. PREYER (presiding). The Chair recognizes the distinguished gentleman from Indiana, Mr. JOHN MYERS.

Mr. MYERS of Indiana. Mr. Speaker, I join my colleague, the gentleman from Maryland [Mr. HOYER], in welcoming all these strangers back. I apologize for our minority leader, the gentleman from Illinois [Mr. MICHEL], who had hoped to be here, but because of an extended meeting at the White House he is unable to be here to welcome you back on the Republican side.

Looking at each of you here today, I recall that I have had the privilege through the years of serving with a great many of you. As the gentleman from Maryland [Mr. HOYER] said, as we came here as freshmen, many of us have kind of forgotten all that experience through all these years, but as freshmen we remember, even though many of us did serve in legislatures and in other high positions, that when we got here, we were really on a strange field. Things were new, things were different, and we kind of carefully had to stick our toes in the water. And then it was kind of nice to have someone with us who had been in the water, not just sticking his toes in the water.

So as I look around, I see there are a great many of you here who were here when I got here 23 years ago to help welcome us and make life a little easier for freshman Members, particularly one from a little area in Indiana where I come from.

So personally, I say, thank you for the help you have given me and that you continue to give to those of us who are still here and have to make some of the decisions, decisions that are hopefully and prayerfully right decisions. It is good that you are still here to offer that counsel.

I can recall that as I came to the floor, it was with some confidence if I could look to a senior Member, one that I could go to and say, "I am troubled with this vote." I know all of us have been there. How nice it is to have someone of experience that we had confidence in, someone we could go to.

But how quick it all happened to us. Now there is no one for us to look to. We used to come to senior Members, as I say, and we still need help, even those of us who are here now, to make difficult decisions. So we still lean very heavily on your counsel.

I know a great many of you have written to each of us as we live through these troubled times and as we look to you for solutions for difficult problems. We thank you for your participation in this group that hopefully all of us will join someday—some of us maybe sooner than we would like—but in any event, we do appreciate the contributions you have made to our country and the sacrifices that you made back then. We also appreciate the contributions you continue to make.

So we are always pleased to have you come back, and we thank you very much for what your have done for the Nation and for each of us individually. So we say, welcome home. [Applause.]

Mr. PREYER (presiding). We thank the gentleman from Indiana [Mr. MYERS] and the gentleman from Maryland [Mr. HOYER] for their eloquent comments which emphasize the bipartisan spirit and nature of this undertaking.

The Clerk will now call the roll of the former Members of Congress.

The Clerk called the roll of former Members of the Congress, and following former Members answered to their names:

ROLLCALL OF FORMER MEMBERS OF CONGRESS ATTENDING ANNUAL MEETING, MAY 11, 1989

Thomas G. Abernethy of Mississippi;
Hugh Q. Alexander of North Carolina;
William H. Ayres of Ohio;

Richard S. Schweiker of Pennsylvania;
William L. Scott of Virginia;
Carlton R. Sickles of Maryland;
Garner E. Shriver of Kansas;
Alfred D. Sieminski of New Jersey;
Henry P. Smith III of New York;
David Michael Staton of West Virginia;
Gene Taylor of Missouri;
John H. Terry of New York;
Andrew Jackson Transue of Michigan;
Charles W. Whalen, Jr. of Ohio;

Larry Winn, Jr. of Kansas; and
Louis C. Wyman of New Hampshire.

□ 1020

Mr. PREYER (presiding). The Chair at this time recognizes the distinguished gentleman from Michigan, Mr. Elford A. Cederberg.

Mr. CEDERBERG. Mr. Speaker, I am pleased to report to you that our Congressional Alumni Association has successfully completed its 19th year. We end our second decade with renewed confidence in the value of our organization that our late beloved colleague, Mr. Hays of Arkansas, and our distinguished cofounder, Dr. Judd of Minnesota (who is with us today), called into existence in the spring of 1970.

We gather together on the House floor at a time of unprecedented resurgence of democracy throughout the world. Whether it be in the streets of Beijing or Tblisi, people are demanding self-determination, the rights of free speech, freedom of the press and the consent of the governed.

This is an historic opportunity for freedom loving men and women to work together to move the world a little closer toward governments of law and order that uphold the dignity of the individual and the right of self-determination through free and fair elections be they in Budapest or Panama.

The world is stirring and striving toward a new birth of freedom. Our association hopes to continue to play a small, but vital role in that expansion of new frontiers of freedom. Let me give you one current example. At our fifth seminar held in Berlin last month that the association sponsored bringing together members of the Congress with their counterparts from the German Bundestag we were challenged by the U.S. Ambassador to Hungary, Mark Palmer, to send teams to Budapest who can help provide the Hungarian Parliament technical assistance and expertise in building a multiparty parliamentary system with which they have had no experience in more than 40 years.

We want to encourage several other organizations to join with us in this endeavor such as the newly created Association of Former Members of the New Zealand Parliament, the Canadian Parliament and the Australian Parliament. We are pleased to have at our meeting John Reid, who served 20 years in the Canadian Parliament and is the president of the Canadian Association of Former Members of Parliament. We have conducted several programs with our Canadian colleagues including a "Wingspread" seminar in Wisconsin and campus fellows visits to United States college campuses by two former Canadian M.P.'s as well as having held our fall meeting in 1979 in Ottawa, Canada. So we have worked closely with our Canadian colleagues in the past and look forward to working with them in the future. Another of the projects that we are exploring with our Canadian friends is the undertaking of a comparative study of the Canadian Parliament and the United States Congress similar to the one we completed several years ago comparing the Japanese Diet and the United States Congress that has been published in both Japanese and English editions which are used widely in comparative government programs and in cross-cultural exchanges in both countries. Our German Bundestag-United States Congress study has been completed and the German edition was presented to the German Bundestag last week. The English edition is at the publishers and will be presented to the Congress this fall. This project was funded by the National Endowment for the Humanities, U.S.I.A. and the Friedrich-Naumann Foundation.

We are very proud of these studies and hope in the future to include a comparative study of the European Parliament and the Congress.

Each year over the past 7 years we have held a program with our colleagues in the Association of Former Members of the German Bundestag bringing Members of the Congress and Members of the Bundestag. These programs take the shape of seminars such as we held this spring in Berlin on the subject of "The European Economic Community and 1992" or in the form of bringing Bundestag members to visit individual congressional districts as we did in the 1986 and 1988 elections. These seminars and exchanges are cosponsored by the German Marshall Fund of the United States and U.S.I.A. to which we express our appreciation. Out of these congressional exchanges and seminars has grown a Congressional Study Group on Germany in the House with some 76 Members that this year is chaired by Representative TOM COLEMAN of Missouri. Senator ROTH of Delaware who participated in our Berlin seminar is in the process of creating a counterpart study group in the Senate.

We also this year continued our Congressional Fellowship Program for Japanese Diet staff members who come to the Capitol for 60 days and work in different congressional offices and committees to learn about our congressional system through firsthand experience. This program has been funded by the Japan-United States Friendship Commission and through a renewed grant will be continued this fall.

This year, under a contract from U.S.I.A., we brought to the United Statres for a 14-day visit a delegation from the Foreign Affairs Committee of the National Congress of the People's Republic of China. This delegation was the first from their Foreign Affairs Committee and they met with a number of the leaders of the Congress including the chairman of the House Foreign Affairs Committee, Mr. FASCELL, and a ranking member of the Senate Foreign Relations Committee, Mr. LUGAR.

Mr. Speaker, at this time I would like to insert at this place in the RECORD a letter and read the letter that I received from our colleague in China. This letter is addressed to me, and I thought it would be worth reading. It is dated April 11, 1989.

NATIONAL PEOPLE'S CONGRESS,
April 11, 1989.

HON. ELFORD A. CEDERBERG,
Association of Former Members of Congress, Washington, DC.

DEAR PRESIDENT CEDERBERG: My colleagues and I thank you and your Association for hosting in the United States the delegation from the Foreign Affairs Committee of the Chinese National People's Congress.

Our visit to your country was both successful and significant. Thanks to your thoughtful arrangements, we were able to meet and talk with people from political and economic circles as well as specialists and professors from various academic fields.

We believe such contacts are useful in bettering our mutual understandings and hope they can be continued to promote the friendship and cooperation between the two countries.

I am sincerely hoping that you and a delegation your Association organized will come to visit China soon.

Best wishes,

FU HAO,
Vice Chairman, Foreign Affairs Committee.

This year we also cosponsored our second conference at the Gerald R. Ford Library on democracy and participated in a planning session at the Carter Center of a second conference on human rights in the Soviet Union scheduled this fall.

Mr. Speaker, the program of which we are the proudest is our Campus Fellows Program where we sent to college campuses persons who have served in the Congress of the United States. This week our colleague, Robert Giaimo of Connecticut, is making such a visit to California Polytechnic University which is our 222d campus visit. I ask permission to list in the CONGRESSIONAL RECORD the names of those campuses visited as well as the names of fellows and the States from which they served. You will notice on that list we do not send anyone to a campus in the State from which they served in the Congress. This is to ensure maximum objectivity in this program to interpret the Congress as an institution. This program has been enormously successful and we expect in the next year to begin some innovations in the format which will extend the time of some of our visits.

COLLEGES AND UNIVERSITIES VISITED UNDER THE CONGRESSIONAL ALUMNI CAMPUS FELLOWS PROGRAM

COLLEGE/UNIVERSITY, STATE AND FELLOW

Alaska Pacific University, Alaska, William S. Mailliard (California).
Albion College, Michigan, David S. King (Utah).

222 visits—68 fellows.

[1] International project funded by the Ford and Rockefeller Foundations for visit of parliamentarians from the United Kingdom, Germany, France, Canada, Brazil and Norway.

Mr. Speaker, all of these projects cost money and it is appropriate at this time to list our 279 foundation, corporate, individual, and other sponsors that make our educational programs possible. I will insert in the RECORD at this point a list of our sponsors:

SPONSORS OF THE U.S. ASSOCIATION OF FORMER MEMBERS OF CONGRESS, MAY 11, 1989

PATRONS [1]

1. Ford Foundation.
2. German Marshall Fund of the United States.
3. Japan-U.S. Friendship Commission.
4. U.S. Information Agency.

BENEFACTORS [2]

5. National Endowment for the Humanities.
6. Rockefeller Foundation.
7. United Parcel Service Foundation.

DONORS [3]

8. Anonymous Individual.
9. Charles Stewart Mott Foundation.
10. John Crain Kunkel Foundation.
11. Lilly Endowment, Inc.

FRIENDS [4]

12. Anonymous Foundation.
13. Anonymous Individual.
14. Claude Worthington Benedum Foundation.
15. Carnegie Corporation of New York.
16. Carnegie Corporation of New York—Aging Project.
17. Exxon Education Foundation.
18. FMC Corporation Foundation.
19. Hon. Charles K. Fletcher.
20. German Bundestag.
21. Grand Street Boys' Foundation.
22. Flora & William Hewlett Foundation.
23. Howard H. Callaway Foundation.
24. Hon. Jed Johnson, Jr.
25. Hon. Walter H. Judd.
26. Hon. William S. Mailliard.
27. Hon. D. Bailey Merrill.
28. Louise Taft Semple Foundation.
29. The Tobacco Institute.

30. U.S. Association Auxiliary.
31. U.S. Department of State.
32. Unilever United States.
33. University of South Carolina, Byrnes Center.

SUPPORTERS [5]

34. Hon. Charles E. Chamberlain.
35. Champion International Corporation.
36. Delphi Research.
37. Forbes Foundation.
38. H.J. Heinz Charitable Trust.
39. Home Federal Saving & Loan Association.
40. Mrs. Benjamin F. James.
41. The Johnson Foundation.
42. Massachusetts Mutual Life Insurance Company.
43. Mobil Oil Corporation.
44. Hon. Frank E. Moss.
45. Panhandle Eastern Pipeline Co.
46. Hon. Otis Pike.
47. The Prudential Foundation.
48. Hon. John J. Rhodes.
49. Sangamon State University.
50. Florence & John Schumann Foundation.
51. Hon. Herbert Tenzer.
52. 3M Corporation.
53. Hon. Andrew Jackson Transue.
54. United Technologies.
55. U.S. National Committee for Pacific Economic Cooperation.
56. U.S.-Japan Foundation.
57. University of Oklahoma Foundation.
58. Mr. Philippe Villers.

SPONSORS [6]

59. A.T. & T. Corporation.
60. Albion College.
61. AMAX Foundation.
62. American-Israel Friendship League.
63. American Brands, Inc.
64. American Consulting Engineers Council.
65. American Family Life Assurance Company.
66. American Income Life Insurance Company.
67. American Institute of Certified Public Accountants.
68. Hon. Beryl Anthony.
69. Mrs. Leslie C. Arends.
70. Ashland Oil Company, Inc.
71. Atlantic Council of the United States.
72. Hon. Lamar Baker.
73. Baltimore Gas & Electric Company.
74. Bank of America.
75. Hon. Joseph W. Barr.
76. Hon. Robert R. Barry.
77. Battelle Memorial Institute.
78. Baylor University.
79. Hon. J. Glenn Beall, Jr.
80. Mrs. J. Glenn Beall.
81. Hon. Berkley Bedell.
82. Hon. Catherine May Bedell.
83. Beech Aircraft Corporation.
84. Hon. Jonathan B. Bingham.
85. Black & Decker Manufacturing Company.

[5] Supporters have contributed between $5,000 and $10,000.
[6] Sponsors have contributed between $1,000 and $5,000.

It is now my sad duty to report to the Congress the list of our deceased colleagues who have passed away since our report last spring: Gordon L. Allott of Colorado; Robert R. Barry of New York; Charles B. Brownson of Indiana; Price Daniel of Texas; Glenn R. Davis of Wisconsin; James P.S. Devereaux of Maryland; James Domengeaux of Louisiana; Thaddeus J. Dulski of New York; Charles R. Jonas of North Carolina; James Kee of West Virginia; Robert McClory Illinois; James G. O'Hara of Michigan; Ellis E. Patterson of California; Monroe M. Redden of North Carolina; David E. Satterfield III of Virginia; Gordon H. Scherer of Ohio; Leonor K. Sullivan-Archibald of Missouri; Stuart Symington of Missouri, and Basil Whitener of North Carolina.

I noticed in this morning's paper that we lost another of our colleagues, Kenneth Roberts of Alabama. I knew him so well. He passed away here I believe yesterday, for which we are very sad.

I ask for a moment of silence in their memory.

Mr. Speaker, it is now my pleasure to report to you that the gentleman from Illinois, Judge Mikva, who is our vice president, will become president the end of next month and lead the association in its 20th year. He will have as his vice president the able assistance of the gentleman from Arizona, Mr. Rhodes.

Each year we present a Distinguished Service Award. The list itself is a very imposing one, beginning in 1974 with Gerald R. Ford and continuing with John W. McCormack, Lewis Deschler, Sam Ervin, Jr., Nelson Rockefeller, George H. Mahon, Clare Boothe Luce, Edmund S. Muskie, Hugh Scott, Richard Bolling, Jacob K. Javits, J. William Fulbright, Walter H. Judd, Thomas P. O'Neill, Jr., and John J. Rhodes. This year it is my honor to present the 1989 Distinguished Service Award to our long-time colleague, Edward Boland, who served in this body with distinction for 36 years from Massachusetts.

I remember so well, if you will pardon just a little personal comment here, when we came together in the 83d Congress back in 1953, we had some pretty good guys in that Congress. Tip O'Neill, Johnnie Rhodes, Mel Laird, and many of us who came. We had a distinguished class. One of the most distinguished was our friend, the gentleman from Massachusetts.

Ed, if you will come up here now, I would like to present you with this gavel, but first, before I do that, we have a book of letters from many of your current and former colleagues, to you, telling you how much they think of you. I think they are all pretty good.

Ed, I would like to present this to you on behalf of the Former Members of Congress Association. We appreciate your being here very much.

Mr. BOLAND. Mr. Speaker, ever since my retirement I have moved to the conservative side of this aisle, so here I am.

Mr. Speaker, former Members of Congress, and present Members, I am deeply touched to be this year's Distinguished Public Service Award winner.

I want to thank President Al Cederberg, and the officers and members of the Assocation of Former Members of Congress for this great honor. The recognition of one's peers in an endeavor as challenging as politics is particularly meaningful, and I am truly appreciative of the good wishes that go with this award.

I am particularly pleased that my wife, Mary, is with me today. On many occasions during my service here, the demands of family meant that I had to fly from Massachusetts to some event in the Capitol alone, while Mary stayed at home in Springfield.

That we can now come to Washington together is one of the best "perks" of my new status as a former Member of Congress.

Two years ago, you honored former Speaker Tip O'Neill with the Distinguished Public Service Award. On the off chance that some of the notoriety which he enjoys is a byproduct of this award, I have been practicing the suitcase trick he does in his new hotel commerical. I want to be ready in case any casting agents call.

I spent 36 years in this Chamber, and I can tell you that it feels good to be back, if only for a day. There is no institution quite like the U.S. Congress. The privilege of serving here is one of the greatest gifts the citizens of our country can bestow.

To the people of western Massachusetts goes my gratitude for having been permitted to represent them in these halls for so much of my career in public life.

This Chamber holds many memories for me. I do not know the precise number of men and women with whom I served during my tenure, although I imagine it was in the thousands. But I do recall the frequent examples of courage, kindness, and grace under pressure that enriched the life of this institution.

I recall as well some of the great questions that were debated on this floor involving: the commitment of U.S. forces to hostile situations in countries far from our own, efforts to advance the cause of civil rights and human dignity in our own Nation, and throughout the world, the expansion of educational and economic opportunity, and the assurance of a place for the United States in the exploration of the universe. Those debates were long and arduous, sometimes punctuated by angry outbursts and heated exchanges. I can remember sometimes thinking to myself, when the issues seemed particularly intractable, and Congress had tied itself into knots, that these must truly be the worst of times.

But, with the benefit of perspective, I believe that they were, in many ways, the best of times. Being involved in the making of decisions that help move this country forward, is part of the exhileration that often characterizes service in the Congress. That exhileration was, for me, always matched by a keen sense of the scope of the responsibility that we shouldered. That this Nation has, for more than 200 years, entrusted to a relatively small number of its citizens the job of governing a large, complex, and diverse society is an act of faith that, for me, has always been a source of marvel.

It is in the shouldering of that responsibility that the current Members of Congress maintain the strength of the tie that binds them, not only to their colleagues of today, but to the James Madisons, Roger Shermans, and Frederick Muhlenbergs of the first Congress as well. This is the forum in which the work of democracy gets done. And it gets done because there exists, in this institution, a tradition of men and women of great ability and dedication who are willing to come together, often at considerable sacrifice to themselves and their families, to serve their country.

As Congress begins its third century, I think it is worth acknowledging that it remains the preeminent legislative body in the history of the world. My association with it has been, with the exception of my family, the single most satisfying association in my life. And I would expect that Members who

will come here decades from now will feel much the same way when their period of service is complete.

I wish the current Members, and those who will follow them, the best of luck in their efforts to grapple with those seemingly insoluable problems with which they will be confronted. If those of us who no longer carry a voting card can ever be of service, I hope the Association of Former Members of Congress will be recognized as an appropriate vehicle.

□ 1040

I want to express again my very deep gratitude for this great distinguished honor that has been conferred upon me.

Thank you very much.

Mr. CEDERBERG. Mr. Speaker, I move we adjourn.

Mr. PREYER (presiding). The Chair again wishes to thank the former Members of the House for their presence here today, and we thank our particular honoree, the gentleman from Massachusetts. He now understands what a pancake feels like after the syrup has been poured over it, or will before the weekend is over.

Before terminating these proceedings, the Chair would like to invite any former Members who have not already responded to their rollcall, to their name, to give their names to the reading clerks, please, for inclusion on the roll.

The Chair thanks all of the other Members, former Members, of Congress for their presence here today, an unusually fit looking group, undoubtedly coming from sufficient time spent in the House gym.

We wish good luck to all of you, and the Chair announces that the House will reconvene at 11 o'clock.

Accordingly (at 10 o'clock and 44 minutes a.m.), the House continued in recess until 11 a.m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore [Mr. BONIOR] at 11 o'clock and 1 minute a.m.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will recognize Members for 1-minute speeches.

TODAY'S YOUNG WOMEN ARE FIVE TIMES MORE LIKELY TO END UP BEING SOLE SUPPORT OF FAMILIES

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I think it is very interesting that the Department of Labor, the United States Department of Labor tells us that young women in school today are five times more likely than young men in school today to end up being the sole support of their families.

That is a world turned upside down from when I was in school.

Let me do it one more time: A young woman is five times more likely to end up being the sole support of her family in this country today than a young man in school sitting next to her.

What wage do most of those women make? They make the minimum wage; two-thirds of the people making the minimum wage are women and they are often supporting their family.

I certainly hope people vote for the minimum wage bill today. It is the least we can do as we watch the Michael Milkens and the greed follies going on around this country. The least we can do is recognize people who are at the minimum wage and hardly making it if they are at all.

FAMILY FARMLAND PRESERVATION ACT

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, the tradition of family farming in America is being threatened by the spiraling value of farmland in proximity to urban areas. As the value of land rises with increased development, the ability of families to pass their farms onto succeeding generations is being eliminated by enormous estate tax burdens. These taxes are based on the price the land could bring for development purposes, not its value if retained in farming.

Today, I am introducing the Family Farmland Preservation Act. My bill would protect family farmers from incredible estate tax burdens reflecting development value rather than farming value. It would not forgive the estate tax, but allow farmers to postpone payment and reduce the total tax burden for each 5 years a farm remains in production and is kept in the family.

Mr. Speaker, my bill is limited in scope and presents an environmentally sound approach to preserving our open space and the American family farm.

PRINTING OF PROCEEDINGS HAD DURING THE RECESS

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess be printed in the CONGRESSIONAL RECORD and that all Members and former Members who spoke during the recess have the privilege of revising and extending their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

NORIEGA STOLE THE ELECTIONS IN PANAMA

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, as an observer in the recent Panamanian elections, it is clear that three things came out of those elections: No. 1, Noriega stole the elections from the Panamanian people. No. 2, there is no support for him at all by the Panamanian people other than his military henchmen. No. 3, I did not see any evidence of anti-Americanism and the United States is not viewed as a negative force.

Whatever the United States does, our obligation is to protect United States citizens and property including the canal and determine if the Panamanian people need our help to carry on the democratic principles.

We should not decide what is best for the Panamanian people but if we are genuinely called upon for help, we should not be afraid to provide help and assistance. There is no question that some of Panama's current problems have been caused by the misguided United States diplomatic and military policy in recent years and we do not go into this situation with totally clean hands. But we must be more than just neutral observers in dealing with the abuse of power by General Noriega.

To paraphrase the Italian poet, Dante: "The deepest place in hell is reserved for those who in a period of moral crisis claim neutrality."

Neutrality cannot be the basis of United States policy when the rights of the Panamanian people are being abused by the dictator Noriega.

GENESEE RIVER PROTECTION ACT OF 1989

(Mr. PAXON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAXON. Mr. Speaker, today I rise to introduce the Genesee River Protection Act of 1989 to accompany legislation which my New York colleague, Senator MOYNIHAN, is introducing in the other body.

The purpose of this legislation is to protect the scenic beauty and ecological value of the Genesee River under the Wild and Scenic Rivers Act.

The Genesee River and Letchworth State Park located in the very heart of

my 31st Congressional District which I am proud to represent.

Affectionately known as the "Grand Canyon of the East," with cliffs that rise to over 600 feet at some points, this gorge is where the magnificent Genesee River spans some 17 miles as it roars over three major falls, one of which is more than 107 feet high.

The historic Letchworth State Park encompasses over 14,000 acres with boundaries accessed by main entrances in Portageville, Castile, and Perry in Wyoming County and Mount Morris in Livingston County and hosts close to 1 million visitors annually.

Mr. Speaker, I was privileged to grow up not far from this environmental wonder and after representing that same area during my 6-year tenure as a New York State assemblyman, I am pleased, extremely pleased, Mr. Speaker, to have the opportunity to introduce this legislation, the Genesee River Protection Act of 1989, that will preserve this natural resource for present and future generations to enjoy.

FAIR LABOR STANDARDS AMENDMENTS

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, I rise in strong support of the conference report on H.R. 2, the Fair Labor Standards Amendments, which raises the minimum wage for the first time since 1981. Today, in 1989, it is about time that we provide a decent hourly wage for the working men and women of America.

I have always felt strongly that we should do everything possible to make work more financially attractive than welfare. By keeping the minimum wage at $3.35, we have forced many American workers to work 40 hours a week, and yet earn only $6,968 per year.

The minimum wage is established by Congress. As a result, there have been no yearly increases for inflation and the real value of the wage today has gone down by almost 30 percent. We establish a variety of social service and employment programs here in Washington, such as the food stamps and supplemental security income programs, and ensure that they will receive inflationary increases. We do not do this for the minimum wage.

There are those who say that increasing the minimum wage will increase inflation. The working poor are not, and never have been the cause of the United States' huge debt burden. To look at inflation and the deficit, and conclude that the working poor are to blame is straining at a gnat while swallowing a camel. Each one of us here has contributed more to inflation than the working poor.

□ 1110

ARREST NORIEGA

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, Jimmy Carter said that General Noriega is a crook. He said that the general fraudulently disrupted the election in Panama. Now we all know that. But Jimmy Carter recommended to President Bush that he go slow. Now I have great respect for former President Carter, but one of the reasons, honestly, that he was not reelected, because at times he would just simply go too slow. We do not need a slow motion President. We have a drug smuggler that has been indicted, sitting in Panama, laughing at the United States. We have a $310 billion defense budget and we do not fund it to provide money for the neighborhood crime watch. Now is the time to use it.

I recommend that President Bush send the Marines to Panama and arrest General Noriega and let the world know America has had it with drug smugglers.

The SPEAKER pro tempore (Mr. BONIOR). The Chair wishes to remind all guests of the Congress not to express their feelings of approval or disapproval of the proceedings of the Congress, as it is in violation of the rules of the House.

WHAT HAPPENED TO THE DIRE EMERGENCY SUPPLEMENTAL?

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, on a day when the House has little on its schedule, the uninformed observer thinks we have little to do.

Well, what about the dire emergency supplemental? It has been more than 2 weeks since that bill, H.R. 2072, was pulled from the floor.

It has been more than 1 month since the President officially sent up his revisions on April 3, and more like 2 months since we found out what was in them.

It has been more than 4 months since President Reagan sent up the original supplemental requests for this fiscal year.

How can there be a dire emergency if we are sitting around on our hands?

How long does it take to figure out that the overwhelming rejection of the Foley amendment means that the House wants a lean and clean supplemental?

How long does it take to cross out the additional funding for programs that can wait a month for the regular bills?

Mr. Speaker, our veterans, our students, our forest rangers, our workers unemployed because of unfair foreign competition, the Soviet refugees, the southwest African peacekeepers, are waiting.

What are we waiting for?

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Hallen, one of its clerks, announced that the Secretary inform the House of Representatives that the Senate is ready to receive the managers appointed by the House of Representatives for the purpose of exhibiting articles of impeachment against Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi, agreeably to the notice communicated to the Senate, and that at the hour of 11 a.m. on Thursday, May 11, 1989, the Senate will receive the honorable managers on the part of the House of Representatives, in order that they may present and exhibit the said articles of impeachment against the said Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1593

Mr. HASTERT. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 1593.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

THREE THIN DIMES

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, once again the House will be considering legislation to improve the lives of the 8.4 million working Americans who live in poverty. The conference report on the minimum wage which the House will be taking up today, would ensure that the paycheck America's workers bring home will be enough to provide for the basic necessities of life.

Can America do any less?

The minimum wage was designed to be a living wage. But, over the last 10 years, its purchasing power has been allowed to decline to its lowest level since 1955. It is no coincidence that as the minimum wage has been allowed to decline over the past 10 years, an increasing number of working Americans are poor and an increasing

number of working Americans are homeless.

Two-thirds of the American public believe that the wage ought to be raised. The problem, Mr. Speaker, comes down to this. Three thin dimes. That is the difference between the Congress and the President of the United States. Thirty cents. Three thin dimes which will make the difference between a living wage and poverty for millions of Americans. Mr. President, we are going to pass this conference report. I hope you will not veto it. Three thin dimes for the poorest working Americans who only want to be able to support themselves and their families. That is what America wants them to do. Let the Members give them an opportunity.

INTRODUCTION OF THE GOVERNMENTWIDE ETHICS ACT OF 1989

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, today I am honored and privileged by the President to introduce his ethics law reform bill, the Governmentwide Ethics Act of 1989.

This bill is an unprecedented legislative opportunity to restore reason to public debate, to reaffirm commonsense standards of public service, to restore some common sense to government ethics. For that we need some government ethics that make sense.

Citizens have a vested interest in the President's proposal. It is the hope of citizens for easily understood, uniform standards that support public officials in their desire to do the right thing.

Members of Congress also have a vested interest in the President's proposal. Members will recognize the basic fairness and responsiveness to the unique constitutional role of Congress. In the broad, comprehensive approach it provides a starting point that Congress could not reach without the commitment and the cooperation of the President.

The alternative, a failure of this Congress to address and restate clear, simple, uniform standards of public service is unacceptable to the American people.

To my House colleagues I say, the President, on behalf of the American people, has given Members the legislative vehicle we need. President Bush has served in this institution, the House. He knows practices. He knows that here as nowhere else in government the people govern, and the people have spoken.

IN SUPPORT OF MINIMUM WAGE INCREASE

(Ms. PELOSI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PELOSI. I rise in support for the minimum wage bill today. Our colleague, the gentleman from Maryland [Mr. HOYER], pointed out that three thin dimes separate Members from the President. I urge my colleagues to support this minimum wage bill and urge the President to sign it, because those three thin dimes amount to $12 a week, only $50 a month, for working Americans.

How can we ignore the needs of the working poor in our country when I could stand here, Mr. Speaker, for hours and read off the list of people making over $1 million a year for their salaries.

□ 1120

Mr. Speaker, I will take the remainder of my 1 minute to read as many of these as I can who are making over $10 million a year. I am not going to use their names; I would rather go into the numbers instead.

No. 1, over $40 million a year;
No. 2, $32,135,000 a year;
No. 3, $21 million a year;
No. 4, $21 million a year;
No. 5, $16 million a year;
No. 6, $14 million a year;
No. 7, $12,960,000 a year;
No. 8, $11 million a year;
No. 9, $11.5 million a year;
No. 10, $11 million a year; and
No. 11, $11 million a year.

The list goes on and on. How can we in our society contend that we have any sense of fairness when there is even a debate over the fact that people in our country who work would get an increase of $12 a week? And that is only a small difference between our legislation and what the President will agree to sign.

Mr. Speaker, I ask the Members, please, let us not allow this disparity to continue. Support the minimum wage bill today.

NEED FOR FUNDS FOR VETERANS HEALTH CARE IS DIRE AND URGENT

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, I rise today to express my deep concern about funding for veterans programs. The supplemental appropriations bill which was originally scheduled for floor consideration included additional money for compensation and pensions as well as health care. Unfortunately, it also contained a lot of money for a host of other programs which, in my mind, did not merit the terms "dire or emergency."

The need for increased funding of veterans health care, however, is both dire and urgent. Veterans in Florida are being denied the care they have earned because there is simply not enough money to serve their needs. The longer we deliberate this, the longer these men and women will go without health care that may not be available to them in any other setting.

I urge my colleagues on the Appropriations Committee to reach an agreement that will allow Members to vote on needs that are truly emergencies. Funding for extraneous programs will only hold up passage of legislation which will address the health care needs of our Nation's former service men and women. I understand that a tentative agreement has been reached, and I hope that the committee has recognized the need for a package we can all vote for.

DEFAZIO SAYS OREGON NEEDS ADDITIONAL JUDGE, CITES INCREASE IN CRIME, CASELOADS

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DEFAZIO. Mr. Speaker, we have passed tough new laws. We have obtained more law enforcement officials. We are building more jail cells. President Bush says he may declare a national crime emergency. But all the declarations, laws, and police in the world will not solve our crime problem unless our courts can prosecute, convict, and sentence criminals.

The Oregon Department of Justice says that my State now ranks second in the Nation in the number of illegal drug lab seizures, third in the number of bank robberies, sixth in serious crime, and seventh in robberies.

Our Federal courts are swamped with cases, which leads to delays in indictments, prosecutions, and verdicts, particularly in the Federal court in my district where we are operating only with a magistrate.

Each of Oregon's Federal judges had more than 514 cases during 1988. The Judicial Conference says that there should be no more than 400 cases per judge per year.

We are arresting more criminals, but our courts cannot hear their cases. Law enforcement officials tell me their hands are tied until we reduce the backlog in our courts. We can talk tough about fighting crime until we are blue in the face, but we will have no effect until we give our courts the judges they need to put criminals behind bars.

Mr. Speaker, I urge my colleagues to lend me their support in considering and passing H.R. 2030, which would

authorize a new article III judge for the district of Oregon.

THE TRUE GAUGE OF OUR IRRESPONSIBILITY

(Mr. PORTER asked and was given permission to address the House for 1 minute.)

Mr. PORTER. Mr. Speaker, last Thursday the House passed a budget resolution that technically pushes our deficit below $100 billion and meets Gramm-Rudman deficit reduction targets. But Gramm-Rudman calculations don't tell the real story.

While we claim that the deficit will be only $100 billion this year, do you know how much our national debt will increase in fiscal year 1990? CBO predicts that when you subtract the trust fund surpluses and add the cost of the savings and loan bailout, the real deficit will be $264 billion. That's right. The real deficit, the real addition to our Nation's indebtedness, the amount our kids will be paying interest on all their lives, is really two-and-a-half times what the budget resolution says it is.

What good is it to craft a budget agreement that produces a deficit number that has no relation to the budget's impact on the national debt?

This summer, when we are passing a debt limit extension bill that authorizes the Treasury to borrow another $300 billion or so to get us through fiscal year 1990, ask yourself how real the $100 billion deficit figure is.

MINIMUM WAGE PROPOSAL DESERVES MEMBERS' SUPPORT

(Mr. HOAGLAND asked and was given permission to address the House for 1 minute.)

Mr. HOAGLAND. Mr. Speaker, there have been a number of excellent arguments presented here today in favor of the minimum wage bill that I hope will pass this afternoon. I would like to join those and dwell on one particular item that particularly concerns me in the proposal that will be before the House this afternoon, and that is that the compromise we have arrived at here in the House of Representatives only restores 86 percent of the loss that has been incurred due to inflation and will be incurred due to inflation since January 1, 1981, when we last increased the minimum wage.

The administration's proposal, coming with the veto threat, would only restore 81 percent of the loss. I think many of us here would like to restore 100 percent of the loss.

I know that in my conservative part of the Midwest, 74 percent of my constituents are in favor of increasing the minimum wage to the level of at least what we have here. I see no justification for a veto in a situation where the compromise we have arrived at here again only restores 86 percent of the loss over the last 9 years.

So, Mr. Speaker, I urge my colleagues to support the conference report, and I certainly urge the President to sign the bill.

SUPPORT A DECENT MINIMUM WAGE

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINETA. Mr. Speaker, the working people of America deserve a fair and decent minimum wage. For too long, our country's minimum wage level has remained stagnant, while the continuing creep of inflation has eroded its value and undercut the buying power of millions of hard working people.

Today we have the opportunity to change that, a chance to approve a long-overdue rejuventation of our basic wage standard.

Mr. Speaker, I urge my colleagues to support that conference report on raising the minimum wage. Most importantly, I urge the President to listen to the voices of millions of deserving American workers, and sign this bill. They deserve those "three thin dimes."

SUPPORT URGED FOR CONFERENCE REPORT ON FAIR LABOR STANDARDS ACT

(Mr. LEHMAN of California asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LEHMAN of California. Mr. Speaker, I rise today to urge my colleagues to show their strong support for the conference report on the Fair Labor Standards Act. Let us show our commitment to the working men and women of America by raising the minimum wage. Let us say today that it is simply no longer acceptable for a man or a woman in this country to work 40 hours a week, 52 weeks a year, and still live in poverty.

This is a modest bill—three thin dimes. The administration claims that those dimes would cause job loss and high inflation—three dimes over 3 years. If history is our teacher, it is well documented that raising the minimum wage will cause no significant job loss or inflation.

Where is the concern for what inflation has done to people on the minimum wage? What this bill does is to restore the purchasing power of a minimum wage that is so eroded that it only buys $2.56 of today's goods and services.

There is more to this issue than just numbers. We are talking about restoring basic fairness to the workplace. No one in this country should work full time and live in poverty. No one should work full time and not be able to have a roof over their head. It is ridiculous to think that a head of household earning the minimum wage has absolutely no hope of supporting his or her family. In addition, it is imperative to provide an incentive for people to get off public assistance and enter the work force. By raising the minimum wage, we can accomplish this.

Mr. Speaker, the President would cut the capital gains tax for the rich today, but he would veto this legislation because of three dimes over 3 years. I say to the Members, let us draw a line in the dirt and stand our ground.

REMEMBERING THOSE WHO WILL NOT GRADUATE THIS SPRING

(Mr. PICKETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKETT. Mr. Speaker, during the next several weeks, as Americans triumph in the graduation of loved ones from high school and college, this Nation needs to also think for a moment about the young people left behind, who, for whatever reason, have either dropped out of school or didn't have the chance to go in the first place. It is a tragedy that these young people will never reach their full potential. More alarming, a recent report by the Joint Economic Committee shows their numbers are growing.

This report, which I urge my colleagues to read, singled out education as, "perhaps the most prominent area where our Nation's shortcomings threaten to impose enormous long-term costs."

The committee found that we have a dropout rate between 40 and 50 percent for minority students and that some 13 percent of all 17-year-old Americans cannot read, write, or count. Many young people are unable to afford higher education. Tuition at America's colleges and universities has outpaced family income at a rate of 5 to 1 during this decade. Not surprisingly, college enrollment is down.

The future of this Nation is filled with too many challenges and too many opportunities to abandon so many young people. For their sake and for the sake of our future, we must do better.

□ 1130

ANOTHER REASON TO SUPPORT THE MINIMUM-WAGE CONFERENCE REPORT—ITS IMPACT ON WOMEN

(Mr. SABO asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. SABO. Mr. Speaker, and Members, I rise today in support of the minimum-wage conference report. There are many reasons to support it. Let me focus on one reason which is a little more narrow than others, its impact on young women, particularly on young women who are furthering their education.

Mr. Speaker, it has been my observation that there is real distinction in our society in the wages that a young woman can earn in comparison to a young man. A young woman who is trying to earn money to go on to college or to earn a few dollars while she is in school suffers immensely because of our wage inequity. This bill will help that.

Mr. President, as part of a kinder, gentler society, please sign this very modest increase in the minimum wage bill.

THE HISTORY OF THE MINIMUM-WAGE DEBATE

(Mr. NAGLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NAGLE. Mr. Speaker, I rise today in support of the minimum wage.

I sometimes think on occasion the debate that we have on the floor of this House actually comes out of the history of the walls around us, that what is said today has actually been said on many occasions before, and specifically with the minimum wage it is true. We hear dire processes again, as we did when the thing was first established, that great gloom and doom will happen to the countryside if we enact the minimum wage.

Mr. Speaker, as part of my preparation today I went back and looked to see what the original debate on the minimum wage said about it, and I was struck with the similarity of then and today. On December 14, 1937, for example, one Member rose in this body and probably stood in the place I now stand, and that Member predicted the establishment of a minimum wage rate of 40 cents an hour would replace our constitutional form of democracy with a despotic form of government, establish a dominion over industry by labor, and drain our countryside of farmworkers who would surely flock to the cities for such high wages.

Mr. Speaker, it did not happen then, and it will not happen today. We should not be misled by those who oppose decency for the American working people by giving them a decent wage. It has worked in this country for 50 years, and it will work again.

Mr. Speaker, we should pass, and the President should sign, the minimum wage bill later today.

PRESIDENT BUSH—THE BIGGEST OBSTACLE TO ENACTMENT OF A DECENT MINIMUM WAGE

(Mr. FORD of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Michigan. Mr. Speaker, I rise in support of the conference report on H.R. 2, legislation to raise the minimum wage to $4.55 by October 1991.

This bill is solidly within a 50-year-old tradition in the United States, a tradition that holds that Americans who work should not be poor. The minimum wage is a social compact initiated by FDR in the New Deal that says to every American: If you work full time, year round, you will be able to support a small family without resort to welfare.

That tradition and that social compact are threatened today. At today's minimum wage of $3.35 an hour, no one can support a family. The poverty line of 1989 is $11,130 for a family of three. Full-time, year-round earnings at today's minimum wage are only $6,968—far below that poverty line.

President Bush is the biggest obstacle to enactment of a decent minimum wage. He wants to raise the minimum, he says, but not so high that it would lift a working family out of poverty.

In George Bush's version of a kinder and gentler America, the minimum wage would be—as he puts it—"not a penny more" than $4.25 an hour, and the three $0.30 increases to get it there would be phased in over 3 years. By the time the $4.25 figure took effect in 1992 it would fall dismally short of a living wage: $8,856 would be more than $4,000 below the estimated 1992 poverty line of $12,890 for a family of three.

President Bush's position on the minimum wage has to be viewed in the light of his position of the capital gains tax. To understand his view of fairness and economic justice, you have to contrast his treatment of the working poor with his treatment of the investing rich.

President Bush's capital gains tax proposal would give the wealthiest 1 percent of American taxpayers, those earning more than $225,000 a year, an average tax cut of $19,800—more than twice the entire annual income a worker would earn under the Bush minimum wage proposal.

The working poor would get "not a penny more" than 69 percent of a poverty level income. The wealthiest of the wealthy would get tax breaks big enough to hire two minimum wage workers each to take care of their gardens or to do their laundry.

Is this the Bush full employment program?

AT LEAST THE REPUBLICANS ARE EMBARRASSED ABOUT THEIR POSITION

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, people sometimes ask if there are differences left between the parties. Today my colleagues see very graphically that there are.

Mr. Speaker, there has been an absence of Republican participation this morning. I will give them credit for the fact that they are somewhat embarrassed about the position they have to defend because it is a position that begrudges hard-working people a chance to earn a barely minimum wage. The President has apparently imposed on them the discipline that says, "Don't you dare vote that the poorest people in this society ought to make more than $4.25 an hour," an amount that everyone, including the President, understands is wholly inadequate to support a family.

Mr. Speaker, the position the administration is urging on its Republican followers is, "Don't let the poorest people in this society, those most disadvantaged by inadequate education, by the ravages of discrimination, by other problems that they have encountered, don't let them make more than 4.25 an hour as a matter of national policy."

That seems to me a tragic situation, and, as I said, I acknowledge the fact that my colleagues on the other side are at least embarrassed about that position not to take the opportunity to articulate it.

Mr. Speaker, the $4.55 that we are voting is also inadequate. Unfortunately it is probably the best we can do in this situation. We have an economy that has worked well. We have prosperity that benefits most of us. It would be wholly unfortunate if the great majority of us who are doing better than we have been begrudge the poorest and the weakest among us the chance to earn a little bit more of a pittance than they have been earning.

Mr. Speaker, I hope the conference report is passed overwhelmingly.

UNITED STATES-MEXICO DEBT FOR DEVELOPMENT PLAN

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, much concern has arisen in recent years about the magnitude of Mexico's external debt to the United States. Both the

Baker plan and the Brady plan have addressed Mexico's debt problem by encouraging banks to refinance the commercial debt owed to them by Mexico. At the same time, we have seen numerous deficiencies along the United States-Mexico border, involving issues including public works, poor health services, and serious environmental problems.

Mr. Speaker, I believe that our Government must demonstrate true leadership in the effort to relieve the Mexican debt, while assisting border development. Mexico currently owes $2 billion dollars to our Federal Government. I will introduce legislation in the near future which establishes a debt for development plan, in which our Government will exchange Mexican debt dollars for development projects along the United States-Mexico border. Through this plan, regional banks will finance essential projects to our border.

By initiating a debt for development plan with Mexico, our Government will take the first step in its commitment to assist our neighbor and create the North American alliance.

□ 1140

SUPPORT CONFERENCE AGREEMENT ON H.R. 2

(Mr. MARTINEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARTINEZ. Mr. Speaker, we in Congress have extended our hand to the administration by compromising on the training wage, which should actually be called the sub-sub minimum wage, since the current minimum wage itself is sub-minimum to what a family actually needs to survive. I have nothing against a training wage that provides people with decent wages and long-term employment. But I do not believe that it takes anyone 60 days to learn how to make a bed, sweep a floor or flip burgers—that is what this training wage really is.

Mr. Bush says that he will veto any legislation with a minimum wage above $4.25 an hour. Our bill mandates 30 more cents for workers. Will this be overly burdensome to industry? No!

The State of California unilaterally mandated a minimum wage 90 cents higher than the current Federal minimum wage. No jobs have been lost in my State as a result of this action. Indeed, California's economy continues to boom.

In short, what we are talking about is a difference of 30 cents. It is the least we can do.

I am not happy with the compromises we have been compelled to make as a result of the administration's intransigence. But we must at least do this much for our working men and women. I urge my colleagues to support the conference agreement on H.R. 2.

CONFERENCE REPORT ON H.R. 2, FAIR LABOR STANDARDS AMENDMENTS OF 1989

Mr. HAWKINS. Mr. Speaker, I call up the conference report on the bill (H.R. 2) to amend the Fair Labor Standards Act of 1938 to restore the minimum wage to a fair and equitable rate, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of May 8, 1989.)

The SPEAKER pro tempore. The gentleman from California [Mr. HAWKINS] will be recognized for 30 minutes, and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of the conference report on H.R. 2, the Fair Labor Standards Amendments of 1989.

This conference report represents a good faith attempt to offer a reasonable, yet meaningful adjustment in the Federal minimum wage.

While this measure is less than what we had originally hoped for, it is an essential step toward ensuring a fair and livable wage for the lowest paid workers.

I am disappointed by the President's threat of a veto. Congress has compromised enough on this bill. When we started this process 2 years ago, we proposed what I considered a very conservative increase, to $4.65, over 3 years.

Now, we have moved lower and added other provisions to satisfy administration and business demands. The President should sign this bill. If he wants to flex his muscle with a veto, do not pick on the lowest paid workers in society.

The real value of the minimum wage has declined by almost 40 percent since 1981. In order to maintain its former purchasing power, the minimum should be at $4.57 per hour today.

We have offered an olive branch to the President by including a 60-day, limited training wage, which goes against the very grain of the concept of Federal labor standards in the first place. This was a huge concession. Why should we legislate a poverty wage or legitimize a training wage that encourages exploitation and cutthroat competition?

The real opposition to Fair Labor Standards is not the President, but a small group of selfish business interests, who are willing to spend millions of dollars on phony studies and carefully orchestrated editorial and ad campaigns.

Their arguments today are recycled versions of those used each time we have legislated an increased since the original Fair Labor Standard Act of 1938. Then they said a minimum wage of 25 cents would create unemployment, result in millions of business failures, and increase inflation. Empirical evidence proved them wrong then, and continues to prove such misinformation inaccurate now.

To believe their prophecy of disaster and claim of leadership of the poor, disadvantaged masses, is to believe in the absurd. In their rhetoric, they are the saviors of the low-skilled, the minorities, the young, who will face astronomical job losses if their compassionate employers, who hire them at subminimal levels of decency, are required to pay a fair, living wage.

To accept this foolishness is to accept these selfish interests as the anointed biblical apostles, designated "to bring good news to the poor, to heal the broken-hearted . . . to proclaim liberty to captives, new sight to the blind, and to set the down-trodden free," (St. Luke, chapter 4, 18th verse).

If you believe the opposition's main concern is the welfare of minimum wage workers, then you must believe in the Tooth Fairy, the Easter Bunny and that Peter Pan never grows up.

I ask my colleagues to put aside the grandstanding, and don't let the opponents' exaggerated, unsubstantiated accusations of economic armageddon dissuade you from improving the economic conditions of the least advantaged among us. History shows that an increase in the minimum wage is good for low-wage workers, good for business, good for our entire economy and in practice results in more jobs, not less.

I urge my colleagues to support this very modest and reasonable offer by voting in favor of the conference report on H.R. 2.

Mr. GOODLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, earlier this week we brought to the floor of the House the Vocational Education bill. It was built on compromise and cooperation, but today we are being asked to adopt a conference report on the minimum wage, and regrettably, this is strictly a product of bipartisan politics. Throughout the minimum wage debate and, yes, again this morning, I have heard the President criticized for not compromising, for sending an ultimatum to the Hill.

Well, let me tell you, folks, you heard about three thin dimes awhile ago, that we are only three thin dimes apart. The President came nine thick dimes to meet the majority side, nine thick dimes.

Do not tell me that the President did not compromise. Nine thick dimes is a long way from three thin dimes. Let me tell you, those three thin dimes are surely on thin ice.

Just once, let us be honest and talk about who has really been willing to compromise and who has not.

□ 1150

There was no compromise on the part of the majority with H.R. 2. It was streamrolled through the committee, the House floor, marked up, subcommittee, full committee, brought to the House in a 3-week period, and then we had the Ridge-Robinson substitute, so-called. Do not tell me that that is a compromise, because that is about as phony as a $7 bill, and all of the Members know that, that it was brought here simply because they realized they did not have the votes to go with H.R. 2 as it came from the committee.

When we went to conference, was there compromise? Of course there was no compromise. There might have been a little out in the hall between the majority of the one body and the majority of the other body, but I will guarantee that there was not any compromise in relationship to what the President was interested in and what the majority wanted. The only compromise, as I said, was made between the same party members from the House and the other body out in the hall, and that was not much compromise either.

Let me now talk a little about this training provision. I have been hearing about this magnificent 60-day training provision. Come on, folks, people can read; people can understand. There is no 60-day training provision in the bill that we have before us today. Who is trying to kid who? Sixty days? First of all, if one worked 60 days for somebody, maybe 500 different employees, they are not included in the first place. One could work 20 minutes for one employer, a quarter of a day for another, 2 days for somebody else, and eventually they have 60 days and so they are not in any training wage whatsoever, but, boy, have they really been trained; they have jumped all over the place to get their 60 days. It sounds like 40 quarters in Social Security—60 days. So there is no 60-day training wage at all.

I will be the first to admit that the one that I presented can use some fine-tuning. I will admit that. But let us not try to convince the public that somehow or other we put a 60-day training wage in here when we know very well there is not. Who out there would fit in that category? There is not a soul. There is not a soul out there who has not had 60 days of employment somewhere, and so we have eliminated them. It prohibits the percentage of employment hours that can be spent on training from exceeding 25 percent. It suggests that the training period be at least 30 days, but above all, it excludes agricultural employees, and then as I said, it excludes anyone who has a cumulative work period of 60 days, not with any one employer or anything of that nature, just any employment for 60 days.

Mr. Speaker, that must be the part of this conference report that the other side is talking about when they talk about a compromise. That must be the only thing that I can find, and that compromise, Members, I hate to keep saying it, is about as phony as they come.

We have not had a minimum wage increase from 1981 to 1988. I have heard that over and over again. We are for one, but let me tell the Members that during that time we went from 600,000 people, heads of households, working at minimum wage in poverty, down to 300,000. We did not do anything during that period in relationship to minimum wage, and we went the right direction. We are now going to try to do something about it and see whether we can go the rest of the way.

Mr. Speaker, I think it is time to stop engaging in partisan politics. The longer workers are deprived of a wage increase, the more likely it is that that wage increase will not come about, and if we are going to just have this partisan rhetoric that we have seen and this noncompromising effort on the part of the majority, then nothing will happen.

They know it will be vetoed, I know it will be vetoed; they know it will be sustained, I know it will be sustained. So let us get on with the business of passing a minimum wage increase as a compromise where one person has come nine thick dimes to the other side's three phony thin dimes, and then we can get on to the real business that we need to do such as job training.

Mr. Speaker, I would urge my colleagues to vote against the conference report.

Mr. Speaker, I reserve the balance of my time.

Mr. HAWKINS. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Subcommittee on Labor Standards of the Committee on Education and Labor, the gentleman from Pennsylvania [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, I rise today in support of the conference report on H.R. 2. This report represents an honest effort to help our lowest paid wage earners as well as to accommodate the concerns of many of the critics of the minimum wage, first among them President Bush.

As a longtime supporter of a raise in the minimum wage I welcome the new President's willingness to support an increase. After 8 years of silence and stonewalling from the White House I had hoped that with a new administration this important issue would finally be resolved. I believe many of my colleagues were also encouraged by the promise of cooperation. Unfortunately, although our committee and the majority in both the House and Senate have compromised, we are disappointed that since that action we have not heard from the President nor has he offered leadership on this issue.

Yes, Mr. Bush has proposed a minimum wage increase, and, yes, that is certainly a step in the right direction. But there is one thing on which we can all agree, no legislative proposal is perfect from the outset, including the President's. The legislative process is one that requires give and take. Democracy survives because we work out our differences instead of fighting over them. The President, however, adamantly refused to talk of compromise, he has said "take it or leave it" to the Congress and then turned his back on the process and our compromise.

This legislation which passed by both Houses of Congress by a bipartisan majority takes into consideration the concerns of many different Members. In our bill we have included a training wage, an issue that still troubles many of the Members from this side of the aisle. We have increased the tip credit, the small business exemption, and we have lowered the rate of increase from our committee bill. Democrats and Republicans have worked together to write this legislation in the hopes of accommodating many different points of view. Yet even with all this work, the President has not responded to our efforts.

On TV and in the newspapers we see this conflict presented as a major test of political will. The commentators often ask who will win in the end. What so many people do not understand is that there will be few winners in this battle. The political benefits of this fight will be fleeting. Unfortunately, the most lasting effect that this battle will have will be upon the millions of people who make up America's working poor.

It will be these people who will be asked to go on working and sacrificing every day. For the ninth year in a row the message to them is, "Don't expect to see any more relief or greater reward for your efforts." Once again these people will have been victims of partisan posturing. There may be no relief this year because Washington is too occupied with business as usual.

Four million American workers, many of them just barely getting by, are waiting for an answer. We must not let this opportunity pass.

I personally hope the President will favorably review what we have forged after a 4-year effort and find the compassion and wisdom to join in our effort to increase the minimum wage from $3.35 an hour to $3.85 this October and to $4.25 in October 1990 and a final step to $4.55 on October 1, 1991. I urge my colleagues to support the adoption of this conference report.

Mr. GOODLING. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas [Mr. ARMEY].

□ 1200

Mr. ARMEY. Mr. Speaker, we are at the beginning stages of a debate that is probably not going to be a very fun debate. Those Members of our body who propose increasing the minimum wage, despite the fact that it will destroy jobs across the Nation, and legislate away the right of the working poor to remain working, are going to argue that compassion is on their side of the argument. That is not correct. Mr. Speaker, compassion without understanding is cruel and mean-spirited, and the only compassion that is behind this proposal to destroy the right to work for the working poor is a compassion with its eyes closed to the fact of the matter, and that has been the manner in which we have approached this process from start to finish.

It will be said that they offered to compromise and others did not, and that is also not true. The President has offered a compromise with nine fat dimes in it, and the President's offer has been rejected out of hand.

It will be said that we do not have a more compassionate alternative, and that is not true. The fact of the matter is a compassionate policy would leave the working poor on the job, free to reach for more and better work in their life, and support them with increased income by which they can feed and care for their children, by which they might be able to reach for their tuition and their training. That is not what we are going to vote on here today.

I am going to ask my colleagues in this House, who will be thoughtful and who will care for the rights of the working men and women of America, to vote no on this proposal today. Save those jobs, give those folks a chance to get started in the world of work. Then when the President vetoes this outlandish proposal, I am going to ask my colleagues to come back and sustain that veto, and then join with the President in demanding that this Congress entertain a serious consideration of a proposal like that offered by our colleague, the gentleman from Wisconsin [Mr. PETRI].

When we are told, Mr. Speaker, that it is not within the jurisdiction of our committee, let us respond by saying the working men and women of America that voted us into office did not vote us to a committee, they voted us to look at every dimension of public policy that will have an effect on their life.

This is the wrong bill to bring to the floor, Mr. Speaker. It is a bill that is cruel and mean-spirited precisely to the working poor.

Who will benefit? Union wage negotiators will stand on the dead, beaten, battered bodies of those poor, abused, unskilled, untrained working men and women of America.

Vote no.

Mr. MURPHY. Mr. Speaker, I yield 4 minutes to my colleague, the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. Mr. Speaker, I rise in support of the conference report on H.R. 2.

I do so with some reservation. Not because I do not believe that a minimum wage of $4.55 by 1991 with a new, 60-day, new hire wage is fair. I believe it is fair and justified. It simply restores the purchasing power of the minimum wage and it takes an historic step in providing a new hire wage for this first time.

My reservation, therefore, is not over the substance of the conference report but over the breakdown in the usual negotiating process between the executive and legislative branch.

First, I want to applaud and thank President Bush for taking the first bold step in this process. He put forward a plan for a 90-cent increase over 3 years and rejecting appeals to battle any increase. He offered this initiative over the opposition of many within his own party—many who didn't even want to discuss minimum wage, let alone increase it. With his proposal, the President demonstrated his compassion and his sense of fairness. Second, I want to acknowledge the willingness of many in this Chamber to reduce their goals, $5.05, $4.65 what have you, and to provide, for the first time, a new hire wage which has been an anathema to many. Unfortunately, the other Chamber did nothing to contribute to this process. By virtually passing the House bill, no opportunity was created for a grand compromise and politics reigns over policy.

My colleagues, I still believe, however, that this Chamber took a valid first step toward such a bipartisan compromise by reducing the wage increase by 10 cents, or 25 percent of the difference, by providing for the first-time ever new hire wage and by increasing and expanding the small business exemption.

Unfortunately, the stalemate we sought to break continues. No negotiators were appointed, no negotiations took place. The administration's offer was said to be their final offer. My friends, we don't treat our worst enemies this way. We do not refuse to negotiate with trading partners or military adversaries. We negotiate with the whole world, but regrettably, on this issue, not with one another.

The arguments against the minimum wage have been the same since the Fair Labor Standards Act was approved in 1938. It is a valid concern over the potential loss of jobs. I will not deny that some jobs will be lost—although the numbers produced by the Department of Labor are based on outdated assumptions and are highly inflated. But since 1938, the Congress and past Presidents have been able to agree on what is a fair wage floor for any hard-working American.

In my view, the real argument this morning is over the value of work. What is the minimum value of a day of hard day's work and does it have more value than welfare or the risks of crime? Does this Congress believe that guaranteeing a minimum standard of living to anyone who works, good public policy? Or should we, through stalemate or by design, allow the minimum wage to decline in relative value until it is meaningless in terms of providing an incentive to work? Remember, the current minimum wage is worth $2.52 in 1981 dollars due to increases in the cost of living and it is moving downward. In current dollars, it would take $4.58 to restore the value of $3.35 in 1981. Clearly, $4.25 falls short of restoring the minimum wage to the poverty level for a family of three.

Yes, I know the marketplace determines the value of work. But, the Government has traditionally stepped in to protect the interest of its citizens and to provide minimal protection. We've done it with the minimum wage since 1938.

My colleagues, the conference report before us today does not increase the minimum wage—it simply restores it to the historically acceptable levels. It includes a new hire wage for the first time. It increases the small business exemption. It's reasonable and it's fair. It deserves your support.

Mr. GOODLING. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin [Mr. PETRI].

Mr. PETRI. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding me this time.

Mr. Speaker, this conference report is regrettable. Everyone knows that the President will veto it and the veto will be sustained. The result will be no minimum wage increase at all, and no other action to really help the working poor. This is a futile exercise in politics. The proponents of this conference report are trying only to score a few political points, but I doubt that even that effort will succeed.

What we should be doing here is trying to figure out how to really help the working poor. That is the supposed purpose of a minimum wage increase. But the truth is, I believe, that a minimum wage is a terribly crude tool for helping the working poor.

It actually hurts the poor through job losses and inflation.

Most of the people it helps are not poor—they are secondary earners from middle-class families. And most of those who are working poor family heads get no direct help from it because they are already capable of earning at least $4.55 but remain poor because of their large families.

Despite all that, the President has offered to accept 70 percent of what the minimum wage proponents originally wanted, together with provisions to minimize the loss of jobs. It is a generous offer, but those who claim to be minimum wage proponents have chosen to spurn it. They could have had most of what they asked, but they have chosen to play politics instead.

When this exercise is all over with, I hope we will return to the real question of how to help the working poor.

In the first place, I think the other side would be wise to accept the President's offer on the minimum wage. But beyond that, I think it is far more important to move on a tax credit approach to the problem. Almost everyone now agrees that is desirable, regardless of what happens on the minimum wage. It is the most direct, most targeted, and most efficient way to help working poor families with children. With a tax credit approach, we can provide direct wage supplements only to those who need them, and in proportion to their need as determined by the number and even the ages of their children.

The President, besides his minimum wage offer, has advanced a tax credit proposal also. The gentleman from New York, [Mr. DOWNEY] and I myself, and several other Members have put related proposals on the table.

I understand that the recent budget agreement assumes that money will be spent in this area. So let's get down to work and put together an agreement on an expanded earned income tax credit adjusted for family size.

Finally, Mr. Speaker, besides providing income support to the working poor, the President has also argued that we should be helping them improve their job skills so they can move up in the labor force on their own. In other words, we should supplement current earnings according to need, and we should help people improve their future earnings. In fact, there is plenty for us to do. Let's quit playing politics and get down to work.

□ 1210

Mr. MURPHY. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, 8 million American workers are not asking for handouts today; they are asking for a helping hand. But the problem is that Congress has been brainwashed over the years by think-tank economists to believe that an increase in the minimum wage is going to hurt our country.

I say "baloney" and I say today I have never seen an economist in a soup line or in an unemployment line. Maybe it would be good for them if they were in a soup line. Then they would know what it would be like to try and keep a family together on $3.35 an hour.

Congress has been subsidizing American industry with food stamps and housing vouchers and, man, they love it. They love it so much they ship the $15 per hour jobs overseas and they keep the $3.35 an hour job for Uncle Sam.

I say today Congress must act. Our American workers should ride the elevator today because they have been getting the shaft too long. Today is not a day in Washington to read lips; today is a day to deal with the pocketbook.

Mr. GOODLING. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa [Mr. GRANDY].

Mr. GRANDY. I thank the gentleman for yielding.

Mr. Speaker, there is not too much more we can say about this. We can talk about this conference report that probably could have been done by a FAX machine; $4.55 for the House, $4.55 for the Senate, agreed, $4.55, and then on through.

The think I want to talk about in the time I have is this three thin-dime argument. We are not talking about three thin dimes. If we want to nickel and dime this issue, let us talk about the 90 cents between the $3.35 and the $4.25 which is what this issue is about.

The President came 70 percent of the way.

If we want to do what I assume the minimum wage is supposed to do, which is to raise the wage base around the country for all of those millions of people who do not collect it and never will, $4.25 will do that. You have got what you want. But if you vote to sustain this conference report and send it to the President and have him veto it, you just delay the process.

You are hurting the people you are trying to help.

This is not labor policy, it is not economic policy, it is not social policy; it is politics. And the people that are getting hurt are the people who could be earning $4.25 right now if we were not playing this game. If we were not insisting on a 60-day meaningless training wage which for some reason exempts agricultural workers—and I do not know why, I guess nobody feels they need training—but it is absurd to think that 60 days of cumulative employment is any kind of a training wage at all. This is a paperboy empowerment act. It means nothing.

Mr. Speaker, I encourage the House to vote down this conference report. Let us go back to where we belong, $4.25.

The President has meant what he said. Let us get that bill back here and pass it and do something about the minimum wage.

Mr. MURPHY. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. KOLTER].

Mr. KOLTER. Mr. Speaker, I rise today to express my strong support for H.R. 2, the conference report on the minimum wage increase.

As a nation, we have seriously neglected to provide our lowest paid workers with an acceptable standard of living. Not since 1981 has the minimum wage been increased. Since that time, the purchasing power of the $3.35 per hour wage has diminished drastically. Had the minimum wage kept pace with inflation, it would now stand at $4.57.

Mr. Speaker, this situation is a national disgrace. All this time our lowest paid wage earners have continually lost ground in their fight to make a decent living for themselves and their families. They must be fairly compensated. Is this too much to ask? I say no.

This is a fair package. Smaller businesses and small farms are exempt from provisions of this bill. History has shown that warnings of decreased employment due to increases in the minimum wage do not hold true. The Nation as a whole can only benefit from enactment of this legislation.

This issue should not be one of partisanship. This issue is one of fairness and equity. I urge my colleagues to give this bill the full support that it deserves.

Mr. MURPHY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES of Illinois. I thank the gentleman for yielding.

Mr. Speaker, I just get sick and tired of listening to these bleeding hearts who are concerned about the loss of jobs on the part of people that would raise the minimum wage to $4.55 an hour over a 3-year period.

It has some similarity between this position and the people who control the minority, the majority in South Africa. When you talk about sanctions, they say one of the reasons why we should not impose sanctions in order that those people can have some sense of democracy, some semblance of democracy, it is that we will hurt the people we are trying to help.

This echo is something that is really bugging me. It is hogwash.

I was one and I am in the distinct position of having been one who was a

recipient in 1938 when the first minimum wage went into effect, the Fair Labor Standards Act, 40 cents an hour. I received a 15-cents-an-hour wage increase.

The same argument was used then that is being used now that it would hurt the people who we are trying to help.

Mr. GOODLING. Mr. Speaker, I reserve the balance of my time.

Mr. MURPHY. Mr. Speaker, I yield 1 minute to the gentleman from Montana [Mr. WILLIAMS], a member of the committee.

Mr. WILLIAMS. Mr. Speaker, there is a hallmark we have tried to reach and maintain for minimum wage. Following the passage of minimum wage more than half a century ago, it was decided that in order to continue to have good wages bubble up into the American economy and to protect workers at the lowest level, that minimum wage ought to be about one-half of the average nonsupervisory wage in this country.

We have maintained that through the years pretty well. In fact, in the 1950's and 1960's, in those great economic times, we actually had a minimum wage that was slightly above that hallmark of half of the other wages in the United States.

However, today we have fallen way below that standard. Today the minimum wage is only 39 percent of the average wage in the United States. And what is worse, the bill before us is so moderate that after the third increase envisioned by this bill, the minimum wage will have only reached 41 percent of the average wage in the United States.

Mr. GOODLING. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, today we are voting on the conference report. I think we all have to recognize there is no compromise here, that there has not been a compromise from the proponents of increasing the minimum wage since the day we started. The bottom line is what is in this conference report is a plain vanilla, 1934-style old way of thinking about minimum wage. The bottom line is it will cost at least 650,000 new jobs per year, the very people that we want to bring into the work force to help them become productive members of society get that first job and move up in the economic ladder, 650,000 of those new entrants into the work force will be denied that job every year, the first year and every year subsequently, and will be doomed into a life of unemployment and poverty.

Now what this House ought to do today is say "no" to this conference report. This conference report is not only not a compromise, it is the same tired old 1934-style increasing minimum wage and throwing people out of work that we have been doing since the 1930's.

Now is there a way to raise the minimum wage without costing those large number of jobs? Yes, there is. Is there a way to compromise this issue? Yes, there is.

President Bush has come 90 percent of the way, has offered a compromise, but his bottom line is neither he, nor should this House, compromise in a way that costs jobs. President Bush has offered a new-hire wage, has offered a package of minimum wage legislation that by the introduction of permitting a new-hire into an employer, permitting that new-hire to get his or her feet wet, to understand something about the job, to come into a job at the current minimum wage of $3.35 an hour and be a new-hire and get that first job as a new entrant to that employment.

□ 1220

President Bush has offered that training wage or that new higher wage as an effort to compromise. He has offered a higher minimum wage as a compromise that many Members would never have thought about offering. But the proponents of the minimum wage have refused to compromise, have refused to negotiate, have refused to even discuss anything different other than what has been proposed from the very beginning based on old style and based on the old laws.

Should there be a compromise? Yes. Do we know what the compromise is? The compromise is what President Bush has offered as a compromise. It is not what he wanted originally, it is not everything he wanted, but it comes 90 percent of the way for the proponents of a minimum wage increase to get what they say they want, which is an increase in the minimum wage, but it also does it in a way in which young people and new entrants into the work force will be not denied that first job.

There can be no further compromise that throws people out of work. President Bush has offered the compromise. The proponents ought to accept it.

Mr. MURPHY. Mr. Speaker, I am astonished to hear that the compromise is what the President wants. What if the compromise would be what I, personally, want? That is not the way the ballgame is played.

Mr. Speaker, I yield 1½ minutes to the gentleman from New Jersey [Mr. PAYNE].

Mr. PAYNE of New Jersey. Mr. Speaker, I rise today in support of an increase in the minimum wage, which is represented by the conference agreement offered in the House today.

As we know, it has been 8 years since the minimum wage was raised to a level that actually represents what President Roosevelt described as a "fair day's pay for a fair day's work." Since 1981 prices have increased by 39 percent, while the value of minimum wage slipped to a mere $2.64. Today that amount places a family of three more than 29 percent below the poverty line. In 1989, a minimum wage worker must work more than an hour to purchase a carton of milk in order to feed his child, and more than 3 weeks to pay the rent at current market prices. In 1992, the purchasing power of the current minimum wage would do more to institutionalize poverty than any other vehicle.

As U.S. Representatives, we have a duty to serve the interest of all people: the working poor as well as the rich. By refusing to raise the minimum wage to a rate that is fair and equitable, we ignore the interest of those citizens most in need. In other words, by compromising with the President any further, I believe that we not only compromise our ideals but our oath of office: To ensure domestic tranquility and promote the general welfare. In addition, by vetoing this agreement, Mr. Bush is refusing to abide by his campaign promise of establishing a kinder and gentler nation.

Mr. GOODLING. Mr. Speaker, I yield myself 1½ minutes.

The President came 70 percent of the way to the majority's proposal. Now the gentleman from Pennsylvania on my side of the aisle said we do not treat enemies that way, we do not treat trading partners that way. I surely hope we do not. I do not want to come 70 percent of the way to enemies, and I do not want to come 70 percent of the way to trading partners, and I hope we never do that, but the President did. He came 70 percent to the majority, 60-day training wage is written in it, no one can qualify. The purpose of the bill is to bargain for those who are way above the minimum, and to do that nicely at $4.25, so I repeat, Mr. Speaker, the longer we engage in partisan politics, the longer workers are deprived of a wage increase. Let us accept the President's proposal of $4.25, and move on to the other issues that are important such as job training.

Mr. MURPHY. Mr. Speaker, I yield 30 seconds to the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Speaker, I hope the ranking minority member would yield to a question. The statement is being made that the President has compromised already, that he has come 70-some-odd percent of the way toward reaching a compromise. I would like to know where was he originally if he has come from someplace up to $4.25. Was he below $4 an hour?

Mr. GOODLING. He did not propose a minimum wage increase. When

Members proposed 4.60, he came to 4.25. So it was 3.35 to 4.25. That is mighty good.

Mr. HAWKINS. The answer is, he came from zero to $4.25 an hour?

Mr. MURPHY. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. OWENS].

Mr. OWENS of New York. Mr. Speaker, the President has said as a matter of principle he must veto a bill which gives an additional 30 cents increase in the minimum wage to workers. At the same time the President has a bill before Members which is asking Members to vote for $157 billion, that is $157 billion to bail out the banking industry; $157 billion for the banks, and he will not give 30 cents for the workers, minimum wage workers who have not had a raise in 8 years, the longest period in history. Inflation has gone up 40 percent in that period. Rents have gone up 43 percent. The cost of public transportation has gone up 36 percent. Health care, 57 percent. All together, the minimum wage is worth about $1.50 less than what it was in 1981. This is the lowest it has been in 30 years.

This modest bill will not make up what minimum wage workers have lost due to our inaction. Minimum wage workers will still be working, however, making about 69 cents an hour less in real terms than they were 8 years ago after we complete the increases, if we go to $4.50 an hour.

I urge my colleagues to vote "No" on the $157 billion on the banks and vote "Yes" to give the workers an extra 30 cents.

Mr. MURPHY. Mr. Speaker, I yield 2 minutes to the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. Mr. Speaker, to me it is unbelievable that George Bush has decided to use the full weight of the Presidency to keep our poorest workers from earning an additional 30 cents per hour. The President claims he is worried about the inflationary impact of this 30 cents. With that attitude, the minimum wage would still be 40 cents an hour because we never would have raised it because we would have been worried that it was inflationary.

I say if the President is so worried about the economy, why not do something about the hostile takeovers? If he is so worried about the economy, why does he not do something about a national energy policy? If he is so worried about the economy, what is he going to do about the waste and fraud in the Pentagon?

But I will tell Members something. The President has drawn the line at 30 cents, so let us put things into perspective.

The top two executives of Walt Disney made a grand total of $72 million last year. What is that per hour, my friends? Fourteen thousand, four hundred per hour. The President never said that was inflationary. The top two executives of RJR Nabisco had to scrape by on a mere $43 million. That is only $8,600 per hour, and I did not hear the President say that that was inflationary. The chairman of Exxon, he is doing such a great job, he made $1.4 million last year. No one said that was inflationary. In 1988, average total compensation for executive increases in the annual Business Week survey topped $2 million for the first time.

□ 1230

The average compensation of a CBO has gone up 300 percent since 1980, and the minimum wage has not risen 1 cent since 1981. There are a lot of great executives in the United States of America, and I wish them well, but if they are able to earn all that money, the people at the bottom of the ladder have a right to 30 cents.

Mr. MURPHY. Mr. Speaker, I thank the gentlemwoman from California [Mrs. BOXER] for her very succinct remarks in support of the conference report.

Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland [Mr. MFUME].

Mr. MFUME. Mr. Speaker, I rise without reservation in strong support of this conference report on the minimum wage.

Mr. FLORIO. Mr. Speaker, I rise in strong support of H.R. 2, legislation to increase the minimum wage to $4.55 an hour over the next 3 years. It has been 8 long years since the last increase in the minimum wage. The current minimum wage of $3.35 an hour is only 35 percent of the average wage in this Nation, the lowest it has ever been since the first minimum wage was enacted 51 years ago. Never before in the history of the minimum wage has so much time passed without an increase.

Mr. Speaker, the majority of minimum wage workers are adults; most are women or minorities. Many are single heads of households, struggling to support families. These are the people we call the "working poor." And I find it unconscionable that, here in America, the richest Nation in the world, we have hard-working women and men who are condemned to a life of poverty.

Our current minimum wage is not a living wage. And unless we act today, unless we vote to increase the minimum wage, the working poor of this Nation will simply fall farther and farther behind.

Today we have the opportunity to bring fairness and dignity back to the lives of our minimum wage workers, and to take a step toward eliminating the need to use that terrible phrase, "the working poor." I urge all my colleagues to vote in favor of H.R. 2.

Mr. KLECZKA. Mr. Speaker, today we are voting on a responsible, modest increase in the minimum wage.

This conference report is the product of many compromises negotiated over several years. As first introduced in 1987, the legislation would have indexed the minimum wage so it would automatically increase over time. A later version of the bill raised the minimum wage to $5.05.

But to meet the concerns raised by businesses and some Members of Congress, the Democratic leadership compromised. This year the minimum wage bill as introduced contained no provisions to index the wage and reduced the increase to $4.65. Since January advocates of a higher minimum wage have again compromised, this time by reducing the increase another 10 cents and creating a new training wage.

So does the final product increase the minimum wage too much? No. Since 1981, inflation has reduced the wage's value by 37 percent. This bill increases the minimum wage just enough to keep the wage's purchasing power relatively constant.

Yet President Bush says this is too much. He says that minimum wage workers should accept continued reductions in the value of their wages. For many minimum wage workers and their families accepting a smaller increase will mean less food on the table. It will mean an increase in the number of working Americans who are homeless.

We Democrats believe that the poorest American workers should not have the value of their wages reduced any further. These workers have already made enough sacrifices. In the name of fairness for American workers I urge my colleagues to support this legislation and I urge President Bush not to veto this bill.

Mr. CONYERS. Mr. Speaker, I rise in support of the conference report to accompany H.R. 2. There is a saying that "justice delayed is justice denied." How true this is. It has been 8 long years since the last increase in the minimum wage was put into effect. Since that time the cost of living has risen more than 30 percent. As a consequence, in today's dollars, the current minimum wage is worth only $2.56.

The case for increasing the minimum wage is urgent and compelling. Our opponents would have us believe that it should not be raised because most people who earn it are teenagers. However, the facts are that only about one-fourth are teenagers. Two-thirds of the minimum wage workers are women, nearly 7 million are full-time workers and nearly 4 million are heads of households.

Millions of Americans throughout this country have been driven into low-paying service jobs due to plant closing and layoffs. The low minimum wage drags down these workers and their families, as well as the wages of all other workers. The fundamental premise of raising the minimum wage is that it should be a living wage. No one who works for a living should be condemned to live in poverty.

Increasing the minimum wage to a livable wage will be one of the most important legislative goals for the 101st Congress. Basic human rights and economic survival are at stake. Economic justice must no longer be delayed or denied.

A minimum wage increase will put a few extra dollars in the hands of low-income workers; reduce Government expenditures for public assistance; restore a measure of dignity to low-wage workers; begin to approach a wage level that represents a fair day's pay for

a fair day's work; and generate more business because low-wage workers must spend virtually all of their income on basic necessities.

Inflation and delay have so eroded the traditional relationship of the minimum wage to average hourly earnings, that one would have to go back to the 1950's to witness the huge disparity of today. This situation is not acceptable; it must be changed.

I would have preferred a much stronger bill that increased the minimum wage to a higher level. In that sense, the conference report does not go far enough. It provides a modest increase. Nevertheless, I urge all of my colleagues in the House who care about protecting and enhancing the quality of life of the American people to vote for this report, and I urge the President to sign it without delay.

Mr. LIPINSKI. Mr. Speaker, I rise in support of the conference report on H.R. 2 because it is fair and it is long overdue. Today I ask my colleagues to look ahead. Look ahead to an issue which we have rarely had to face in our history. The issue of labor shortages. Today, in the context of this debate, we have a chance to address this issue before it becomes a crisis, a chance to act instead of react.

A report by the Department of Labor on the impending shortages reveals that many in the labor force lack basic skills. Potential employees are found lacking in spelling, writing, mathematics, initiative, attitudes, and work habits. The pool of laborers in the best position to fill this critical void are today struggling and failing to stay afloat earning $3.35 an hour. Could a wage earner possibly be inspired to make a real effort for a wage that yields no more than a welfare payment? Would this parent encourage his child to stay in school or would he allow that child to take a minimum wage job? At today's wage that parent would have no choice and the skills gap in the labor force will materialize as a crisis. I urge my colleagues to take a quick look back and see that increases in the minimum wage have been effective. More importantly I urge you to take a long look forward and see how costly the failure of this measure will be.

Mr. RANGEL. Mr. Speaker, I rise to add my voice to those who are arguing for economic justice for the working poor people of America—the more than 75 million people working in jobs subject to the minimum wage and the 7 million who are actually receiving it. Each week, the least paid of these workers take home less than $150 after 40 hours of work.

I believe the previous speakers have already made the financial case to raise the minimum wage to $4.65 an hour by 1992—isn't it enough that the lowest paid among us haven't been voted an increase by this body since 1977? I strongly agree with those arguments, but the dollars and cents facts are only part of the issue.

The bigger issue for me—and for millions of our fellow citizens watching this debate—is fairness.

To put it another way, how many of us could support our family on $150 a week—even with a husband or wife working? Let's not kid ourselves, the majority of those 7 million minimum wage earners I mentioned are either women with children or heads of households. That means, in many cases, that that pittance of a paycheck is feeding, clothing, and housing three or more people.

How many of us could manage on that? How much longer can we ask millions of working Americans to do that?

To those who argue that increasing the minimum wage will cause a loss of jobs to the economy, I point to other evidence from the Department of Labor that debunks such contentions. In fact, I would argue that increasing the minimum wage will be a dramatic incentive to some of the most dispirited elements in our society and thus serve to increase the overall vitality of the economy.

To those who argue that paying the neediest workers a little more will cost the country resources that are more desperately needed elsewhere, I disagree. How can we argue on one day to pledge $50 billion to bail out our failing banking institutions, and on the next deny a $1.20 bailout for failing families?

The fact is that we cannot afford to act other than positively on this matter on behalf of our working poor. At risk is our credibility before the majority of working Americans, some of whom already question our commitment to their priorities.

To anyone who would argue that Congress has a higher priority than increasing the minimum wage, I would ask, what priority is higher than fairness?

Mr. BORSKI. Mr. Speaker, I rise in support of the conference report on H.R. 2, the Fair Labor Standards Amendments of 1989. An increase in the minimum wage is long overdue. It is a matter of economic justice and human dignity. Clearly, it ought to be approved without further delay.

The fair labor standards amendment was established in 1938 to guarantee a living wage to the working people of this country. Since then, it has been periodically raised to compensate for inflation. However, the last time Congress increased the minimum wage was in 1977. At that time, it was raised in steps from $2.30 to $2.65 per hour in 1978, and to $3.35 per hour in 1981.

The minimum wage has stayed at $3.35 since 1981 and today its real value has decreased by more than 30 percent. It is no longer a living wage. In fact, the earnings of a full-time minimum wage worker supporting a 3-person family are 29 percent below the official poverty line.

Contrary to popular myth, the vast majority of minimum wage workers are not teenagers earning a little extra spending money. Approximately 70 percent of all minimum wage workers in 1986 were 20 years or older.

Despite President Bush's promise for a kinder, gentler nation, the administration is firmly opposed to H.R. 2. The President pledges to veto any increase that boosts the wage above $4.25. A wage set at that level would not even come close to replacing the purchasing power lost by minimum wage earners since 1981.

The House-Senate conference report is the best alternative. It raises the wage over 3 years from its current $3.35 an hour to $4.55 and it allows employers to pay first-time workers a training wage during their first 2 months on the job.

While the conference agreement provides reasonable minimum wages for workers, it also assures reasonable opportunity for growth of small businesses by exempting those companies with less than $500,000 in annual gross volume.

In conclusion, inflation and political delay have so eroded the traditional relationship of the minimum wage to average hourly earnings, that we would have to go back to the 1950's to witness the huge disparity of today. This situation is simply not acceptable; it must be remedied.

Mr. RAHALL. Mr. Speaker, I rise in strong support today for the conference report on H.R. 2, the Fair Labor Standards Amendments of 1989. I would like to begin by commending both the esteemed chairman of the Committee on Education and Labor, Chairman HAWKINS, and the able chairman of the Subcommittee on Labor Standards, the gentleman from Pennsylvania [Mr. MURPHY], for all the hard work they have put into this legislation. It has been a long, arduous process, with strong opposing views expressed along the way. In crafting both the original version of H.R. 2 and this conference report, the committee leadership did an excellent job of producing an equitable bill, taking into account the concerns expressed by all.

The Bush administration, on the other hand, has not budged an inch from its original proposal. The President continues to insist on a minimum wage level of only $4.25 per hour, in addition to a 6-month training wage of $3.35 an hour for all new hires. The compromise before us today is very reasonable and will certainly go a long way toward improving the quality of life for American workers while taking into account concerns expressed by the business community: The wage rate will be set at $4.55 an hour after 3 years, businesses with less than $500,000 in annual gross volume are exempt, the tip credit will be increased to 50 percent, and employers will be allowed to pay an eligible worker a training wage for a maximum of 60 days while the employee is engaged in on-the-job training.

We in this country agreed decades ago that the American worker deserved and needed protection against unfairly low wages, and, in fact, that we could determine a minimum wage below which no citizen of this country should work. We made a moral commitment to our workers that even those holding the most menial of jobs were entitled to a wage on which they could exist with dignity. By approving this conference report before us today, we will live up to this commitment. It will then be up to the President to decide whether or not he will live up to his campaign pledged of a kinder, gentler nation for all American citizens.

Mr. POSHARD. Mr. Speaker, let's tell the working men and women of America that we care about their future and that their lives matter.

Let's agree to bring them up to a decent, livable, working wage so they can participate in the American dream.

We're not talking about second homes and overseas vacations. We're talking about people being able to look at their kids in the eye and say "Yes, you can go to college."

If you want to leave behind the people who want to work and succeed, then vote no.

If you want to keep people on the borderline of poverty, forever dependent on Federal, State, and local aid programs, then vote no.

But if you, like me, want to improve the quality of life for minimum wage earners in this country, then vote yes on this minimum wage increase.

It's time for action. Millions of single parents, young people entering the work force, and the working poor are waiting to see if we care enough about them to do the right thing.

Mr. BROWN of California. Mr. Speaker, I rise in support of the conference report on H.R. 2, the fair labor standards amendment which will come before the House today. This measure will increase for the first time in nearly a decade the minimum level which employers can pay their workers, from $3.35 an hour to $4.55 by 1992.

Once enacted, the fair labor standards amendment will provide immediate relief for the estimated 2.1 million Americans who work full-time for the minimum wage, yet remain impoverished. The minimum wage traditionally has equaled 50 percent of the average hourly earnings; however, inflation has so eroded the value of the minimum wage that it has now slipped to less than 35 percent of the average hourly earning—an all-time low.

While I intend to vote to approve the conference report on H.R. 2, Mr. Speaker, I do so with some reservations. In the 100th Congress, my colleagues will recall, the House was considering legislation to raise the minimum wage to $5.05 an hour within 4 years—a substantially higher wage level than the measure before us today. It is disappointing that we have conceded so much in only a few months. I also object to the subminimum training wage provision. I feel this wage invites abuse by employers seeking to get around the minimum wage law. In conclusion, this measure only goes part of the way toward ensuring a fair wage for all workers.

In the interest of compromise, however, I will support the conference report. The conference report on H.R. 2, in its current form, represents a major concession by Congress bringing the bill very close to the proposal put forth by President Bush. It is unfortunate that the President feels compelled to take a hard line on this issue, and intends to veto the measure. It is my sincere hope that Mr. Bush will come to agree with Congress that this conference report, while not perfect, is far better than no minimum wage legislation at all.

Mr. GAYDOS. Mr. Speaker, I rise in support of the conference report on H.R. 2, which would increase the minimum wage to $4.55 over the next 3 years.

For President Reagan once said, "When it comes to the bottom line, all of us are striving for the same thing—a strong and healthy America and a fair shake for the working people."

Unfortunately, some of the working people of this country aren't getting a fair shake. Nearly 5½ million Americans make a mere $3.35 an hour—the minimum wage for the last 8 years—and are still below the poverty level.

Since the last increase in 1981, prices have risen 39 percent. After adjusting for inflation, the purchasing power of the minimum-wage earner is lower than it's been in more than 30 years.

There are those who argue that only teenagers and part-time workers work at the minimum wage. But we know that 84 percent of those workers at the minimum wage are 18 years of age or older, and almost one-half of those earning $3.35 an hour are working full time.

The original purpose of the minimum wage was to provide a living wage—at least a wage that allowed the American family to meet the necessities of life.

From 1959, the first year poverty statistics were collected, through 1981, a full-time, year-round minimum-wage worker earned 102.5 percent of the poverty level for a three-person household.

Today, a minimum-wage worker working full time earns $6,968 per year. Seven in ten of those minimum-wage workers are their family's only earner. They support their family on roughly $580 a month. That's 26 percent or nearly $2,500 below the three-person poverty level.

More than 25 percent of minimum-wage jobs are held by heads of households. During the 1970's, almost 60 percent of young men earned enough to support a three-person family above the poverty level. By 1985, just 44 percent of young men were able to do so.

Today, two-thirds of the 600,000 women who solely support their families and work at the minimum wage are in poverty. That number increases to three-quarters when the woman is black.

Today's outdated minimum wage is no longer a livable one, and it has created a rise in the numbers of working poor and working homeless.

The problem isn't a lack of jobs, but rather that those minimum-wage jobs don't pay enough for a person or a family to eat and afford housing at the same time.

During the 1980's, the number of working poor rose 47 percent. In 1987, the Census Bureau found that 8.4 million Americans worked for a living, but lived in poverty. Of those, almost one-fourth worked full-time, year-round.

The U.S. Conference of Mayors estimated that last year 22 percent of homeless people held full-time or part-time jobs. A count of residents in Connecticut shelters found that 20 percent were working full-time.

I hope that President Bush realizes that we have tried to go at least halfway by accepting a lower minimum base than originally considered as well as a 60-day training wage. He must compromise as well. And he must recognize the value of what we are doing. I hope that he does not veto H.R. 2.

I urge my colleagues to vote in favor of the conference report on H.R. 2 because what's good for the American workers is good for America.

Mr. COMBEST. Mr. Speaker, today is a dark day for agriculture, not because of drought, floods, or a bust in commodity markets, but because of a monster called H.R. 2, the Unfair Labor Standards Act. The burden that will be placed on the backs of a select group of people who clothe and feed the greatest Nation in the world is unbelievable.

Within this job destroying piece of legislation, is a farce provision called a training wage. The present proposal denies the farmers and ranchers of America the same right provided every other employer in the Nation, the right to a training wage. Although the training wage provision is basically ineffective, the stewards of the land will not be offered this wage rate. Granted, many farmers and ranchers will be exempt from payment of the Federal minimum wage, but over 25 percent will feel the wrath of the Unfair Labor Standards Act.

Even it the training wage provision was changed to include farm workers, it would not offset the damage that would be caused by this bill. In addition to increasing the annual inflation rate, H.R. 2 would cause a loss in job opportunities, force layoffs, and increase the overall cost of consumer products. Although there is some merit to a training wage, this bill does not provide a workable training program. I will continue to oppose any legislation that reduces the number of opportunities for employment and works to the detriment of the disadvantaged.

Although my support of this bill does not hinge on the inclusion of farm workers in the training wage, I am hopeful that the veto message from the President on this bill will include language stating that farm employers should not be discriminated against.

I encourage my colleagues to oppose this bill not only because it will raise the unemployment rate, force families into poverty, raise consumer prices, but also because it is discriminatory to the men and women who toil over the land for our great Nation.

Mr. BALLENGER. Mr. Speaker, I rise in opposition to the conference report on H.R. 2, the Fair Labor Standards Act Amendments of 1989.

Unemployment in our country is just over 5 percent, the lowest it has been in 15 years. But leave it to Congress to try and stop the current economic expansion by mandating a wage increase to $4.55 an hour. An increase of this magnitude will destroy thousands of job opportunities for the young, the low-skilled, and the disadvantaged. In addition, raising the minimum wage will adversely affect small businesses, which create 70 percent of all new jobs.

H.R. 2 will also result in higher inflation and interest rates. The direct cost to consumers will be over $12 billion. There will also be an impact on the Federal budget to the tune of $2 billion. Indirectly, we could expect to see the Federal budget increase another $5 billion through higher interest costs and higher benefits costs on programs. With a budget deficit of at least $147 billion, we don't need to be looking for ways to further increase the deficit, nor do we have the resources to pay for such an increase.

A workable alternative to the minimum wage does exist. The Family Living Wage Act shares an identical goal with that of increasing the Federal minimum wage. It would provide direct financial assistance to workers at the bottom rung of the income ladder and it would accomplish that goal without a harmful effect on the American economy.

Unfortunately, this sensible solution has not been considered by the Congress.

Vote "no" on this conference report and let's give the Family Living Wage Act the serious and thoughtful consideration that it deserves.

CALL OF THE HOUSE

Mr. MURPHY. Mr. Speaker, I move the call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

The SPEAKER pro tempore. On this rollcall, 390 Members have recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call were dispensed with.

CONFERENCE REPORT ON H.R. 2, FAIR LABOR STANDARDS AMENDMENT OF 1989

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. WELDON].

Mr. WELDON. Mr. Speaker, I rise in opposition to the conference report on H.R. 2. I do so reluctantly, as I agree that there must be an increase in the minimum wage. Members on the other side of the aisle have eloquently pointed out that the purchasing power of minimum wage has slipped significantly over the last decade.

The debate over this bill, however, has less to do with fair labor, decent wages, and inflation than it does with partisan political battles between Members of this body and the resident of the large house 16 blocks from here. It is another example of political symbolism triumphing over substantive action.

The President has supported an increase in the minimum wage. He did so during his campaign for that office, and renewed the pledge with his compromise proposal, one that would have increased the wage to $4.25 over 3 years. His proposal is an earnest and acceptable offer. It is a proposal that seeks to insulate small businesses from the impact of a sudden jump in the minimum wage by the initiation of a realistic training wage. It is a proposal that never had a chance.

Mr. Speaker, the debate on this bill has made several things very clear. It is clear that the Democrats do not have enough votes to override a presidential veto. It is also clear that the President does not have enough votes in Congress to pass his own minimum wage plan. Why, then, are we continuing with this charade?

Let us begin again. Let us remember that both the administration and the Congress have gone on record in support of a minimum wage increase. Let us negotiate a reasonable compromise that meets the needs of both workers and businesses. Let us take meaningful action that will result in legislative success. Let us remember that an increase in the minimum wage is important because it will help the American worker, not because it helps Congress in its power struggle against the President.

Let us stop treating the debate over the minimum wage as a vehicle for political posturing. It is a game that is of no benefit to the American worker, and we should not play it.

Mr. MURPHY. Mr. Speaker, I yield 30 seconds to the gentlewoman from Washington [Mrs. UNSOELD].

Mrs. UNSOELD. Mr. Speaker, when I was in the State legislature for 2 years we fibrillated, unable to vote for an increase in the minimum wage, so the public grows up, put that measure on the ballot through the initiative and it was overwhelmingly approved by 76 percent of the public.

I call on my colleagues, Mr. President, to follow our public and let us overwhelmingly approve this increase to the minimum wage.

Mr. MURPHY. Mr. Speaker, I yield such time as he may consume to the Speaker of the House, the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. Mr. Speaker, I rise in support of the conference report on the minimum wage bill.

What we consider today is a matter of the most elemental fairness. It goes to the very heart of what this country of ours is all about. Today we seek to provide fairness for the working poor of this country. There are at least 4 million of them who receive no more than the minimum wage. That minimum wage has not been increased since 1981.

During that period of time, their buying power has been reduced by some 30 percent. In 1981, a woman working on a minimum wage and trying to support two children on her own, with the work of 3 hours of pay could purchase a $10 sack of groceries. Today her 3 hours of pay will buy only a $7 sack of groceries.

These are not people who have political power. They are not people whose names appear on the donors' lists to political candidates. They are not prominent in society—for the most part—but they work, and they pay taxes and they contribute mightily to this economy of ours. They do the work that most other people do not want to do.

They are the people who look to us to represent them. They have nobody else to represent them. They are not organized. If they were organized workers, they would be paid much more than the minimum wage, but they are not.

They are not people who seek a handout. They are not asking for welfare, although some of them are homeless because the wages they receive are not adequate to pay for homes or to pay rent in the society in which we live today. And yet they work. They want to perform the dignity of work. It seems to me it is to those people that America owes a very great deal, because without the work that they perform the wheels of American commerce would grind to a halt.

Now let us just look at it from the standpoint of elemental fairness. Let us consider what has happened in these intervening 8 years since 1981. Since that time the minimum wage has fallen to its lowest historical level. Originally when it was established, the idea was that the minimum wage ought to be about half the average wage. But today it has fallen to only about 35 percent of the average wage.

What has happened to others in our society during those same 8 years? I want to show you in a very simple comparative way the difference between what has happened to the highest position in American government and what has happened to them.

Let us take, for example, the post of the Vice President. The Vice President's pay has been increased and would have been increased by recommendations made by the President by $40 an hour since 1981. There you have 400 dimes representing what would have happened to the Vice President's pay. Now I'm not saying it is not warranted. No doubt it is warranted. But that is what has happened in those years. That is an hourly increase of $40.

What has happened to the take-home keep-home income of the top 1 percent of the American people as the result of tax cuts that we have voted since 1981? As a result of the tax cuts that Congress has voted, let alone any other income that may have come to them, the average person in the top 1 percent of the income brackets in the United States will be allowed to keep $17.40 every hour more. Calculated on a 40-hour week, that is about $36,000 a year more in income that the top 1 percent has enjoyed as the result of tax cuts that we have voted. So there you have that comparative figure. That is hourly, that many more dimes an hour, 174 dimes.

Then if you were to add to that what is proposed by President Bush by way of a cut in the capital gains rate, the top 1 percent of America's income group would receive, on average, about $30,000 more a year, or 144 dimes, or $14.40 an hour more take-home pay. So there is what would be given by the Congress over this period of time in just tax cuts for the wealthiest 1 percent.

What then have we given to those at the bottom of our economic pyramid? Nothing, nothing at all. You see, they have lost.

Now what we propose to give is a very meager catch-up which will not even catch up to the buying power of the 1981 minimum wage by 1991.

The difference between what we propose and what President Bush says he would be willing to accept is three dimes. That is it. Three thin dimes.

Now, it is a question of elemental fairness in a country such as ours where we believe all work is dignified work, where we believe that those who do work ought to be protected—the basic American ethic, the fundamental idea that anybody who works for a living in the United States full time ought not to be poor, ought not to be needy, ought not to be homeless. If we believe these things, then surely we would be able to vote for this meager increase.

I hope that when we send it to President Bush he will reconsider it in light of the kinder, gentler admonitions that he has made. If this is to be a kinder and gentler country, certainly then those who work for a living ought to be able to have enough money, a day's pay, so that they will be able to afford hospitalization for their kids if the kids get sick, be able to have a roof over their heads, be able to have an adequate diet, and be able to have enough money to send those kids to school.

□ 1300

Those are the fundamental, elemental things, and this is fundamental, elemental fairness.

The gentlewoman from Washington State mentioned a moment ago a statewide vote in which 70 percent of those in her State voted for an increase in the minimum wage. If the polls I have read are to be believed, some 84 percent of the people nationwide favor this legislation.

Please, bear in mind, my friends, that these are people who have nobody else to look after their interests. They do not have any lobbies. They are not repesented by someone who comes and uses the blandishments and wiles of his persuasion to tell us that we ought to do something for them. They do not make contributions to political campaigns. They are the very people for whom we are elected, because we are the only voice they have.

Without us, they would be voiceless. We are the only source of power that they have. Without us and our concern for them, they would be powerless in this political democracy of ours, and I do not think we want to perpetuate that kind of a situation.

In a sense of fairness, a sense of justice, and a sense of what is just simply right, I ask the Members to vote for this bill and send the message to President Bush to consider it carefully and to sign the bill once we have sent it to him.

Mr. FAWELL. Mr. Speaker, the Fair Labor Standards Amendments of 1989 to raise the minimum wage sounds virtuous and laudable. It very well may be, but let us not fool ourselves into thinking that we are lifting the working poor out of poverty with an increase to $4.55. Raising the minimum wage is not an antipoverty weapon.

A large majority of minimum wage earners are young part-time workers. Ninety-three percent of those earning minimum wage do not maintain families. Of the 3.9 million on minimum wage, one-third work in restaurants where many of their incomes are supplemented by tips. Sixteen percent of minimum wage earners work in sales where many of these earn commissions, yet they are still counted as minimum wage workers.

We say we're trying to help the working poor while we actually will be helping young part-time workers. There is one thing, however, upon which there is agreement. Economists from all persuasions agree that increasing the minimum wage will mean lost jobs and it will mean inflation. The Congressional Budget Office estimates that 125,000 to 250,000 jobs will be lost; the Department of Labor's estimates range from 400,000 to 800,000. Of course, the first employees to suffer this reduction in jobs will be those that have the fewest skills and have the most to lose. We also know that increasing the minimum wage at this time will have a ripple effect on consumer prices. The last time we increased the minimum wage, from 1978 to 1981, inflation jumped from 7 percent to 12 percent and the prime rate more than doubled from 8 percent to over 20 percent. Inflation and recession are the cruelest taxes that we can levy on our working poor.

What is the best way to truly help the poor? First of all, the use of the earned income tax credit would allow us to target our efforts to those who are truly needy. Second, the creation of new jobs, a strong economy, and con-

tinued growth are components of the best employee-benefit program. During the last 7 years, there have been 19 million new jobs created. Sixty-three percent of our adults are now employed; this is a record. Let's keep this ball rolling and avoid any Government-imposed roadblocks. Instead, Congress must reduce its profligate overspending. The national debt now stands at $2.8 trillion, and we pay $240 billion a year in interest alone. Often overlooked, the Federal Government is also borrowing $140 billion a year from the Nation's trust funds. Mr. Speaker, vote "no" on the conference report of H.R. 2, and let's put our energy into efforts that will truly help the poor.

Mr. DE LUGO. Mr. Speaker, I rise today in support of the conference report on H.R. 2, the Fair Labor Standards Amendments of 1989.

I commend the members of the Education and Labor Committee for moving so quickly with this important bill from the subcommittee to the full committee and through conference.

Mr. Speaker, I regret that the President has not seen fit to support this important bill. The President has stated that he will veto this conference agreement if it is sent to him because the minimum wage will be raised 30 cents an hour more than he wants. H.R. 2 will increase the minimum wage from the current $3.35 an hour to $4.55 an hour over a 3-year period. The $4.55 an hour wage rate would begin October 1, 1991.

It is very unfortunate that an important bill such as H.R. 2 may be vetoed because of a 30-cents-an-hour difference with the President. H.R. 2 is a bill that will help millions of working people who are trying to make a better life for their families by working full time and yet continue to remain in poverty. I cannot believe that vetoing this bill will lead to a kinder and gentler nation that the President has said he wants to see. To the contrary, such action will be extremely brutal to the millions of families that can hardly survive on the current minimum wage.

Mr. Speaker, there has not been an increase in the Federal minimum wage since 1981, over 8 years ago. We must now act on behalf of the hard-working men and women of America to increase the minimum wage to a decent level. These workers deserve to be treated fairly.

I hope my colleagues will agree and support the conference report on H.R. 2.

Mr. MURPHY. Mr. Speaker, I move the previous question of the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MOAKLEY). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. GOODLING. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 247, noes 172, not voting 15, as follows:

[Roll No. 52]

NOT VOTING—15

Ackerman	Courter	Molinari
Barnard	Dickinson	Moorhead
Bateman	Edwards (OK)	Pepper
Brooks	Fazio	Roybal
Bustamante	Madigan	Udall

□ 1320

The Clerk announced the following pairs.

On this vote:

Mr. Fazio for, with Mr. Barnard against.

Mr. Roybal for, with Mr. Courter against.

Mr. Bustamante for, with Mr. Dickinson against.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MURPHY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on H.R. 2 just agreed to.

The SPEAKER pro tempore (Mr. LEWIS of Georgia). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

EMMETT SANDERS LOCK AND DAM

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2178) to designate lock and dam numbered 4 on the Arkansas River, Arkansas, as the "Emmett Sanders Lock and Dam" and ask for it immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, I do not plan to object, and I yield to the distinguished gentleman from California [Mr. ANDERSON] chairman of the Committee on Public Works and Transportation, for an explanation of his request.

Mr. ANDERSON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, H.R. 2178 would designate lock and dam No. 4 on the Arkansas River, AR, as the "Emmett Sanders Lock and Dam." I urge my colleagues to join me in support of this legislation.

Mr. Sanders served as mayor of the city of Pine Bluff, AR, in the 1940's and the 1970's, and had been a member of the Arkansas Basin Association since its inception in the 1930's. He served as the Association president and as a member of the coordinating committee, working with the various States that banded together to seek authorization and funding of the Arkansas River Basin project. His interest in transforming the Arkansas River from a menace to an asset continued until his death on March 21, 1989. Mr. Sanders played a leading role in bringing about the completion of the Arkansas River waterway system in a timely manner, and he has been by the Chief of Engineers for his work by being awarded the highest civilian award of the Department of the Army.

I believe that it is a fitting and appropriate tribute to the work of Mr. Sanders to designate lock and dam No. 4 in his behalf and I urge my colleagues to support the bill.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, I rise in support of H.R. 2178. This bill, which I introduced last week, would rename lock and dam No. 4 on the Arkansas River after Mr. Emmett Sanders, formerly of Pine Bluff, AR.

Mr. Speaker, I have long been an advocate of honoring our most distinguished leaders by renaming the public facilities which they have helped to erect in memory of their accomplishments. In my view, this measure of respect and gratitude is best bestowed in the twilight of ones years so that the recipient is able to fully appreciate the honor. Accordingly, I have, in the past, offered legislation to rename a number of public facilities after senior public figures who have played an important role in the life of their community. Such is the case with Emmett Sanders.

Mr. Sanders was the former mayor of Pine Bluff, AR, who, through tireless effort, worked to tame the Arkansas River, bringing navigation and a measure of flood protection to the area. He was an outspoken and extremely effective advocate of water resources development and progress and his efforts were met with not only success but the appreciation of the citizens of Pine Bluff. It is for these reasons that I have advocated legislation in the two preceding Congresses to honor Mr. Sanders by renaming lock and dam No. 4 on the Arkansas River at Pine Bluff as the "Emmett Sanders Lock and Dam."

Unfortunately, Mr. Sanders passed away earlier this spring. His passing was noted with deep regret as evidenced by local newspaper accounts which I would like to have inserted in the RECORD at the conclusion of my remarks. I only regret that we were unable to bestow this honor on Mr. Sanders while he was alive. With that, Mr. Speaker, I withdraw my reservation.

[From the Pine Bluff Commercial, Mar. 27, 1989]

EMMETT SANDERS: THE VISION BEHIND THE SERVICE

Behind his eye for economy, his businesslike manner and bookkeeper's exactitude, Emmett Sanders was a visionary. His dreams for Pine Bluff were as vast as his habits were regular. It was with his vision that some of Pine Bluff's most dramatic advances began, and through his unremitting efforts that they became reality.

For four decades, as mayor and alderman and public servant in general, Mr. Sanders served and shaped his city. He came as close as anyone to embodying local government during those years, and it was Pine Bluff's good fortune that he did. The minimal pay afforded public servants back then could not have brought the attention and devotion he lavished on this town freely. Emmett Sanders was always more interested in Pine Bluff's advancement than in his own.

Of his many visions, surely the idea of an Arkansas River converted from menace to asset was his greatest. And it included a thriving Port of Pine Bluff, the finest in the state. No one but a visionary could have foreseen all that in 1927, when the 100-year-flood came rampaging over the levees on both side of the river, sending refugees to seek shelter on the Free Bridge or any other structure that remained unsubmerged.

Emmett Sanders never forget the sight; it drove him year after year. He was an early member and later president of the Arkansas Basin Association. That lobby worked to make the vision real decade after decade, trip to Washington after trip to Washington, conference and report after conference and repaort . . . until the mean, twisted, treacherous old Arkansas was made over into the Kerr-McClellan River Navigation System. Thanks to dreamers—and workers—like Emmett Sanders, the Arkansas no longer disrupts but serves. It controls floods instead of bringing them. And Pine Bluff reaps the benefits every day.

Utterly reliable, Mr. Sanders was so absorbed in his duties and projects that he was just absent-minded enough to be endearing. A walker, he could be seen traversing the city regularly, looking at it up close as he went his way, noticing things.

Like any public servant, Mr. Sanders took his share of flak over the years but, unlike many, tolerated it with complete self-confidence, never yielding to the temptation to reply in kind. His devotion to his family, especially his two "girls," was as much part of him as his devotion to his city. If Mr. Emmett ever erred, it was never on the side of too small plans or too little ambition of his town and state.

As he grew older, Emmett Sanders' enthusiasm for various projects seemed to grow younger. He had a very American confidence in an ever expanding future, and it grew all the stronger with the years. He died last week at 89, but it should be noted that his vision of what this city would do never grew old.

[From the Pine Bluff News, Mar. 23, 1989]

'MR. EMMETT'

Pine Bluff lost one of its truly outstanding citizens this week with the death of Emmett Sanders.

"Mr. Emmett" was involved in so many of the major developments in Pine Bluff during the great growth periods of the community in the middle decades of this century, there is no way to fully credit his contributions to the progress and development of our city and county.

In his positions in city government and on industrial and river development groups, Mr. Sanders gave us the vision and leadership that was vital to the successful development of such things as our industrial parks, the outstanding port facility that has made Pine Bluff the major shipping port on the Arkansas River, our Civic Center and Convention Center, and practically anything else that has enhanced the life of the city in the past 40 years.

He had a vision of greatness for Pine Bluff and a great pride in its achievements. We can all have an equal pride in his life and his accomplishments for his community. He will be greatly missed.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2178

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

Lock and dam numbered 4 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Emmett Sanders Lock and Dam".

SEC. 2. LEGAL REFERENCE.

A reference in any law, regulation, document, or record of the United States to the lock and dam referred to in section 1 shall

hereafter be deemed to be a reference to the "Emmett Sanders Lock and Dam".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2178, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, might I inquire of the distinguished majority leader, the gentleman from Washington [Mr. FOLEY], the program for next week?

Mr. FOLEY. If the distinguished Republican leader would yield to me, Mr. Speaker, this concludes the business for today and for this week. The House will not be in session tomorrow. The House will meet at noon on Monday next but there will be no legislative business.

The House will meet at noon on Tuesday and will consider 5 bills under suspension of the rules. We will withhold recorded votes that may be ordered on these suspensions until debate is concluded on all suspensions. But the suspensions, if they draw votes, will have those votes taken on Tuesday. They will not be postponed beyond Tuesday.

The suspensions are:

H.R. 968, Noise Reduction Reimbursement Act of 1989;

H.R. 838, to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the Peninsula Airport Commission for airport purposes;

H.R. 2214, to ratify certain agreements relating to the Vienna Convention on Diplomatic Relations;

H. Con. Res. 63, to commend the 30th anniversary of the Tibetan national uprising and to express the concern of Congress regarding human rights abuses in Tibet; and

H.R. 2145, to prohibit U.S. contributions to the United Nations if full membership as a state is granted to any organization or group that does not have the internationally recognized attributes of statehood.

Also Members should be advised of a possible resolution with regard to Panama which may be considered on Tuesday.

On Wednesday the House would normally, under the rules, meet at 10 o'clock, but I intend to offer a unanimous consent request that that be at 12 o'clock on Wednesday.

At 10 o'clock on Thursday to consider a conference report on the House Concurrent Resolution 106, the first concurrent resolution on the budget, subject to a rule; and H.R. 2072, the dire emergency supplemental appropriations for fiscal 1989, subject to a rule, and H.R. 643, to amend the Mineral Leasing Act relating to oil shale claims, subject to a rule.

On Friday, May 19, 1989, the House will not be in session.

Mr. Speaker, if the distinguished Republican leader would yield further, I would like to remind Members that on May 15 the House will change the schedule, under standing orders of the House, and will meet regularly at noon on Monday and Tuesday and at 10 a.m., rather than 2 p.m. on Wednesday, Thursday, and Friday.

Next week because of the pending Republican conference we will ask unanimous consent to meet at noon rather than at 10 a.m. on Wednesday. But the general rule will be 10 a.m. on Wednesday, Thursday, and Friday and noon on Monday and Tuesday.

Mr. MICHEL. I thank the distinguished majority leader.

ADJOURNMENT TO MONDAY, MAY 15, 1989

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so just to ask one question if I may, and I will not object. On the resolution that may come up on Panama, would that come up under suspension of the rules?

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Washington.

Mr. FOLEY. I thank the gentleman for yielding.

Mr. Speaker, it may come up under suspension of the rules or by unanimous consent. I cannot advise the gentleman at this time.

Mr. WALKER. I think the question on our side is, if it will come up under a procedure, will it be subject to an amendment?

Mr. FOLEY. I would advise the gentleman that I doubt very much it would come up on Tuesday in that form.

If it comes up on Tuesday it would be either under unanimous consent or under suspension. I do not think the Rules Committee would have an opportunity to consider a rule prior to Tuesday.

Mr. WALKER. Mr. Speaker. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

HOUR OF MEETING ON WEDNESDAY, MAY 17, 1989

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday, May 16, 1989 it adjourn to meet at noon on Wednesday, May 17, 1989.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

AUTHORIZING EXCHANGE OF CERTAIN FEDERAL PUBLIC LAND IN MADISON COUNTY, IL

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 2119) to authorize the exchange of certain Federal public land in Madison County, IL, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. WISE). Is there objection to the request of the gentleman from California?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, under my reservation I yield to the gentleman from California [Mr. ANDERSON], the chairman of the Committee on Public Works and Transportation, to explain his request.

Mr. ANDERSON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, H.R. 2119 would authorize the United States to convey its interest in a parcel of land to the Blue Tee Corp. in exchange for the conveyance to the United States of the corporation's interest in another parcel of land.

The land owned by the United States was acquired in connection with the construction of the Melvin Price Locks and Dam project on the Mississippi River at Alton, IL. The land will

be under water when the pool behind the locks and dam is raised. This is expected to happen this September.

Local interests wish to develop a boating dock and marina in the area, and have determined that the land scheduled to be inundated would be the best location for the boating facilities if its elevation is raised by the placement of fill material.

The land owned by the United States was acquired in 1985 at a cost of $137,350. In 1988 the United States acquired a flowage easement over the land owned by the Blue Tee Corp. for the sum of $1.125 million. The remaining interest in the land held by the corporation, which would be conveyed to the United States, is valued at $200,000.

Mr. Speaker, the interests in the lands to be exchanged are of comparable value—if anything, the value of the land to be acquired by the Government is likely higher considering the lower 1985 market value of the land presently owned by the Government.

Enactment of this legislation at an early date is necessary so that the land to be used for boating facilities can be raised prior to its inundation. I urge enactment of the bill.

□ 1330

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I thank the chairman for his explanation.

Let me commend the gentleman from Illinois [Mr. COSTELLO] for his hard work in developing a solution to a problem that seems to work out well for all concerned. This solution will allow an important business concern to relocate to a more desirable location. It will allow the city of Alton, IL to develop some valuable recreational facilities. And it will ensure that work on the Melvin Price Lock on the Mississippi River proceeds on schedule without any impairment of the Government's interest. It is my understanding the value of the lands in question is approximately equivalent and that enactment of the legislation will not result in any costs to the Federal Government.

Mr. Speaker, I yield to the gentleman from Illinois [Mr. COSTELLO].

Mr. COSTELLO. Mr. Speaker, and ranking member of the Committee on Public Works and Transportation the gentleman from Arkansas [Mr. HAMMERSCHMIDT], I thank the Members for their support of this bill, and the distinguished chairman of the Committee on Public Works and Transportation, the land swap agreement that will be decided through this legislation will be of great benefit to an economic development project in my congressional district. This is an opportunity for the Federal Government to assist local government in an economic development project at no cost to the taxpayers or to the Federal Government.

Mr. Speaker, I thank both of the gentlemen for their assistance.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. WISE). Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2119

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXCHANGE OF FEDERAL PUBLIC LAND.

(a) EXCHANGE OF LAND.—Subject to section 2, at such time as the Blue Tee Corporation transfers all right, title, and interest in and to the land described in subsection (b)(1) to the Secretary of the Army, the Secretary shall transfer all right, title, and interest in and to the land described in subsection (b)(2) to the Blue Tee Corporation.

(b) DESCRIPTION OF LANDS.—The lands referred to in subsection (a) are the following:

(1) NON-FEDERAL LAND.—35.03 acres of land located in Madison County, Illinois, known as Government Tract Number 121 and owned by the Blue Tee Corporation.

(2) FEDERAL LAND.—58.64 acres situated in Madison County, Illinois, known as Government Tract Number 122 and administered by the United States Army Corp of Engineers, which is constructing the Melvin Price Lock and Dam Project on this land.

SEC. 2. CONDITIONS OF EXCHANGE.

The exchange of land authorized by section 1 shall be subject to the following conditions:

(1) DEEDS.—

(A) FEDERAL LAND.—The instrument of conveyance used to convey the land described in section 1(b)(2) to the Blue Tee Corporation shall contain such reservations, terms, and conditions as the Secretary of the Army considers necessary to allow the United States to construct, operate, and maintain the Melvin Price Lock on that land.

(B) NON-FEDERAL LAND.—The conveyance of the land described in section 1(b)(1) to the Secretary of the Army shall be by a warranty deed acceptable to the Secretary.

(2) REMOVAL OF IMPROVEMENTS.—The Blue Tee Corporation may reserve the right to remove any improvements on the land described in section 1(b)(1) belonging to them. The terms of such reservation shall be subject to approval by the Secretary of the Army. The Blue Tee Corporation shall hold the United States harmless from liability, and the United States shall not incur any cost, associated with the removal or relocation of such improvements.

(3) TIME LIMIT FOR EXCHANGE.—The land exchange authorized by section 1(a) must be completed within 2 years after the date of enactment of this Act.

(4) LEGAL DESCRIPTION.—The Secretary shall provide the legal description of the lands described in section 1(b). The legal description shall be used in the instruments of conveyance of such lands.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on H.R. 2119, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ROBERT DOUGLAS WILLIS HYDROPOWER PROJECT

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 923) to redesignate the Federal hydropower generating facilities located at Dam B on the Neches River at Town Bluff, TX, as the "Robert Douglas Willis Hydropower Project."

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. WISE). Is there objection to the request of the gentleman from California?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, let me just state that we have carefully reviewed the bill on our side of the aisle. We will have no objections to its passage.

Mr. Speaker, for many years, Mr. Willis was the general manager of the Sam Rayburn Municipal Power Authority. That authority served as the local sponsor for the hydroelectric facilities at the Town Bluff project, facilities which were constructed using 100 percent local financing.

It is a fitting tribute to Mr. Willis' efforts that a component of the project, more specifically Dam B on the Neches River, which will provide power to the surrounding area should be named after him.

Mr. ANDERSON. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I yield to the chairman of the Committee on Public Works and Transportation.

Mr. ANDERSON. Mr. Speaker, I am pleased to support the bill H.R. 923, which would redesignate the Federal hydropower generating facilities located at Dam B on the Neches River at Town Bluff, TX, as the "Robert Douglas Willis Hydropower Project."

Mr. Willis was connected prominently with public power and civic activities in east Texas for the majority of his adult life. Mr. Willis served as the executive director of the Sam Rayburn Municipal Power Authority from its creation in May 1980, until his death on May 14, 1988. During that time his public service has lead to the

development of reliable power supplies for the involved communities of east Texas. The renaming of these hydropower generating facilities has the support of the Sam Rayburn Municipal Power Authority, the Sam Rayburn Dam Electric Cooperative, the Sam Houston Electric Cooperative, and the Southwest Power Administration of the Department of Energy.

I urge my colleagues to join me in support of this legislation.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 923

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION. 1. REDESIGNATION OF HYDROPOWER FACILITIES.

The Federal hydropower generating facilities located at Dam B on the Neches River at Town Bluff, Texas, is redesignated as the "Robert Douglas Willis Hydropower Project".

SEC. 2. REFERENCES.

Any reference in a law, rule, map, document, record, or other paper of the United States to the Federal hydropower generating facilities located at Dam B on the Neches River at Town Bluff, Texas, shall be deemed to be a reference to the "Robert Douglas Willis Hydropower Project".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material, on H.R. 923 the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

REMOVAL OF NAME AND MEMBER AS COSPONSOR OF H.R. 49

Mr. BEREUTER. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 49.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

SOLOMON URGES PRESIDENT BUSH TO ABROGATE PANAMA CANAL TREATY

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SOLOMON. Mr. Speaker, yesterday I took the floor of the House to let you, the Congress, and the American people know of a resolution I introduced urging President Bush to abrogate the Panama Canal Treaty.

The recent events connected with General Noriega's attempts to steal the election just held in Panama underline the urgency of this matter. Until such time as a properly elected, democratic government assumes legal control of the nation of Panama, the strategically located canal cannot be allowed to be threatened by the likes of General Noriega. Nor can we stand by and let this killer endanger the lives of American men and women stationed in the Panama Canal Zone.

Mr. Speaker, I would like to call the attention of my colleagues to an editorial I wrote over a year ago concerning this whole issue. In writing this editorial, I wanted not just to point out the dangers posed by General Noriega's presence in Panama, but to the fact that international law provides the basis for abrogation of treaties—such as the one now governing the canal, when certain unexpressed understandings connected with their negotiation prove to be false, and I am submitting the article for today's RECORD.

Mr. Speaker, now is the time for forceful action by our Government, backed by the unanimous consent of the Congress. It is not a time for backpeddling and hesitation. The world is watching and so is this killer, Noriega.

[From the Albany (NY) Times Mirror]

BUSH SHOULD LIMIT CANAL PACT

(By Gerald B. Solomon and Bruce Fein)

Shortly before he left office, President Reagan urged the reconsideration of the 1977 Panama Canal treaty because of the unreliability of Panamanian leader Manuel A. Noriega.

During his confirmation hearings before the Senate Foreign Relations Committee, Secretary of State James A. Baker III also expressed misgivings about the treaty.

One of the President Bush's first acts should be to declare the portion of the treaty transferring sovereignty to Panama to be provisionally inoperative. Congress should also play a constructive role in acting on these concerns.

Noriega mocks the transfer's presumption of continuing Panamanian good faith and ability to prevent sabotage of the canal, and to safeguard its openness and security. International law would thus justify Bush's suspension declaration.

In 1903 the Hay-Bunau-Varilla treated granted the United States perpetual use of and sovereignty over a 10-mile-wide, 50-mile-long Panama Canal Zone. Under U.S. sovereignty, the canal has operated reliably, and without sabotage or interruption. It has significantly boosted the commerce and national security of the United States.

During the Cuban missile crisis, 18 American warships transited the canal overnight, jumping ahead of commercial shipping to fortify a naval quarantine of Cuba. The U.S. warships would otherwise have consumed 13 days to navigate around Cape Horn.

Considering Panama's history of violence, chronic political turbulence and anti-Yankee sentiments, it is little wonder that the 1977 treaty considers good will and friendly relations as being indispensable to carrying out the treaty's terms. Since its birth, Panama has had four constitutions. During World War II, profascist President Arnulfo Arias denied the United States defensive rights outside the Canal Zone. In 1964 Panamanian students rioted in the Canal Zone, leaving four American soldiers dead and dozens wounded while the Panamanian police and national guard stood aloof.

During the 1977 treaty negotiations, participants from both Panama and the United States openly acknowledged a basic presumption of good faith and political will behind the treaty terms. For instance, Panamanian negotiator Carlos Lopez Guevaro trumpeted: "The canal has no defense without the friendship of the Panamanian people"—a view echoed by the Pentagon and President Carter. Similarly, Panama's chief treaty adviser, Romulo Escobar, insisted: "I think we must begin from one major premise: That the United States and Panama are not enemies." American Ambassador William J. Jorden recognized that "(a)gainst a threat of sabotage to the waterway, by far the best defense was the good will and cooperation of the Panamanian people and their national guard."

But Noriega's domestic- and foreign-policy gambits undermine that treaty assumption. He has thickened ties with Cuba, Libya and Colombian Marxist guerrillas, and harassed the 40,000 U.S. civilians and 12,000 U.S. troops in the zone. Indicted by the United States for complicity in drug trafficking and subject to a companion economic embargo, he exploits those actions domestically to bestir Panamanian ill will towards America.

The 1977 treaty terminates U.S. sovereignty over the Panama Canal and the Canal Zone in 1999. That stipulation, however, is limited by the higher treaty right of the United States to protect and defend the canal from armed attack "or other actions" that threaten its neutrality or security or the right of U.S. warships to transit the canal expeditiously in cases of emergency. The latter right requires maintaining U.S. troops in the zone whenever prevailing Panamanian conditions are inconsistent with good faith and Panama's capacity to honor its 1977 treaty obligations—circumstances that exist today.

International law empowers a treaty signatory to suspend provisions when a material unexpressed postulate of the negotiations proves to be false. Thus, during World War II, President Franklin D. Roosevelt declared a shipping convention suspended and inoperative because a continuation of peace was an essential premise of its provisions. Similarly, Bush should inform Noriega U.S. troops will remain in the zone and that zonal security will remain untransferred in 1999 unless the United States then concludes that Panama is both able and politically dedicated to preventing an interruption of canal operations or a violation of canal neutrality.

IN SUPPORT OF HOUSE-SENATE MINIMUM WAGE INCREASE AGREEMENT

(Mr. HAYES of Illinois asked and was given permission to address the

House for 1 minute and to revise and extend his remarks.)

Mr. HAYES of Illinois. Mr. Speaker, as a member of the minimum wage conference committee, I would like to express my support for the House-Senate minimum wage increase agreement, which will be considered on the floor later today. But, I would first like to thank my colleague, STENY HOYER, for convening these 1 minute speeches on this very important issue.

As a former trade unionist, I have strongly supported the need for an increase in the minimum wage since my election to this body. This Congress has waited too long to address the needs of working men and women. I supported the House-passed legislation, and now the conference agreement, because there is absolutely no question as to whether or not there is a need to increase the minimum wage.

As you are aware, the conference committee has approved the Fair Labor Standards Amendments of 1989 which raises the wage floor from $3.35 to $3.85 on October 1, 1989, to $4.25 a year later, and then to $4.55 in the third year. The minimum wage legislation also allows employers to pay a training wage of 85 percent of the minimum wage for up to 60 days that would be a one-time training wage and could not be imposed on a worker with more than 60 days of total job experience.

The basis for the enactment of the Fair Labor Standards Act of 1938 was to provide a decent wage at which working people can care for themselves and provide for their families. We, in the U.S. Congress, have neglected to honor this Nation's 50-year contract with workers to pay a better decent minimum wage. This oversight must now be rectified.

Now that our conference committee, headed by Chairmen KENNEDY and HAWKINS, has convened and completed its work, President Bush is the only remaining obstacle to a minimum wage increase, giving America's working poor their first pay raise in more than 8 years.

The President has stated his intent to veto the congressional agreement since the measure goes beyond his minimum wage ceiling of $4.25 an hour, with a 6-month training wage. I will continue to fight for an equitable minimum wage increase, regardless of this veto threat. While I reluctantly agreed to the training wage provisions in this legislation, I cannot in good conscience further compromise my beliefs and agree to a lower wage increase, which would keep hard working Americans in poverty.

Mr. Speaker, it has been a long and ongoing battle for us to reach this point. It took a great effort to gain consensus on the minimum wage issue, and I strongly urge my colleagues to stand in support of this wage increase, and the conference report to H.R. 2. We must all understand that we have to hold-the-line on this minimum wage raise, regardless of the President's veto threat. Keeping workers in poverty was clearly not the intent of the minimum wage ceiling, and we can no longer condone nor tolerate such occurrences.

IT'S TIME TO RAISE THE MINIMUM WAGE

(Mr. VISCLOSKY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VISCLOSKY. Mr. Speaker, I rise in support of the conference report on the minimum wage. We have compromised long enough at the expense of the well-being of America's working men and women. Now is the time to act.

The 1980's could rightly be labeled the "lost decade" for the working poor. In the 8 years since the minimum wage was last increased, millions of American workers have suffered a serious decline in their living standard because of Federal inaction to ensure that the minimum wage kept pace with the cost of living. As we approach the 1990's, the evidence in favor of raising the minimum wage is overwhelming.

As everyone in this Chamber is well aware, the minimum wage of $3.35 an hour is the same as it was in 1981. The 8 years since the last adjustment marks the longest period without an increase since the law was first enacted in 1938. Due to inflation, the purchasing power of that wage has actually declined more than 30 percent. In other words, had the minimum wage kept pace with inflation, it would now be approximately $4.68 an hour.

The most compelling indicator of our need to act is the fact that the 5 million Americans who currently work full time for the minimum wage earn an income that keeps them below the poverty line. In fact, an individual working 40 hours per week at the minimum wage earns only $134 a week, before taxes and Social Security are deducted.

In March, I joined my colleagues in voting for legislation to raise the minimum wage to $4.55 over 3 years and to create a lower, training wage for employees who have never worked before. The bill represented a compromise over the original measure which would have raised the wage to $4.65 and included no training wage. It is my great hope that this compromise will convince President Bush to withdraw his pledge to veto any minimum wage increase over $4.25.

The arguments against the minimum wage are not new. Indeed, in the first congressional debate in 1938 on legislation to establish a minimum wage of 40 cents an hour, a Michigan Congressman argued that the proposed wage was "ill timed * * * and is neither in the interest of labor nor the Nation as a whole * * * enactment of the legislation will further increase unemployment, not reduce it."

Like their predecessors, present day opponents of an increase in the minimum wage assert that it would cause more harm than good. They now further argue that an increase is not needed since the majority of minimum wage earners are teenagers hoping to earn extra monty for discretionary spending on such luxury items as brand-name clothes and CD's. In reality, nearly 70 percent of minimum wage workers are over 20 years old, and more than 1 million are trying to support a family on the minimum wage alone. More than 60 percent of those earning the minimum wage are women.

In 1938, a Maine Congressman eloquently stated that:

> If we are sincerely in favor of improving working conditions throughout the Nation, especially to help those who are underpaid and unorganized, it is time to meet the situation businesslike and unselfishly, with friends and foes, Republicans and Democrats, willing to forget and forgive, to give and take.

Over 50 years later, these words retain their exactitude. For, if we seriously address the dismal condition of our Nation's working poor, who are increasingly joining the ranks of the homeless, we must establish a minimum wage that will provide an adequate standard of living. To do less and to continue to make the issue of raising the minimum wage a test of political will is to perpetuate a condition of poverty for those who deserve much more for their efforts.

IN SUPPORT OF CONFERENCE REPORT ON FAIR LABOR STANDARDS AMENDMENTS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous material.)

Mr. RICHARDSON. Mr. President, do not veto the minimum wage bill. Do not appear in headlines saying, "Bush Vetoes Minimum Wage."

It is not going to say, "Bush Vetoes Bill That Is Different Between Republicans and Democrats."

Mr. President, we are talking about $500 per year for an individual who is working poor. We are talking about 7 percent of that individual salary in 1 year.

Mr. President, we are talking about 30 cents an hour.

Both sides have come a long way.

I think those of us on the majority side have a tip credit. We have a protection for small businesses. We have a

training wage. I think this side has come a long way.

Mr. President, it is important that you assume that pledge of a kinder, gentler Nation, and not veto the minimum wage bill over 30 cents an hour.

Mr. Speaker, tomorrow the House will consider the conference report on the fair labor standards amendments. Like my colleagues, I am greatly concerned about the working poor of my State and of this Nation.

The erosion of the minimum wage has led to a dramatic increase in the numbers of working poor. Statistics bare my statement out: In 1979, 6.5 million Americans lived below the poverty level. In 1987, 8.4 million Americans worked for a living but lived in poverty. The decline in the purchasing power of today's minimum wage is directly related to the escalation in the number of working poor.

The minimum wage was last increased in 1981 to its present level of $3.35. However, as a result of inflation, the purchasing power of minimum wage earners has declined over 20 percent. In other words, compared to 1981, the purchasing power of today's minimum wage is worth a mere $2.40. I would like to point out that in this same period, we increased Social Security benefits by 45 percent. In fact, when we adjust the minimum wage for inflation, we find that it is at its lowest level in four decades.

My friends and colleagues, I fear that we have been negligent. I say this because our silence over the past 8 years, has contributed to the rise of a new underclass in America—the working poor and homeless. I would remind my colleagues that today's minimum wage worker must provide food, shelter, and clothing for his or her family on just $7,000 a year.

In short, our failure to raise the minimum wage is having dire and dramatic consequences for millions of American workers and their families. We, in Congress, must right the wrong that we have committed. Moreover we are duty bound to help those who lack a political voice participate in the life and prosperity of the Nation by raising the minimum wage. In closing, I would hope that the President will remember his campaign promise of a kinder gentler nation.

". . . A fair day's pay for a fair day's work."—FDR on recommending legislation to establish a minimum wage May 24, 1937.

On March 23, 1989, the House passed a minimum wage increase by a vote of 248 to 171. The Senate passed its version on April 12 by a vote of 62 to 37.

The House will pass a conference report this week and the Senate is expected to act soon.

This Democratic bill would raise the minimum wage from its present level of $3.35 an hour to $4.55 an hour over three years ($3.85 on October 1 of this year; $4.25 on October 1 of 1990; and $4.55 on October 1 of 1991).

This bill also permits the payment of a sub-minimum "training wage" to certain employees for 60 days and expands the exemption from coverage of the minimum wage law for small businesses. Businesses with gross sales under $500,000 and family owned and operated businesses are exempt. The only employees eligible for the subminimum wage would be those whose total work experience is less than 60 days who is receiving "on-the-job" training for at least 30 days. This Democratic bill also contains other safeguards to ensure employers do not replace regular wage workers with subminimum wage workers.

The Bush Administration wants to pay a subminimum wage to all newly hired employees for six months, regardless of their past experience and training.

The Department of Labor's own calculations show that minimum wage jobs require, at most, 30 days of training, yet the President insists on 6 months. The reality is that Bush is trying to destroy the effectiveness of the minimum wage entirely by giving businesses a huge loophole allowing them to hire and fire low skilled workers as a routine business practice.

Today the minimum wage is $735 (or 9.5 percent) below the estimated 1988 poverty level for a family of two, $2,463 (or 26.1 percent) below the poverty level for a family of three, and $5,123 (42.4 percent) below the poverty level for a family of four.

The Pennsylvania Legislature found that many of the homeless in that state have jobs but do not make enough money to afford housing.

The U.S. Conference of Mayors estimated that last year 22 percent of homeless people held full-time or part-time jobs. In some cities, like San Antonio, more than half the homeless have jobs.

In 1987, a Gallup Poll revealed that the American people supported raising the national minimum wage to $4.65 in 1990 by a wide margin: 77 percent to 20 percent.

In 1988, a Gallup Poll revealed that the American people favored raising the national minimum wage to $5.05 by 1992 by a margin of 76 percent to 20 percent.

In 1989, a Washington Post/ABC News poll found 84 percent of Americans believed minimum wage should be increased, while only 14 percent thought it should be kept at the current level; 21 percent of respondents believed that such an increase should be given the highest priority, and 38 percent believed it should receive a high priority.

President Bush has threatened to veto any bill that increases the minimum wage beyond $4.25 per hour, or that fails to include a six-month training wage that could be paid to all newly hired employees, regardless of their past experience and training.

The Bush Administration sees no problem with hard working Americans taking home a paycheck of $134 per week after putting in a 40-hour week.

Bush claims he agrees that an increase is needed, but he is arguing about a mere 30 cents a week. At the same time he supports massive tax cuts for the very wealthy in the form of a capital gains tax break.

In other words, Bush has taken his first firm stand of this Administration by reaffirming the Republican commitment to the rich to the disadvantage of average working Americans.

While most Americans were better off during the last decade, the lowest fifth fell further behind. Bush says, "too bad!"

Nothing in the President's proposal requires real training, its just a recipe for abuse, a huge wink at big business to avoid paying the minimum wage.

Senator Bob Graham: "when I look at the President's proposal, it is not six months; it is potentially forever because a person could stay on that training wage time after time after time."

The minimum wage was last increased in 1981, when it was raised to its present level of $3.35 per hour. Had the minimum wage kept pace with inflation, it would now stand at $4.68 an hour.

While the minimum wage has remained frozen since January 1981, average hourly wages have risen 35.9 percent, and the cost of living has increased 39.8 percent.

The lack of change in the minimum wage during a period of rising prices has reduced the value of the current minimum wage to only $2.40 (in January 1981 dollars). This is the lowest purchasing power of the minimum wage since 1955.

Relative to the average hourly wage of all private-sector production and non-supervisory workers, the minimum wage has fallen to its lowest level since 1949.

This scandalous neglect of hard-working Americans has contributed to the rise of a new underclass in American society—the working poor and the working homeless.

Working for a living and living in poverty are no longer mutually exclusive conditions in the U.S. More than 1.1 million families cannot escape from poverty even though one or more persons within the family work full-time and year-round.

In 1987, 8.4 million Americans worked for a living, but lived in poverty, according to the Census Bureau.

From 1959 (the year poverty statistics were first collected) through 1981, the minimum wage was true to its original purpose: it provided a living wage. During these years, a full-time, year-round minimum wage worker earned, on average, 102.5 of the poverty threshold for a three-person household. Today a full-time minimum wage earner, working 40 hours a week for 52 weeks, earns $6,968 a year. The only type of "family" that keeps out of poverty is a single individual living alone.

From 1973 to 1987, the average cash income in constant after-inflation dollars dropped from $5,507 in 1973 for the bottom one-fifth of Americans. At the same time the top fifth froze from $60,299 to $68,775. In other words the average income of the lowest fifth dropped nearly 11 percent while those at the top fifth enjoyed a rise of 24 percent.

Bush has made his only other firm stand since assuming the presidency, his crusade to cut taxes for the wealthy. He proposes cutting the capital gains tax (a tax paid only by the richest Americans) to 15 percent, while working Americans pay up to 28 or 33 percent of their wages to taxes. His argument is that it will stimulate investment and lead to greater revenues in the U.S. Treasury, but economists disagree.

The Joint Committee on Taxation estimates the proposal would cost the Treasury nearly $25 billion in lost receipts over six years.

The President fights a 30-cent pay raise for working Americans in poverty, yet he proposes a capital gains tax cut to give the very wealthiest Americans a $30,000 tax cut. That cut is four times larger than the total annual income of Americans who work at the minimum wage.

"We are told we cannot afford 30 cents more an hour for the poorest of Americans but we can afford $30,000 for the wealthiest Americans." (Senator Majority Leader George J. Mitchell during Senate floor debate.)

A Kinder, Gentler Minimum Wage Is a Livable Minimum Wage

More than a decade ago, the U.S. Congress passed the 1977 amendments to the

Fair Labor Standards Act (FLSA). These amendments, through a series of step increases, raised the national minimum wage rate to $3.35 per hour as of January 1, 1981. While the minimum wage has remained unchanged since January 1981, average hourly wages have risen 35.6 percent, and the cost of living has increased 39.8 percent.

The lack of change in the minimum wage during a period of rising prices has reduced the value of the current minimum wage to only $2.40 (in January 1981 dollars). Had the minimum wage been adjusted over the past eight years to maintain its January 1981 value, it would have reached $4.68 per hour as of February 1988. But, as it is: The purchasing power of the minimum wage has declined to its lowest level since 1955, and relative to the average hourly wage of all private-sector production and non-supervisory workers, the minimum wage has fallen to its lowest level since 1949.

Allowing the value of the minimum wage to fall so steadily and for so long has not made life any kinder or gentler for those Americans who work at minimum wage jobs. It seems, in fact, all but certain that the stagnant and, hence, deteriorating minimum wage rate of the 1980's has contributed to the rise of a new underclass in American society—the working poor and the working homeless.

Working for a living and living in poverty are no longer mutually exclusive conditions in the United States. The plethora of statistics in Table 1 shows that poverty does not necessarily result from a lack of work effort but often results from insufficient rewards for work. When more than 1.1 million families cannot escape from poverty even though one or more persons within the family work full-time and year-round, the adequacy of the wages paid must be questioned.

TABLE 1—WORKING FOR A LIVING, BUT LIVING IN POVERTY

According to the latest Census Bureau data on poverty, in 1987: 8.4 million Americans worked for a living, but lived in poverty, 5.0 million Americans worked full-time, but remained in poverty, and 1.9 million Americans worked full-time, year-round, but remained in poverty.

Excluding those individuals who did not work in 1987, and generally would not have been expected to work, because they were ill or disabled, over the age of 65 and retired or between the ages of 15 and 21 and going to school; 56.4 percent of the individuals living in poverty worked during the year, 33.1 percent of the individuals living in poverty worked full-time, and 12.5 percent of the individuals living in poverty worked full-time and year-round.

With respect to the 7 million families mired in poverty in 1987: One or more persons worked full-time, year-round in 1 in 6 poor families, and one or more persons worked at least part-time, part-year in 57.2 percent of poor families.

Excluding those heads of households who did not work in 1987, and generally would not have been expected to work, because they were ill or disabled, retired, or single-parent mothers at home caring for children under the age of six: 70.7 percent of the householders worked during the year, 48.5 percent of the householders worked full-time, and 21.9 percent of the householders worked full-time and year-round.

Of those householders who worked part time: 52.4 percent were single-parent mothers with children under the age of 18, and 25.7 percent were single-parent mothers with children under the age of six.

The original purpose of the minimum wage was to provide a living wage—at least a wage that allowed the American family to meet the necessities of life. Upon proposing the legislation that established the national minimum wage rate, Senator Hugo Black explained:

"The bill is intended to prevent . . . the payment of wages which are below a necessary subsistence level. The bill is written upon the principle that the Congress should not attempt to make itself a wage fixing body. We believe that wages should be fixed by agreement between employer and employee, except that the bill has as its objective withdrawing from competitive conditions the wage level necessary for a person to live on, wherever he may be." (*Congressional Record*, June 27, 1937, p. 7651.)

From 1959 (the year that poverty statistics were first collected) through 1981, the minimum wage was true to its original purpose—it was a living wage. During those years, a full-time, year-round minimum wage worker earned, on average, 102.5 percent of the poverty threshold for a three-person household.

Today, however, the minimum wage no longer keeps a family above poverty. A full-time minimum wage earner, working 40 hours a week for 52 weeks, earns $6,968 a year. The only type of "family" that the wage keeps out of poverty is a single individual living alone. For the other American families, the minimum wage is inadequate. This is seen by the fact that: it is $735 (or 9.5 percent) below the estimated 1988 poverty level for a family of two, it is $2,463 (or 26.1 percent) below the estimated 1988 poverty level for a family of three, and it is $5,123 (or 42.4 percent) below the estimated 1988 poverty level for a family of four.

Without an increase in the minimum wage, the income gap for minimum wage workers will grow even wilder in 1989. This year, for example, assuming inflation does not accelerate above last year's rate, a full-time minimum wage worker will earn approximately $2,850 (or 29.0 percent) less than the projected poverty threshold for a family of three.

The link between the current minimum wage and poverty and homelessness has been repeatedly acknowledged by people directly involved in efforts to alleviate the plight of these unfortunate Americans. Their stories again demonstrate that the problem is often not the lack of jobs but that many jobs do not pay enough to enable a person or family to eat and afford housing at the same time.

The Pennsylvania legislature's Subcommittee on Health and Welfare found many of the homeless in that State have jobs but do not make enough money to afford housing. According to State Representative Michael Dawida: "What shocked the committee was when we went to Montgomery County, the wealthiest in the State, and found people sleeping on benches . . . There is almost no unemployment in that county, but many people can't afford the housing."

The U.S. Conference of Mayors, using information supplied by mayors' offices in 26 cities, estimated that last year 22 percent of homeless people held full-time or part-time jobs, up from 19 percent the year before. In some cities, like San Antonio, more than half the homeless have jobs.

David Christensen, executive director of the Harbor Interfaith Shelter, an agency that helps homeless families become self-supporting, estimated that minimum wage workers must set aside 70 percent to 80 percent of income for housing. About 30 percent of the families who come to the shelter have at least one wage-earner, Christensen explained; "You have to be the tightest money manager in the world to spend 70 percent to 80 percent of your money on rent."

A count of residents in Connecticut shelters found that 20 percent were working full-time. "It's probably the first time in American history that homelessness is appearing among employed people," explained Robert Hayes, counsel for the National Coalition for the Homeless." And it's on the upswing."

For those who have worked with, or studied, the problems of the working poor and homeless, a common response is to increase the minimum wage. The report of the Pennsylvania legislature's Subcommittee on Health and Welfare recommended increasing the minimum wage. As the counsel for the National Coalition for the Homeless points out, "the best place to begin" to deal with this social and economic calamity is "to increase the Federal minimum wage."

Opponents of legislation to raise the minimum wage attack this premise by arguing that minimum wage earners are mostly teenagers and other part-time workers whose earnings are not essential to their family's well-being. The U.S. Chamber of Commerce cites the following statistics in arguing against any increase in the minimum wage: Two-thirds of minimum wage-workers are part-time workers, 60 percent of minimum-wage workers are under 25 years of age, and most minimum wage workers are teenagers living in households with an employed adult.

While these statistics are technically correct, they are misleading in that they do not take into account those workers earning more than the current minimum wage but less than the proposed higher minimum wage. As shown in Table 2, for workers earning between the current minimum wage, $3.35 an hour, and the higher minimum wage of $4.65 an hour proposed by the Senate Labor and Human Resources Committee: Nearly half of these wage earners are full-time workers, more than 50 percent of these wage earners are over 25 years of age, and only 40 percent of these wage earners are children living in families.

For workers earning between $4.25 an hour, the minimum wage level proposed by the Bush Administration, and $4.65 an hour, the differences in the demographics are even greater. For these workers: More than 60 percent are full-time workers, nearly 60 percent are over 25 years of age, and only 30 percent are children living in families.

TABLE 2.—DEMOGRAPHICS OF LOW-WAGE WORKERS

[In percent]

	$3.35	$3.35 to $4.64	$4.26 to $4.64
Full-time workers	32.1	47.0	62.6
Part-time workers	67.9	53.0	37.4
Children in families	51.7	40.8	30.6
Teenagers	39.7	29.3	18.6
Non-teenagers	60.3	70.7	81.4
Under 25 year of age	61.8	51.8	41.6
Over 25 years of age	38.2	46.2	58.4

The problem with the figures cited by the U.S. Chamber of Commerce and other opponents of an increase in the minimum wage is the confusion they create as to who would

benefit from such an increase. This confusion was evidenced by a recent New York Times editorial which incorrectly stated that "most of those who do benefit from increased wages will be part-time workers from middle-income families."

The argument that those who would benefit most from an increase in the minimum wage would be teenagers or others working part-time jobs to earn a little extra "spending money" is simply not true. For example, nearly 1 to 5 workers earning $4.65 per hour or less are the only employed members of their family.

The contention that an increase in the minimum wage results in lost jobs is another age old myth that has always been cited by opponents of the minimum wage. So often has this contention been repeated that it, too, has become a common misconception cited as an ordinary fact. Last year, for example an editorial in the New York Times noted that raising the minimum wage would "push thousands of needy workers off the job rolls."

The employment effects of an increase in minimum wage, however, would not necessarily be evidenced by workers being thrown "off the job rolls." As University of Michigan Professor Charles Brown, former senior economist with the Mimimum Wage Study Commission has noted, "The reduction in employment predicted in the standard model is not necessarily accomplished by that number (or any number) of workers being discharged since turnover rates in minimum wage jobs are on the order of 12.5 percent per month, attrition is a speedy method of adjustment."

Whatever employment affects occur following an increase in the minimum wage they are likely to take place in terms of fewer jobs being created rather than existing jobs being lost.

While opponents suggest that raising the minimum wage is courting economic disaster, history reveals that the minimum wage has been repeatedly raised in the past without resulting in any economic calamity. As Secretary of Labor Willard Wirtz reported to Congress in 1966 "The record is that following the original establishment of the mimum wage there is clearly no evidence of decreased employment resulting from statutory minimum wage rate increase." Indeed as shown in Table 3, excluding those occasions when a change in the minimum wage has coincided with a severe recession, every increase in the minimum wage since 1950 has always been followed by a period of increased employment.

TABLE 3.—THE MINIMUM WAGE AND EMPLOYMENT

	Change in minimum wage	Change in employment [1]
January 1950	$0.40 to $0.75	+1,977,000
March 1955	$0.75 to $1.00	+962,000
September 1961	$1.00 to $1.15	+1,585,000
September 1963	$1.15 to $1.25	+1,282,000
February 1967	$1.25 to $1.40	+1,609,000
February 1968	$1.40 to $1.60	+2,066,000
May 1974	$1.50 to $2.00	−1,438,000
January 1975	$2.00 to $2.10	+1,634,000
January 1976	$2.10 to $2.30	+2,655,000
January 1978	$2.30 to $2.65	+3,585,000
January 1979	$2.65 to $2.90	+1,910,000
January 1980	$2.90 to $3.10	+28,000
January 1981	$3.10 to $3.35	−308,000

[1] Change in employment over the 12-month period following increase in minimum wage.

As mentioned previously, the idea that an increase in the minimum wage results in lost jobs comes from theoretical economic models that indicate some jobs may not be created with such an increase. The precise number of jobs involved is very unclear. Critics of an increase have charged that it could involve hundreds of thousands, perhaps, millions of jobs.

In testimony to the Senate Labor and Human Resources Committee on March 3, 1989, the Administration asserted that an increase to $4.65 would result in the loss of 650,000 jobs.

The U.S. Chamber of Commerce puts the number of lost jobs even higher. It projects 750,000 lost jobs if the wage is increased to $4.65.

A study by Clemson University economists estimated that an increase in the minimum wage to $4.65 would cost 1.9 million jobs by 1995.

While economists generally agree that an increase in the minimum wage would have some impact on employment, there is no general agreement that the magnitude of the impact would be as large as that claimed by critics of minimum wage legislation. In contrast to the studies cited above, other credible studies indicate that the number of theoretical jobs not created will be minimal.

A study by an economist with the U.S. Department of Labor's Office of Policy concluded that while "there are sound reasons to believe that increasing the minimum wage does reduce teenage employment, the evidence from the CPS time-series data is not very convincing."

The Minimum Wage Study Commission estimated that a 10 percent increase in minimum wage is associated with a reduction in teenage employment opportunities of about one percent.

A study at the University of Michigan under the supervision of the senior economists for the Minimum Wage Study Commission, found that a minimum wage increase of 10 percent is associated with a 0.56 percent decrease in employment opportunities and that there is no effect on the employment of young adults (age 20 to 24).

The bottom line is, as Professor Brown points out, the "effects of the minimum wage on employment are smaller" than supposed, and the economic impact of an increased minimum wage is "overrated."

COMPARISON BETWEEN MINIMUM WAGE CONFERENCE AGREEMENT AND BUSH PROPOSAL

WAGE RATE

Under the conference agreements, the minimum wage rate would be increased to $4.55 an hour by 1992;

Under the Bush proposal, the minimum wage rate would be adjusted to $4.25 an hour by 1992.

TRAINING WAGE

Under the conference agreement, employers are authorized to pay inexperienced workers 85 percent of the minimum wage for a maximum of 60 days for on-the-job training—$3.87 in 1992. Employees are eligible for the training wage until they have worked for a total of 60 days for all employers. Migrant and seasonal farm workers are exempt from the training wage.

Under the Bush proposal, employers could pay any new hire, regardless of prior work experience, 80 percent of the minimum wage for 6 months—$3.40 in 1992. No training would be required. The Bush proposal would exclude virtually all migrant farmworkers from regular minimum wage coverage and would subject approximately 40 percent of all low-wage workers to a subminimum wage.

MINIMUM WAGE REVIEW BOARD

The conference agreement establishes a bipartisan review board to submit periodic recommendations to the Congress on adjustments needed to preserve the purchasing power of the minimum wage and estimates of the economic effects of enacting such adjustments.

The Bush proposal does not provide for an objective means to examine the minimum wage rate.

TIP CREDIT

Both the conference agreement and the Bush proposal provide for an increase in the tip credit from 40 percent to 50 percent.

SMALL BUSINESS EXEMPTION

Both the conference agreement and the Bush proposal increase the small business exemption to $500,000. The conference agreement leaves current law's coverage for hospitals and schools unchanged; the Bush proposal would include hospitals and schools in the small business exemption.

OVERTIME EXEMPTION FOR REMEDIAL EDUCATION

The conference exemption would exempt employers from overtime provision up to a maximum of 10 hours per week while workers lacking a high school diploma receive remedial education; the Bush proposal has no comparable provision.

CONGRESSIONAL COVERAGE

The conference agreement would apply the rights and protections of the Fair Labor Standards Act to House and Senate employees; the Bush proposal has no comparable provision.

APPRECIATION TO PUBLIC SERVANT ALAN KRANOWITZ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. UPTON] is recognized for 5 minutes.

Mr. UPTON. Mr. Speaker, you know a lot of people come and go in this great institution, a lot of staff people. Some to seek their fortune, others to do other things. It is pretty rare when we actually see someone stay for years and years and years. A true public servant.

One of those that just left our service, Alan Kranowitz, a very good friend, very good staff member here in this institution, one that gave up so many things to serve our great country. Alan is a longtime friend of mine. In fact, when I used to head Congressional Affairs at the Office of Management and Budget, Alan had held that job back in the seventies as well, and worked for our good friend and former colleague, Tom Loeffler, for a number of years. I really got to know him when he came down to the White House and served as head of the House side of Congressional Affairs for many years.

In that capacity, I witnessed many daily meetings, luncheons, working out on the steps of the House, lobbying Members to vote one way or another. He had a tremendous understanding of the issues and the issues

that run this institution. He knew the personalities, and that is how this institution works, the personalities. That is what really makes things go.

We on the Republican side of the aisle, we do not have the votes on most of the issues. In fact, today we had only 175 out of 435 votes and for those early days particularly in the Reagan administration when Ronald Reagan was acclaimed across this great land as having a tremendous relationship with Congress, the tremendous battles that he was able to win, working with Congress and working through the initiatives that the Reagan team was able to get through, so many of them were responsible because of the guiding hand of Alan Kranowitz, knowing the issues, knowing the personalities, being able to build the coalitions to get things done.

We gave up quite a bit, Alan did, sacrificing that to serve this great institution, both in the White House and again later in the House of Representatives.

□ 1340

Dick Cheney, now the Secretary of Defense, unopposed in our own leadership fight for minority whip this last year, and who probably became the fastest Member to get confirmed through the Senate once he was announced to become Secretary of Defense, worked closely with Alan Kranowitz. Alan Kranowitz had a great hand in Dick Cheney's success. Alan, for good reason, was going to be one of his top aides here on the House floor if Dick Cheney had stayed as whip.

When Alan announced his departure just 2 or 3 weeks ago, I know there was great sadness on my own side of the aisle, as well as on the Democratic side, knowing that we will miss a great friend, someone who has worked and toiled for countless hours, hundreds and hundreds of hours, for the cause.

Mr. Speaker, I know that all of us, in recognition of Alan Kranowitz' contributions to this great institution, wish him a great farewell, and I know that we will see him again soon.

THE 100TH ANNIVERSARY OF SAINT FRANCIS DE SALES CHURCH

The SPEAKER pro tempore (Mr. WISE). Under a previous order of the House, the gentleman from Pennsylvania [Mr. COYNE] is recognized for 5 minutes.

Mr. COYNE. Mr. Speaker, it was nearly 100 years ago, on September 15, 1889, that Bishop Richard Phelan laid the cornerstone for a new church on the corner of First and Mary Streets in McKees Port, PA. It would be called Saint Francis de Sales Church.

That must have been a happy occasion—and a very special occasion—for all the clergy and laity who were gathered there that day. But I am sure that none of them could have predicted that the next 100 years would see thousands of people at Saint Francis for worship, for counseling, for education, for solace. They could not have predicted the 9,385 baptisms, the 5,629 confirmations, the 2,863 weddings, the 3,084 deaths in the parish that they were starting.

The church building at First and Mary was the center of the parish until 1900, when the present church—which faces Chartiers Avenue at Margaret Street—was built.

From the start, an important part of the mission of Saint Francis de Sales was its school. Indeed, the building that was dedicated in 1889 had two floors, with the school on the first floor and the church on the second.

Excellence in education was always a hallmark of the Saint Francis de Sales School. That tradition continues to this day in McKees Rock Catholic School, which was formed 11 years ago when Saint Francis de Sales School merged with the parish schools of Saint Cyril and Methodius; Saint Mary, Help of Christians; and Saint Vincent de Paul.

A big part of the reason for the success of Saint Francis de Sales through the years has been the dedication and devotion of its pastors. Their names and the dates of their service are: Rev. Charles J. Coyne, 1889–1911; Rev. William Dunlea, 1911–1928; Very Rev. Philip J. Moore, 1929–1960; Rev. Michael A. Cusick, 1960–1966; Rev. John B. Maher, 1966–1969; Rev. William A. Lavelle, 1969–1972; Rev. Thomas M. Kirby, 1972–1985; and Rev. Richard J. Dorsch, 1985-present.

The motto of Saint de Sales was, "Ask for nothing, refuse nothing." The pastors, parishioners, and employees of his church have kept that standard for 100 years.

This is an appropriate time to mention two groups of unsung heroes and heroines. The first is the church's current staff and employees: Rev. Richard Dorsch, pastor; Father Regis Ryan; Delores Gallagher; Ellie Brown; Edward Shearer; Anna Grace Perrier; Deborah McGowan; Sister Michele Quinn; Ruth Dines; Margaret Flaherty; and Sarah Anderson. The second is Joe Colucci, chairman; Bill Arbanes; and all of their colleagues on the Centennial Committee who have given generously of their time, energy, and effort for 3 years now. Each of these individuals in their own special way deserves our praise and recognition for all their good work.

On May 21, Reverend Dorsch and his parishioners will commemorate the church's centenary with a mass, which will be celebrated by the bishop, and a banquet.

I know that my colleagues join me in congratulating them all and wishing them joy and happiness on that day.

LEGISLATION TO REFORM PROCEDURES IN SALE OF FARM PROPERTY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 5 minutes.

Mr. BEREUTER. Mr. Speaker, on April 26, I introduced H.R. 2113, a bill that I believe will help correct a situation that has arisen with the right of first refusal provision and the selling of inventory property under the Consolidated Farm and Rural Development Act as amended by the Agricultural Credit Act of 1987. The abuse I am referring to involves the former owners of their families or tenants of Farmers Home Administration [FmHA] inventory property who choose to exercise their right to purchase the farm property. It has come to my attention, however, that not surprisingly, in certain cases these former owners of farmers who chose to exercise this right did so for the prearranged purpose of selling it to an ineligible person.

Mr. Speaker, I have no objection to the original intent of Congress with regard to the FmHA offering the former owner or tenant the first opportunity to buy such property. I certainly have no objection to giving such farmers a chance to purchase this property if they are truly interested in the continued operation of the farm. The provision allowing the FmHA to offer inventory land to other eligible borrowers was also a positive although imperfectly crafted component of the Agricultural Credit Act. However, there provisions were imperfectly crafted by the amendment process and invited abuse. The disturbing reports of abuses in Nebraska and other States occurring with these sales are serious, and changes in procedures must be made.

A particularly troubling case for example, involved a tenant who chose to exercise his option to purchase FmHA land at the appraised value for the prearranged purpose of reselling it to an ineligible party. The ineligible party who supplied financing for the original FmHA sale then sold or traded the land to wealthy ineligible person for a profit. This is clearly not the intended result of the law that Congress passed.

In addition, I know, for example, that under current FmHA procedures for selling inventory property, persons who are not truly eligible to purchase this land are in effect, becoming eligible by improper methods. The current procedures for the disposition of inventory property require that the potential purchaser must be an eligible FmHA borrower who cannot obtain financing from a private bank. In turn, the county FmHA committee is then mandated by law to select an applicant who has the greatest need for farm income and best meets the criteria for eligibility.

However, it has been brought to my attention that literally dozens of farmers who wish to be considered for eligibility for the FmHA inventory property have asked their local banker to turn them down for a loan in order to meet FmHA eligibility criteria. It seems to me that we have presented

the county committees with the almost impossible task of selecting one eligible applicant out of many who claim to be eligible and are legitimately eligible.

It is my intention to correct these situations through the introduction of H.R. 2113. First, the bill would authorize the Secretary of Agriculture to use a deed restriction or covenant to restrict the tenant or other eligible persons who wish to purchase inventory property from transferring or selling this property for no less than 2 years. The bill would also remove the county committee from what is often the nearly impossible task of deciding which applicant has the greatest need as defined by law or regulations. Instead, the county committee would be able to use a random selection process to select a buyer from eligible persons.

Finally, Mr. Speaker, the bill would allow the sale of the inventory property to eligible persons based on the fair market value of the farmland rather than on its appraised value. The sale of inventory property at its fair market value will also help eliminate the abuses of third-party sales by insuring that inventory property is sold at a level comparable to private sales of other farmland.

LET US END THE FUSION CONFUSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, over the last weeks, we have all been elated, inspired, and confounded by reports of the advent of "cold fusion."

Are we on the verge of a new era? An era without fossil fuel dependence, the greenhouse effect, dangerous radioactive waste, and implacable Persian Gulf political dilemmas. I sincerely hope so.

Yet, laboratories around the country have attempted to confirm the cold fusion claims, with little or no success. Recently, two prominent research centers, Cal Tech and MIT, have found significant errors in the original interpretation of the cold fusion experiments.

Were the original cold fusion claims overstated? I don't know. Indeed, it's remarkable how little is known about this phenomenon which has so inspired the American public.

And yet, some suggest that Congress divert funding from traditional fusion to cold fusion research. Clearly, Congress needs to get to the bottom of this controversy so that it can make informed decisions in its allocation of research moneys.

Today, my colleagues, Representatives BOXER, BATES, COLEMAN, DEFAZIO, SPRATT, and myself will introduce the following concurrent resolution. It recommends that the Department of Energy take immediate action to determine the validity of claims regarding recent cold fusion experiments. The resolution recommends that the Department provide a program to expedite the development of cold fusion, if its promise as an alternative energy source can be confirmed. Otherwise, the resolution calls on the Department to outline a program to expedite the development of traditional fusion research.

The potential benefits of fusion power are widely known. It is time to cut through the confusion surrounding fusion research and establish a national program to expedite the development of this promising source of limitless, clean energy.

H. CON. RES. 120

Whereas fusion energy offers the potential of safe, clean power which is unlimited in amount, is free of long-lived, high-level radioactive waste, and can have environmental advantages over other technologies;

Whereas budgetary constraints have forced the Department of Energy to cut back on fusion energy research programs;

Whereas the field of magnetic fusion research has a 30-year history of successful and mutually beneficial international cooperation;

Whereas the Office of Technology Assessment states in its recent report "Starpower: The U.S. and the International Quest for Fusion Energy" that the Department of Energy now sees more intensive international collaboration as a financial necessity;

Whereas the United States has been an active participant in international efforts to develop a conceptual design for a magnetic fusion reactor called the "International Thermonuclear Experimental Reactor", with the costs shared by the participants;

Whereas the conceptual design phase of the International Thermonuclear Experimental Reactor will conclude in the near future; and

Whereas failure to participate in the International Thermonuclear Experimental Reactor project could place fusion research in the United States far behind such research in Japan, Europe, and the Soviet Union and could force the United States to rely on foreign technology to satisfy the Nation's future energy needs: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress strongly recommends that the Department of Energy continue to work closely with other nations in the field of magnetic fusion research, if such collaboration can take place without jeopardizing our national security interests or endangering our domestic fusion program; that the Department foster collaborative research in fusion materials to maximize the environmental advantages of fusion energy; and that the Department conduct, in an expeditious manner, a thorough analysis detailing the specific benefits, the existing obstacles, and the steps necessary to overcome such obstacles to participation in the engineering design phase of the International Thermonuclear Experimental Reactor.

LUMBEE RECOGNITION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mr. ROSE] is recognized for 5 minutes.

Mr. ROSE. Mr. Speaker, more than 100 years ago the tribal leaders of Indians in southeastern North Carolina asked Congress to formally acknowledge their special heritage as native Americans. A year after the centennial of that first request, it is with great enthusiasm that I am introducing the "Lumbee Recognition Act," which will extend Federal recognition to the Lumbee Tribe of Cheraw Indians of North Carolina.

In December 1987 the Lumbee Indians filed a fully documented petition for Federal acknowledgement with the Bureau of Indian Affairs. This is the process which all tribes seeking recognition must now go through. In the case of the Lumbees, however, I feel it is necessary to circumvent the usual recognition process for several reasons. Foremost, I feel this legislation merely completes a process which Congress began in 1956 when it passed the Lumbee Act. As you may know, the 1950's marked a period when the Federal Government sought to end many of its trust relationships with native Americans. Although the 1956 legislation stopped short of formally acknowledging the Lumbees, it refers repeatedly to their heritage as Indians. None of the other tribes seeking recognition today can claim such a precedent. Furthermore, one other tribe with an almost identical legislative history, the Tiwa Tribe of Texas, was recognized through legislation during the Reagan administration.

Due to the backlog of pending petitions at BIA, the Lumbees have been told that their petition will not receive active consideration until 1993. This means a final ruling on the petition could be up to 10 years away. Such a timeframe makes it unlikely that tribal members whose expertise was so vital to the completion of the petition will be available for consultation when the BIA begins its consideration. Most importantly, I must keep in mind the interests of all the citizens of Robeson County, NC, where most of the Lumbee Indians reside. If the Lumbees were recognized under the BIA recognition process, they would be responsible for setting up their own criminal and civil justice system. Rather than risk undermining improving relations in this triracial community, I have included provisions to ensure that the State of North Carolina maintains its civil and criminal jurisdiction over this area.

In drafting this legislation, I have also kept in mind both budgetary restraints and the immediate needs of other federally recognized tribes. Included in the bill is a new funding mechanism, endorsed last year by Interior Assistant Secretary for Indian Affairs Ross Swimmer, which would establish BIA funding for the Lumbees as a new line item, totally separate from BIA outlays for other federally recognized tribes. The 1989 Lumbee Recognition Act does not provide for any appropriations, and it would be several years before Congress could even consider such appropriations.

The guidelines established at BIA to federally recognize American Indians fail to take into account the special circumstances which apply the Lumbee Indians. Theirs is truly a unique case, and I call on my colleagues to support this effort to extend the Lumbee Indians that status they deserve as a federally recognized tribe.

THE RESPONSIBLE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Mexico [Mr. SCHIFF] is recognized for 15 minutes.

Mr. SCHIFF. Mr. Speaker, I believe that the most significant legislation upon which I have voted since being elected to the U.S. Congress last year, was House Concurrent Resolution 106, the budget resolution for fiscal year 1990. The budget of the Government of the United States will deeply affect every American citizen and also many governments and individuals around the world.

I voted in favor of House Concurrent Resolution 106. I did so because it appeared that the failure of the Congress to pass this budget resolution, based upon the recent budget agreement between the administration and the bipartisan leaders of Congress would create a crisis in the budget making process. It appeared that the views of the Members of Congress are so diverse, that the entire budget process would be reduced to chaos, unless we enacted this budget.

Listening to the several alternative budgets proposed, anyone could see how they greatly differed from each other in terms of priorities and approaches, and understand that the chances of another agreement were very slim. I certainly did not want to see the budget process descend into chaos, particularly in the first few months of the administration of a new President. Even though I am a member of the President's political party, my desire for budget stability would be the same for a new President of the other party.

Nevertheless, Mr. Speaker, although we avoided one crisis, we have created another crisis because this budget resolution, fails, once again, to come to terms with the budget deficit.

This budget resolution contains provisions such as:

First, an admitted increase in the budget deficit of $9 billion over the administration's first proposal;

Second, limiting the admitted increase in the deficit to $9 billion only because the resolution includes an agreement to produce about $5 billion in revenues, without an agreement as to how to raise those revenues. This means that we may still have an impasse in Congress, which the bipartisan budget agreement was intended to avoid;

Third, meeting the Gramm-Rudman-Hollings deficit target for fiscal year 1990 only by such devices as counting trust account income, most notably from Social Security taxes, for purposes of calculating the deficit, when this income was never intended to be either used or counted in terms of general budgetary expenses; by changing the payment date of some expenditures and taking others off budget completely; and by basing the entire budget package upon the most optimistic predictions about economic performance during the next fiscal year, which may turn out to be unrealistic.

Mr. Speaker, the budget deficit is more than a theoretical exercise. In this fiscal year, interest on the accrued national debt accounts for nearly 15 percent of the entire Federal budget. We often debate the economic priority between military and domestic spending all around the fact that 15 percent of the budget goes to pay the interest on the national debt. These funds are not available for either military or domestic spending or for any other purpose. It is obvious that if this 15 percent of the budget were available for discretionary spending, the requests for both national defense and domestic programs, along with other requests for humanitarian assistance in other parts of the world, could be met. But, as we continue to permit the national debt to grow, we are increasing our interest payment obligations, which will only further reduce available money in the future.

Mr. Speaker, I hope that the next bipartisan accord for fiscal year 1991 will adequately and accurately address our budget deficit. But, if this does not happen for fiscal year 1991, that is, if a budget resolution is proposed which again fails to really address the deficit, then I intend to vote "no" and risk the budgetary chaos, because then the Congress will be compelled to confront the situation.

Mr. Speaker, I hope that in the upcoming budget discussions for fiscal year 1991, the administration and the leaders of Congress will agree to produce a fiscally responsible budget and not continue to add to the debt and to the interest we must pay. Otherwise they risk a majority of the Members voting "no" which would allow crisis and chaos to force us to do our jobs.

□ 1350

THE NORTH AMERICAN WATERFOWL MANAGEMENT PLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. DAVIS] is recognized for 10 minutes.

Mr. DAVIS. Mr. Speaker, today I am pleased to introduce legislation with the Honorable WALTER B. JONES, the Honorable DON YOUNG, the Honorable ARLAN STANGELAND, the Honorable LINDSAY THOMAS, and the Honorable PORTER GOSS to further the implementation of the North American waterfowl management plan.

The average number of ducks in North America in recent years has been lower than any comparable period on record. The number of breeding ducks currently averages only a little more than half the number present in the 1970's. The key factor in the alarming decline in our continent's waterfowl population is the continuing destruction of wetlands. In short, existing public and private wetland protection efforts have been inadequate.

The North American waterfowl management plan, signed in 1986 by the Minister of Environment for Canada and the Secretary of the Interior for the United States, outlines a far-reaching joint effort to identify the major management problems, establish objectives, and propose a series of strategies to protect waterfowl habitat, restore declining waterfowl populations, and enhance waterfowl research and management.

The plan extends to the year 2000 and will be implemented through action plans developed at the national, flyway, provincial, territorial, and State levels, which will then set out specific management details required for waterfowl conservation in both countries.

Successful rebuilding of waterfowl numbers will require the restoration, protection, and improvement of almost 6 million acres of habitat in six priority ranges in the United States and Canada. These areas are essential for the perpetuation of North American waterfowl and require immediate action. They are: Prairie potholes and park lands, lower Mississippi Valley, the gulf coast, California's Central Valley, Great Lakes-St. Lawrence lowlands, and the Atlantic coast.

The North American waterfowl plan when adopted in 1986, provided the framework addressing this habitat need; unfortunately the plan does not address funding.

Mr. Speaker, the legislation that I have introduced today provides a commitment for that funding. It does so by providing a structure that encourages partnerships among public agencies and private interests to protect, enhance, restore, and manage habitats for migratory birds and other fish and wildlife in North America. While waterfowl are the most visible and well-known wildlife species that rely on wetlands, they aren't the only beneficiaries of the plan. Shorebirds, upland game birds, and even endangered species use wetlands. A myriad of mammals, reptiles, amphibians, invertebrates, fish, and plants are a part of the wetlands. Saving wetlands for ducks also protects these areas for hundreds of other species.

In planning for the future of waterfowl, we must reflect upon the past, consider the present, and recognize and appreciate the tremendous efforts that have been made since the turn of the century on behalf of waterfowl conservation by many organizations. Millions of dollars have been expended to preserve and manage waterfowl habitat across the continent. The acquisitions made by the Migratory Bird Conservation Commission have spearheaded the Federal effort into wetland conservation. State and local agencies along with Ducks Unlimited and the Nature Conservancy have lead the fight on the local level for wetland protection.

We have carefully drafted this legislation to avoid any conflict with the actions of the Migratory Bird Commission which have been so successful in addressing the Federal wetlands conservation needs. The gentleman from

Michigan [Mr. DINGELL] and the gentleman from Massachusetts [Mr. CONTE] who are the Commissioners on behalf of the House of Representatives have provided an immense amount of guidance and support to those efforts and I look forward to working with them in further developing the concepts which are contained in the legislation, in order to make it, or some alternative, more efficient in furthering the goals of the plan.

Mr. Speaker, this legislation, summarized at the end of this statement, starts us on the road to protecting the habitats needed to bring waterfowl populations back to the level that we once enjoyed. Its an important step in coordinating the cooperation and financial contributions of all interested parties, both public and private.

The key to the success of this undertaking will be the participation not only of the national governments of the United States, Canada, and Mexico, but also the involvement of State, provincial, territorial, and local governments, and private individuals, conservation organizations, and businesses.

SUMMARY OF THE NORTH AMERICAN WETLANDS CONSERVATION ACT

SELECTION AND FUNDING OF WETLANDS CONSERVATION PROJECTS IN THE UNITED STATES, CANADA, AND MEXICO

The Act authorizes the Secretary of the Interior to match federal funds with non-federal funds for wetland conservation projects (acquisition, management, enhancement or restoration of lands and waters administered for long-term conservation) in Canada, Mexico and the United States.

A nine-member North American Wetlands Conservation Commission is established to recommend wetlands conservation projects to the Secretary for federal funding under the Act. Acquisition by the Secretary of Lands and Waters under the Migratory Bird Conservation Fund, Land and Water Conservation Fund or other laws would not be subject to this process or otherwise affected by the Act.

The Commission consists of the Director of the U.S. Fish and Wildlife Service, the Secretary to the Board of the National Fish and Wildlife Foundation and seven individuals appointed by the Secretary. Four of these individuals must live in different flyways and be directors of state fish and wildlife agencies directly responsible for conservation of fish, wildlife and wetlands. The other three must represent different charitable, non-profit organizations which are actively participating in implementation of the Plan.

The Commission's recommendations on funding of wetlands conservation projects are to be based on (1) the availability of sufficient non-federal monies to carry out any project; (2) the extent to which any project represents a partnership among public agencies and private entities; (3) the consistency of any project in the United States with the National Wetlands Priority Conservation Plan developed under the Emergency Wetlands Resources Act; (4) the substantiality of the character and design of any project; (5) the extent to which any project fulfills the purposes of the Act and the goals of the Plan; and (6) the recommendations of any partnerships among public agencies and private entities in Canada, Mexico or the United States, which are participating actively in carrying out any projects under the Act of the Plan.

The Secretary in consultation with the Migratory Bird Conservation Commission is required to approve the federal funding available under the Act for wetlands conservation projects in the order of priority recommended by the Commission unless the Secretary finds that any of those projects should not have been recommended based on consideration of the factors listed above. If the Secretary makes such a finding, the Secretary is required to provide the Commission and Congress with a written justification.

CONDITIONS RELATING TO WETLANDS CONSERVATION PROJECTS

The Secretary may convey any lands and waters purchased with federal funds to a state or another entity approved by a state. Any lands and water acquired, enhanced, managed or restored with federal funds cannot be converted for uses other than conservation without the approval of the Secretary. If lands and waters purchased with federal funds are not conveyed, they must be included in the National Wildlife Refuge System.

The Secretary may provide federal funds to public agencies in Canada or Mexico or entities approved by these agencies to assist in carrying out approved wetlands conservation projects.

FUNDING OF WETLANDS CONSERVATION PROJECTS

Funds to carry out wetlands conservation projects are provided as follows:

1. The interest earned through short-term investment of any federal excise tax revenues in the Pittman-Robertson fund that are not needed to meet a current year's withdrawals would be available to the Secretary under the Act (about $10 million annually). None of the fund's excise tax revenues (the fund's capital) would be allowed to be used by the Secretary. Thus, the Act would have no effect on the amount of the fund apportioned to any state or territory. Once the goals of the Plan are achieved, the interest earned each year from short-term investments would become available for apportionment to the states.

2. The penalties or fines, or funds from forfeitures or property under the Migratory Bird Treaty Act are authorized to be appropriated to carry out the Act (about $1 million annually).

3. In addition to the amounts above, the Act authorizes appropriation of $15 million annually to the Department of the Interior to carry out wetlands conservation projects.

ALLOCATION OF FUNDS

Up to 70 percent, but not less than 50 percent, of each year's funds must be allocated by the Secretary to carry out approved wetlands conservation projects in Canada and Mexico. Up to 4 percent of this amount may be used for administering the Act. The federal money for projects in Canada or Mexico must be matched by at least 25 percent non-federal money. The non-federal share may not be derived from federal grant programs.

At least 30 percent, but not more than 50 percent, of each year's funds must be allocated by the Secretary to carry out approved wetlands conservation projects in the United States. The federal money to carry out approved wetlands conservation projects in the United States must be matched by at least 50 percent non-federal money. The federal share may be 100 percent if the project is conducted solely on federal lands and waters or involves the acquisition of inholdings within such lands and waters. The non-federal share may not be derived from the federal grant programs.

REFUGE REVENUE SHARING

The Secretary is not allowed to acquire lands and waters for inclusion in the National Wildlife Refuge System with the funds under the Act unless full funding is provided under the Refuge Revenue Sharing Act for payments in lieu of taxes to counties with U.S. Fish and Wildlife Service lands.

RESTORATION, PROTECTION AND ENHANCEMENT OF WETLANDS AND MIGRATORY BIRD HABITAT ON FEDERAL LANDS

Each federal agency responsible for acquiring, managing or disposing of federal lands and waters is required, consistent with the agency's mission, to cooperate with the Director of the U.S. Fish and Wildlife Service to restore, protect and enhance the wetland ecosystems and other waterfowl and migratory bird habitats within its lands and waters.

REPORTS TO CONGRESS

The Secretary is required to report to Congress every two years with an assessment of the following:

(1) the estimated number of acres of wetlands and habitat for waterfowl and other migratory birds that were restored, protected or enhanced during such two-year period by federal, state and local agencies and private entities in the United States, Canada, and Mexico; and

(2) trends in the population size and distribution of North American migratory birds.

The Secretary also is required to report annually to Congress concerning the status of wetlands conservation projects, including an accounting of federal, state and private expenditures by Canadian and Mexican sources to carry out these projects.

REVISION TO THE PLAN

In 1991 and every five years thereafter, the Secretary is required, with the appropriate officials in Canada and Mexico, to revise the goals and other elements of the Plan in accordance with the information required above and with the other provisions of the Act.

ARTHUR C. GUYTON DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 60 minutes.

Mr. MONTGOMERY. Mr. Speaker, an event will be held in Mississippi on August 25 honoring one of our State's most outstanding citizens. It will be called "Arthur C. Guyton Day" in recognition of the more than 40 years Dr. Guyton has served the University of Mississippi and our entire State.

Dr. Guyton has already been honored with resolutions passed by both Houses of the Mississippi Legislature and will be feted at a reception for 4,000 at the Mississippi Coliseum on August 24, prior to the special ceremonies the following day.

Dr. Guyton's work as a physician, author, scientist, teacher, husband and father is truly a great story. I want to share an article written about Dr. Guyton by Brenda Owen and printed in the Northeast Mississippi Daily Journal in Tupelo.

The article follows:

ARTHUR C. GUYTON DAY—RENOWNED TEACHER, RESEARCHER TO BE HONORED

(By Brenda Owen)

In 1946, when he was a 27-year-old surgical resident, Dr. Arthur C. Guyton was stricken with polio.

The disease left him partially paralyzed, and his dreams of becoming a cardiac surgeon were shattered. He could have used this disability as an excuse to quit trying. Instead, he used it as an opportunity.

Although polio had affected his mobility, it had not affected his ability to research, to write and to teach.

And so his career as a scientist, author and teacher began.

Today, Guyton, a native of Oxford, is chairman of the physiology and biophysics department at the University of Mississippi Medical Center in Jackson, a position he has held more than 40 years.

He is a world-renowned scientist whose discoveries have become basic to treatment of heart patients. He is the author of the most widely used physiology textbook in the world. And he is a teacher who has given more than 4,000 medical students the benefits of his knowledge.

The measure of appreciation for Guyton and his accomplishments has been shown by the designation of August 25th as Arthur C. Guyton Day in Mississippi.

Thousands of Guyton's colleagues, friends and former students will gather in Jackson to commemorate the event. Highlights of the day will be a medical symposium at the Municipal Auditorium in the afternoon and a gala banquet at the Trade Mart at the Fairgrounds in the evening.

Jack Stuart, chairman of the committee in charge of Arthur C. Guyton Day, said he expects no problems finding the 2,000 sponsors needed to contribute the $200,000 tab for the event. To become a sponsor costs $100, with the right to purchase one banquet ticket for $15 and a second for $25.

"As Dr. Guyton nears retirement, we thought it only fitting that the community come together to show its deep respect and gratitude for his many contributions," Stuart said.

Guyton, at age 70, will officially retire in September.

Unofficially, however, Guyton said in a recent interview, "I don't plan to slow down a step."

He said he will continue his research and his writing as long as he feels like has has something to discover or something to say.

That could take a while since Guyton's life has always been one of challenge, courage and academic excellence. These traits were a family tradition.

Guyton's father, Dr. Billy Guyton, was dean of the medical school on the Oxford campus from 1936-1943. His mother has taught mathematics and physics as a missionary in China, and she encouraged her children in such studies.

Guyton did not disappoint them. He graduated from Ole Miss with special distinction in 1939 and went to medical school at Harvard. His post-graduate training in cardiac surgery at Massachusetts General Hospital was interrupted by service in the U.S. Navy.

He was assigned to secret physiological research projects at Camp Detrick, Maryland. His work there earned him an Army Commendation Citation.

The war over, he returned to Massachusetts General as a surgical resident. He was on his way to becoming a cardiac surgeon when he was stricken with polio.

During his nine-month recovery at Warm Springs, Ga., he pondered the plight of polio victims struggling with their useless limbs. He passed the time by trying to work out ways of helping them. By the time he had recuperated, he had invented a motorized wheelchair, a special hoist and a walking brace which freed thousands from the restraints of polio.

This work earned him a Presidential Citation.

Guyton returned to Oxford in 1947 to become associate professor of pharmacology in the School of Medicine, and a year later he accepted his present position as professor of physiology and chairman of the department. He played a leading role in establishing and planning the University of Mississippi Medical Center, which opened in Jackson in 1955.

During the years he taught in Oxford he wrote the textbook of Medical Physiology, which has become the most widely used physiology textbook in medical schools worldwide. It was published a year after he and the school of medicine moved to the new University of Mississippi Medical Center in Jackson, where the curriculum expanded to a four-year program. Since then he has written more than 500 publications, including several books and numerous articles.

His accomplishments will make him a hard act for the next chairman to follow.

During his tenure at UMMC, Guyton and his team have discovered some of the essential relationships between kidney function and blood pressure. He also has developed a computer mathematical model of the human body, containing more than 400 equations to make up the model's cardiovascular system alone.

These accomplishments are testimony to Guyton's genius as a scientist, but perhaps his most important personal contribution is the family he and his wife, Ruth, raised and inspired.

Of their 10 children, eight boys and two girls, nine are doctors, and the 10th—the youngest—will enter medical school this fall. Among them are eight Harvard graduates and five medical professors. They hold pestigious positions in hospitals and research centers in Maryland, Georgia, Texas, Washington, Massachusetts, Florida, Iowa and Mississippi.

Guyton said he and his wife did not intentionally pressure their children to enter the medical profession.

"I think the younger ones may have felt some pressure from the older ones, but I think they all enjoy their profession," Guyton said.

One legislator called the Guytons "Mississippi's most outstanding family."

Guyton said he appreciates having a day named in his honor, but he is modest about his long list of accomplishments, always crediting his department's help in his research discoveries.

"It's a team effort," he said, "and I'm just head of the team."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DICKINSON (at the request of Mr. MICHEL) for today on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SCHIFF) to revise and extend their remarks and include extraneous material:)

Mr. UPTON, for 5 minutes, today.

Mr. BEREUTER, for 5 minutes, today.

Mr. DAVIS, for 10 minutes, today.

(The following Members (at the request of Mr. MCNULTY) to revise and extend their remarks and include extraneous material:)

Mr. COYNE, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. ROSE, for 5 minutes, today.

Mr. MONTGOMERY, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. SCHIFF) and to include extraneous matter:)

Mr. FIELDS.

Mr. LIGHTFOOT.

Mr. GILMAN in three instances.

Mr. DAVIS.

Mr. GOODLING.

Mr. PORTER.

Mr. SMITH of New Jersey.

Mr. BARTON of Texas.

Mr. CONTE.

Mr. DOUGLAS.

(The following Members (at the request of Mr. MCNULTY) and to include extraneous matter:)

Mr. KAPTUR.

Mr. SKELTON.

Mr. FALEOMAVAEGA.

Mr. YATRON.

Mr. STARK.

Mr. GAYDOS.

Mr. MONTGOMERY.

Mr. BILBRAY.

Mr. PENNY.

Mr. WYDEN.

Mr. HOYER.

Mr. LEVINE of California in two instances.

Mr. WILLIAMS.

A BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, a bill and joint resolution of the House of the following title:

On May 10, 1989:

H.R. 1385. An act to make permanent the Martin Luther King Jr., Federal Holiday Commission.

On May 11, 1989:

H.J. Res. 135. Joint resolution to designate the week beginning May 7, 1989, as "National Correctional Officers Week."

ADJOURNMENT

Mr. McNULTY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 55 minutes p.m.), under its previous order the House adjourned until Monday, May 15, 1989, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1169. A letter from the Assistant General Counsel, Department of Defense, transmitting a report of individuals who filed DD Form 1787, report of DOD and defense related employment for fiscal year 1988, pursuant to 10 U.S.C. 2397(e); to the Committee on Armed Services.

1170. A letter from the Secretary of Defense, transmitting his views on the importance of the planned relocation of the 401st Tactical Fighter Wing from Spain to Italy; to the Committee on Armed Services.

1171. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting the 14th annual report of the Corporation's Office of Consumer Affairs, pursuant to 15 U.S.C. 57a(f)(6); to the Committee on Banking, Finance and Urban Affairs.

1172. A letter from the Secretary of Education, transmitting a copy of final regulations—General Education Provisions Act—Enforcement, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

1173. A letter from the Administrator, Agency for International Development, transmitting a copy of the Eastern waters study report, pursuant to 7 U.S.C. 1727 nt.; to the Committee on Foreign Affairs.

1174. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting text of ILO convention No. 168 and recommendation No. 176 concerning employment promotion and protection against unemployment as adopted by the International Labor Conference at its 75th session, at Geneva, June 21, 1988, pursuant to article 19 of the Constitution of the International Labor Organization; to the Committee on Foreign Affairs.

1175. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting text of ILO convention No. 167 and recommendation No. 175 concerning safety and health in construction as adopted by the International Labor Conference at its 75th session, at Geneva, June 20, 1988, pursuant to article 19 of the Constitution of the International Labor Organization; to the Committee on Foreign Affairs.

1176. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions by Melvin F. Sembler, of Florida, Ambassador Extraordinary and Plenipotentiary-designate to Australia, and members of his family, pursuant to 22 U.S.C 3944(b)(2); to the Committee on Foreign Affairs.

1177. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions by Morris Dempson Busby, of Virginia, for the rank of ambassador as Coordinator for Counter Terrorism-designate, and members of his family, pursuant to 22 U.S.C 3944(b)(2); to the Committee on Foreign Affairs.

1178. A letter from the Chairman, Nuclear Regulatory Commission, transmitting the report of the nondisclosure of safeguards information for the quarter ending March 31, 1989, pursuant to 42 U.S.C. 2167(d); jointly, to the Committee on Energy and Commerce and Interior and Insular Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. RANGEL:

H.R. 2318. A bill to amend the Internal Revenue Code of 1986 to provide incentives to prevent the loss of low-income housing; to the Committee on Ways and Means.

By Mr. RANGEL (for himself, Mr. CARPER, Mr. ACKERMAN, Mr. MORRISON of Connecticut, Mr. SOLARZ, Mr. DONNELLY, Mr. DOWNEY, Ms. PELOSI, Mr. WEISS, Mr. BUSTAMANTE, Mr. NEAL of Massachusetts, Mr. ROWLAND of Connecticut, Mr. SCHUMER, Mr. JACOBS, Mr. TOWNS, Mrs. KENNELLY, Mr. MANTON, Mr. MRAZEK, Mr. GARCIA, Mr. JONTZ, Mr. COYNE, Mr. GUARINI, Mr. CARDIN, and Mr. GEPHARDT):

H.R. 2319. A bill to amend the Internal Revenue Code of 1986 to improve the effectiveness of the low-income housing credit; to the Committee on Ways and Means.

By Mr. BILBRAY:

H.R. 2320. A bill to designate certain lands in the State of Nevada as wilderness, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Agriculture.

By Mr. CARR (for himself, Mr. SABO, Mr. BROOMFIELD, Mr. DAVIS, Mr. TRAXLER, Mr. CONYERS, Mr. WOLPE, Mr. FORD of Michigan, Mr. KILDEE, Mr. SCHUETTE, and Mr. HENRY):

H.R. 2321. A bill to amend the Federal Aviation Act of 1958 to limit acquisitions of control of air carriers to ensure fitness; to the Committee on Public Works and Transportation.

By Mr. DAVIS (for himself, Mr. JONES of North Carolina, Mr. YOUNG of Alaska, Mr. STANGELAND, Mr. THOMAS of Georgia, and Mr. GOSS):

H.R. 2322. A bill to conserve North American wetlands ecosystems and waterfowl and other migratory birds and fish and wildlife that depend upon such habitats; to the Committee on Merchant Marine and Fisheries.

By Mr. WAXMAN (for himself, Mr. LEWIS of California, Mr. ACKERMAN, Mr. ALEXANDER, Mr. ANDERSON, Mr. ATKINS, Mr. BATES, Mr. BEILENSON, Mr. BERMAN, Mr. BILBRAY, Mr. BOEHLERT, Mr. BOSCO, Mrs. BOXER, Mr. BROWN of California, Mr. BRYANT, Mr. CARDIN, Mr. CLAY, Mr. COELHO, Mr. CONTE, Mr. DELLUMS, Mr. DIXON, Mr. DOWNEY, Mr. DREIER of California, Mr. DWYER of New Jersey, Mr. DYMALLY, Mr. EDWARDS of California, Mr. FAZIO, Mr. FISH, Mr. FLAKE, Mr. FLORIO, Mr. FORD of Tennessee, Mr. FRANK, Mr. GALLEGLY, Mr. GALLO, Mr. GARCIA, Mr. GEJDENSON, Mr. GILMAN, Mr. GOSS, Mr. GREEN, Mr. GUARINI, Mr. HAWKINS, Mr. HAYES of Illinois, Mr. HOCHBRUECKNER, Mr. HORTON, Mr. HOUGHTON, Mr. HOYER, Mr. HUGHES, Mrs. JOHNSON of Connecticut, Mrs. KENNELLY, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEHMAN of California, Mr. LELAND, Mr. LEVINE of California, Mr. LOWERY of California, Mrs. LOWEY of New York, Mr. MCGRATH, Mr. MCHUGH, Mr. MARKEY, Mr. MARTIN of New York, Mr. MARTINEZ, Mr. MATSUI, Mr. MILLER of California, Mr. MINETA, Mrs. MORELLA, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. NAGLE, Mr. NELSON of Florida, Mr. NOWAK, Mr. OWENS of New York, Mr. PACKARD, Mr. PALLONE, Mr. PANETTA, Mr. PASHAYAN, Mrs. PATTERSON, Mr. PAYNE of New Jersey, Ms. PELOSI, Mr. RANGEL, Mr. RAVENEL, Mr. RICHARDSON, Mr. ROE, Mrs. ROUKEMA, Mr. ROWLAND of Connecticut, Mr. ROYBAL, Mr. SABO, Mr. SAXTON, Mr. SCHEUER, Ms. SCHNEIDER, Mrs. SCHROEDER, Mr. SCHUMER, Mr. SHAYS, Mr. SIKORSKI, Mr. SKAGGS, Mr. SMITH of New Jersey, Mr. SMITH of Vermont, Ms. SNOWE, Mr. SOLARZ, Mr. SOLOMON, Mr. STARK, Mr. STUDDS, Mr. TORRES, Mr. TORRICELLI, Mr. VENTO, Mr. WALGREN, Mr. WEISS, Mr. WYDEN, Mr. HUNTER, Mr. MCCANDLESS, and Mrs. SAIKI):

H.R. 2323. A bill to amend the Clean Air Act to provide for the attainment of the national ambient air quality standards in areas which have failed to attain those standards, and to provide for maintenance of such standards, and for other purposes; to the Committee on Energy and Commerce.

By Mr. DAVIS (by request):

H.R 2324. A bill to authorize appropriations for the Coast Guard for fiscal years 1990 and 1991, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 2325. A bill to establish a domestic liability and compensation system for oil pollution from vessels and facilities and to implement the 1984 protocols to the 1969 civil liability and 1971 fund conventions concerning seagoing tanker-source oil pollution; jointly, to the Committees on Public Works and Transportation, Merchant Marine and Fisheries, and Ways and Means.

H.R. 2326. A bill to transfer administration of bridges and causeways over navigable waters from the Secretary of Transportation to the Secretary of the Army, and for other purposes; jointly, to the Committees on Public Works and Transportation and Merchant Marine and Fisheries.

By Mr. DORGAN of North Dakota (for himself and Mr. SYNAR):

H.R. 2327. A bill to direct the Administrator of the Health Care Financing Administration to provide grants under the rural health care transition grant program for transforming rural hospitals into medical assistance facilities; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. GILMAN:

H.R. 2328. A bill to amend title II of the Social Security Act to eliminate the earnings test for individuals who have attained retirement age, and to provide for an in-

crease in the exempt amount under the earnings test for beneficiaries who have not attained retirement age; to the Committee on Ways and Means.

By Mr. GOODLING (for himself and Mr. SMITH of Vermont):

H.R. 2329. A bill to improve the operation of vocational education programs under the Carl D. Perkins Vocational Education Act by promoting accountability, making the act more flexible, reducing administrative burden, and fostering economic development and the improvement of vocational education personnel, and for other purposes; to the Committee on Education and Labor.

By Ms. KAPTUR:

H.R. 2330. A bill to permit secondary mortgage market financing for residential properties that include small day care centers; to the Committee on Banking, Finance and Urban Affairs.

By Mr. McCLOSKEY:

H.R. 2331. A bill to amend title 39, United States Code, to designate as nonmailable matter solicitations of donations which could reasonably be misconstrued as a bill, invoice, or statement of account due, solicitations for the purchase of products or services which are provided either free of charge or at a lower price by the Federal Government, and solicitations which are offered in terms implying any Federal Government connection or endorsement, unless such matter contains an appropriate conspicuous disclaimer, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MORRISON of Connecticut (for himself, Mr. GEJDENSON, Mrs. KENNELLY, Mrs. JOHNSON of Connecticut, Mr. ROWLAND of Connecticut, and Mr. SHAYS):

H.R. 2332. A bill to amend title 28, United States Code, to provide for the appointment of two additional district judges for the District of Connecticut; to the Committee on the Judiciary.

By Mr. PAXON (for himself, Mr. HOUGHTON, and Ms. SLAUGHTER of New York):

H.R. 2333. A bill to provide for the protection of the Genesee River in New York State; to the Committee on Interior and Insular Affairs.

By Mr. PICKLE (for himself, Mr. WRIGHT, Mr. ANDREWS, Mr. ARCHER, Mr. ARMEY, Mr. BARTON of Texas, Mr. BROOKS, Mr. BRYANT, Mr. BUSTAMANTE, Mr. CHAPMAN, Mr. COLEMAN of Texas, Mr. COMBEST, Mr. DE LA GARZA, Mr. DELAY, Mr. FIELDS, Mr. FROST, Mr. HALL of Texas, Mr. LAUGHLIN, Mr. LEATH of Texas, Mr. LELAND, Mr. ORTIZ, Mr. SARPALIUS, Mr. SMITH of Texas, Mr. STENHOLM, Mr. WILSON, Mr. GONZALEZ, and Mr. BARTLETT):

H.R. 2334. A bill to redesignate the Post Office located at 300 East Ninth Street in Austin, TX, as the "Homer Thornberry Judicial Building;" to the Committee on Public Works and Transportation.

By Mr. ROSE:

H.R. 2335. A bill to provide Federal recognition for the Lumbee Tribe of North Carolina; to the Committee on Interior and Insular Affairs.

By Mr. SCHULZE (for himself, Mrs. MARTIN of Illinois, Mr. LAGOMARSINO, Mr. DONALD E. LUKENS, Mr. STANGELAND, Mr. BOEHLERT, and Mr. HATCHER):

H.R. 2336. A bill to amend the Internal Revenue Code of 1986 to increase the benefits of the special estate tax valuation of farmland where the land continues to be farmed for an extended period; to the Committee on Ways and Means.

By Mr. SMITH of Texas:

H.R. 2337. A bill to ensure that serving with honor is the aspiration of every employee in our Government and to provide for the equitable treatment of all Government officers and employees under the laws of the United States, and for other purposes; jointly, to the Committees on the Judiciary, Post Office and Civil Service, House Administration, Ways and Means, Armed Services, and Rules.

By Mr. WALKER:

H.R. 2338. A bill requiring the National Science Foundation to submit to the Congress a report concerning science and mathematics education and career potential for the underprivileged; to the Committee on Science, Space, and Technology.

By Mr. WHITTAKER (by request):

H.R. 2339. A bill to amend the Federal Railroad Safety Act of 1970 to authorize the imposition of rail safety user fees; to the Committee on Energy and Commerce.

By Mr. WILLIAMS:

H.R. 2340. A bill to direct the Secretary of Agriculture to dismiss frivolous administrative appeals of decisions made by the Forest Service; to the Committee on Agriculture.

By Mr. YOUNG of Alaska (for himself and Mr. McDERMOTT):

H.R. 2341. A bill to amend section 21 of the Alaska Native Claims Settlement Act of 1971; jointly, to the Committees on Interior and Insular Affairs and Ways and Means.

By Mr. GILMAN:

H.J. Res. 267. Joint resolution designating October 16, 1989, and October 16, 1990, as "World Food Day"; to the Committee on Post Office and Civil Service.

By Mr. STENHOLM (for himself, Mr. CRAIG, Mr. ROBERT F. SMITH, Mr. CARPER, Mr. FISH, Mr. GIBBONS, Mr. ANDERSON, Mr. ANDREWS, Mr. ANTHONY, Mr. ARCHER, Mr. ARMEY, Mr. BAKER, Mr. BALLENGER, Mr. BARNARD, Mr. BARTLETT, Mr. BARTON of Texas, Mr. BATEMAN, Mr. BATES, Mr. BENNETT, Mrs. BENTLEY, Mr. BEREUTER, Mr. BEVILL, Mr. BILBRAY, Mr. BILIRAKIS, Mr. BLAZ, Mr. BLILEY, Mr. BOEHLERT, Mr. BOSCO, Mr. BRENNAN, Mr. BROOMFIELD, Mr. BROWDER, Mr. BROWN of Colorado, Mr. BUECHNER, Mr. BUNNING, Mr. BURTON of Indiana, Mr. BUSTAMANTE, Mrs. BYRON, Mr. CALLAHAN, Mr. CAMPBELL of Colorado, Mr. CAMPBELL of California, Mr. CHANDLER, Mr. CHAPMAN, Mr. CLARKE, Mr. CLEMENT, Mr. CLINGER, Mr. COBLE, Mr. COLEMAN of Missouri, Mr. COMBEST, Mr. COSTELLO, Mr. COUGHLIN, Mr. COURTER, Mr. COX, Mr. CRANE, Mr. DANNEMEYER, Mr. DARDEN, Mr. DAVIS, Mr. DELAY, Mr. DERRICK, Mr. DEWINE, Mr. DE LA GARZA, Mr. DICKINSON, Mr. DORGAN of North Dakota, Mr. DORNAN of California, Mr. DOUGLAS, Mr. DREIER of California, Mr. DUNCAN, Mr. DYSON, Mr. EDWARDS of Oklahoma, Mr. EMERSON, Mr. ENGLISH, Mr. ERDREICH, Mr. ESPY, Mr. FAWELL, Mr. FIELDS, Mr. FLIPPO, Mr. FRENZEL, Mr. GALLEGLY, Mr. GALLO, Mr. GEKAS, Mr. GILLMOR, Mr. GINGRICH, Mr. GOODLING, Mr. GORDON, Mr. GOSS, Mr. GRANDY, Mr. GRANT, Mr. GUNDERSON, Mr. HALL of Texas, Mr. HAMMERSCHMIDT, Mr. HANCOCK, Mr. HANSEN, Mr. HARRIS, Mr. HASTERT, Mr. HATCHER, Mr. HAYES of Louisiana, Mr. HEFLEY, Mr. HEFNER, Mr. HENRY, Mr. HERGER, Mr. HILER, Mr. HOLLOWAY, Mr. HOPKINS, Mr. HORTON, Mr. HUBBARD, Mr. HUCKABY, Mr. HUNTER, Mr. HUTTO, Mr. INHOFE, Mr. IRELAND, Mr. JACOBS, Mr. JAMES, Mr. JENKINS, Mrs. JOHNSON of Connecticut, Mr. JOHNSON of South Dakota, Mr. JONES of Georgia, Mr. JONES of North Carolina, Mr. JONTZ, Mr. KASICH, Mr. KOLBE, Mr. KYL, Mr. LAGOMARSINO, Mr. LANCASTER, Mr. LAUGHLIN, Mr. LEACH of Iowa, Mr. LEATH of Texas, Mr. LENT, Mr. LEWIS of California, Mr. LEWIS of Florida, Mr. LIGHTFOOT, Mr. LIVINGSTON, Mrs. LLOYD, Mr. LOWERY of California, Mr. THOMAS A. LUKEN, Mr. DONALD E. LUKENS, Mr. MADIGAN, Mr. MARLENEE, Mr. MARTIN of New York, Mrs. MARTIN of Illinois, Mr. McCANDLESS, Mr. McCOLLUM, Mr. McCURDY, Mr. McDADE, Mr. McEWEN, Mr. McGRATH, Mr. McMILLAN of North Carolina, Mr. McMILLEN of Maryland, Mrs. MEYERS of Kansas, Mr. MICHEL, Mr. MILLER of Ohio, Mr. MILLER of Washington, Mr. MOLINARI, Mr. MONTGOMERY, Mr. MOORHEAD, Mr. MORRISON of Washington, Mr. NEAL of North Carolina, Mr. NELSON of Florida, Mr. NIELSON of Utah, Mr. OLIN, Mr. ORTIZ, Mr. OWENS of Utah, Mr. OXLEY, Mr. PACKARD, Mr. PALLONE, Mr. PARKER, Mr. PARRIS, Mrs. PATTERSON, Mr. PAXON, Mr. PAYNE of Virginia, Mr. PENNY, Mr. PETRI, Mr. PICKLE, Mr. PORTER, Mr. POSHARD, Mr. PRICE, Mr. PURSELL, Mr. QUILLEN, Mr. RAVENEL, Mr. RAY, Mr. REGULA, Mr. RICHARDSON, Mr. RIDGE, Mr. RITTER, Mr. ROBERTS, Mr. ROBINSON, Mr. ROGERS, Mr. ROHRABACHER, Mr. ROSE, Mr. ROTH, Mr. ROWLAND of Georgia, Mr. ROWLAND of Connecticut, Mrs. SAIKI, Mr. SANGMEISTER, Mr. SARPALIUS, Mr. SAXTON, Mr. SCHAEFER, Mr. SCHIFF, Mr. SCHUETTE, Mr. SCHULZE, Mr. SENSENBRENNER, Mr. SHAW, Mr. SHUMWAY, Mr. SHUSTER, Mr. SKEEN, Mr. SKELTON, Mr. SLAUGHTER of Virginia, Mr. SMITH of New Jersey, Mr. DENNY SMITH, Mr. SMITH of Texas, Mr. SMITH of Mississippi, Mr. SMITH of Vermont, Mr. SMITH of New Hampshire, Mrs. SMITH of Nebraska, Ms. SNOWE, Mr. SOLOMON, Mr. SPENCE, Mr. STALLINGS, Mr. STANGELAND, Mr. STEARNS, Mr. STUMP, Mr. SUNDQUIST, Mr. TALLON, Mr. TANNER, Mr. TAUKE, Mr. TAUZIN, Mr. THOMAS of Wyoming, Mr. THOMAS of Georgia, Mr. THOMAS of California, Mr. UPTON, Mr. VALENTINE, Mr. VANDER JAGT, Mr. VOLKMER, Mrs. VUCANOVICH, Mr. WALKER, Mr. WALSH, Mr. WATKINS, Mr. WEBER, Mr. WELDON, Mr. WHITTAKER, Mr. WILSON, Mr. WOLF, Mr. WYLIE, Mr. YOUNG of Florida, and Mr. YOUNG of Alaska):

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 49: Mr. BEREUTER.
H.R. 1593: Mr. HASTERT.

PETITIONS, ETC.

Under clause 1 of rule XXII,

39. The SPEAKER presented a petition of the city of Compton, CA, relative to the National League of Cities; which was referred to the Committee on Government Operations.

SENATE—*Thursday, May 11, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 10:45 a.m., on the expiration of the recess, and was called to order by the Honorable RICHARD BRYAN, a Senator from the State of Nevada.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Gracious God, loving Heavenly Father, we thank Thee for our mothers and honor them with the tribute to godly women by the author of the book of Proverbs. Concerning a "virtuous woman," he wrote: "* * * her price is far above rubies. The heart of her husband doth safely trust in her. * * * Her children arise up, and call her blessed; her husband also, and he praiseth her * * * a woman that feareth the Lord, * * * shall be praised."—Proverbs 31: 10, 11, 28, 30. We thank Thee for their incalculable influence which, from before our birth until long after they are gone, continues to guide us. We praise Thee Lord for the power of mothers.

Gracious Father, as Mother's Day approaches, may your abundant blessing be upon our mothers and the mothers of our children. And may the memories of godly mothers sustain us in truth and righteousness.

In the name of Him who is incarnate love. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDENT OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, May 11, 1989.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable RICHARD BRYAN, a Senator from the State of Nevada, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BRYAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

SCHEDULE

Mr. FOWLER. Mr. President, I thank the Chair. The leadership of the Senate is presently meeting at the White House with President Bush as we await the formal receipt of the resolution of impeachment from the House of Representatives in the matter of Judge Walter L. Nixon, Jr. We expect the receipt of that resolution at approximately 11 o'clock. I would like to announce to Senators that their presence will be necessary on the floor at or around 11, or shortly thereafter, in order to be sworn in and to hear the House managers in the matter of Judge Walter L. Nixon, Jr. and the impeachment resolution.

In a moment, I will put in a quorum call which will be a live quorum.

IMPEACHMENT OF JUDGE WALTER L. NIXON, JR.

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

Mr. FOWLER. Mr. President, I ask unanimous consent that the secretary inform the House of Representatives that the Senate is ready to receive the managers appointed by the House for the purpose of exhibiting articles of impeachment against Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi, agreeably to the notice communicated to the Senate and at the hour of 11 a.m. on today, Thursday, May 11, 1989, the Senate will receive the honorable managers on the part of the House of Representatives in order that they may present and exhibit the said articles of impeachment against the said Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. FOWLER. Mr. President, I ask unanimous consent that the following counsel and staff of the House of Representatives and counsel for Judge Nixon be permitted the privileges of the floor during today's proceedings with respect to the trial of the impeachment of Judge Nixon. They are as follows: Daniel Freeman, Alan Barron, Catherine Leroy, William Jones, Peter Keith, Pam Naughton, Coleen Kiko, and David Stewart.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. FOWLER. Mr. President, I suggest the absence of a quorum. This will be a live quorum. We will, as further stated and under the rule, meet at 11 o'clock for the swearing in of Senators to proceed with the impeachment matter.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll and the following Senators entered the Chamber and answered to their names:

[Quorum No. 4]

Bryan	Metzenbaum	Thurmond
Fowler	Stevens	Wirth

The ACTING PRESIDENT pro tempore. A quorum is not present.

The clerk will call the names of the absent Senators.

The assistant legislative clerk resumed the call of the roll and the following Senators entered the Chamber and answered to their names:

Adams	Gore	McConnell
Baucus	Gorton	Mikulski
Biden	Graham	Mitchell
Bingaman	Gramm	Moynihan
Boren	Grassley	Murkowski
Boschwitz	Harkin	Nickles
Bradley	Hatch	Nunn
Breaux	Hatfield	Packwood
Bumpers	Heflin	Pell
Burdick	Helms	Pressler
Burns	Hollings	Pryor
Byrd	Inouye	Reid
Coats	Jeffords	Riegle
Cochran	Johnston	Robb
Cohen	Kassebaum	Rockefeller
Conrad	Kasten	Roth
Cranston	Kennedy	Rudman
D'Amato	Kerrey	Sanford
Danforth	Kerry	Sarbanes
Daschle	Kohl	Sasser
Dixon	Lautenberg	Shelby
Dodd	Leahy	Simon
Dole	Levin	Simpson
Domenici	Lieberman	Specter
Durenberger	Lott	Symms
Exon	Lugar	Wallop
Ford	Mack	Warner
Garn	Matsunaga	Wilson
Glenn	McClure	

The PRESIDENT pro tempore. The Senate will be in order. The staff will take their seats. The Senators wishing to converse will retire to the Cloakroom.

A quorum is present.

The secretary of the majority.

The secretary of the majority, C. Abbott Saffold, announced their presence as follows:

Mr. President, I announce the presence of the managers on the part of the House of Representatives to conduct proceedings on behalf of the House concerning the impeachment of Walter L. Nixon, Jr., judge of the U.S.

District Court for the Southern District of Mississippi.

The PRESIDENT pro tempore. The managers on the part of the House will be received and assigned to their seats.

(The Sergeant at Arms escorted the managers to the seats assigned to them in the area in front of the Chair.)

The PRESIDENT pro tempore. The Sergeant at Arms will make the proclamation.

The Sergeant at Arms, Henry K. Giugni, made a proclamation, as follows:

Hear ye! Hear ye! Hear ye! All persons are commanded to keep silent, on pain of imprisonment, while the House of Representatives is exhibiting to the Senate of the United States articles of impeachment against Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi.

The PRESIDENT pro tempore. The managers on the part of the House will proceed.

Mr. Manager BROOKS. Mr. President, the managers on the part of the House of Representatives are here present and ready to present the articles of impeachment which have been preferred by the House of Representatives against Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi. The House adopted the following resolution, which with the permission of the President of the Senate, I will read:

HOUSE RESOLUTION 150, IN THE HOUSE OF REPRESENTATIVES, MAY 10, 1989

VIII. *Resolved,* That Mr. Brooks, Mr. Edwards, Mr. Cardin, Mr. Sensenbrenner, and Mr. Dannemeyer, Members of the House of Representatives, are hereby appointed managers to conduct the impeachment trial against Walter L. Nixon, Jr., judge of the United States District Court for the Southern District of Mississippi. Pursuant to the authorities granted in H. Res. 150 and H. Res. 151, the managers now appear before the Senate of the United States and at the bar thereof in the name of the House of Representatives and of all the people of the United States to try the impeachment of Walter L. Nixon, Jr., of high crimes and misdemeanors in office and to exhibit to the Senate of the United States the articles of impeachment against that judge which have been agreed upon the the House of Representatives. These managers hereby demand that the Senate take order for the appearance of Walter L. Nixon, Jr., to answer such impeachment, and demand his conviction and appropriate judgment thereon.

IX. With the permission of the President and the Senate, I will now read the articles of impeachment.

HOUSE RESOLUTION 87, IN THE HOUSE OF REPRESENTATIVES, MAY 10, 1989

X. *Resolved,* That Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi, be impeached for high crimes and misdemeanors, and that the following articles of impeachment be exhibited to the Senate:

Articles of impeachment exhibited by the House of Representatives of the United States of America in the name of itself and all of the people of the United States of America, against Walter L. Nixon, Jr., a judge of the United States District Court for the Southern District of Mississippi, in maintenance and support of its impeachment against him for high crimes and misdemeanors.

Article I

On July 18, 1984, Judge Nixon testified before a Federal grand jury empaneled in the United States District Court for the Southern District of Mississippi (Hattiesburg division) to investigate Judge Nixon's business relationship with Wiley Fairchild and the handling of the criminal prosecution of Fairchild's son, Drew Fairchild, for drug smuggling. In the course of his grand jury testimony and having duly taken an oath that he would tell the truth, the whole truth, and nothing but the truth, Judge Nixon did knowingly and contrary to his oath make a material false or misleading statement to the grand jury.

The false or misleading statement was, in substance, that Forrest County District Attorney Paul Holmes never discussed the Drew Fairchild case with Judge Nixon.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

Article II

On July 18, 1984, Judge Nixon testified before a Federal grand jury empaneled in the United States District Court for the Southern District of Mississippi to investigate Judge Nixon's business relationship with Wiley Fairchild and the handling of the prosecution of Fairchild's son, Drew Farichild, for drug smuggling. In the course of his grand jury testimony and having duly taken an oath that he would tell the truth, the whole truth, and nothing but the truth, Judge Nixon did knowingly and contrary to his oath make a material false or misleading statement to the grand jury.

The false or misleading statement was, in substance, that Judge Nixon had nothing whatsoever officially or unofficially to do with the Drew Fairchild case in Federal court or State court; and that Judge Nixon "never handled any part of it, never had a thing to do with it at all, and never talked to anyone, State or Federal, prosecutor or judge, in any way influence anybody" with respect to the Drew Fairchild case.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

Article III

By virtue of his office as a judge of the United States District Court for the Southern District of Mississippi, Judge Nixon is required to uphold the integrity of the judiciary, to avoid impropriety and the appearance of impropriety, and to obey the laws of the United States.

Judge Nixon has raised substantial doubt as to his judicial integrity, undermined confidence in the integrity and impartiality of the judiciary, betrayed the trust of the people of the United States, disobeyed the laws of the United States and brought disrepute on the Federal courts and the administration of justice by the Federal courts by the following:

After entering into an oil and gas investment with Wiley Fairchild, Judge Nixon conversed with Wiley Fairchild, Carroll Ingram, and Forrest County District Attorney Paul Holmes concerning the State criminal drug conspiracy prosecution of Drew Fairchild, the son of Wiley Fairchild, and thereafter concealed those conversations as follows:

(1) Judge Nixon concealed those conversations through one or more material false or misleading statements knowingly made to an attorney from the United States Department of Justice and a special agent of the Federal Bureau of Investigation during an interview of Judge Nixon conducted in Biloxi, Mississippi, on April 19, 1984. The substance of the false of misleading statements included the following:

(a) Judge Nixon never discussed with Wiley Fairchild anything about Wiley's son's case.

(b) Wiley Fairchild never brought up his son's case.

(c) At the time of the interview Judge Nixon had no knowledge of the Drew Fairchild case and did not even know Drew Fairchild existed, except for what the judge previously read in the newspaper and what he learned from the questioners in the interview.

(d) Nothing was done or nothing was ever mentioned about Wiley Fairchild's son.

(e) Judge Nixon had never heard about the Drew Fairchild case, except what he told the questioners in the interview, and certainly had nothing to do with the case.

(f) Judge Nixon had done nothing to influence the Drew Fairchild case.

(g) State prosecutor Paul Holmes never talked to Judge Nixon about the Drew Fairchild case.

(2) Judge Nixon further concealed his conversations with Wiley Fairchild, Paul Holmes, and Carroll Ingram concerning the Drew Fairchild case by knowingly giving one or more material false or misleading statements to a Federal grand jury during testimony under oath in Hattiesburg, Mississippi, on July 18, 1984. The substance of the false or misleading statements included the following:

(a) Paul Holmes never discussed the Drew Fairchild case with Judge Nixon.

(b) To the best of his knowledge and recollection, Judge Nixon did not know of any reason he would have met with Wiley Fairchild after the Nixon-Fairchild oil and gas investment was finalized in February 1981.

(c) Judge Nixon gave the grand jury all the information that he had and that he could, and had withheld nothing during his grand jury testimony.

(d) Judge Nixon had nothing whatsoever unofficially to do with the Drew Fairchild criminal case in State court.

(e) Judge Nixon never talked to anyone, including the State prosecutor, about the Drew Fairchild case.

(f) Judge Nixon never had a thing to do with the Drew Fairchild case at all.

(g) Judge Nixon "never talked to anyone, State or Federal, prosecutor or judge, in any way influence anybody" with respect to the Drew Fairchild case.

Wherefore, Judge Walter L. Nixon, Jr., is guilty of an impeachable offense and should be removed from office.

XI. Mr. President, the House of Representatives by protestation, saving to themselves the liberty of exhibiting at any time hereafter any further articles of accusation or impeachment against the said Walter L. Nixon, Jr., district judge of the United States for the southern district of Mississippi, and also of replying to his answers which he shall make unto the articles preferred against him, and of offering proof to the same and every part thereof, and to all and

every other article of accusation or impeachment which shall be exhibited by them as the case shall require, do demand that the said Walter L. Nixon, Jr., may be put to answer the misdemeanors in office which have been charged against him in the articles which have been exhibited to the Senate, and that such proceedings, examinations, trials, and judgments may thereupon be had and given as may be agreeable to law and justice. Mr. President, the managers on the part of the House of Representatives, by the adoption of the articles of impeachment which have just been read to the Senate, do now demand that the Senate take order for the appearance of the said Walter L. Nixon, Jr., to answer said impeachment and do now demand his conviction, and appropriate judgment thereon.

The PRESIDENT pro tempore. The Chair on the part of the Senate thanks the managers on the part of the House.

The majority leader is recognized.

Mr. MITCHELL. Mr. President, at this time the oath should be administered in conformance with article I, section 3, clause 6 of the Constitution, and the Senate's impeachment rules. I move that the Senator from South Carolina [Mr. THURMOND] be designated by the Senate to administer the oath to the President pro tempore, the Senator from West Virginia [Mr. BYRD].

The PRESIDENT pro tempore. The question is or agreeing to the motion.

The motion was agreed to.

Mr. THURMOND. Do you solemnly swear that in all things appertaining to the trial of the impeachment of Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi, now pending, you will do impartial justice according to the Constitution and laws. So help you God.

The PRESIDENT pro tempore. I do.

Mr. MITCHELL. Mr. President, the oath shall now be administered by the President pro tempore to all Senators. This is an appropriate time for any Senator who has cause to be excused from service in this impeachment to make that fact known. If there is no Senator who desires to be excused, I move that the President pro tempore administer the oath to Members of the Senate.

The PRESIDENT pro tempore. The question is agreeing to the motion.

The motion was agreed to.

The PRESIDENT pro tempore. Senators will now raise their hands and take the oath.

Senators shall now be sworn: Do you solemnly swear that in all things appertaining to the trial of the impeachment of Walter L. Nixon, Jr., judge of the U.S. District Court for the Southern District of Mississippi, now pending, you will do impartial justice according to the Constitution and laws. So help you God.

SENATORS. I do.

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. MITCHELL. Mr. President, any Senator who was not in the Senate Chamber at the time the oath was administered to the other Senators will make that fact known to the Chair so that the oath may be administered as soon as possible to the Senator.

The Secretary will note the names of the Senators who have been sworn, and will present to them for signing a book which will be the Senate's permanent record of the administration of the oath.

Mr. MITCHELL. Mr. President, on behalf of myself and the distinguished Republican leader, Mr. DOLE, I send to the desk a resolution that provides for the issuance of a summons to Judge Walter L. Nixon, Jr., for Judge Nixon's answer to the articles of impeachment against him, and for a replication by the House, and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the resolution.

The legislative clerk read as follows:

A resolution (S. Res. 127) to provide for issuance of a summons and for related procedures concerning the articles of impeachment against Walter L. Nixon, Jr.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution.

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 127) was agreed to, as follows:

S. RES. 127

Resolved, That a summons shall be issued which commands Walter L. Nixon, Jr., to file with the Secretary of the Senate an answer to the articles of impeachment no later than May 31, 1989, and thereafter to abide by, obey, and perform such orders, directions, and judgments as the Senate shall make in the premises, according to the Constitution and laws of the United States.

SEC. 2. The Sergeant at Arms is authorized to utilize the services of the Deputy Sergeant at Arms or another employee of the Senate in serving the summons.

SEC. 3. The Secretary shall notify the House of Representatives of the filing of the answer and shall provide a copy of the answer to the House.

SEC. 4. The managers on the part of the House may file with the Secretary of the Senate a replication no later than June 12, 1989.

SEC. 5. The Secretary shall notify counsel for Walter L. Nixon, Jr., of the filing of a replication, and shall provide counsel with a copy.

SEC. 6. The Secretary shall provide the answer and the replication, if any, to the Presiding Officer of the Senate on the first day the Senate is in session after the Secretary receives them, and the Presiding Officer shall cause the answer and replication, if any, to be printed in the Senate Journal and in the Congressional Record. If a timely answer has not been filed the Presiding Officer shall cause a plea of not guilty to be entered.

SEC. 7. The articles of impeachment, the answer, and the replication, if any, together with the provisions of the Constitution on impeachment, and the Rules of Procedure and Practice in the Senate when Sitting on Impeachment Trials, shall be printed under the direction of the Secretary as a Senate document.

SEC. 8. The provisions of this resolution shall govern notwithstanding any provisions to the contrary in the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials.

SEC. 9. The Secretary shall notify the House of Represantatives of this resolution.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The majority leader is recognized.

S. RES. 128

Mr. MITCHELL. Mr. President, on behalf of myself and the distinguished Republican leader, Mr. DOLE, I send a resolution to the desk on the appointment of an impeachment trial committee, and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report the resolution. The legislation clerk read as follows:

A resolution (S. Res. 128) to provide for the appointment of a committee to receive and to report evidence with respect to articles of impeachment against Judge Walter L. Nixon, Jr.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 128) was agreed to, as follows:

S. RES. 128

Resolved. That pursuant to rule XI of the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials, the Presiding Officer shall appoint a committee of twelve senators to perform the duties and to exercise the powers provided for in the rule.

SEC. 2. The majority and minority leader shall each recommend six members to the Presiding Officer for appointment to the committee. The committee shall designate one of its members to be chairman and one of its members to be vice chairman.

SEC. 3. The committee shall be deemed to be a standing committee of the Senate for the purpose of reporting to the Senate resolutions for the criminal or civil enforcement of the committee's subpoenas or orders, and for the purpose of printing reports, hearings, and other documents for submission to the Senate Under Rule XI.

SEC. 4. During proceedings conducted under rule XI the chairman of the committee is authorized to waive the requirement under the Rules of Procedure and Practice in the Senate When Sitting on Impeachment Trials that questions by a Senator to a witness, a manager, or counsel shall be re-

duced to writing and put by the Presiding Officer.

SEC. 5. In addition to a certified copy of the transcript of the proceedings and testimony had and given before it, the committee is authorizd to report to the Senate a statement of facts that are uncontested and a summary, with appropriate references to the record, of evidence that the parties have introduced on contested issues of fact.

SEC. 6. The actual and necessary expenses of the committee, including the employment of staff at an annual rate of pay, and the employment of consultants with prior approval of the Committee on Rules and Administration at a rate not to exceed the maximum daily rate for a standing committee of the Senate, shall be paid from the contingent fund of the Senate from the appropriation account "Miscellaneous Items" upon vouchers approved by the chairman of the committee, except that no voucher shall be required to pay the salary of any employee who is compensated at an annual rate of pay.

SEC. 7. The Secretary shall notify the House of Representatives and counsel for Judge Walter L. Nixon, Jr., of this resolution.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. MITCHELL. Mr. President, in accordance with the resolution on the appointment of an impeachment trial committee, I recommend to the Chair the appointment of Senators FOWLER, HEFLIN, WIRTH, REID, ROBB, and KOHL.

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. DOLE. Mr. President, in accordance with the resolution on the appointment of an impeachment trial committee, I recommend to the Chair the appointment of Senators HATCH, DANFORTH, CHAFEE, MURKOWSKI, JEFFORDS, and MACK.

The PRESIDENT pro tempore. Pursuant to Senate Resolution 128 on the appointment of an impeachment trial committee and impeachment rule XI, the Chair appoints upon the recommendations of the two leaders the following Senators to be members of the committee to receive and report evidence in the impeachment of Judge Walter L. Nixon, Jr.:

Senators FOWLER, HEFLIN, WIRTH, REID, ROBB, KOHL, HATCH, DANFORTH, CHAFEE, MURKOWSKI, JEFFORDS, and MACK.

The majority leader is recognized.

Mr. MITCHELL. Mr. President, the resolution on the appointment of an impeachment trial committee provides that the committee shall designate one of its members to be chairman and one of its members to be vice chairman. The Committee on Rules and Administration will be providing its hearing room, SR-301, to the impeachment committee for an organizational meeting on Tuesday, May 16, at 4 p.m.

The PRESIDENT pro tempore. The Senate will take further proper order, and notify the House of Representatives, and counsel for Judge Nixon.

Mr. MITCHELL. Mr. President, that completes action on this matter.

I now suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time and I also reserve the time of the distinguished Republican leader, Senator DOLE.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 1 p.m. with Senators permitted to speak therein for not to exceed 5 minutes each.

The Senator from Iowa is recognized.

Mr. GRASSLEY. I thank the Chair.

(The remarks of Mr. GRASSLEY pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore (Mr. LIEBERMAN). The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KOHL). Without objection, it is so ordered.

PANAMA

Mr. DOLE. Mr. President, it seems there is no bottom to the abyss into which Gen. Manuel Noriega has tossed his own country.

It seems there is no end to Noriega's affront to his own people—and to peaceful, democratic people everywhere.

We all know that the most recent prank of Panama's drug-dealing dictator was to steal an election from a majority of people who cast their vote for a new government, but events of the last few days have truly brought Noriega to new lows.

Thousands of Panamanian citizens lined the streets to bear witness to a fact everyone already understood: The election was clearly won by opposition candidates Guillermo Endara, Ricardo Arias Calderon and Guillermo Ford.

Instead of declaring the Endara ticket the victor, Noriega voided the election and sent his thugs after the Panamanian people with water cannons, tear gas, clubs, and bullets.

Endara, Arias, and Ford were administered sound beatings, and today the popularly elected leaders of Panama are in hiding.

Now Noriega would have the world believe that this situation is the result of overbearing North American neighbors. Will not wash. Ask any Panamanian, foreign observer, reporter, or the Catholic Church: Noriega stole the election and went on a rampage against his own people.

Unfortunately, some of those few who believe Noriega live in Moscow. Yes, Moscow.

This morning's Washington Post reports that Secretary Baker and Foreign Minister Shevardnadze made some progress on regional issues, including Central America. But as Baker wound up his first official Moscow visit, Tass was saying that Noriega was right to nullify the election because the United States rigged the election.

The Soviets cannot have it both ways. If they want good relations with us, if they want us to believe that glasnost and perestroika really mean a new foreign policy, then this sort of verbal assault will have to stop.

Let us face it, perestroika or not, the Kremlin still controls Tass. So what is Moscow's position? They just had an election, of sorts, in the Soviet Union, and it was a much freer election than thay had in Panama. At least in Moscow, and in some places around the Soviet Union some people were elected for the first time in a long, long time. So, are the Soviets going to stand up for democracy and freedom or take cold war pot-shots at Uncle Sam?

It is also time for some plain talk to Manuel Noriega. In addition to his own citizens, he has set his thugs lose to harass American military and diplomatic personnel and their families. We cannot and will not tolerate this.

Earlier this morning, the Republican and Democratic leadership in the House and Senate met with President Bush at the White House. We were advised that later this afternoon, at 4 o'clock, he will make an announcement of what measures he feels are necessary at this time—I underscore "at this time," because this matter is

changing, almost as we speak, in Panama—to protect Americans and American interests in Panama. And we do have an interest in Panama. In addition to the Panama Canal; there are estimates of 40,000 Americans in Panama and the Panama Canal Zone.

I think it is fair to say here and now that whatever the President decides, he will have bipartisan support in Congress. He will have the overwhelming support of the American people. I know the President has been consulting with leaders in central America and around the world. It seems to me that there should be an outcry and an outrage from Panama's neighbors, as well as the people in Panama.

In my view, that would have a most important impact upon General Noriega. So when President Bush announces the measures he plans to take, I hope, believe, and I feel certain that they will be greeted with bipartisan approval from nearly every Member of Congress in the House and the Senate.

Again, there are preliminary steps. Who knows what may happen tomorrow or the day after or next week? That will depend on the conduct of General Noriega.

Mr. President, I reserve the remainder of my time.

Mr. WIRTH addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Colorado [Mr. WIRTH].

Mr. WIRTH. I thank the Chair.

(The remarks of Mr. WIRTH pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

FAREWELL TO KEVIN KNOBLOCH

Mr. WIRTH. Mr. President, we have all had the painful experience of bidding farewell to valued staff members, and today I want to share my impressions of a most valued member of my staff, Kevin Knobloch. Kevin has been my legislative director—both in the House and Senate—since the summer of 1985. During Kevin's tenure, the Wirth legislative operation—which has always been, in my opinion, one of the best on the Hill—has far exceeded even my own high—some might say unrealistically so—standards and expectations.

To a very large extent, the effective functioning of this group of talented individuals has been due to Kevin's outstanding leadership abilities. His grasp of the issues, fluency with pen, pencil, and word processor, understanding of the State of Colorado, intimate knowledge of the workings of Congress and ability to guide and inspire other staff members are skills I fear I will be hard-pressed to find in any replacement.

Moreover, I will sorely miss the benefit of Kevin's counsel. As many of my colleagues will attest, the single most important quality to find in a senior staff person is the ability to say, "No. I don't think that is such a good idea. Here are the reasons * * *." Kevin has been the central individual I could always count on to provide me with a direct, honest, and accurate evaluation of any proposal or position. That capability has served me very well for nearly 4 years.

I recognize that few of us can hope to retain the services of any one highly skilled staff member here on the Hill forever. Neither the lifestyle nor the compensation in general are such that outside opportunities will not ultimately beckon. In Kevin's case, I am pleased that he will be going to work with an organization that I have long respected, the Union of Concerned Scientists. He will be handling their arms control issues and I have to say that they could not have found anyone with greater integrity, ability, or sincerity to drive that very important agenda for them. He will be sorely missed in the Wirth operation but, at least, we are giving him up to a very good cause.

I know that my staff feel the same sense of loss as I. Kevin has filled very big shoes in the Wirth operation for a long time. His sense of humor, his warmth and his total unwillingness to get ruffled are traits that have made everyone's job here a good deal easier and a lot more fun. We wish Kevin the very best in the coming years. As he just became a father for the first time last month, I can earnestly say that he has a future full of exciting challenges and immense rewards—which he richly deserves.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—SENATE JOINT RESOLUTION 113

Mr. MITCHELL. Mr. President, I ask unanimous consent that, during the consideration of Senate Joint Resolution 113, the FSX disapproval resolution, only amendments or motions relevant to the subject matter of the joint resolution be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PROCEED TO THE CONSIDERATION OF SENATE JOINT RESOLUTION 113

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the FSX disapproval resolution (S.J. Res. 113) at 2 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 2 P.M.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate stand in recess until 2 p.m. today.

There being no objection, the Senate, at 12:53 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. LIEBERMAN].

Mr. COHEN. Mr. President, I ask unanimous consent that I be allowed to proceed for 2 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EVENTS IN PANAMA AS MONITORED BY THE SOVIET UNION

Mr. COHEN. Mr. President, the recent unfortunate events in Panama, which are being followed so closely here at home, are being monitored with equal interest by our friends in the Soviet Union, as indicated by an Associated Press account of a dispatch today from Tass, the official news agency.

I believe all of us are aware of the fact that Mr. Gorbachev has attempted to improve the situation in the Soviet Union with his policies of "glasnost" and "perestroika." I think they have generated considerable attention in this country and throughout the world. They have created a certain feeling that there is a softening of the attitude of the Soviet Union toward the West, a more civilized and harmonizing approach, I might say.

But this dispatch from Tass leaves a vastly different impression. It indicates to me that Mr. Gorbachev's restructuring evidently has not penetrated into the depths of the Tass newsroom, where old school fingers were clearly at the keys of the typewriter that produced this report.

The Panamanian opposition, according to Tass—and I would like to quote it—"instigated by the United States, violated election laws and attempted to rig the results."

As those results came in, Tass continued, "the opposition, directly instigated by the United States, started heightening the atmosphere by resorting to obviously provocative and subversive actions."

Mr. President, I find these reports both disturbing and rather remarkable. They seem to me to be a product of news-speak. Facts are twisted into lies, and they are paraded about as truth, like the Orwellian nightmare in which we saw hate twisted into love and were told that ignorance was the equivalent of wisdom, that slavery would be equal to freedom, that two plus two equaled five.

Well, unfortunately for Tass and those reporting on its behalf, the camera does not blink. Millions of people were able to see the brutality that was carried out against the Panamanian opposition—those people who are striving for freedom—and it gives lie to the facts as reported by Tass.

I will say, Mr. President, that if this is the Soviets' new thinking, then glasnost and perestroika are moving very slowly indeed, and we have a lot further to go than many thought in establishing a much better relationship with the Soviet Union.

Mr. President, I ask unanimous consent that the Associated Press report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

SOVIETS BLAME INVALIDATED PANAMA ELECTION ON OPPOSITION

Moscow.—The nullification of elections in Panama was necessary because the opposition, instigated by the United States, violated election laws and attempted to rig the results, the official Tass news agency claimed today.

The Electoral Tribunal in Panama City late Wednesday invalidated Sunday's election, saying the stealing of ballots, vote-buying and missing tally sheets made proclamation of a new president impossible.

Both sides had claimed victory in the balloting, which international observers and the opposition claimed were rigged by forces loyal to strongman Gen. Manuel Antonio Noriega.

Tass, in a dispatch from Panama City, claimed supporters of opposition presidential candidate Guillermo Endara had violated election procedures.

"They blockaded polling stations, preventing ballot boxes from being taken to the commission's headquarters in good time," Tass said. "A considerable number of ballot papers were stolen or destroyed and several ballot boxes were burned."

Witnesses and international observers said soldiers loyal to Noriega had stolen ballots from polling stations where voting heavily favored the opposition.

Tass said that as results were coming in, "The opposition, directly instigated by the United States, started heightening the atmosphere by resorting to obviously provocative and subversive actions."

Tass said allowing the election results to remain valid posed "unpredictable consequences for the country's future."

The decision to nullify the election "appears to be extraordinary, but the only correct one," the news agency said.

MAKING A SPECIAL EFFORT: JAMES FENIMORE COOPER HIGH SCHOOL

Mr. CRANSTON. Mr. President, I recently received letters from four young constituents of mine inviting me to attend their school's graduation ceremony. Because the Senate is scheduled to be in session on the day of their graduation, I told them I would be unable to join them. However, I did tell them I would be with them in spirit. And I meant that.

I'd like to tell my colleagues here a little about the school these young people attend because I believe that it and the students there deserve some special recognition.

James Fenimore Cooper High School in San Pedro, CA, is 1 of 5 opportunity high schools in the Los Angeles Unified School District. Created by statute to respond to the high dropout rate in California, opportunity schools face an even greater challenge in meeting the needs of its students than do more conventional schools because the needs of its students are so great.

When assigned to the opportunity school like Cooper, a student has usually been transferred from one or more traditional schools—in some cases, as many as eight schools—because he or she has had difficulty either socially or academically or both. Truancy and poor behavior are the primary reasons these students were asked to leave the traditional schools.

What makes an opportunity school different from other schools which have tried to work with troubled students is its approach. Opportunity schools recognize the synergistic relationship between self-esteem and academic achievement. In other words, schools like Cooper High realize that students who think of themselves as losers will not do well at school—cannot, in fact, do well. And conversely students who do poorly—for whatever reason—will think poorly of themselves. Opportunity schools seek to break this negative cycle and help the students recognize themselves for what they are: unique individuals with the potential to achieve whatever they set their minds to.

James Fenimore Cooper's students, its faculty, its administration and all those in the community who make the school possible deserve recognition for their special commitment to America's future. Each of them can learn from each of them the most important lesson of all—do not give up.

A VISION FOR SCHOOLS

Mr. CRANSTON. Mr. President, Dr. JoAnn Shaheen is a former constituent of mine and presently director of Elementary Education in South Orangetown, NY. Her skills as an educator and administrator have earned her numerous recognitions and awards, including being named one of 100 outstanding U.S. educators in 1984. Dr. Shaheen's professional accomplishments are rooted in the sheer love of children, respect for their teachers, and a clear vision of schools in which teachers are able to teach and children are able to learn.

In the winter 1988 edition of "Democracy and Education," Dr. Shaheen shares her experience and her hopes for humane, excellent schools. Her article was written when she was principal of the William O. Schaefer School in Tappan, NY. I ask unanimous consent that the article, "Democratic Discipline, Democratic Lives" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEMOCRATIC DISCIPLINE, DEMOCRATIC LIVES

(By JoAnn Shaheen)

I want to share with you what we at Schaefer School are about and why. As I do this, I hope each of you will take stock of where you are and where you want to be. I hope the steps we have taken will suggest ways for you to bridge the gap between where you are and where you want to be. Just as importantly, you will have a chance to see which pieces of the Schaefer program may not fit well into your dreams and goals.

It is so difficult to teach in today's schools. In order to survive, each of us can succumb to relying on memories to get feelings of satisfaction rather than create new dreams for ourselves and those whom we teach. Urie Bronfenbrenner has written much about the necessity for somebody to be irrationally crazy about a kid, if that kid is to become a competent and compassionate member of our society. It often seems to us that it is increasingly difficult to become irrationally crazy about a kid in today's schools.

Let me explain a key reason for this difficulty. One of my teachers recently asked me to approve a letter which he wished to send to the parents of his students. I ask all teachers to share with me all communication going to all parents in their classrooms so that I know what is going on before I get telephone calls. This is Don's letter:

DEAR PARENTS: I am sorry to report to you that I was unable to teach your child reading or language arts this week. However, I am happy to report that I, and possibly your child, were somehow involved in the following:

"Bicycle Safety Program, Fire Prevention Program, Handicapped Program, Class Mother Program, Probe Program, Computer Program, Parent Conferences, Ghost and Goblin Fair, Law-related Eduction,

"Metrics Program, Class Pictures, Elks' Free Throw Contest, Costume Workshop, Independent Reading, Book Orders, Outdoor Education, Mock Elections, Career Eduction Program,

"Playground Clean-up Program, Humanities Grant Program, Trade-Offs (Economics Program), Gifted and Talented Screening, Classroom Physical Education, Gem and Mineral Demonstration, Substitute Teacher Evaluation Program, and N.Y.S. Physical Fitness Testing Program.

"All of these "special" programs are laudable and educationally sound programs. I hope you'll agree.

"Sincerely,

DON GERARD."

The curriculum burgeons. Teachers fight time. The expectations grow for today's schools. Everyone, it seems, wants us to fix everything or at least take responsibility for everything that is difficult so that he/she can label us as responsible and feel free to drop the problems or dilemmas. But many of us remain in the schools although other jobs might pay more, or the work might be easier, or we might have closure after eight hours a day. Why? Because most of us are irrationally crazy about kids—at least enough of the time so that we only write our resignations in pencil.

But life is too short to be little. All of us who remain in education need to feel in the inner, very private core of our beings the power we have for good. All of us, if we are not to become withered and passive and truly worn-out human beings, need to feel the exaltation which comes when we form caring, giving relationships with kids and with our colleagues. We need to feel the exuberance that comes from being intellectually, ethically, and emotionally on the move.

All of us can create energy within ourselves when we lead ourselves and our students (be they five-year-olds or seventeen-year-olds) in a search for justice and wisdom, when we run after truth, beauty, and goodness. Some of us beleive today that we have to make this run apologetically because these words—justice, wisdom, truth, beauty, and goodness—seem to have an old-fashioned, out-of-vogue and out-of-touch, embarrassingly innocent tinge to them. I believe that these feelings are wrong. In the lingering malaise of Vietnam, of Watergate, and of the recent Contra hearings, we cannot give up the dreams and voyages we must take in order to become good persons and to contribute personally to the maintenance, continuance, and extension of our forefathers' promises.

To feel truly alive in a world where antiheroes are popular, I believe that each of us, at least once in a while, must feel like a hero. Being in a school with children can give each of us a chance to feel and behave like a hero. In doing so, we will assuredly have many opportunities for laughter and love, for learning and challenge, for accomplishments and achievements. And is there really anything else that matters?

I would like to talk with you about my experiences and beliefs. These are very important if you are to understand why we at Schaefer have designed a series of programs [See boxes throughout this article.] to help us create a setting in which children can grow in the attitudes and skills necessary for citizenship in our country.

TO TEACH, TO LEARN

Let me begin with our two, immediate, absolutely imperative goals. We want teachers to be able to teach and children to be able to learn. We want this in every one of our classrooms. It is an essential beginning and is really our reason for being. Once I attended a conference at which a principal and several teachers described a wonderful educational program they wished us to adopt. They began with, "Let me tell you about our school." Their first descriptive statement was, "The children run the school: they really do!" I thought, "How tragic. They are taking away the children's childhood. Child development makes it absolutely clear that limits, structures, routines are part of children's basic needs."

Next, they told us, "We had the longest bunny hop in history." And I thought, "What wonderful fun for the children. The children will remember it forever and that is nice. However, if that is one of the most important things you have to say about your school, if 'fun' is all we are about, we can accomplish that much more cheaply at a zoo or an amusement park."

Finally, they urged us to do what they do. They said, "At the beginning of the year, the children choose where they want to sit, and that is it! The children stay that way until they want to change it." I thought, "How cruel! How about the child who is inevitably lonely, assertively rejected, the handicapped child who needs help in becoming a member? As an adult, the teacher has an obligation to assist the children in making such important decisions."

Last year, I had a third grader who was disrupting the classroom. She was not fulfilling her excellent educational potential. She was losing, her classmates were losing, and the teacher was unable to use her own talents, knowledge, and experience. The teacher's voice became shrill and loud, her manner curt, her goals and teaching objective primitive. I moved the child to another classroom (both teachers and the parents were in agreement). The child threw tantrums at home and at school; however, for only a short time. The child told me she hated me—that I was unfair, that I was separating her from her friends. I did not back down—not because I am so wonderful, but because I remembered the words of Paul Tillich: "A leader must be just and full of love."

Emily, my lovely, gifted, underachieving third grader, earned an outstanding final report card. Her mother reported to me that she had questioned Emily about how she had been able to accomplish so much in such a short time. Emily responded, "Oh, that's easy. I didn't have any friends to talk to in my room, so I decided that I might as well do my work."

ON BEING DEMOCRATIC

Everyone at our school—parents, teachers, and children—knows that we explicitly follow our New York State Code, which demands, "Every child has a right to be and to feel safe at school and to learn." One of my major roles as principal is to be as sure as I can be that this expectation is carried out in every classroom in our school. Classrooms cannot be viewed as small, democratic communities—not even at the senior high level. It is ridiculous to think of a classroom in terms of a political democracy. The teacher has more authority than one equal vote. Students do not determine the curriculum. Students do not choose the purpose of the school. Students cannot withdraw.

A good system of discipline must not be wishy washy. More than anything else, discipline means that the leader of the school (the principal) and the leaders of the classrooms (the teachers) must make absolutely clear that "Every student in this school has a right to be and to feel safe at achool and to learn." But that is not enough; we need to deepen our perspective of where we want to get to.

We have just as strong an obligation to be able to prepare children to live in a democratic society. We cannot discipline in ways which necessitate that an authority figure be ever present. We cannot discipline students in ways which necessitate hiring a personal police person for each citizen or which shallowly justify the formation of mobs, bigoted clans, or cults. If I'm standing here with my foot on someone, that person is not free. But neither am I because I can't take my foot off. I believe that we used to consider only the first part of the statement: "If I stand with my foot on someone, I control that person." Today we know enough to recognize the widsom of the second clause of the statement: "But neither am I free because I cannot take my foot off." We realize that compliance granted only because of fear of punishment is not truly good education. If I only educate in ways which produce obedience to greater power, I am not educating in ways that assure the continuance of our democratic way of life.

We want to educate students who can live in the future—they have no choice. We created the world in which they grow up, and in many ways, we have provided them a great heritage. We also leave them a great many problems. They must be able to cope with a different world—be able to make decisions, solve problems, settle conflicts, negotiate, compromise, mediate. Because a sense of isolation, selfishness, and helplessness increases with age, our children as adults will have to find ways to cope with these feelings or go mad.

Certainly we must dream and dare to hope that we are educating in ways which will enable most of our students to realize the full development of their individual capacities. We must dream that many of our children will have the kind of education which will enable them to shed crude egocentricity for self-realization—to shed self-absorption so they can help build a community healthy enough for human beings.

THE CHALLENGE WE FACE

A tall order? yes, indeed! The problems are tough because society, as we live it today, seems to create more and more problems, and society's problems do not stop at the schoolhouse door! The children bring them into the classroom.

Let me tell you about Jonathan, a second grader. He drew a picture of a house and his family using only strong black crayon. He wrote this story to accompany his family portrait: "This is my house. It is made of iron. Even the clouds and the sun hear the yelling. It is a sad house. It is terribly unhappy." Last year my school nurse gave me a note describing an incident on the playground that morning. The note read: "JoAnn, don't want to interrupt your meeting, but while I was on bus duty this AM, buses were arriving and Mike took a toy gun out of his pocket, put it to his head, and said, 'BANG.' When I said how terrible it was, he said, 'No, it would be great; I wouldn't have to live anymore.' " Alcoholic father * * * family in the midst of divorce * * * Mike often ill. Mike is one of the eight children in our school who talked openly of suicide last year.

Last year, too, notes from parents started to arrive at school regularly: "To Whom It May Concern: Robert is not to leave the school with anyone other than myself [Mother] or Mary [grandmother]." Perhaps nine or 10 times during the year we were involved with messy, messy divorces—parents sued one another, police became involved, childen screamed for help. We even hired a private security guard for the first two days of school because the police informed us that there was a possibility one father would try to abduct his son from school at gunpoint. We have a small counseling pro-

gram. Of the 12 kindergarten and first grade children identified and involved in this program, nine are messed up because of drug and alcohol abuse in their immediate families. The teachers identified the children as needing help before we knew the backgrounds. One child sobbed to the counselor, "My grandmother stays home to take care of me because I am a child, but I have to take the bottles away from her. My mom says I am to pour the liquor down the toilet, but my grandmother gets so mad. * * *"

Those who study psychopathic behavior believe that it is on the increase in our country. Psychopathic people are guiltless, insensitive, amoral, and loveless. They will affect our communities and our lives.

Should we be angry with ourselves because we don't have answers to all this? No, we should be furious with ourselves if we do not continue to become learners. We all must unashamedly remain learners if we are to take up the educational challenges of today: to find ways to enable children to live in a democratic society in the 21st century; to find ways to enable children to become as fully human as possible. Our greatest sin today is not to seek to learn.

TOWARD DEMOCRATIC DISCIPLINE

It is impertive today that each school have an excellent system of discipline and classroom management. These tortured, mixed-up, sad, and angry kids are not easy to teach; they are not easy to reach. But I have learned that an effective system of discipline must not damage a person's self-esteem. We must nurture and encourage human potential. We must not destroy that kernel of greatness in each human being, no matter how small it is. Ridicule, sarcasm, public admonishments have no place in a good school.

Several years ago my stepmother died after a long illness. The day before she died, I went to the hospital to visit. She shared with me her sorrow that her sisters and brothers had not come to visit her. I think that she knew that she was dying, and she wanted to say good-bye to them. I criticized them severely. She took my hand and gently admonished me: "Don't blame them, JoAnn. I raised them, you know. I could have done a better job, but in school they always told me I was dumb, and when they didn't say it, I knew they thought it. And later in life, sometimes I would try to do things, and I found I could. Why did they do this to me? My life could have been so diferent. * * *"

Mildred, a fourth grader, taught me where the real power for good is in the school. One day I was in my office—running late for a meeting at Central Office. As I pulled on my coat, my secretary said, "Mildred is waiting for you." I was in a hurry, but I had to deal with Mildred, a child with many academic and even more behavioral problems. I said, "Mildred, what is the problem?"

Mildred responded quietly and slowly. "Have you ever had a day when everything you did got you in trouble?"

"Yes, I think so," I replied. I knew enough to know that Mildred needed to talk, so I pulled off my coat and led her to a bench where we could sit down.

Mildred spoke again. "And, have you ever had a day when everybody did everything that hurt you and they probably didn't mean to?" I again responded that I thought I knew this feeling. Mildred and I talked about the day, and she described the many things that had gone wrong.

Then, still in a hurry, I said to her, "Mildred, what can I do for you?" Because, of course, I thought I could do something—fix Mildred—and rush to my meeting at Central Office.

Mildred looked at me, took my two shoulders in her hands, faced me, and quietly said, "You can't do anything for me. . . . You can just listen!!!"

Here Mildred and I were, in a very good school with thousands of dollars of hardware and software and lots of aides and specialists—almost everything educators could want; and Mildred was saying, "Please, please, just listen to me." Whenever I lose my dream and think I'm not good enough to reach so high, I think of my step-mother and Mildred. I know you, too, have memories to keep you seeking "the best."

Let me tell you about Jack, the sophisticated terror of the third grade, a non-reader, and an effective negative leader. As an elementary school guidance counselor, I was asked to help. I worked with Jack on phonics, using all kinds of word games. As we worked and trust grew, I found out that Jack cooked, fed three younger children, polished his shoes and the shoes of all the other chidlren each night, saw to it that the three younger children were dressed and spic and span each morning. In school we were treating him as a small boy. He was aware that he was in the bottom reading group, lacking status and failing in school. He also knew that he had many important things to accomplish in caring for a family where there was no father and where the mother, working in a factory from 6:30 a.m. to 3:30 p.m. each day, was too overwhelmed to care much.

Jack helps to point up the proper place of order and control in our classrooms. There must be order and control in these classrooms if learning is to take place. Hopefully, none of us refutes the need for order. Hopefully none of us promotes permissiveness, but this does not mean that we believe that stand-up sit-down raise-your-hand-before-thinking-or-acting is indicative of good teaching.

All of us know that there are classrooms in which the students will say nothing because they are afraid of the teacher. We also know that significant learning is not taking place in those classrooms. The conclusion is obvious: just having order and control in a classroom does not necessarily mean that learning is taking place; nor does having an orderly classroom make one an excellent teacher. I think many people judge teachers only by their ability to control children, not by the teacher's ability to truly teach. There are some teachers who erroneously judge themselves good teachers by the same criteria.

Professional teachers are always good disciplinarians. Yet a close look at these great teachers reveals that they are not the kind who carry clubs. They are disciplinarians in a human way. They set standards for acceptable student behavior and are somehow and some way consistently successful in getting children to meet the standards. They help meet the human needs of children like Jack by involving them in positive ways with the teacher and with learning.

Robert's teacher helped Robert, a bright sixth grader, completely change his behavior. Robert would not do his work in school or his homework at home. He mimicked his teacher, causing one disruption after another. One day, I had had it. When he was sent in to me, I flung a yellow pad at him and asked him to go into the library and write for me what was going on. He wrote:

"During my lunch recess I haven't been behaving. I have been doing everything I'm not supposed to do. We, that is my friends and I, have been purposely annoying the aide. We've been hitting kids with our hats. I have known I'm not supposed to do these things and I've done the following:

"(1) pushed over milk cartons,
"(2) got in one fight,
"(3) annoyed all the children outside,
"(4) chased kids,
"(5) handcuffed them,
"(6) chased them on a bicycle,
"(7) hit some with a stick,
"(8) took some kid's ball,
"(9) threw snowballs,
"(10) had a good fight,
"(11) fooled around in gym,
"(12) fooled around in art,
"(13) gone off school grounds, and
"(14) didn't come in when Miss Shaheen told me to.

"I've also got a reputation for being a trouble maker. Also I moved one of the big garbage cans. I haven't tried to stop my friends from getting in trouble. I don't look forward to going to school. None of the teachers like me. I guess the more freedom I get, the less I appreciate it. I'm sorry that I have caused so much trouble and I know this time that I won't do it again. I'm sorry. I've had some trouble at home and I guess I take my aggression out at recess.

Sincerely,

ROBERT."

Robert's teacher and I sat down with him that afternoon. He trusted us enough to tell us that he had had it with our saying that we had had it and that he was sick of hearing from his parents that they had had it. Robert was a very ethical, unusually moral, rational sixth grader. In solving their problems the adults had torn this young boy apart. He truly could not endure any longer the screaming, yelling, deceit, hurt, and sorrow of the family members he loved. As teachers, we must be more alert than ever to children who come to school with their basic mental or physical needs unfulfilled. Robert was able to change his behavior, but only because a teacher was willing to listen and respond with love and humanity.

DON'T GET TOUGH

The current "get tough" message in our schools is wrong. It is ethically and morally wrong. Our schools must not model toughness. The world is rampant with models of toughness and the results of that toughness. Each night the television pumps toughness into the living rooms of our children, into their bedrooms, their kitchens, and in some homes even into the bathroom so that no three minutes of violence may be missed. Instead, our schools must model gentleness. The sickness of America today—and America and the American people are hurting—is that we don't know how to be gentle. There are few models because only the true strong and competent can be gentle. Think for a minute when you last heard a gentle, sensitive, caring, compassionate news item. If there was ever a time in history when our children need to have models for what it means to be gentle, it is now. Swirling about the children who attend many of our schools are images of egocentric adults. We must be gentle because we are strong and because we know what we are doing and accept responsibility for our actions.

Our schools must create excitement for and with children. If we do not create excitement, the children will create their own. I learned early in my teaching career that it was safer for me to plan excitement than to

let the children design it. I do not believe that school must always be fun, that we must be a live Sesame Street show. I really resent this notion. I do believe that school should consciously build memories: a talent show, a snow festival, a field day. Once we have launched these memories, the important thing is that we let them fly, not that we get them back.

School should have the excitement that comes from being a part of solving problems so that everyone, young and old, student and teacher, feels better about the time spent at school. School should have the excitement of helping other children, of mastering number facts even in the age of calculators, of learning how to write, and of sharing feelings with audiences of all kinds.

Our schools must have administrators and teachers who stand for something. The days when school teachers and school principals could be wishy-washy are gone. The schools must reflect such landmark ideals of our country as truth, beauty, faith, love, and justice. These ideals must be the very hallmarks of what happens between people in the school.

TAKING THE TIME TO CARE

We cannot teach beauty in a school where there is not time each day for people to stop just to think of something beautiful. We once asked our third graders to ask their parents what was beautiful to them. One little boy wrote this for his homework: "My mommy says that I was the most beautiful thing she ever saw when I was born. My daddy says that my mommy is beautiful." We cannot teach faith in a school where we raise expectations only to dash them callously. We cannot teach truth in a school, where textbooks carry unsupported or unchallenged distortion or only teach facts, events, and interpretations which will displease no one. We cannot teach love in a school "rigged" against young people, in a school which throws an arm of support around some—the obviously beautiful—while the other arm pushes others out the schoolhouse door. And we cannot teach justice in a school or in classroom bereft of due process, of fair treatment, of adherence to our Bill of Rights.

Every school must deal as rationally as possible with all the human beings for whom it is responsible. We did not teach citizenship from our "Civics" textbooks, and we will not teach rational problem solving out of newer textbooks. We will teach these and all other subjects more effectively through the experiences we have with each other during each day at school.

JACOB'S STORY

This is not easy. I remember my failures more than my successes. I remember Jacob. Jacob was the daily bane of my existence. I understood his problem, I thought, but we could not seem to meet his needs academically, through involvement, or through firm, fair, consistent discipline.

Nothing seemed to work with him. During the last week of school, Jacob got into trouble with me for deciding that he would scribble some everlasting graffiti on our bathroom walls. He spent a little time that last week washing walls. Then, the last day of school, Jacob got onto the bus to leave school, to leave his home town to live with his other parent in Florida. His sixth grade teacher came dashing out to the bus because the kids had reported that Jacob had a bag of bits of paper which he was going to throw out the window.

I grabbed Jacob off the bus; told him to call his mother to have her pick him up. I was angry. As he went in to call his mother, he dug deep into his jeans pocket and thrust a crumpled piece of paper at me, saying, "I almost forgot to give this to you." I stuck it in my pocket. A week later I found that wadded-up piece of paper when I was readying that skirt for the laundry. It read:

"DEAR DR. SHAHEEN: I want to say I'm sorry for what happened in the boys' bathroom. I also want to apologize for all the other problems that I caused you in the last couple of years.

JACOB."

I was not proud of my irrational behavior. I could have simply taken his bag of papers from him. But I have learned from my experiences with Jacob and with others: I have learned that I must be ever rational, ever gentle, ever respecting of each child if I am to feel the joy of accomplishment and the magnificent wash of trying to be good at what I do and at what I am.

It is not easy. But it is far easier than it is to be mediocre, to settle for being less than I might be. And if you or I need re-convincing every once in a while, then we can think about the children we miss in every school—children from cities or suburbs or farm communities, children who are rich or poor. Of course we "miss" children in every school—the tattling, wasting, bullying, chattering, bragging, bossing, over-bearing children; the dependent, complaining, slavish-to-should and ought children; the cruel and disabling children; the crumpled and withered "old" childrren. All these are children we have lost.

I sometimes think that if one of these children would just once speak openly, honestly, directly—in an eyeball to eyeball confrontation—the child might say, "Look at me * * * look at me. * * * don't you see that I really am hurting? Can't you see my hurt? Can't you see my disdain for me? My lack of respect for me? You must see it * * * I see it so clearly. * * * Well, you're wrong. I am so a good person. I know I am a good person. You are the one who isn't a good person. But wait a minute * * * I am the one who must be awful because you are a teacher or a principal. You are supposed to be good and intelligent and right. * * * You lead the way. * * * If you weren't all of these things, you wouldn't be a teacher or a principal. You must be o.k."

I believe that these children can grow into amoral anti-social adults. They can become adults who often are incapable of truly ethical decisions, who are dependent upon alcohol, narcissism, drugs, cults, even rampages against society. They are not helpful to their families, to their society, to themselves.

We must heed the advice which Jewish parents often give to their children. "You never know what will be taken from you. You can never be sure that what you own or collect will always be yours. You can be sure only of what you carry with you as an educated, loving person. You must have important experiences tucked away in your heart—experiences with truth, beauty, justice, and responsibility."

We know that, as teachers and as human beings, we will have days that are dark, filled with alienation or terror, with heartbreaking anguish. When we watch a parent die, when a mate asks for a divorce, when a child is sick with fever, when such powerful feelings of inadequacy wash over us that we can't catch our breaths, when a job is lost and there is no other in sight, when. * * * I know that you, too, can add to this list. But we must never forget the importance of helping others tuck away in their hearts experiences filled with truth, beauty, justice and responsibility.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now concluded.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The PRESIDING OFFICER. Under the previous order, the clerk will now report the joint resolution.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 113) prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island [Mr. PELL].

Mr. PELL. Mr. President, earlier today, the Committee on Foreign Relations considered Senate Joint Resolution 113, a resolution to disapprove the administration's proposal for the joint development of a new fighter aircraft, the FSX, with Japan.

A motion to report the resolution favorably failed narrowly by a one-vote margin. Voting in favor of the resolution of disapproval were Senators BIDEN, SARBANES, DODD, KERRY, SIMON, SANFORD, HELMS, and MCCONNELL. Voting against the resolution of disapproval were Senators CRANSTON, MOYNIHAN, ROBB, LUGAR, KASSEBAUM, BOSCHWITZ, MURKOWSKI, MACK, and PELL.

The committee then considered a motion to report the resolution with a negative recommendation. That motion was approved by voice vote, with a quorum present and voting.

The proposal was formally transmitted on May 1. On May 10, the committee received testimony from Senators DIXON, BINGAMAN, and D'AMATO. The committee then heard from Secretary of Defense Richard P. Cheney, Secretary of Commerce Robert A. Mosbacher, and Deputy of State Lawrence S. Engleburger. Earlier today, the committee considered a matter related to the sale in closed session with intelligence community witnesses.

Mr. President, I must tell you first that I found the proposal very troubling. The testimony allayed some of my major concerns, as well as those of some other members. Clearly, however, the committee was quite divided in reaching conclusions on certain aspects of the deal and in reaching the determination that this proposal is in the national interests of the United States. In the end, speaking for

myself, I concluded, with some misgivings, that our new President deserved the benefit of the doubt.

Clearly, the previous administration did not do at all well either in consultations with Congress or in coordinating internally among its own departments. As a result, a deal was formulated which raised a number of concerns whether our national security, foreign policy, and economic interests had been properly served. President Bush was quite correct to take the advice of a number of Members of Congress, as well as senior administration officials, and direct a reevaluation. That led to further discussions with the Japanese and the side letters of April 28.

I wish that this had not been such a contentious proposal. It need not have been. We and the Japanese have many interests in common and should be interacting with greater harmony. The contentiousness and suspicion which has been brought about in our economic and commercial relations has clearly infected our political and security relationship. Even if this proposal is allowed by the Congress, the Japanese Government and industry would be well advised to take our debate as a warning that the economic and commercial relationship must change substantially for the better. It is intolerable for us to be, in effect, the guarantors of Japanese security interests and have Japan still reluctant to give a fair deal on the economic front.

If this is understood here in Washington and, more important in Tokyo, I would hope that this proposal, if allowed, will serve as a bellwether of a new relationship in which the Japanese will comport themselves so as to quickly allay the fears and concerns now evident. If so, the debate will be markedly different several years from now when the Congress is asked to approve a coproduction arrangement for the FSX. I would hope by then the concerns and mistrust so evident now will have been replaced by economic, commercial, diplomatic, and security relationships marked across the board by mutual trust and fairness.

Mr. President, I see that the sponsor of the joint resolution is with us. In view of the fact that I voted against his resolution, I think it would be more appropriate for him to handle the managing of it on this side.

The PRESIDING OFFICER. The Chair recognizes the Senator from Illinois [Mr. DIXON].

Mr. DIXON. Mr. President, may I say to the distinguished senior Senator from Rhode Island and the distinguished chairman of the Foreign Relations Committee, that it is another indication of his kindness and his many accommodations to his colleagues over the years that, notwithstanding the very close result against this Senator in his committee, he would accommodate this Senator by permitting me to manage the question of the resolution of disapproval of the FSX deal here on the floor of the Senate.

Senator PELL is a great Senator. He is a Senator who has served for many years and served not only his State but this Nation with great distinction. I regret very much that he has been unable to support this Senator on this particular occasion but I would observe that in the many years I have spent in politics, I have found that good men of integrity often differ on matters of importance. I honor him. I honor his judgment. And I thank him for his continued kindnesses and deem it a great honor to have served in this institution for a period of time with such a great Senator.

Mr. President, having said all that, I must observe, first, that I am disappointed with the result in the committee. But the Senate ought to know that we come here to discuss a resolution of disapproval of the FSX deal that was not agreed to by the committee by a very narrow vote 8 to 9, against this Senator, with two members not present who did not leave proxies.

It remains open to my colleagues in the Senate ultimately to make their judgment about this question. Clearly, Mr. President, this is not an issue that comes to us with some kind of a special mandate from the committee. Oh, no.

I have taken this floor many times in my short 9 years of service to support the committee process. I have done that when my great friend, the distinguished senior Senator from Georgia, the chairman of the Armed Services Committee has honored me by permitting me to serve as his assistant when he manages the Department of Defense authorization bill. That, as the President knows, is a bill that takes, sometimes, many days, sometimes weeks here. And I have always argued: support the committee process.

Many times with complicated issues, after the committee has spent hundreds and hundreds of hours and many weeks and months in the process on the Department of Defense authorization bill or on this recent, massive thrift legislation you have a right to suggest to your colleagues and friend on the floor that the committee function is paramount. Not so here.

My friend, the chairman of the Foreign Relations Committee, has been his usual fair, impartial, understanding self in the committee. At the same time may I again observe that the vote was exceedingly close. The vote is now closed, but two members did not vote. And those two members had the power to change the result.

So I think we come to this floor unburdened by the committee process. We come here to look at the issue of whether this administration is right in going forward with the negotiation process that has not yet received the approval of the Congress.

Let me make this one particular point, Mr. President, because the occupant of the Chair is a lawyer of great reputation and skill who served as attorney general of his State. In the Armed Services Subcommittee the other day, Chaired by my distinguished friend and capable colleague, Senator JEFF BINGAMAN, the Departments of State, Defense, and Commerce were represented. First of all, Commerce had nothing to do with the FSX deal; nothing at all until January this year. It never had a fingerprint on this.

Commerce was finally brought in at the end by the new President. Secretary Mosbacher, U.S. Trade Representative Carla Hills, Mr. Sununu, and others, shocked by this agreement at first, are now telling us they negotiated it and changed it sufficiently so that now it is acceptable.

When they came before that subcommittee they said the President and the Congress have endorsed the FSX deal. And my thoughtful friend, Senator CARL LEVIN of Michigan, who is insightful about these things, said to the witness: "Wait a minute. We haven't done anything in the Congress on this yet. We are not part yet of this package".

"Oh," but that man said, "you will be."

That is the question, Mr. President; whether we will be. We had not been consulted in this process. We were not a party to what has so far transpired. This deal belongs to the administration; not us. It is not our deal. It is not our deal until we lend this thing our votes.

And I say: Do not do that. There are some that say that this deal has been improved; some who will vote against this resolution, such as my distinguished friend from Missouri, Senator DANFORTH, whom I consider to be a great Senator, have come to us and said: Well, now we can vote for it. You know, the deal is done. They fixed it up a little bit at the end.

But I say: Did they really fix it up a little bit at the end?

Senator DANFORTH, a fine Senator on the other side of the aisle who now says he will vote for this, has, in effect, said: I would not have voted for the deal if commerce had not become involved in January.

Well, has the deal really changed? Here I would like to quote Clyde Prestowitz, Jr., who probably has been quoted more on this transaction than any other American. He is a man of prestige, a man of knowledge on this subject matter. He is a senior associate at the Carnegie Endowment for International Peace in Washington and

author of "Trading Places, How We Allowed Japan To Take the Lead."

This is an article in the Tribune, May 5, just a few days ago. He says: "The new financial deal hardly differs from the original."

Let us start with this understanding. Even those who will hold their nose and vote for this deal admit it was a bum, bad deal before January.

Some are coming to us now and saying: They cleaned it up a little since January. Malarkey. They fiddled around the edges a little bit, moved a sentence here, a little comma here, put an exclamation point where there used to be a period. This is the same old deal, Mr. President, a bad, bad deal for America.

One of my friends who is going to be here in a minute, one of the leaders in this debate, the senior Senator from Kentucky, is going to read you an editorial from a Lexington newspaper that has a headline that says the "S" in FSX is for sucker.

Here is this deal. So the American taxpayers can know the deal, I want to tell them that we spent $7 billion of the American taxpayers' money. As my old friend, Senator Everett McKinley Dirksen, one of the great leaders in this institution who even has buildings named after him, said, "Even if you say that fast, it is a lot of money." Seven billion dollars of the American taxpayers' money we spent to build the finest fighting aircraft in the world. Not the second best, Mr. President. The winner. The best in the world.

In 50 hostile situations around the world Mr. President, 50 times our best fighting aircraft the F-16, has gone up against the best in the world, and do you know what the score is? Fifty kills, no losses for the best fighting aircraft in the world. That is what we have here. We spent $7 billion for the F-16. Now we are going to let Japan have it for about $400 million. For a little more than $400 million, we are going to let them have it.

My arithmetic is not real good, but already I do not like this deal on the math of it. I see taxpayers in the balcony. I will bet none of them like the deal much either.

Supporters of this agreement say, "Do not worry; we are going to get something in return from the Japanese for this." I said, "What? Tell me about it? What are we going to get?" "Oh," they said, "we're going to get two good things." You will love this. We are going to get composite wing technology. That is one. Then we are going to get advanced radar technology. That is two. We are going to get those two things.

We asked the General Accounting Office to look into this. Let me tell you something. The people from Defense, including General Yates, said these folks are fair. That is his testimony, "They are fair. We agree with everything they said. We endorse it."

Well, what did they say? I went to a 1-hour briefing last Friday. I will tell you, there were other Senators there. There was Senator CONRAD BURNS from Montana from the other side of the aisle; Senator QUENTIN BURDICK, the senior Senator from North Dakota, who has served for many years here and is one of our most senior Members; Senator BRYAN of Nevada. This Senator was there. Here is what they said.

The GAO told me there are two technologies we would receive from the Japanese. One is composite wing technology. That is good, and it is further explained to all of us gathered at the briefing it won't require the use of bolts anymore, and the material from which it is made is lighter than what we have now and it will fly further and cheaper.

I said, "Well, now, are the Japanese better than us at that?" The fellow thought for a minute. "No, not as good." I said, "Wait a minute. Wait a minute, now. We are getting this technology from them, as part of the deal, but they are not as advanced in this field as us?" He said, "No, they're not." I said, "Well, I don't understand that." He said, "They are still working on it and they are real good at working on stuff." I said, "We are pretty good at working on stuff, too. Now you are telling me that their composite wing technology is not as good as ours. You, the General Accounting Office, tell me this. When I go on the floor of the U.S. Senate where my colleagues can see me, I am going to make this statement to America that they cannot make composite wing technology as good as ours." They said, "That is what we are telling you." I said, "All right, that is what I am going to tell America they are getting. We are selling them something which we spent $7 billion of the taxpayers' money for and we are getting back $400 million and with that get some composite wing technology, only it ain't as good as ours." He said, "That's the deal." I said, "Good."

When my folks back home hear about it, they will understand what kind of deal we are getting. I said, "Now, then, I guess it is the radar." I said, "It must be the radar. It has to be the radar where we get the good part of the deal." They said, "Well, no." I said, "How come?" They said, "Well, their radar is only as good as our 1983 radar." I said, "Wait a minute, this is 1989. We're getting their 1983 radar which ain't as good as our 1989 radar? They are 6 years behind us?" They said yes. I said, "I'm going to tell them that on the floor of the Senate, too."

So that is the original deal. Is that not a honey of a deal? I say the Lexington newspaper is right, the S in FSX is sucker. That is what it is for, sucker. Old Uncle Sugardaddy got took.

Some say, "Well, that's true, but look, if we don't do this with them, they may go somewhere else." The first thing I say in response is we should have sold them the F-16 off the shelf, 130 to 170 of them. They can buy those for $30 million apiece less—I hope people back home are listening—for $30 million apiece less than this deal. That is what they can buy them for. If they want good defense from the best fighting aircraft in the world that took on the whole world and is 50 to 0 in hostile situations, they can have it for $30 million apiece less. That is No. 1.

Some say, "Well, they don't want to do it that way. If we do not do this deal with them, they're going to go into their own aircraft business." I say, "Fine, let them." They built the F-1. If they want to, they can take all the time they want to take to go into the airplane business. Let me tell you something, this is a free country and most of the places in the world, thank God, are free. If they want to build an airplane, let them build an airplane. I am for competition, but I am not for giving them everything that we have to help them get competitive. It makes about as much sense as saying in a football game, "Looks like they'll beat us anyhow, why don't we just give them our plays right now to see if it will help any?" I do not understand how that type of thinking is allowed to be the framework of our negotiations.

Some say, "Well, Senator, notwithstanding all you have said, they are our great ally, and we owe them." I heard one Senator say that.

Yes, they are our ally and they are our friends. But I want to say this to an ally and a friend: "Hey, pal, we had a $54 billion deficit with you in trade last year. Buying these airplanes would help a whole lot. Hey, pal, when you talk about buying an airplane or an engine or a platform from the British or the French, remember this: 'Are they the ones keeping the Persian Gulf open for you so you can burn that oil and are they the ones protecting your island for you and are they the ones who are essentially your best friend in Asia?' "

Friendship, Mr. President, requires sharing, and I want to know when we get our share.

The other day my office brought me something about an inch thick. This is not it, Mr. President. I do not want to misrepresent this as demonstrative evidence, but they brought me something about an inch thick. I said, "What's that?" They said, "That's the super 301 violations by the Japanese." Inside the document was a listing of all the places and all the products and

all the goods being dumped into our country at disadvantageous price levels hurting American workers and American business.

Is that the action of a friend?

Now, let us say another thing about allies. I want my friends in the Senate to understand this as well. In this memorandum of understanding with Mitsubishi, from which the Japanese Government and Mitsubishi will do the work on the FSX with General Dynamics, Mitsubishi is, of course, allowed to do a lot of subcontracting and other things with other Japanese companies. I think it is very clear, that they can do things with Toshiba. That is not barred by the memorandum of understanding.

Toshiba, which sold the secret submarine technology to the Soviet Union, an act which will cost the American taxpayers about $30 billion and which puts every man and woman in American uniform at risk on all the seas of the world.

Let me say this further. On the basis of everything I know and understand—and let me cite the Detroit News story which suggested that Mitsubishi was involved in the manufacture of canisters for poison nerve gas in Libya which could be used against our allies and our friends in the Mideast, there are significant security issues involved in this deal.

Mr. President, at this point in time I would like to introduce into the RECORD an article from the Detroit News by John E. Peterson of the Washington News Bureau of that newspaper that outlines the story of the involvement of Mitsubishi with other Japanese companies in connection with the Libyan gas plant. May I have consent to put that in the RECORD?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JAPANESE FIRM TIED TO LIBYA GAS PLANT

(By John E. Peterson)

WASHINGTON.—Japan's leading aerospace firm has installed equipment that enables Libya to make poison gas bombs at a chemical complex in the desert south of Tripoli, Defense Department and congressional sources have told The Detroit News.

Sources said the CIA, in a closed-door briefing last Wednesday for the Senate Foreign Relations Committee, revealed that Mitsubishi Heavy Industries has a team of about 50 technicians and engineers at the complex. The sources spoke on condition they not be identified.

The Japanese technical experts installed metal-machining equipment used to make bomb canisters that contain the poison gases, the sources said, and the CIA contends the equipment has enabled Libya to stockpile hundreds of poison gas bombs.

Calls for comment to Mitsubishi Heavy Industries representatives in the United States were referred to Tokyo officials, who could not be reached Tuesday. The CIA also told the committee that Intek, a West German company, sold air-to-air refueling equipment to Libya and trained more than three-dozen Libyan fight crews to use it. The equipment and training could for the first time allow Libyan bombers to fly round-trip to Israel.

The CIA and other Western intelligence agencies fear the Libyan gas bombs and refueling capacity endanger Israel to such a degree that the balance of power in the Middle East could be altered.

Senators on the Foreign Relations subcommittee declined to comment, saying the briefings were intended to be secret. However, several indicated privately that there could be political repercussions.

Mitsubishi Heavy Industries' involvement in Libyan gas bomb production may spur moves to block a plan for General Dynamics to provide the company with designs to build an advanced "FSX" fighter plane modeled on U.S. F-16 fighters.

The joint venture was negotiated by the Pentagon last year and is under review by the Bush administration.

The Detroit News reported in September that another Japanese company, Japan Steel Works, erected the building that houses the production line for poison gas canisters. Japan Steel Works initially denied the story, then admitted it built the plant, but said it was intended to remove salt from salt water.

The CIA is skeptical of that claim; the plant is near Rabta, about 65 miles southwest of Tripoli and about 70 miles from the Gulf of Sidra, the nearest body of salt water.

The CIA reports indicate that Mitsubishi Heavy Industries is working inside the plant built by Japan Steel Works.

Mitsubishi Heavy Industries is one of several large Japanese companies that use the Mitsubishi name. While they cooperate, share heritage and exchange technology, they legally are independent of one another.

The bomb plant reports have implicated two other Japanese firms. Sources said the CIA disclosed that Mitsubishi Heavy Industries' involvement in the project was arranged by Mitsubishi Shoji, the world's largest trading company, and C. Itoh.

C. Itoh is the trading company that arranged the sale of silent submarine technology from Toshiba Machine Co. to the Soviets. And Toshiba Electric Company, another subsidiary of Toshiba Corp., recently admitted supplying electrical equipment to the Libyan plant as a subcontractor for Japan Steel Works.

Is the plant built by Japan Steel Works, Mitsubishi technicians are overseeing production lines for the poison gas canisters, sources said.

The plant is next to a large chemical production facility that was completed in the mid-1980s. Libya claims the chemical plant makes pharmaceuticals and pesticides; U.S. officials have charged that poison gas is produced there.

The first plant in the complex, to make poisons, was built largely by West German firms. When German involvement was revealed last fall, a resulting scandal shook the foundation of Helmut Kohl's ruling party.

Libyan officials, fearing that the U.S. or Israelis might bomb the complex, have surrounded it with families in tents.

In a public session before the private briefing last week, CIA Director William Webster said the Libyans are producing mustard and nerve gases. Nerve gas causes death in minutes by attacking the brain and central nervous system. Mustard gas, used in World War I trench warfare, blisters the skin and lungs, causing serious injury or death.

In the private briefing, sources said, the CIA said Mitsubishi Heavy Industries has set up two production lines for poison gas canisters and that Libya is preparing to install a third line to produce guided missiles. The CIA indicated the missile production contract might go to a Southeast Asian firm, sources said.

In the public session, Webster discussed Libya's new refueling capability. Asked to comment on a map of the Middle East that showed the expanded list of targets Libyan bombers could strike with the new refueling capability, Webster said:

"I think you have illustrated one of the really strategic changes that this kind of weaponry can have. It moves it off the battlefield and puts it into the cities and strategic areas of the whole region."

Webster also was asked to comment on reports that members of the West German air force were involved in the refueling project, during or after their period of service. "I would prefer to discuss it this afternoon (in closed session)," he replied, "but you're right on target."

The CIA director also deferred until the closed session a question by Sen. Jesse Helms, R-N.C., the committee's ranking GOP member, about Mitsubishi Heavy Industries involvement.

Helms' aide William Triplett said the senator likely will introduce legislation seeking sanctions against Japanese firms involved in the gas canister plant.

"This upsets the balance of power and jeopardizes Israel's security," he said.

Sen. Claiborne Pell, D.—R.I., chairman of the Foreign Relations Committee, declined to discuss the closed-door briefing. But aide Frank Sieverts said, "He's very concerned about the whole subject of technology. . . . He's already introduced a bill that would levy a variety of tough sanctions against countries and companies that transfer chemical or biological materials and technology" to unfriendly nations.

Another committee member, Sen. Paul Simon, D.—Ill., said he was unaware of Mitsubishi's involvement with the nerve gas plant, but added, "If they are involved, I think we should protest to the Japanese government in the strongest possible terms."

Simon said, "I had heard that the Japanese were involved in constructing an extension to the (nerve gas) plant, but that's different. I was even a bit taken aback by that." Simon said he attended the public portion of last Wednesday's meeting of the committee, but that he was not present for the private session.

He also said that if Mitsubishi Heavy Industries is involved in the Libyan plant, "I would think we would have to review any involvement with that company" in the F8X airplane agreement.

The Bush administration began a review of the agreement in mid-February to see if the transfer of aerospace technology would hurt U.S. competitiveness. Bush reportedly was not to approve the agreement by Friday.

One Senate expert said the technology transfer involved in the fighter project "would move Japan's aerospace industry up an express elevator from the ground floor to the penthouse overnight."

"You're talking about giving them secrets that only the U.S. has at this time," he said.

Mitsubishi Heavy Industries' participation in the production of nerve gas delivery systems for Libya raises the question of whether shared technology could compromise U.S. security if Japanese firms are willing to sell it to nations unfriendly to the United States.

Mr. DIXON. In short: There is a nerve gas plant in Libya. Next to the nerve gas plant as a supporting manufacturing system is sort of a metal fabrication plant. Do not hold me to the precise description because, again, I tell you that these are not my areas of expertise, but the metal plant, which is next door to the poison gas plant where the canisters, shells, and bombs are made for this insidious, deathly nerve gas was in large part developed by Japanese concerns, with some involvement by Mitsubishi.

I would also like to put in the RECORD, Mr. President, the statement by Clyde Prestowitz, Jr., "The New FSX Deal Hardly Differs From the Original."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, May 5, 1989]

THE NEW FSX DEAL HARDLY DIFFERS FROM THE ORIGINAL

(By Clyde V. Prestowitz, Jr.)

The FSX mountain has labored and brought forth a mouse. For several months the Bush administration appeared to be raising the priority of defense of U.S. technologies leadership in the deal with Japan to codevelop its next generation fighter as a derivative of the U.S. F-16. Yet the administration now seems to have settled for little more than the original deal of last December.

Under the agreement, the United States was to turn over to Japan F-16 technology—developed at the cost of $3 billion to $5 billion—in return for 40 percent of the development work on four FSX prototypes ($460 million), a vague expression of "best effort" to achieve a similar U.S. workshare on the eventual 130-plane production run, and an equally vague promise of access to undefined Japanese technology. Flowback to the U.S. of Japanese technology "essentially" derived from U.S. technology was to be free of charge, while indigenously developed Japanese technology would be available for a royalty.

Critics pointed out that the wildly unbalanced nature of this deal (similar to others the U.S. had come to regret) probably would accelerate Japan's drive toward world-class aircraft manufacturing status and narrow the U.S. lead in its last industrial stronghold.

In response, President Bush ordered a review and then asked Japan to agree to certain improvements in the deal. Specifically, the President demanded: (1) revision of the basic memorandum of understanding to obtain clear assurances of a 40 percent U.S. production workshare; (2) restriction on the transfer of key software source codes for the plane's computers; and (3) a clearer definition of the term "essentially" derived from U.S. technology with regard to the flowback of technology to the U.S.

When made in February, the President's demands amounted to a denial of the assertion by the Pentagon and State Department, as well as by former Secretaries of Defense Frank Carlucci and Caspar Weinberger, that the deal as originally negotiated was the best one possible. In particular, the President obviously questioned their insistence that the United States "had every reason to expect that it would receive 40 percent of the eventual production work."

He had good cause. Bitter experience had taught that the words "best effort" in this kind of deal really mean "it will never happen." Experience with the F-15 and others also indicated a U.S. readiness to transfer increasing increments of technology for very little or nothing in return.

Nothing confirmed the wisdom of the President's course and confounded the partisans of the original deal more than the Japanese response. Three months of haggling ensued. Where the Pentagon had earlier insisted that the U.S. "had every reason to expect" a 40 percent production workshare, the Japanese proposed 28 percent, then inched up to 32-35 percent.

The stakes in this game were the engines. At a 40 percent U.S. workshare, if the Japanese were to keep the avionics and other sophisticated work in Japan, the U.S. would have to get most of the engines that contained new and important technology in which the U.S. has a substantial lead.

Similar haggling occurred over technology transfer issues. For most of that time the administration held firm for the President's demands with, amazingly, the State Department taking the lead as the tough guy.

Then, suddenly, it all fell apart. Shortly after Prime Minister Noboru Takeshita's resignation statement, an agreement on the FSX was announced. Under it, the U.S. is to get "approximately" 40 percent of the production workshare. Mention of restriction on transfer of source codes was made, but it is agreed that the U.S. will transfer all codes necessary to realization of the FSX project's objectives.

The terms of the U.S. access to possible Japanese technology were somewhat clarified, and the U.S. agreed that it would not preclude the possibility of Japanese production of the engine. Moreover, these changes were contained in an exchange of letters rather than in the memorandum of understanding itself as the President had requested.

One can only wonder what all the fuss was about. This is essentially the same deal as that announced in January. What is "approximately" 40 percent. Is at 20 percent or 35 percent? Certainly it is not 45 percent. Any suggested restrictions on source code transfer are meaningless as long as they are qualified by the need to "reach project objectives." In time, "reaching objectives" will result in virtually total transfer.

Why did the U.S. back down? One can only speculate, but it appears to be a reassertion of the traditional primacy of defense over economic consideration in U.S. diplomacy. With Takeshita on the skids, the U.S. became concerned that a new prime minister could not agree to any deal on the FSX. Concerned that Japan would not have an adequate fighter in the 21st Century, the U.S. appears to have pressed for a quick deal with Takeshita was still around to do it, proving once again that, between the U.S. and Japan, nothing ever changes.

Mr. DIXON. Mr. President, let me interrupt myself for one moment in order that I may ask unanimous consent that Randy Ferryman of my staff be allowed on the floor during the debate on this resolution.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. DIXON. Mr. President, you heard me tell the story about what we are getting from the Japanese in return with respect to the composite wing technology and with respect to the radar technology. That has been substantiated in a full hour discussion with the General Accounting Office in a separate meeting on Friday a week ago and it has been substantiated again in a subcommittee of the Armed Services Committee meeting the other day, but just to make the record eminently clear I hold in my hand, Mr. President, a letter from the U.S. General Accounting Office, Washington, DC, National Security and International Affairs Division dated May 8, 1989, addressed to this Senator. I want to read a sentence. In time I may read the whole letter, but I want to put the whole letter in the RECORD now but read this sentence. "Our preliminary observations are that, overall, the United States has superior"—superior—"composites technology and appears to be ahead in the radar development."

On composite technology and radar development, the United States of America is superior to the country with which we want to do business. Japan would be giving us technology in which the GAO says we are superior.

I ask unanimous consent that this letter from the General Accounting Office be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAY 8, 1989.

Hon. ALAN J. DIXON,
U.S. Senate.

DEAR SENATOR DIXON: On January 30, 1989, you requested that we review various aspects of the proposed FS-X support fighter codevelopment program between the U.S. government and the government of Japan. As arranged with your office, we are furnishing the information we have obtained to date on two Japanese technologies that will be available to the United States under the program. These technologies, which relate to composites and the active phased array radar, are discussed in detail in enclosures I and II.

In October 1987, the government of Japan decided to develop the FS-X support fighter using the General Dynamics F-16 C/D as the baseline aircraft. In November 1988, the Department of Defense (DOD) and the Japan Defense Agency signed the Memorandum of Understanding for the cooperative development of the aircraft. In January 1989, Mitsubishi Heavy Industries, the Japanese prime contractor, and General Dynamics, the U.S. manufacturer of the F-16 signed a Licensing and Technical Assistance Agreement.

According to DOD, the FS-X program was not pursued with the primary objective of obtaining access to Japanese technology or balancing the exchange of technology.

Other strategic and national priorities dominated. However, once Japan agreed in principle to codevelop the FS-X and a negotiating position was developed, the United States stressed the importance of obtaining access to the new aircraft's technologies. DOD officials have emphasized the potential value of these technologies in a general sense and are impressed with Japan's overall manufacturing capabilities, particularly its cost-effective electronics production.

Our preliminary observations are that, overall, the United States has superior composites technology and appears to be ahead in the radar development. Our view has to be qualified because there are many unknowns about these Japanese technologies and the United States still has limited information from which to make meaningful comparisons.

In doing our work, we obtained information from various U.S. government and industry sources. We reviewed program files and had extensive discussions with DOD program and technical officials. We met with structural, design, and avionics engineers at the Air Force's Wright Research Development Center, Dayton, Ohio. We also met with industry representatives from Hughes, Westinghouse, Texas Instruments, McDonnell Aircraft, and General Dynamics to assess U.S. capabilities and obtain information, to the extent available, about Japanese capabilities. Because our review was underway at the time of the renewed negotiations between the two governments to clarify certain aspects of the program, we did not visit Japan.

We are continuing our efforts to fully respond to your request and hope this information will assist you in your deliberations.

Sincerely,

FRANK C. CONAHAN,
Assistant Comptroller General.

Mr. DIXON. Mr. President, I called John Peterson, the reporter for the Detroit News, who wrote the article that you have admitted into the RECORD. I asked if there had been any administration denial of the story.

The State Department accepted Mitsubishi's denial but Peterson's CIA sources told Peterson that his article is absolutely accurate.

I have checked before I made these statements on the floor, not to reveal anything that is classified but to make sure that what I say is accurate and unclassified.

Mr. President, shortly, others will be here to engage in this discussion with this Senator. But I want to say a few things in the meantime.

In the hearing held by my distinguished friend, Senator BINGAMAN—a very fine Senator and very, very informed in this field, and a man for whom I have infinitely high regard—some of the folks who were witnesses for the Government were anxious to try to make it appear that giving some military aircraft technology to a country does not necessarily mean they are going to end up having an advantage in commercial aviation.

Dr. Robert Barthelemy, the U.S. National Aerospace Plane Program Director, recently addressed a group of Senate staffers at an NASP—everything has an initial around here, you know, Mr. President; those are initials for National Aerospace Program, NASP—at an NASP luncheon on April 20, 1989, less than a month ago. During his remarks, Dr. Barthelemy referred to his October 1988 trip to Japan. The purpose of his trip was to assess the pace and goals of the Japanese aerospace industry. Here is what he says: Essentially the Japanese informed him that they "plan to excel in the aerospace industry." When asked how, since the Japanese have neither an aviation history nor the background technology in this field, the Japanese, responded that they "have a long-term commitment."

Remember that terminology. They have long-term commitments on these things. And they do not believe that the United States shares this philosophy. That is sad, Mr. President. They are right, are they not? What a shame. One of the things that they have done in the last several generations over the last several decades is beat us in a lot of fields because they have a long-term commitment, and we do not have one.

Dr. Barthelemy also explained how the Japanese Government is committed to spending $16 billion to achieve their goal to become advanced in this field—$16 billion they are going to advocate spending in that country in their long-term commitment to get this job done.

Here is a statement in the Japan Economic Journal, January 21, 1989, by Yotaro Iida, the President of MHI:

The technology we will develop and accumulate during the [FSX] project will be instrumental in the development of next-generation planes such as hypersonic and supersonic transports.

That, you may rest assured, is the plan of our friends in Japan in connection with this deal.

I see a colleague here who may be prepared to make some remarks. I will have plenty more to say on this subject. Let me offer another quotation from John R. Harbison, vice president, Booz, Allen and Hamilton, Inc. He says:

The Japanese are not trying to develop a plane; they are trying to develop an industry. Why else would they pay two times more for this plane than for some aircraft they can buy off the shelf? This plane will not give them two times the performance.

Oh, how true. How true, Mr. President.

A lot of people in the balcony may not know who this Senator is, but I will bet everybody in the balcony knows who Mr. Iacocca is. Everybody in the country does. They know who Jane Pauley is too. I want to quote from the "Today Show," January of this year. Jane Pauley interviewed Lee Iacocca and said to him, "As I understand it, the Japanese have targeted certain industries for development over the past few decades."

Remember about my talking about long-term commitment, Mr. President? She then went on and said, "The fifties were cameras."

I can remember that. I hate to admit that, but I can remember that.

"The sixties were videos."

I can remember that.

"The seventies were autos."

Oh, boy, they really worked us over good on that one.

"And the eighties were microchips. What's next?"

Iacocca says, "Aircraft." Aircraft, Mr. President—aircraft. That is what is next.

And here in the next several days, the Senate of the United States will find out whether it gives that to them on a platter, or whether we say, "Oh, go make it yourself, you want to so much. Go make it yourself."

I am not going to give it to them, not with this Senator's vote.

If I were to be so fortunate to be on this floor 9 or 10 years from now, I am prepared to say, Mr. President, without any doubt whatsoever, that if this administration gets its way and moves forward with this FSX deal, they will dominate in commercial aviation and aerospace within the decade of the nineties. And I will be here to say we gave it to them.

Oh, what a tragedy for America, Mr. President. What a tragedy for America.

I yield the floor.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senator from North Carolina [Mr. HELMS].

Mr. HELMS. Mr. President, I thank you very much.

We have a situation that is like an anomaly. I do not know who is managing each side. Senator PELL, the distinguished chairman of the Foreign Relations Committee, voted against the resolution of disapproval this morning. I am the ranking member. I voted for the resolution of disapproval. The resolution of disapproval was defeated by a one-vote margin, nine to eight, with two Senators courageously not being present to vote.

Second, I am not sure how the time will be yielded, even though there is no time agreement. I understand that. But I want to make it clear that I am not representing any Republican other than myself. There are some who agree with me, and there are some who do not. I expect the same situation exists on the other side.

So maybe this is somewhat of a free-for-all, and it may go on a little while, maybe until next week.

Now, let me propound two or three parliamentary inquiries just to set the record straight. First of all, there is no time agreement—that is correct, is it not, Mr. President?

The PRESIDING OFFICER. The Senator is correct. There is no time agreement.

Mr. HELMS. Second, I ask the Chair if the resolution of disapproval, which came to the floor with an unfavorable report, and which is now pending, is amendable?

The PRESIDING OFFICER. Senator, the resolution is fully amendable.

Mr. HELMS. I thank the Chair.

Now, then, let me pay my respects to my distinguished friend from Illinois. I have been sitting here patting my foot as he spoke. As he well knows, I am a cosponsor of this resolution of disapproval and am honored to be one. I support him in all that he has done and said. Yesterday we had a hearing before the Foreign Relations Committee. We had the distinguished Secretary of Commerce, Mr. Mosbacher, the distinguished Secretary of Defense, Mr. Cheney, and the No. 2 man in the State Department, Mr. Larry Eagleburger. They did the best they could with what they had, but it was not quite good enough. They were giving answers to simple questions. I was reminded of something I learned back in high school—now, get ready—"when promulgating your esoteric cogitations or articulating your superficial sentimentalities, beware of platitudinous ponderosities."

[Laughter in the Chamber.]

Mr. DIXON. You will clarify that for the record, will you not, Senator?

Mr. HELMS. That is the kind of gobbledygook we got. The distinguished Secretary of Defense read me a whole list of advantages we were going to get from this deal. As I clicked them off in my mind, and he was going rapidly, I did not hear one that we did not already have, none.

The distinguished Senator from Illinois said that the "S" in FSX stands for sucker. It could stand for simpleton. Take your choice. I just do not understand how we arrived at such a deal. I have said so from the very beginning. As the Senator from Illinois has pointed out, the Department of Commerce was left entirely out of the loop until the bottom half of the ninth inning, and then the other agencies said, "OK, boys, come on in. But just be good boys, because we are going to tell you what to do." And dutifully, they came along.

I wish I could discuss in the Senate, for the Senate, some classified information. I cannot discuss it, but a lot needs to be studied and considered about what goes on with respect to the Japanese consuming obsession to make a buck, or a yen, or billions of them. I want to know more about what the Japanese did with respect to that poison gas plant over in Libya. Oh, yes, we are told they are great allies, but I want to see some evidence of it. I like them fine. I have been to Tokyo, like everybody else. I think very highly of their leaders. I think we all do. But the fact remains that for a country such as the United States, which was subjected to a great deal of torment, beginning on December 7, 1941, and which finally won that war and then rebuilt that country, I do not see a lot of gratitude.

I am like the Senator from Illinois; I want to see something. In North Carolina they talk about people "eating our lunch for us." The people from North Carolina, like the people of Illinois, understand when our country is "being had," as the expression goes.

So here we are on the floor of the Senate on a Thursday afternoon, 5 minutes to 3; and we are going to be called upon, I suppose next Monday or Tuesday, to decide what the United States is going to do in terms of U.S. participation in the FSX. But indirectly, as the Senator from Illinois has eloquently emphasized, we are also going to be deciding whether we will help create another new, dominant industry for the Japanese, to wit: the aerospace industry.

Now, the decision on FSX is really just one part of a larger decision about the survival of the United States as the world's preeminent economic and military power. We already know about the diminution of that. A lot of it is our fault; I acknowledge that, but the stakes are critical. It seems to me that the proponents of FSX must meet an extremely high standard of proof in what they say. Blandishments will not do. Lobbying among Senators will not do. But the proponents, Mr. President, simply cannot meet an extremely high standard of proof for one simple reason: the FSX is a bad deal for America. It was a bad deal when it was signed last November. It is a bad deal today—in spite of the fact that under pressure from congressional opponents of the program, the administration did close a few of the loopholes in the recent negotiations with Japan, but they did not close enough.

Let me tell you why the FSX, in my judgment, is a bad deal. The United States not only believes in, but practices, free trade. Japan says that Japan believes in free trade, but it practices what you might call "mercantilism." That is a pretty fancy word, but it means that Japan closes its markets and refused to buy our highly competitive products, including fighter planes. In short, the Japanese are protectionists of the first order.

Do you want a good example of Japanese protectionism? I cannot think of a better one than their refusal to buy the world's best, the world's least expensive fighter aircraft, the F-16 Fighting Falcon. Instead, the Japanese are going to reinvent the wheel, as they have, using so much of U.S. technology, so much of American know-how. They are going to build their own plane, and the Illinois Senator was exactly right when he said, "Why, if they were not concentrating on building their industry at our expense, they would be good businessmen and buy the cheaper, better aircraft from us, which is available to them."

Now, what about common defense? The Senator from Illinois also touched on that. Does FSX provide for better common defense? No, sir, it does not. You see, the Soviets had a big buildup of their Far Eastern forces in the early and mid-1980's.

How did the Japanese respond to that? Zilch. They did not respond. If the FSX development goes perfectly, and nothing in this kind of business goes perfectly, but let us assume for the sake of discussion that this development should move ahead without any hitch whatsoever, the first FSX will be ready to defend the Japanese and United States forces when? In 1997. That is about 15 years after the Soviet buildup began. Now who is and who has been paying for the defense of Japan during all that time? You have it right. Uncle Sucker, the good old American taxpayer. But I am here to tell you, Mr. President, that the people out across America, if I judge from the deluge of mail and telegrams and telephone calls coming into my office, the people of America may not understand all the nuances, but they know when they are being had.

And they do not like it.

They have a gut understanding and I think it is an absolutely correct gut instinct that this is not good for our country and they are opposed to it. I have not seen any polls on it. I do not suppose there have been any polls.

But what about after 1997, under the ideal circumstances that I just described, when the FSX is introduced—will the FSX be such an advanced fighter that it is worth the risk the Japanese are forcing us to take today with our common security? Again the answer is no, not at all. As Senator DIXON said, the FSX will be no better than the then-current version of the F-16. So the alliance really does not gain one bit of military advantage once the FSX comes on line.

Mr. President, parenthetically, let me say that I have on the minority staff of the Foreign Relations Committee a fine young man who is about as knowledgeable as anybody in the country on this question. His name is Kevin Kearns. He is Pearson Fellow assigned to the staff of the Committee on Foreign Relations out of the Department of State. And there is a precedent for the unanimous consent that I am about to make and I do make it: I ask unanimous consent that Mr. Kearns may be present on the floor to provide such information and counsel as may be needed, today and during the pendency of this matter,

and on rollcall votes pertaining thereto.

The PRESIDING OFFICER (Mr. WIRTH). Is there objection?

Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Senator DIXON has addressed the cost of the FSX and without being too repetitive let me say a few words about that just to emphasize what I regard as the total accuracy of what the Senator said.

Japan spends about $35 billion a year on defense. The United States spends $285 billion a year, 9 times the amount the Japanese spend.

And maybe it is a foolish hope, but I would hope that the Japanese would spend their small defense resources carefully. Unfortunately they do not. There comes that obsession with taking over yet another industry, in this instance the aerospace industry, because instead of buying 130 F-16's from the United States for about $3 billion they are going to spend three times that much money to develop the same number of FSX aircraft.

The Senator is right. He asked the Chair why; why? And that is a rhetorical question because the Senator knows the answer, the Chair knows the answer, and this Senator knows the answer. They are investing in the development of a new industry which will dominate the world market, pure and simple. That is what it is.

So the question comes down to this, I suppose. Is there really anything in the FSX program for the United States?

The proponents claim, and they claimed yesterday, and they are good men—I like them all, all of them, Mr. Cheney, Mr. Mosbacher, Mr. Eagleburger—and they were sent up here to do a selling job, and maybe they succeeded, maybe they did not. We will see when the vote is taken on this question.

But the proponents claim that there is access to advanced Japanese technology. Yesterday I asked them for an example: What technology? I was read a list of things but I didn't get much of an answer, just a lot of fast talk, a lot of syllables. But the point is, Mr. President, in a General Accounting Office study that I requested, along with other Senators, the GAO has found that the claim of advanced technology is a false claim. There is no advanced Japanese technology in the two areas our Department of Defense is interested in: The phased area radar and the cocured composite wing. The fact is that at this point, unless and until we give it away, the United States is far ahead in these areas, thanks to the U.S. companies that have spent a lot of money on R&D.

So I will raise anew the question that Senator DIXON raised. What is the FSX deal really all about? I can tell you what it is not about. It is not about the common defense, or Japan would be hastily buying F-16's today in order to meet this current Soviet threat. It is not about saving scarce defense resources, or Japan would be buying United States aircraft instead of spending billions of extra dollars on the FSX.

No. What the FSX is really about for the Japanese is meeting their stated national goal of having a full-fledged aircraft industry with which to challenge the United States in the next century. Maybe I will not be around then. I hope I am. But the Senate by design of the Constitution is supposed to consider such matters carefully in an unhurried atmosphere. In other words, do it right the first time.

But the haste which has been pushed upon the Senate, as if this is something that is going to cause the world to fall apart tomorrow night at 11:57, is unseemly. There was very little debate in the Foreign Relations Committee and we heard the administration witnesses yesterday and that was it. Bang, bang, bang—we vote on it today.

The FSX is part of a sophisticated Japanese national effort to develop a viable aircraft industry that they intend to become preeminent. No other face can be put upon it.

The FSX will be the laboratory and the training ground from which will spring the design, the production, the avionics and other engineering teams necessary for the Japanese civilian aircraft industry. It we cannot see that, then we need to go to the eye doctor. If they want an aircraft industry to try to compete with us that is fine. I do not blame them for that. But we should not, at great sacrifice to ourselves, help them in their process.

I do not think we ought to give them one bit of technology that will further that goal. The very existence of the FSX Program provides a kind of university in which Japanese engineers will learn the systems integration skills necessary to compete with us not only in military aircraft but commercial aircraft, as well. And that is where the body is buried.

So I think it is time that the Senate pull upon the reins a little bit, think about this. All of us want to be helpful to the administration and certainly I want to be helpful to the administration when I can. But there was scarcely an input, as I understand it, from either side of the Hill. It was not requested.

And I have told this administration, as I have told others, that if you expect me to be in on the crash landing, let me be in on the takeoff as well. But this one is going to crash. We may not see it this year or next year, but down the road it will crash in terms of what it does to America.

This debate is about our national future. And I say again, Mr. President, that the FSX is a bad deal for America and I intend to vote against the U.S. participation in this program and I certainly hope Senators, after due consideration, will do the same.

Now, let us play a little bit of a game about fact versus fiction. True or false. That is fair enough in any debate. We can engage in all the rhetorical exercises that we want, but when push comes to shove, we ought to make our determination on fact, not because we like the President of the United States—and I do—not because we want to go along with any reasonable proposition—and I do.

But let us look at a few of the facts and the fictions. There is the fiction, for example, that the FSX is no big deal because the F-16 already has been coproduced in eight other countries since 1979. It is illogical to prevent allies such as Japan from having the same privileges.

Do you know who said that? Frank Carlucci, former Secretary of Defense. That was published in the Washington Post on February 9 of this year.

Well, what is the fact? Yes, the F-16 has been coproduced in other countries. However, the United States-Japan agreement is for codevelopment. And there is a difference, an important distinction. Codevelopment and coproduction are two totally different things. Coproduction involves assembling prebuilt parts, but codevelopment involves research and testing and development. And while the United States is looking for partners in other codevelopment projects for the future, the United States has no plans whatsoever to buy any FSX's.

Mr. DIXON. Will my friend yield at that point?

Mr. HELMS. Yes, I am delighted to yield to my friend.

Mr. DIXON. I just want to say to my friend, as he goes through this, he is making a tremendous contribution to the understanding of the separate 100 Senators about this thing, because in fairness to all of us, we are busy in a lot of things. I noticed in both hearings I have attended that people do not understand the distinction that my colleague from North Carolina has just drawn. We have all kinds of coproduction deals. Japan does a coproduction on the F-15E with McDonnell Douglas right across the river from where this Senator lives in Belleville, IL, out in St. Louis. We do a lot of that.

The only time anybody ever wanted to do a codevelopment with us on an airplane was the Israelis and I would argue that they are great friends. And in the end, we jawboned them out of it.

Now that is accurate. My friend is accurate. This is the first attempt to

go to a codevelopment where they get the research and testing and other things. That is a quantum difference.

My friend is pointing out something so important to my colleagues when he makes this distinction. People on the committee the other day, I noticed, did not understand that distinction. I do not mean that to make fun of them because, before I got into this, this Senator did not understand the distinction, but it is a terribly important distinction. I thank the Senator for that contribution to the understanding of every Senator to the distinction between what we are doing here and what we have done in the past.

Mr. HELMS. I thank the Senator. And, as Senator Dixon has said, all of us have many committee assignments. We have many meetings to go to, many important issues to consider, which is a strong argument for not hastily rushing into something. And I fear that we have rushed into this without due consideration.

But I thank the Senator. He knows how much I admire him.

Frank Carlucci, again, in the Washington Post of February 9, said, "The F-16 technology is old 1970's technology." Well, the fact is that this agreement calls for the United States to send F-16C block 40 technology, the most up-to-date technology on the plane. And this technology is 1980's technology.

While the Japanese continue to insist our technology is old, they are also insisting upon receiving the source codes that control the F-16's computers. And besides, Mr. President, any technology that a country does not have is new technology.

Japan does not have it. They want it. We have it.

Fiction: Again, Frank Carlucci writing in the Washington Post on February 9, this year. He said, "There are no commercial applications for this technology."

Now, I like Frank Carlucci, but I say to him in response to that: Bullfeathers. When Mitsubishi Heavy Industries, the prime FSX contractor, completed a production line of F-15's, they began using many of the same technologies on the production of their own MU-300 Diamond commercial jet. And the reference on that is the Congressional Quarterly Weekly Report, March 11 of this year.

So the point is this: By giving the Japanese this technology, they are able to gain experience in producing their own plane.

Fiction: This from Time magazine, March 27, this year. "If the United States does not complete this agreement, we will not have access to any new technological developments that the Japanese have developed."

Again, bullfeathers, because the fact is there are provisions in the 1983 Exchange of Notes between Japan and the United states that would allow for United States access.

Furthermore, there are no indications whatsoever that the Japanese even have this technology. Those who have looked at what the Japanese do have, including the General Accounting Office of our Government and the CIA, have concluded that this new technology does not exist.

Ted Reinhard, the chief Air Force materials engineer at Wright Patterson Air Force Base, has said, "They"—meaning the Japanese—"don't have anything that we would really need. I don't see why we are going to trade technology for a technology that we can't use."

The Wall Street Journal is a publication which I admire. A good friend of mine, I would say to my friend from Illinois, is Vermont Royster. He is the editor emeritus of the Wall Street Journal, now retired, and living in Chapel Hill, NC.

But the Wall Street Journal fell for this line. On February 24 the Wall Street Journal said, "Proponents of scrapping the FSX deal are protectionists." Well, the true protectionists in this case are the Japanese.

Under the principles of free trade, a nation should purchase a plane which has the lowest cost. As the Senator from Illinois has pointed out, the FSX is approximately $20 million per copy more expensive than a F-16 purchased off the shelf.

Well, then, they say if the FSX the agreement is rejected, the Japanese are likely to go it alone. This was said over and over again yesterday morning in the hearing before the Foreign Relations Committee.

Well, probably. They may try to go it alone. But you have to remember, Mr. President, that the Japanese have a very poor track record in military aviation. Japan's previous effort, the F-1, cannot be flown at night. It has a fatal blind spot. And the former Japan Defense Agency defense policy bureau director, Osamu Kaihara, has stated that Japan cannot do it—meaning develop the FSX—alone.

If the Japanese do push forward on FSX, it is highly doubtful that they will be able to bring the FSX in at the $1.2 billion projected cost. It is estimated that the total cost of the developmental stage will be at least 400 billion yen, not the 165 billion yen budgeted.

Well, let us go back to Time magazine again, from March 27, 1989. The magazine stated flatly, "If we do not aid the Japanese, they will turn to the Europeans." Again, that was said yesterday at the hearing by the three distinguished officials of the administration.

Well, I will say: Possible. But not probable. Because the Japanese have consistently stated that if the deal fails, if the deal falls through, they will develop the FSX themselves.

But the Japanese must also face the fact that it is doubtful that the Europeans would go forward with such a deal. The EFA has been delayed many, many times over the issue of who will build and develop what.

Then we hear, oh, the FSX will be a top-flight plane. The fact is that even proponents have admitted that the FSX will be unable to deal with the current top Soviet fighters, much less the next generation that is expected to be on line by the time the FSX is operational in the late 1990's. We are not talking about something that is going to be developed and produced in the next 18 months. No, sir, we are talking about a lot of years down the line. A Japanese military analyst, Kazuhisa Ogawa, has acknowledged that it will take 20 years to fix, as he put it, the R&D, research and development, system to the point necessary to produce a superior aircraft. That was in The Economist magazine, February 25, 1989.

Then, you hear over and over again the Japanese have not purchased United States aircraft off the shelf since 1955. That is not so. The Japanese have purchased both the E-2 Hawkeye, and the C-130 cargo plane, right off the shelf.

The Wall Street Journal, I believe it was about February 24, said flatly, "The Japanese purchases $1 billion in defense technology from the United States every year."

That figure is correct for this year. But the number is a one-time phenomenon based more on the purchase of Aegis technology than any longstanding trend. On average, the Japanese purchase about half that amount.

Mr. President, I do not want to hold the floor if any other Senator is ready to speak. But let me just quickly run down a few of the reasons why the revised FSX deal is still a bad deal for America.

Issue 1: Workshare. Both old and new agreements promise the United States 40 percent of the $1.2 billion development budget. That means that we are transferring $7 billion worth of F-16 technology for $480 million.

The old deal had only a very ambiguous guarantee of a U.S. share in production. And the new deal is only slightly better, if that. The new deal says we will get, "approximately 40 percent" of the production program if the program goes into production and if there is a new production agreement signed. So the figure 40 percent is there, but the Japanese could decide to cancel the program, in which case we get only a $50 million cancellation fee.

The Japanese could also decide to go ahead, but to drive a hard bargain on the production agreement. DOD

claims that since the Japanese will need our engine to go ahead with the plane, DOD will have all the leverage. Well, we will have to wait and see about the accuracy of that. Because the record is pretty clear about caving in to the Japanese to protect the security relationship.

Issue 2: Compensation. The 40 percent of the production share is estimated to be about $2 billion and this amount, plus the development share of $480 million equals about $2.5 billion. An outright buy would have been $3 billion. So the administration is arguing that there is little difference between the FSX program and a buy.

The answer is that in a buy the money would have come right up front in 2 or 3 years. The FSX program will last about 20 years and the money will be spread over the period. So the FSX money will have a lot less effect on our deficit with Japan.

Issue 3: Spare parts. In addition, neither the old or the new agreement has any provision for U.S. participation in spare parts. Over the life of the program, spares generally cost two to three times the value of the original buy or $6 to $9 billion in this case. So that amount of money has been totally neglected by the administration.

Issue 4: Technology. The new agreement says that all technology in the FSX program except four specified areas is defined a priori as U.S.-origin technology. It will flow back to us free of charge under the program. This is an improvement over the old agreement which was vague.

However, the four technologies defined as Japanese technologies are the radar, the inertial reference system, the mission computer hardware and the electronic countermeasures. We must formally request these items under the 1985 technology transfer agreement and pay for them.

In addition, the administration says it has gone through the list of F-16 technologies and deleted certain items that have commercial applicability. The problem is that the administration can change its mind at any time and release formerly nonreleasable items to the Japanese. In fact, the Japanese request such releases and the administration complies all the time.

For example, the new agreement says the United States will release sensitive computer source codes to the extent necessary to make the Japanese computer program work. However, the administration is saying to Congress that the Japanese won't get the sensitive source codes. But if the Japanese aren't successful in making their own source codes work, won't they ask for and receive release of our source codes? The answer is most probably yes.

Finally the administration says it is releasing such items as the source codes for the fire control computer—which controls the plane's weapons—because they don't have commercial applicability. However, military items are also commercial items if we sell them to other countries, or even when DOD buys them. The FSX program sets the Japanese up in the business of manufacturing military end items which have the potential to compete with our military products if the Japanese cabinet ban on export of military items is lifted.

Issue 5: Engines. The old agreement is silent on engines during the production phase. The new agreement says that the Japanese may be allowed to produce the engines under license. Because the wording is vague, the Japanese can interpret this portion of the new agreement as guaranteeing them the right to produce at least a portion of the engines.

I see the distinguished Senator from New York [Mr. D'AMATO] on the floor. As Senator DIXON has said earlier, I am prepared to go on and on like Tennyson's brook on this matter. But I do not want to inhibit any other Senator and I yield the floor, and I say hello to my friend from New York.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, I thank my distinguished colleague, Senator HELMS, for giving me an opportunity to rise on this occasion and speak to this most significant and important issue.

Let me first say, Mr. President, that I deeply admire Senator HELMS for his fearlessness in calling it the way it is. That is a rare quality today in political life and it is certainly unusual to find a man who is unafraid to stand up, even in the face of opposition that comes from one's own administration and one's own party.

Mr. President, I deeply appreciate having the opportunity to also work with Senator DIXON, from Illinois, in his spearheading the opposition to the proposed codevelopment and production agreement with the Japanese concerning the FSX.

Mr. President, I indicated to a number of people in the media just a short time ago when questioned about the FSX, that last week I had an opportunity to be home.

My dad was in the hospital. I visited him, and he said to me, "Son, what is happening? What is going on in the Senate?" I told him. I discussed with him the proposed transfer of technology and the proposed FSX agreement between Japan and the United States. Dad, who is a World War II veteran, said to me, "Son, it sounds to me like this is Pearl Harbor without bombs."

Mr. President, I think this is even more serious because, you see, Mr. President, we did not have an opportunity to prevent Pearl Harbor from taking place. That was a sneak attack. This is an attack that maybe the Japanese will attempt to disguise, but we should know better. We have ample opportunity, ample warning.

Later on tomorrow, or on Tuesday, when we have further extended debate, we will demonstrate specifically the technologies that the Japanese have targeted, technologies that really give us the capability to remain a modern industrial society, technologies that, one dominated by the Japanese, will make it impossible for this Nation—impossible—to cost-effectively produce our planes, our ships, and our missiles. Yes, my friends, we will have people who will say, as it relates to cost-effectiveness, that we have no alternative but to buy from the Japanese because they can produce superior quality and cheaper products in these areas. And, indeed, we will find it difficult, if not impossible, by any measurable standard to resist those arguments, particularly if they are factual.

So, Mr. President, I rise today reluctantly because I believe that President Bush and particularly Secretary Mosbacher have done all they possibly could to attempt to change or modify a bad agreement, a bad deal that they inherited. Indeed there have been some improvements. There are letters of agreement that talk about coproduction, and yet when the Japanese Minister of Foreign Affairs goes back home, he says, "Do not worry about that; that is not really true. We do not have to address that until several years from now and it may not be."

So in one voice we hear that yes, there will be coproduction. Let me suggest to you that we are selling out for the 30 pieces of silver now.

Some companies—General Dynamics—will agree to anything. They will get some additional work. We have heard a lot of things here about flowback. My, how the editorial writers like to think they have some kind of superior esoteric knowledge. Oh, the United States can pick up some technology flowback. What do we hear the flowback is going to be? In the area of advanced radar systems, who is number one? The United States of America. Not only in applied technology, but that which looks to the future. Oh, we hear about if we have this codevelopment and this production agreement, we are going to gain some advances from getting these composite materials and they are rather important advances.

Let me tell the American people what we are talking about regarding composite materials. These are the composite materials we talk about. They are co-cured. These materials are tougher than steel, much lighter. Incredible. And who are the leading developers of composite materials in the world? The United States of America.

Oh, General Dynamics says we are going to advance, we are going to advance because we do not have it. Yes, General Dynamics, you may not have it, but let me suggest to you when my staff requested from the General Accounting Office a review of certain contracts, and these are the contracts that have been in effect as it relates to composite materials, General Dynamics, who may get some additional work out of this, said, "We don't have this composite material," but Boeing has been working on it and developing it, and so have Northrop, Rockwell, and Grumman.

What are we being told? How is it that the Congress of the United States has not been dealt with in a forthright manner? Why is it that we have been told half truths and been given this line of malarkey that we are going to be ahead as a result of this flowback when we already have the best? I will tell you who is going to be ahead. Do you really think the Japanese are going to pay $.5 billion for old, antiquated technology? Why is it on one hand they say they can get it anywhere and yet they are ready to put up $500 million? Let us wake up. We cannot stand the truth. We cannot handle it. An element called fairness.

By the way, let me tell you about composite materials. Let me show you the pictures of what we have been doing. We are years ahead. Aerospace is one of the few industries where we are ahead of the Japanese and yet we are ready to turn it over. This is a picture of co-cured composite materials that have been used in a tail and that have been applied for 10 years now. It has been produced. It has been applied. The Boeing people use it now, but we are going to get this technique from the Japanese. That is malarkey. It is nonsense. It is not true.

How come we indulge that? Why do we tell that to people? Why do we tell that to the Congress? So General Dynamics will get something? The Japanese are not going to be paying $500 million for old, antiquated technology that cost the taxpayers of this Nation $7 billion. They want our systems integration skills.

We hear we are going to protect these systems, these secrets just like we did when we gave them the F-15 materials and went into coproduction with them. When we got the General Accounting Office report of 1982, it said that we systematically turned over all of these secrets to them, and do you know who went and did it? The same people who are the architects of this ridiculous agreement, the Defense Department. The Defense Department. Read the report, and I challenge you, if you are really going to be conscientious and do what you should be doing, and I say this to the Members of this body, read this report of October 1982 and tell me that the same thing is not going to happen here. No, we have made promises; we are not going to do it again. Do not believe it.

Burden sharing; oh, this a new thing. Terrific. I want to tell you something; the same people who invent these magnificent names, star wars, secret pebbles, what is it, little pebbles, colored pebbles—this is incredible. Now we are onto burdensharing. We should go through with the FSX deal for burden sharing. Nonsense.

We tell the Japanese, "Listen, you have to pick up a greater share of the defense in the Pacific." They say, "Fine, we need 130 planes. We will build an FSX." Supposedly we said to them, "Why not buy our plane?" I do not even know if we did. Supposedly they just said no way, no how.

Then we got into this business of codeveloping the FSX. What a bunch of suckers. Codeveloping. Incredible. We take your technology at bargain rate prices, we develop it, maybe we will give you something back.

By the way, what part of the production do you think the Japanese are going to give us? They will give us the assembly work. They are not going to give us the high-technology part, the integration part, the computer systems, et cetera. So we will have some people who may be working for a while, and eventually we will have American working the assembly lines at the low end, the low-wage area when they want to give us that work, if they want to give us that work in the future. Oh, but this is burden sharing.

Look, let me suggest to you very candidly, I think somehow we are afraid to take credit for producing the best plane in the world, which is the F-16. We have absolutely lost our resolve to say we have the finest plane in the world and why do the Japanese not buy it because it is fair, because it is the right thing to do. It is the right thing to do not only as it relates to the balance of trade and treating partners fairly and dealing with them forthrightly.

It is not only the right thing morally to do, but it is important as it relates to our own relationship so that the American people and the Americna Congress and Government can say, look, we have real allies, true allies. They do not come under false pretenses or stand on ceremony. This ceremonial business of our national honor and we do not buy planes abroad, we have to manufacture them ourselves, true burdensharing would be saying, who has the best plane? Where would it be most cost-effective to buy? True burdensharing would say, United States of America, you have the best plane; you can produce it at one-third the cost. You can guarantee delivery starting 5 years earlier than if we go through this coproduction of an FSX.

We think it makes sense and we know it makes sense and we are going to buy it. If the United States of America had been suggesting to the Japanese that they buy a plane that we made just because we made it, just because we wanted to keep people working—and that plane was an inferior plane and that plane cost more and that plane could not do the job, then they would be absolutely right. They would be correct.

Burdensharing? Nonsense. What you call it is looking ahead and targeting an industry, one of the few areas where we have a surplus as it relates to our foreign trade. It is projected that it will generate about $17 to $18 billion in trade surplus from sales abroad. We are in a sorry state when we have our own people in the administration, the bureaucrats, the Defense Department in particular, cutting deals like this. What do you expect from an unelected group that has become policymakers for this country yet feels they must apologize for American strength? They should run for office if they want to do that—we'd have stronger policy with a little backbone.

We hear people saying, "If we don't go through with the FSX deal, what will people say about us keeping our word?" I want to suggest again to the editorialists and writers who say we have to go through with this agreement because if we do not, nobody is going to believe our President, that we have a Constitution, and it prescribes the methods and modalities by which laws are enacted, agreements are made, et cetera. Should we apologize because we are asking for the Congress of the United States to work its will on this agreement? We do not have a dictatorship; we do not have a monarchy, thank God. We have a democracy. I do not think we should be apologizing because we have a superior plane and because there are those of us who say "buy our plane"—it is cheaper; it is better.

We should not be blackmailed. There is a subtle influence being exerted around here. Nobody wants to say it. We are being blackmailed, absolutely. "We give you 30 pieces of silver today and, by God, if you do not take this, you fellas, we are not going to let you produce it anyway."

What happens if the Japanese decide to retaliate, retaliate because we are doing what is right? Incredible. The threat is that they will not buy our bonds, our debt. We are being held hostage, economic hostage. Do you think it is going to get better 2 years from now, 3 years from now, 5 years from now, 10 years from now? I suggest the FSX is an issue so clearcut that if we do not have the courage to

do what is right, now, when will we? We are not suggesting rejection of this deal because there is going to be a plane in the future that is going to be better, faster, or cheaper for the United States. We are being told to take this deal in spite of the fact that there are lots of questions that are open—technology transfer, secrets that will flow from this that are not supposed to, jobs that are lost, targeting of an industry, aerospace, both military and domestic. We are being told, notwithstanding we have the best product, the cheapest product, that does not count. Somehow it does not count.

Let me tell you something. If we are not careful, we will have a defense industry that will be based in Japan and maybe they will let us produce some of the things—maybe. Maybe—and it will not just be planes; it will be ships; it will be missiles. I am going to suggest to you that Sushi and Sonys and Toyotas are enough. Enough. I do not want to hear the nonsense some day, "We can't compete. They've got a better missile system. We've got to buy it."

What about our national defense? What about the spare parts for our weapons? Who is going to be supplying these? So for 30 pieces of silver we lack the courage to stand up for what is right and say, "My gosh, if we are truly allies and friends and partners, we expect you to do what is right." I hope the Members of this body will do what is right, that is, to approve this resolution of disapproval, to stand up now for America before it is too late.

I thank the Chair.

Mr. BRYAN. Mr. President, The specifics of the FSX agreement have been debated in this Chamber the past 2 days. I would like to make some further general comments on the agreement and its broader implications.

To me, the basic flaws of the FSX agreement are apparent:

This is a deal in which the United States gives very valuable technology to Japan in return for only vague and speculative benefits to this Nation.

I think that arrangement—negotiated mainly by the Department of Defense during the preceding administration and revised by the current administration—cannot be responsibly approved.

Some may say that the deal should go through because this Nation has made a commitment, and that to change course now would undermine our credibility or damage the integrity of the Japanese Government.

To those I say that it is time we stand up for our country, and our industries, and take a long-range view of our economic destiny before it is too late to do so.

This deal was not done by Congress—and Congress has an independent responsibility to review it in the context of the long-term best interests of the Nation—and Congress should stand up for the United States.

I think that it is time to reexamine the Nation's attitude as well as our policy toward our role in international trade.

We often hear that our country must be "responsible" in our international dealings. And we have been.

Now I think the operative word should be "tough."

There has been much talk the last few years about reducing our budget and trade deficits. Unfortunately, talk, rather than tough actions have characterized our actions in both areas.

Until we act—and act decisively—our economic future is in doubt.

Last year our Nation experienced a trade deficit in the range of $137 billion. Our trade with Japan accounted for about 40 percent of that deficit.

Approval of the FSX agreement—and providing to Japan the technology base needed to further their own commercial and military aircraft industry—in the long run can only act to increase our trade deficit.

The United States is without question the world's most advanced and successful producer of military and commercial aircraft. It is a great success story that the Nation should be proud of.

The Japanese are our greatest economic competitor—and they do not plan for just the next year.

The Japanese are willing to invest today in order to secure a long-term advantage in the world's marketplace.

Through the coproduction agreement we are providing the technological base for Japan to become, over the next few years, a major force in the aerospace market—our strongest industrial export sector.

It is time we adopt a long-range view toward our trading partners that is fair—but also which implements a long-term strategy for enhancing our role in international trade.

The fact is Japan has not displayed an active approach to reducing the massive—$55 billion—trade deficit that exists between our countries.

By purchasing our existing F-16's Japan could be displaying a good faith effort toward reducing the trade imbalance—and they would be receiving one of the most successful military aircraft ever produced at a very reasonable cost.

It has been estimated that the FSX may cost as much as $30 million more per aircraft than if existing F-16's were purchased directly—existing F-16's could be purchased directly for one-third to one-half the cost of the FSX.

By rejecting this agreement, the Congress can start to put the United States back on the course of actively guiding our Nation's economic future.

We can learn a lesson from Japan—and that lesson is not how to build military aircraft.

The lesson we can learn from Japan is that aggressive government economic development and trade policies can be effective if they are part of a coordinated strategy.

The Japanese economy is successful largely because of aggressive policies to invest in and promote markets in which they can compete effectively. And they protect their domestic markets.

Despite talk of opening its markets to U.S. goods, the fact is that progress has been painfully slow. Instead of a promised 20-percent share of the semiconductor market U.S. producers have only about 11 percent.

It is still difficult to export our agriculture products to Japan.

Our U.S. Trade Representative, Carla Hills, recently released a report in conjunction with the Trade and Competitiveness Act of 1988 which addressed trade barriers in foreign nations.

Trade barriers were found in Japan to United States exports of in many fields—superconductors, agricultural products, telecommunications, optical fibers, aluminum, and construction. I suggest that if the Japanese aircraft producers were competitive today, we might very well have United States aircraft on the list of products which were difficult to sell to Japan as well.

In conclusion, I view our actions today as critical to tomorrow's economic future—the FSX agreement should be rejected in the best interests of our future.

The PRESIDING OFFICER. The Senator from Washington.

Mr. ADAMS. Mr. President, I rise today in opposition to the proposed codevelopment agreement of the FSX fighter aircraft, and I want to compliment my colleague from Nevada on his excellent remarks on this subject.

Mr. President, only occasionally do we have an opportunity to debate a subject such as this agreement, which involves both foreign policy and military policy, in an open forum with enough time that we can present these issues and present them in a manner in which the American people can look at their economic future.

The Senator from Colorado, who presently is in the Chair, is one of the great experts in the United States on our industrial development and on where we can or cannot go, in terms of free trade, our economic future, the industrial future of the United States, and the quality of life of the United States. His global warming bill is a very important one.

This particular bill goes to the technology that we all face, whether it be global warming, whether it be the defense of the United States, as has been

eloquently addressed by other Members on this subject, or to what I want to talk about today, Mr. President, with regard to this particular agreement; and that is, the trade aspects. This is one of the first times we have debated, as a trade matter, our military sales, or our military coproduction agreements.

Mr. President, I am opposed to this FSX fighter aircraft agreement.

I might say I represent a State that presents a picture to the world of a free-trading State. One job in five in our State depends upon free trade. And, yet, we manufacture a few airplanes. The State of Washington probably manufactures more domestic airplanes than any other single State in the United States, and we are very proud of that.

I might say that I have not been contacted by members of my aircraft industry in the State with regard to this proposition. I state those background facts, Mr. President, because I also believe in free trade and fair trade. The people in my State believe in free trade and in fair trade. We certainly want to expand our trade with the Pacific rim, so why is it that the Senator from the State of Washington stands and says that this coproduction agreement is not in the best interests of the United States?

It is simply this, Mr. President: I do not believe in giving away an evolutionary technology to a mercantile country when we are involved in a trade fight throughout the entire world against very strong economic competitors.

Mr. President, we have almost dropped from our vocabulary the word "mercantile" nation in our desire to have free trade and in our desire to compare our trade to that of bloc nations, or to the old-fashioned ideas of socialistic blocs and free-trading countries versus the bloc trading countries.

It is a new world, Mr. President, and in this new world we have, once again, the growth of the mercantile nations among the free-trading nations, and a mercantile nation, simply stated, is one that looks into a free-trading market, and for its own self-interests, make certain that each deal benefits that country's economic position and runs, develops, and establishes a strategy for taking advantage of other nations in every opportunity.

You can say that that is just the competitive system, but here there is far more than that. There is a pattern here, Mr. President. There is a cycle, one that we must break. We must recognize that Japan, as a mercantile nation, has, is, and will demonstrate a pattern of industrial planning and developing, aimed systematically at acquiring a technological expertise and developing a manufacturing base to sustain an export-oriented economy.

This is not to be criticized as something that is foolish, something that is simply evil; they are absolutely dependent upon this type of an orientation, this type of an economy, this type of a mercantile strategy. We have, until recently, been an import-oriented, self-sustaining, internally directed economy, an economy that traded 95 percent with itself. As this has changed rapidly in the last 10 years, and we have become part of the world's trading base, we must understand what we are competing with and what exists in a free world market, and that is what we are going to have in the next 10 years. The Japanese have a definite strategy of acquiring the technological expertise and developing a manufacturing base to sustain this export-oriented economy.

Consequently, Japan has systematically developed new industries, new industrial capacities that far outstrip any domestic requirements that they have, whether it is in automobiles, electronics, or semiconductors. Their economy is based upon—created for an export trade. Ours has not been. Ours has been on the recipient end, and there is no wonder in the world at all that, though we may be technologically equal, and we may be larger in size, we may be smarter, and we may be every bit as competitive, that without this type of strategy, and without this type of devoted effort, they are going to export, and we are going to import, and that leaves us with a trade deficit.

We have to think about these things, and this debate on this product is a perfect place to demonstrate this, to talk about it, and to begin to develop and build our trade strategy and our ability to trade with the Japanese. We have had a great deal of experience in the State of Washington on the west coast with this. Prior to coming back to Government, from 8 years out of it, I was in the private practice of international trade, doing a great deal of trade with the Pacific Rim, and with Japan, and with China. And their system is directed toward exporting to the United States. They have a very small domestic internal automobile industry, and if you wish to determine in great detail exactly how this is done, and exactly what is about to be done in the airline industry, I would suggest a reading of the book by David Halberstein, "The Reckoning." If you read "The Reckoning," it sets forth in enormous detail a 15-year plan to penetrate the American auto industry, and penetrate it sector by sector, company by company, geographic area by geographic area, not evil, not the wrong thing to do in the world if you want to set up a standard of right and wrong, but a precise, directed effort to become the equal of the American manufacturing industry.

When I attended the briefing—and it was a military briefing, it was classified, all of that kind of thing—on this project, I think the last thing that I could think of to say as I left the room was in response to comments that this was not really our most advanced technology and that by the year 2000 the Japanese would just be catching up with us, or maybe not even catching up with us. I said, "If you allow this strategy to be pursued to its ultimate end I can guarantee you the Japanese will deliver you an Okuro fighter aircraft in the year 2000 and if they miss it by a year or two, they will have it by 2005 and they will sell it head to head with you all over the world and you will wonder why it is they beat you."

To those who are saying that you can go to the European technology or the Japanese will and they will get it there, they do not have to do that.

As Transportation Secretary and as a Congressman long before that, I am very familiar with the European aircraft technology. It is a good one but it is one that is way behind ours; even though they build a very good air bus, it has taken them a tremendous effort, and the Japanese will bypass that with very little effort once they acquire the necessary technology, apply the strategy, and apply their industrial base to it.

They are not going to sell these airplanes in Japan. All Nippon Airways and Japan Air Lines can absorb very few of them. But the market of all the expanding nations in Asia can absorb them.

I do not understand why at this point in our life we need to do this type of agreement. It would be different if we were in a position to where we needed to sustain the Japanese economy, which we had to do in the 1950's and 1960's in order to bring it back into its full industrial capacity. But we are ignoring the economic fact of life that the Japanese economy as of today is doing very, very well, so well in fact that there is a trade deficit with Japan and the United States where the Japanese are receiving in excess of $1 billion per week from us as part of a trade deficit.

Japan is our valued and respected strategic ally, but it is also a tough economic competitor, and when you have a tough economic competitor it is like any competitor in the American sports arena, you do not give away your play book to the opposition. The Seattle Seahawks do not give their playbook to the Denver Broncos before they play them. The Supersonics do not hand over their game plan to the Portland Trailblazers, and the aerospace industry should not give away its playbook to the Japanese.

The supporters of the FSX agreement have said we have little to fear from the FSX because the technology

we are transfering to the Japanese is several years old and it is not on the cutting edge of United States advanced military aircraft technology. They miss the whole point. The Japanese do not need tomorrow's military technology today. They are not designing an airplane to defeat us militarily as the Soviets might. They are not interested in selling an airline to the transport business that is going to be a Stealth transcontinental aircraft. No. The Japanese are buying the technology and the ability to handle integrated circuits and the ability to completely manufacture a total aircraft from us when they need it, and they need it now to build their aircraft manufacturing base.

That is their right and they can build this base on their own and that is their right. But it is also our right not to sell it to them in an evolutionary chance so that they will simply move that much farther ahead of us that much faster.

We should not go through with the deal, Mr. President, that jeopardizes our long-term economic and technological competitiveness because of a transitory short-term gain. We are going to be in the trading business and this competition a long, long time.

I would point out to my colleagues that the International Association of Machinists, who represent over 20,000 men and women working for General Dynamics, including 10,000 who work directly on the F-16 have gone on record opposing this deal.

We just cannot be complacent about maintaining our lead in aerospace.

The MIT "Made in America" report on U.S. productivity released last week concluded that the U.S. manufacturing industries will continue to suffer in the world market because of their dismal productivity performance.

One of the industries examined in detail was a study of the commercial aircraft industry, and one of the reasons that it was singled out was because this industry is suffering now from an erosion in its technological lead. The report concluded the U.S. aerospace industry already constitutes "a deteriorating industrial base," in other words, our jigs are old. Our ability to make aircraft is old; it is slowly beginning to deteriorate. We must update it, and we are just about to take one of the best parts of it and give it to someone else who will build a brand new industry. We did this in the steel industry. We did this in the auto industry and we are about to do it in the aerospace industry.

I might say parenthetically, Mr. President, that you may wonder why then if they are not going to build the Stealth transcontinental aircraft and they are not going to compete with us militarily, what is the danger, what is the problem.

The United States got into the air transport business out of the military transport business, through that technology. The dash 7 was the 707, and now the development costs for new aircraft are enormous.

The Japanese have determined a very simple and a very clever system for redoing what we did in the 1950's.

The warning signals are out and for our own good we better hear them. Proceeding with codevelopment, coproduction agreements with Japan where critical technology is involved is not in our national interest.

Mr. President, I urge a vote in favor of this resolution to disapprove the FSX.

The aerospace industry is important to my State of Washington and it is important to the Nation; both in terms of economics and in terms of national security. The aerospace industry employs more than 100,000 people in Washington State with a payroll of roughly $60 million per year. These dollars, in turn, generate more than $4.4 billion a year of Washington State's "gross State product." Nationally, the commercial aircraft industry is the single largest net contributor to the U.S. balance of payments. According to the recent Massachusetts Institute of Technology study on American productivity, "Made in America," commercial aircraft exports provide between 4 and 7 percent of the total U.S. exports with the entire aerospace industry providing an obviously larger share.

The record level of orders for U.S. commercial aircraft is affirmation of our international competitiveness in this area and our sales to foreign customers is a bright spot in an otherwise frustrating and bleak balance-of-trade picture.

While it is harder to quantify the value of the United States aerospace industry to our national security, there is no question that we depend upon our technological advantages to counter the larger numbers of Soviet aircraft, tanks, and surface ships.

To quote from an October 1988 report by the Defense Science Board on the status of the U.S. Defense Industrial and Technology Base,

> "We have chosen not to match our adversaries soldier for soldier and bullet for bullet. Instead, we have chosen to maintain a degree of technological superiority sufficient to overcome our numerical disadvantage.

As the Board noted in its report, we are quickly losing our technological and industrial base in key defense areas. In some areas, such as U.S. maritime industries, the board concluded that we simply do not have the capability required by our defense plans to transport our forces overseas. In other areas, we have not slipped as far, but drastic action is required. There can be little question that maintenance of technological superiority in aerospace technologies is essential to our national security.

We cannot afford to jeopardize the competitiveness of the U.S. aerospace industry and I am absolutely convinced that this agreement will do so.

First, it is clear that Japan is intent on buying more in this agreement than a fighter plane for its national defense. If Japan wanted a fighter plane, they could buy existing United States aircraft for less than half the cost of the FSX. Instead, the Japanese Government is buying access to technology that they do not now possess and a multibillion-dollar production program to develop experience with that technology. Supporters of the FSX are quick to point out that Japan had intended to proceed with the development of a new fighter plane on its own and the Reagan administration convinced them to proceed with codevelopment.

Therefore, the argument goes, the United States comes out ahead. This scenario only underscores my point, which is that Japan's primary goal in pursuing the development of this new aircraft was, and is, to develop its aircraft design and manufacturing base. This fact is not changed one iota by FSX.

Japan has had a longstanding policy of developing its domestic aircraft industry through coproduction agreements for military aircraft. This effort goes back to the 1950's when Japan's aircraft industry was revived after World War II. In the 1950's, Japan coproduced the F-86 and the T-33. In the 1960's, it coproduced the F-104, the F-4, and the P2V-7. In the 1970's, it coproduced the P-3C and the F-15. At every step, the level of technological know how has increased. What has also changed over time is the boldness with which Japan has moved to expand its aircraft industry; an industry that has a very small civilian market and a even smaller military market because of Japan's policy prohibiting military exports and its constitutional restrictions on its military forces.

In its strategic plans, or vision statements, Japan's Ministry of International Trade and Industry—known as MITI—has repeatedly designated aerospace as one of the three key targeted technologies for the 21st century. To help make this vision a reality, MITI has been heavily involved in promoting coproduction agreements, most recently the F-15 fighter, as a means of developing Japan's aircraft industry.

This issue was extensively examined by the General Accounting Office in 1982 in a report that was strongly critical of the way in which the United States handled these coproduction agreements, especially the F-15.

Whereas GAO concluded that the United States entered coproduction agreements primarily to achieve national security objectives, GAO found that Japan and other nations invariably entered into coproduction agreements with the United States to obtain advanced technology, to enhance their high-employment technology base, and to develop future export industries, in addition to national security.

The 1982 GAO report documented a systematic three part Japanese strategy to expand its domestic aircraft industry by: First, establishing consortia of Japanese aircraft manufactures; second, entering into international joint ventures; and third, providing Government financing for aircraft R&D and production contracts.

Earlier this year, in response to the FSX proposal, GAO looked at this issue again. GAO reaffirmed that the United States continued to look at these agreements, including FSX, primarily to advance the military capabilities of foreign countries and to promote compatibility among United States and allied forces. GAO also reaffirmed that Japan is as intent as ever in using military coproduction agreements to expand and enhance its aircraft design and production capability if not more so.

These conclusions are supported by the "Made in America" report of the MIT Commission on Industrial Productivity released last week. The MIT report found that the Japanese Government funds half of both the development and production costs of its aviation consortia versus very small percentages of U.S. Government funded aerospace research from NASA and DOD.

It is also worth pointing out that the 1982 GAO report also recommended that the United States develop a new national policy toward the whole issue of coproduction agreements to make sure that U.S. economic interests were protected including the direct involvement of the U.S. Commerce Department. Unfortunately, the Reagan administration failed to heed any of this advice.

It also comes as little surprise that the 1989 GAO report still found that the United States did not have a coherent policy of safeguarding U.S. economic interests in coproduction agreements. In point of fact, the give-away of U.S. economic interests in the FSX deal was so flagrant that even the Bush administration was unable to support it in its original form.

The problem is that despite Commerce Secretary Mosbacher's actions, the fact remains that the FSX deal still gives away far too much to our most aggressive economic competitor. What it gives away is the advanced design technology and expertise needed to develop and manufacture an entire advanced aircraft. Unlike previous coproduction agreements, which transferred manufacturing capability for a limited set of aircraft components, the FSX encompasses an entire aircraft including the integration of advanced electronic and computer systems.

While the transfer of manufacturing technology under previous agreements may ultimately prove to have been economically damaging to the United States, the FSX agreement would constitute a quantum increase in the type of expertise being transferred to Japan and I have no doubt that it would damage the United States aerospace industry economically. I have examined the only two technologies that the United States is, in theory, to gain access to from this transaction; the composite wing technology and radar technology. I am not convinced that the United States will gain anything at all in these two areas, much less offset the loss of technology we are transferring to Japan. Japan is an economic competitor that is taking aim at one of the few United States industries where the United States still maintains international leadership.

I will close, Mr. President, by saying that those of us who have been involved in the international trading system of the world and now have an opportunity to talk about American Government policy are at a juncture and for us to be taking one of our last remaining technologies and giving to one of our toughest competitors the advantage that we used in the 1950's and 1960's to develop an aerospace industry so that they have a 5- to 10-year jump on what they would be otherwise is simply not the way to proceed.

And as my colleague from Illinois stated so very well in his earlier remarks we are doing this for a competitor and instead of their just buying our airplane, which I think they should do, this idea that we must do all these things just does not make sense to me. We have troops in Japan. We have troops in Korea. We have an entire fleet to make the Pacific safe. We maintain a nuclear umbrella. We defend this Nation and other nations such as Japan from the threat of war. We limit their defense budget to 1 percent. Ours will not reach 1 percent in my lifetime. It is much larger. So as we are spending ourselves into a deficit to protect a competitor, I do not see why that competitor should be demanding from us the terms by which they will help defend themselves.

I hope for a little bit of cooperation, help, and assistance from them to say they will pick up part of the defense burden and not require this kind of an agreement, because we are not on an even footing. We are $55 billion per year in debt to them every year under the present policies. I think we deserve better. I hope the Senate will stand to give us better and will vote down this FSX proposal.

I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that I be allowed to proceed as if in morning business on a subject not related to the FSX matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. REID pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER (Mr. SANFORD). The Senator from Illinois is recognized.

Mr. SIMON. Mr. President, I thank you.

I would like to comment briefly on the FSX agreement that is before this body and tell why I have reached the opinion that I have reached. I served on the Foreign Relations Committee, as my colleagues about it. I have listened and read documents on this.

First, I want to commend my colleague from Illinois, the senior Senator from Illinois.

Mr. DIXON. The very senior Senator from Illinois.

Mr. SIMON. Frequently I say the very senior Senator from Illinois but I should not do that too frequently.

But my colleague from Illinois, by vigorously bringing this question up and causing us to take a close examination of this issue, I think, has performed a real public service. In addition to everything else, I know more about the technology of this country today than I did before this whole matter was questioned. And I am grateful to my colleague and I think all of us in the Senate on both sides of the aisle are.

First, I think we have to talk about this in connection with the atmosphere that is here today. We are not dealing with this just in isolation.

There is, in part, an atmosphere that is not healthy and I am not talking about my colleagues in the Senate here when I talk about this. But the phone calls and some of the responses that I have sensed at town meetings in regard to, first, our relations with Japan. There is a little of the racist tinge occasionally to some of the remarks. Second, there is an understandable but not healthy response on the part of some: We were attacked at

Pearl Harbor, we have to get some revenge.

I do not for a moment suggest anyone in the Senate is part of that but it is out there. And while I understand the feeling it is not a good basis for policy.

There are two other things that are more understandable that have to be weighed in all of this. One is the trade deficit. People understand that this trade deficit with Japan is far beyond anything this Nation has ever experienced. I believe, and my colleague from Illinois is on the floor right now, I believe the trade deficit with Japan this last year was about $70 billion; approximately that amount.

That is far, far in excess of the trade deficit this Nation usually had, years on end. We had trade surpluses, as a matter of fact, generally. But there is an understandable concern about the trade deficit, a concern that we ought to share here.

Second, there is a concern because we are paying and we are footing too much of the military bill, as far as the protection—not only of Japan but of much of that area of the world where Japan has such a dominant influence.

Japan spends 1 percent of her GNP on defense. We spend 6 percent. Our friends in Western Europe spend about 3.3 percent. We are doing a disproportionate amount for the defense of Japan.

In fairness to Japan it has to be said that General MacArthur imposed that on Japan. Unfortunately, General MacArthur did not impose that on the Soviet Union and the United States and other places, too. But we are at a substantial disadvantage because we are doing a disproportionate amount to protect Japan.

When Japan, which gets a good chunk of her oil, the majority of her oil from the Persian Gulf, needs someone to defend Japan, we go there to defend that oil supply. That causes part of the feeling on the part of this body that somehow there ought to be some redress in the balance.

We are spending money on research on better and more powerful nuclear weapons while they are spending money on better television sets and toasters and other things. And our friends that each of us know do not want to buy nuclear warheads, they want to buy television sets and toasters.

Anyway, that is part of the overall atmosphere. Then on the agreement itself. The agreement itself, and here I differ from my colleagues because, although I end up on the same side in voting as my colleague from Illinois, the agreement itself, it seems to me, while it is not a gigantic tilt in either direction, the agreement itself it seems to me, on balance, is probably a good thing for the United States.

The agreement itself—we end up getting some jobs. If it is rejected the Japanese will either develop their own plane or they will enter an agreement with the French or the British or the Swedes or someone else. I think that is the reality.

The choice is not this or rejecting the deal and then our FSX agreements. One of the political realities that the Presiding Officer and my colleagues here on the floor understand also is this deal is going through. I do not know what the vote is going to be on the floor of the Senate. If I were to guess, my guess is the resolution to disapprove will carry but not by a sizable margin.

The President will veto that. And there will not be a two-thirds vote to override the veto.

Then, if that is the case, I have the opportunity to cast a vote, not just on the agreement itself but a vote that is very visible that says: We have to get our trade policies in order with Japan. I want to send a signal to Japan. I want to send a signal to this administration: We are going to have to do much, much better in our trade with Japan. And by voting against this resolution I send the most visible signal I know how to the administration and to the Japanese Government that we have to change our trade policies.

It is true that part of the trade deficit is caused by our own folly. Our budget deficit is, in large part, responsible for the trade deficit. We keep ducking facing reality.

Last year we did not face the budget deficit situation because we said this year we are going to have a new President.

This year we are not facing it because the new President has said I feel obligated because of my campaign pledges, read my lips, no new taxes, and we are getting whispered to by the new administration. Next year, we will face reality. Next year, Congress is going to be up for reelection and maybe we are not going to have it next year. We keep finding excuses for not facing the budget deficit. That is part of it.

But part of it is also, frankly, and this is true not just of this administration, it is the previous administrations we have stumbled, we have been very inept in handling our trade relations with Japan. Japan has had seasoned people in there negotiating trade. They have put stipulations there that are just totally unreasonable.

Cars built in Japan today have 26 dollars worth of American auto parts. When you buy a Ford, Chevrolet, or Plymouth here, you have 600 dollars' worth of Japanese auto parts. A small part of that is because of the quality of the products.

I met with the vice minister for trade from Japan and explained my concerns on the auto parts field, and he said you must understand the Japanese corporations cooperate with one another. Well, I knew that. That is why I was having the meeting. We have to be able to have access to markets. We have to stand up. That is part of it.

Part of it is also, frankly, Japan has just been very tough, and we have not been tough in response. By voting for the resolution to disapprove, I want to send a signal to Japan, I want to send a signal to this administration that I want us to get tougher in this whole area of trade negotiations. We are going to have to do much better.

I do not know what the prospect is for this resolution, as I indicated earlier. My guess is that it will be approved by this body, not overwhelmingly, but it will be approved, and that the deal ultimately will go through because the President will veto whatever resolution is agreed to. I hope the message from all of this reaches the administration and reaches our friends in Japan. We just cannot go on with the kind of trade deficit we have had up to this point.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I simply wanted to say while my dear friend and colleague from Illinois is still on the floor that he honors me greatly by his statement and his vote in the committee in support of my resolution of disapproval. There is no more thoughtful man in the U.S. Senate than my colleague from Illinois, Senator PAUL SIMON.

I have had the pleasure and the distinction and the honor of serving with PAUL SIMON in public service since we were very young men in the Illinois House of Representatives in the very early 1950's. As many here know, we do not always vote the same way, so that his vote here was not a vote to be voting the same as ALAN DIXON. His vote here was a thoughtful and careful vote that he arrived at after hearing all the evidence. I just would like to tell one story about my colleague, Mr. President, who I have the deepest personal affection and the greatest personal admiration for.

One time many years ago when we were very young men in the Illinois House, there was a tremendously popular man in our State who was auditor of public accounts, and he came from our part of the world from southern Illinois. He was from Granite City, I was from Belleville and PAUL was from Troy. We were each about half an hour away from this fellow, the auditor of public accounts. Everybody was fond of him. Everybody said he would be Governor sometime soon.

He had an appropriation bill to substantially increase the appropriation for the operation of his office as audi-

tor of public accounts. Everybody in the House of Representatives voted for it save one. Everybody thought, how in the world could PAUL SIMON vote against that appropriation for our popular friend who is auditor of public accounts? Frankly, many were very critical of him. He was a very young man in either his first or very early term in the Illinois House.

Mr. President, that auditor of public accounts was indicted for stealing millions from the State of Illinois out of the funds in his office. He was sent to the penitentiary and served many years' time in this penitentiary of our State, and one thoughtful man in all of the legislature at that time had the good sense and the courage to vote no on his appropriation bill.

I have been watching PAUL SIMON's votes all my life since then, Mr. President. No man has the integrity and the mission and the purpose that I have ever known that I find in my colleague and friend. I am deeply honored that he is supporting me in what I consider to be this very worthy cause, and I express to him my profound personal appreciation.

Mr. President, I yield the floor because I look forward to hearing some words from my good friend, the President pro tempore and our former distinguished leader of this body.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. BYRD. Mr. President, I thank my friend from Illinois, and I support his efforts in this matter. I probably will have more to say on that subject later, perhaps not today. But I want to address the Senate on another matter.

PANAMA'S ELECTION

Mr. BYRD. Mr. President, the events in Panama yesterday and over the course of the election have been saddening and maddening for all of us. Our hearts go out to the citizens of Panama for the frustrations which they have endured in having their democratic rights trampled in front of them. Our concern goes out to the brave opposition politicans who ran against a hand-picked lackey, and beat him overwhelmingly by a ratio of 3 to 1, only to have Noriega declare his defeat null and void and order his goons to beat up the victors.

Mr. President, the rightful winners of the Presidential election and the people are being denied the fruits of their democratic victory. We have had the spectacle of a crass cabal executed by General Noriega. Noriega has exhausted any pretense of respectability in Panama. He should step down immediately, but I am sure that has been said before.

The joint leadership of the Congress met with the President on this matter this morning. I was invited to be present. I listened carefully to the President's remarks then, and again this afternoon. I support the President fully.

The President took a position that was right, cautious, yet firm, not jingoistic but stating his clear intent and his obligation to take whatever action is necessary to protect American lives in Panama.

It is my firm conviction that the United States should embark on an intensive diplomatic offensive throughout the hemisphere and throughout the world to isolate Noriega and his associates from the fruits of international economic, political and diplomatic intercourse in this hemisphere, to rally the democratic political forces of the hemisphere against him.

I think a summit meeting of the leaders of the democracies in our hemisphere would be an effective forum for a new multinational effort regarding Panama.

In our anger, there is the temptation to call for the violent overthrow of his government, to call for military action, but, Mr. President, cool heads must prevail. The people of Panama and the peoples of the United States, Venezuela, and the Central American countries understand what has happened in Panama in recent days, and understand what our President is saying.

The President said that he would live up to our obligations under the treaties and that he expects Panama to live up to theirs.

The amendment which Senator Howard Baker, the then Republican leader of the Senate, and I offered to the Panama Canal Treaties when they were being debated in the Senate authorizes the United States to take whatever action is necessary to keep that canal open to the vessels of the world. So our interests are protected by the treaties, and I fully support the President in his determination to live up to the treaties but also to see to it that the other side does likewise.

Let us not divert attention from the problem by inviting the possibility of condemnation of the United States for heavy-handed military interference in Panama. In that sense, we would be playing Noriega's game. In response to those who would say, "Let's act now; Let's take military action at this time; Let's don't wait;" let us be cool about this. Let us focus the considerable economic and diplomatic powers of the United States to galvanize the hemisphere on this issue, bringing in all the international institutions which are willing to play a responsible role so as to achieve a solution that will avoid the bloodshed of law-abiding Panamanians and, of course, of Americans living in Panama.

Mr. President, there are those who argue that the strategic interests of the United States—that is, the viability of the canal—are now in jeopardy and that the United States needs to take some kind of action.

The action usually cited is to shelve the Canal Treaties. The treaties, themselves, as I have already indicated, provide adequately for the protection of the strategic interests of the United States; they give us the right to "defend the canal against any threat" and "to act against any aggression or threat directed against the canal or against the peaceful transit of vessels through the canal—not only now but also in the year 2000 and thereafter when, under the treaties, the Panamanian Government would take over the operation of the canal. Those amendments that were approved when the Panama Canal Treaties were being debated, and to which the Senate gave its consent, provide fully for the protection of our rights even after the Panamanian Government takes over under the treaties. So our rights are protected now and in perpetuity.

Our legitimate legal right in this respect is not in jeopardy, and, if the events occur which require us to exercise that right, then I, for one, would fully support whatever action is needed to fulfill that responsibility.

At the present time, that situation does not pertain and is not relevant to the issue of the system of democracy which Noriega himself is attacking in Panama.

If the actions of the Noriega regime are threatening the safety of United States dependents in Panama, then I again support whatever prudent actions need to be taken, including relocating dependents and augmenting our forces in the region to provide that safety or whatever else is required under the circumstances. The President has made clear the purpose for which he is sending the brigade-sized force to Panama, and he has indicated that we are not sliding into American military intimidation and possible action against Noriega without due provocation.

The opportunity for American leadership in the Panama situation stares us in the face, and after the President's action today, I am optimistic that a sound strategy can be implemented to engage in an intensive diplomatic offensive in the hemisphere, including a vigorous effort at public diplomacy to isolate Noriega, and promote the prospects for a peaceful democratic transition in Panama.

Mr. President, I congratulate the President on the actions that he has outlined. I think he has acted prudently, carefully, deliberately, cautiously enough, not provocatively but firmly, saying we will protect our people, we will protect Americans living there, and we will protect our interests.

Mr. President, I yield the floor.

Mr. President, my friend Senator DIXON, I understand, is returning to the floor shortly. In the meantime, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LAUTENBERG). Without objection, it is so ordered.

DISAPPROVING THE EXPORT OF TECHNOLOGY TO CODEVELOP OR COPRODUCE THE FSX AIRCRAFT WITH JAPAN

The Senate continued with consideration of the joint resolution.

Mr. FORD. Mr. President, what is the parliamentary situation at the moment?

The PRESIDING OFFICER. The pending business is Senate Joint Resolution 113.

Mr. FORD. Is there any time limit?

The PRESIDING OFFICER. There is no time limit.

Mr. FORD. Mr. President, I want to talk about Senate Joint Resolution 113, which is the resolution of disapproval of the sale of the FSX to Japan.

You know, I am somewhat pleased that the paper in my State, one of the large papers, a very good paper, listened to the debate and researched the reasons for this sale. Their headline has been used quite a bit here this afternoon. The headline of that editorial in the Lexington Herald-Leader, Lexington, KY, says "The 'S' in FSX stands for sucker."

I would like to read that editorial, Mr. President, into the RECORD.

> U.S. Sen. Wendell Ford is right. The Bush administration's proposed FSX aircraft deal with Japan brings to mind P.T. Barnum's famous line about the birth rate of gullible people.
>
> Ford, the Democrat from Kentucky, is leading a fight to keep Americans from being played for suckers in this deal; and well he should. It's a one-way transaction. The United States gives the Japanese the technology they need to *compete*—
>
> I underscore "compete"—
>
> with us in aircraft production. In return, we get nothing we don't already have.
>
> Sure, General Dynamics, the aircraft company that will work with Mitsubishi Heavy Industries on this new version of the F-16 fighter, will get the benefit of Japanese radar and composite materials technology. But that will only help General Dynamics catch up with its domestic competitors—Boeing, Lockheed and Northrup, for instance—who already are competitive with the Japanese in this area.
>
> To get technology that we already have, we give away the secrets to our leadership in airframe construction and electronics—secrets the Japanese can use to enter the commercial aircraft market. And that, as the president of Mitsubishi has indicated publicly, is what this *deal*—
>
> I underscore "deal"—
>
> is all about. Why else would Japan agree to pay twice the price of an F-16 for a slightly better version of the same plane?
>
> Of course, there is nothing wrong with Japan developing an aircraft industry. Competition in any industry is good. But we don't have to hand everything to the Japanese on a platter. Let them incur their own research and development expenses, instead of buying the technology wholesale. And let General Dynamics do the same on the domestic front.
>
> The figure has been used of $7 billion of hard-earned taxpayers' dollars that have gone into the development of the finest military aircraft in the world, the F-16. So here in a flick of a pen a deal is struck to give that technology, that research, that development away for a pittance. I do not know what other Senators are hearing. But let me tell you when you get outside the Beltway—in case anyone listening to me does not know what the Beltway is, that is the highway that runs around Washington, DC, 72 miles, I guess—when you get beyond that, beyond the Potomac River, people do not like this arrangement. And it would be my guess that the mail is going to be almost as heavy in opposition to this arrangement as it was to the pay increase.
>
> Telephone calls are coming in my office, and letters are being received by the boxes and bags full. When our constituents get through telling us, I do not believe there will be a Senator who should support this arrangement with Japan. Some will. Some are loyal even if the people they are following are wrong. You cannot fault loyalty, but you can also fault being wrong.
>
> I know what good business with the Japanese is. There is a perfect example in my State. Toyota has built a plant in Georgetown, KY, and is manufacturing Camrys with American workers and American parts. They get the revenue; we get the jobs. There is nothing wrong with that. Why give them the revenue and the jobs both? In my opinion, that plant in Georgetown, KY, is a good business transaction—this one is not—because in that situation in Georgetown, KY, there is no erosion of American jobs, no giving away of valuable technology, no giving away—and this is what really get to me—of the capability to establish a lead in the commercial aviation industry and take away our predominance, our one last area of manufacturing predominance, from us.
>
> We are approaching the Japanese decade of the aircraft, having suffered through the decade of the automobile and the decade of the microchip; and we are handing it to them on a silver platter—maybe green. I think if we took time, as I said earlier, to listen to our constituents, and what they are saying, not one Member of this body would have to think about how to vote on the resolution of disapproval. The decision would be automatic, and it would be a resounding vote of no sale, no sale.
>
> The working men and women of this great country of ours have a stake in what we do now and how it develops the future. You know, the American dream is to invest at night and be rich in the morning. It does not happen to many people. It takes a while to work and develop, and it takes a demand in the American system to make a go of things. As we say in Kentucky, "It would take a while."
>
> The working men and women know what this is, and union knows the difference between a short-term gain and a long-term loss. This morning I received a very interesting letter from the International Union of Electronic Workers. This union represents some 47,000 workers at General Electric who manufacture the jet engines which will be involved in the FSX deal.
>
> Listen to what the union president says, William H. Bywater:
>
> The net effect of this deal will be to give Japan a leg up in another vital industry, resulting in the loss of jobs for U.S. workers, who have built the U.S. aerospace industry into the strongest industry of its kind in the world.
>
> They paid their taxes, they worked hard, and now we say to them, with all your payment of taxes, all your hard work, we are going to give that away. We say, down in Kentucky, something about that: "That ain't right."
>
> Likewise, it misses the boat in its failure to hold out for full production of the FSX. Production where? In the United States of America, if we hold out for a full production of the FSX in the United States, as a down payment by Japan on longstanding commitments to bring down the $55 billion trade bonanza it enjoys over this country.
>
> The union has not been fooled, not for a minute, by the fleeting promise—and I underscore "fleeting"—of a temporary workload. They understand the tradeoff between short-term gain and long-term loss. Why do we not here on Capitol Hill understand it as well?

So, Mr. President, I ask unanimous consent that a letter written to me by William H. Bywater, president of the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers be printed in the RECORD at this time, along with the news release.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

> INTERNATIONAL UNION OF ELECTRONIC, ELECTRICAL, SALARIED, MACHINE, AND FURNITURE WORKERS, AFL-CIO,

Washington, DC, May 9, 1989.

Re FSX Fighter Jet Agreement with Japan—S.J. Res. 113.

Hon. WENDELL FORD,
Russell Senate Office Building, U.S. Senate, Washington, DC.

DEAR SENATOR FORD: As you know, the IUE represents approximately 200,000 American workers, more than half of whom are employed by firms in defense related industries. Among these are 1,000 workers who build jet engines at the GE manufacturing facility in Madisonville, Kentucky. These workers are very concerned about the Bush Administration's recent agreement to co-develop the FSX fighter aircraft with Japan. We understand that Senator Dixon's Resolution, S.J. Res. 113 to disapprove the FSX agreement, will come before the Senate within the next few days. We are writing to urge you to support S.J. Res. 113, to stop the Administration from concluding the FSX deal.

The Japanese have made no secret of their intention to develop an aerospace industry which will be a strong competitor on the world market. Aerospace is one of the few remaining manufacturing industries in which the United States has an advantage in international trade. There are strong indications that the FSX agreement will threaten the competitive position of that vital U.S. industry.

At a time when the critical task of reducing our $55 billion bilateral trade deficit with Japan is prominent on our national agenda, this agreement virtually guarantees the further decay of our trade position. The Japanese could quite easily, and economically, meet their military needs by purchasing sophisticated F-16 aircraft from the U.S. and thereby contribute substantially to an improvement in the trade deficit. Instead, the deal may cause further damage if the Pentagon chooses to import FSX fighters from Japan.

These possibilities do not seem far-fetched to the American workers who have built the strength of the U.S. aerospace industry. They have watched as other sectors of the economy have been destroyed by imports. In many cases, the competitive foundations for those imports were laid by public and private agreements to transfer technology.

We urge you to join with your colleagues in Congress to reject the FSX agreement by voting in favor of S.J. Res. 113, the Disapproval Resolution sponsored by Senator Dixon.

Thank you for your consideration of our views on this very important issue.

Sincerely,

WILLIAM H. BYWATER,
International President.

[News Release from the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers, AFL-CIO; May 10, 1989]

BYWATER CALLS ON CONGRESS TO REJECT FSX DEAL

Calling for Congressional rejection of the Administration's agreement with the Japanese to co-develop the FSX fighter aircraft, President William H. Bywater of the International Union of Electronic Workers said clarifications offered by the Bush Administration did "little or nothing to answer the critical concerns of American workers."

"The net effect of this deal," Bywater said, "will be to give Japan a leg up in another vital industry, resulting in the loss of jobs for U.S. workers who have built the U.S. aerospace industry into the strongest in the world. At the same time, it undermines our national security interests in the face of the transfer of sophisticated technology to a foreign government.

"Likewise, it misses the boat in its failure to hold out for full production of the FSX in the United States as a downpayment by Japan on longstanding commitments to bring down the $55 billion trade bonanza it enjoys over this country."

The IUE represents some 47,000 workers at GE, including 5,000 in Massachusetts and nearly 1,000 in Kentucky, who manufacture the jet engines which will be involved in the FSX deal. The IUE also represents thousands of workers at Westinghouse, United Technologies, Rockwell International, Unisys and hundreds of other companies, large and small, which manufacture defense-related products.

The furor over the FSX has occurred just as many in Congress are demanding that the U.S. Trade Representative apply the provisions of the 1988 Trade Act to Japan. Yet, while the U.S. trade deficit with Japan continues to skyrocket, the Administration has negotiated yet another giveaway to the Japanese. "The FSX deal shows that President Bush is not serious about balancing the trade deficit. Aerospace is one of the few remaining industries in which we run a trade surplus. This deal sows the seeds of future catastrophe in that sector just as previous agreements have paved the way for Japan to acquire world leadership in other industries such as consumer electronics."

The Administration has justified the FSX giveaway by saying that it is in the national security interests of the United States. Yet, the Defense Department, itself, has said that Japan is targeting the aerospace industry for extensive development in the near future. Japan has, thus far, limited its sales of military products to the United States. "In ten or fifteen years, we'll be buying our fighters jets from the Japanese, just like we now import our VCRs."

"Our national security and our economic security cannot be divorced from one another", said Bywater. "If we don't protect and maintain our manufacturing industries and the livelihoods of our people, how will our nation be secure?" While the production details have not yet been settled, it was agreed in the FSX development agreement that 60% of the production of FSX components would be done in Japan. It was also understood that the licensed production of engines may well be a part of that Japanese portion.

"Having offered precious few actual details, the Administration claims it has answered all complaints about the FSX. The U.S. track record on similar trade deals does not justify such blind acceptance by the Congress," Bywater said.

Mr. FORD. Let me just pose two questions, if I may, that I wish to submit to my colleagues here in the Senate: Why is it that those of us who recognize the FSX trade agreement for what it is, a bad deal, are accused of Japan-bashing, when all we are doing is calling it like it is?

"You ought to let the State Department and the Administration make the deal." Well, we have to approve or disapprove. As Hamilton said, referring to the Congress, that "In these halls, the people's voice shall be heard by their immediate representative." I will guarantee you that the people's voice in my State is being heard by this immediate representative, and I promise you that when the time comes next Tuesday or next Wednesday, I will support the resolution to reject this arrangement.

I have said it all along, that the business transactions of Japanese companies are business transactions. Country to country, that takes away business; it takes away jobs. It is not a good business transaction, and when Government puts our people out of work by making arrangements that we know are not right, then we, as Members of the Senate and of the House, should reject that agreement.

And why is it that no one who is in favor of this proposal has passionately or even aggressively defended it on the floor? I do not hear anybody coming out here and questioning me, saying, "Ford, you do not really understand this."

I understand $7 billion in tax money that has gone in to develop the finest military aircraft in the world and now we want to give away that technology. That is a simple "no" to me.

Maybe we will get some defense before we vote on it. But I suspect that defense will be more in offices and on the phones than it will be out here publicly defending this agreement.

The reason is that this is a proposal that is simply indefensible. It is difficult to defend it. It was originally negotiated by the wrong people for the wrong reason, by the people with tunnel vision, and was left to the Bush administration to handle.

The Commerce Department was not even included in this discussion under the previous administration. They have just been brought in recently. They complained and the new Secretary complained that it was a bad deal, but he said, "It has already been done, so let us go ahead and complete it."

If he said it is a bad deal as a businessman he would not complete it.

There was absolutely nothing that could be done to make it an acceptable package because it is fundamentally wrong.

I heard of a football team win a football game that they should not have been able to win, and you ask the coach, "Why did you win this game? What was different about this game"? He said, "We just carried out our fundamentals, what we practice on, the fundamental way of carrying the ball."

The fundamentals in this arrangement are wrong. They do not work. The plays are not correct.

This is a fumble.

The administration tried and was only able to make a cosmetic change—you heard it—just something out here on the edge on the fringes that makes it look different. But the guts of it is

not. The bottom line remains that this sale disguises the fact.

We are establishing a Japanese commercial aviation industry and we are developing it for them and at the taxpayers' expense. We are giving them an aviation industry at bargain basement prices.

It is startling to me that we have arrived at this point. I thought those who opposed it within the administration and said so publicly and then said, "We have already made it; let us go on and carry it out," that somehow or another there would be enough bumps in the road that our position today would not have occurred.

But it has. Our responsibility as Senators representing our constituents is to look at it thoroughly, be briefed, have hearings, and look at the agreement, look at the long-term effect, look at the increase in balance of trade.

So, Mr. President, I am not into statistics or that sort of thing that people can get the calculators out and start hitting these little buttons and start telling you all the numbers, how quick it is, how much we are going to make, and how great it is going to be.

But, you know, I have seen a lot of things in the short period of time I have been here: People say if you increase the tax, you will get more money. People come back and say if you decrease the tax, you will get more money. I have not been able to figure that out. It is kind of hard, kind of tough to understand.

Then you tell us this is a good deal for the working men and women of this country and the working men and women of this country studied it and looked at it hard; they know that a short-term gain and a long-term loss is not in the best interest of their future or their children.

Oh, we are going to hear Senators come out here now and represent districts or States, or something, say that business will make that short-term gain and try to defend it. I do not believe they can say anything to change the constituents' minds as it relates to this issue.

I think it is always distasteful to vote against the administration regardless of who it is. I have had to do that to the President of my party. I have had to do it to the President of the other party or the administration of my party or the administration of the other party.

I think my percentage is pretty good, though.

There is one of those I think and look back on or maybe two of them.

I voted against the Canadian Free Trade Agreement. You try to get uranium enrichment worked out today and see what the price is, the spot market and all that. I voted against that.

I voted against the Panama Canal Treaties. I voted against my President.

Both of those votes are beginning to look a little better.

I feel the same way about this resolution of disapproval. It came from a very strong thinker, very hard worker, a fellow who listens to his constituents, the distinguished Senator from Illinois [Mr. DIXON]. When he goes home, he has his town meetings, and he listens to his people. Hopefully I follow in his footsteps. We are listening. I said I believe the cards and letters and phone calls are coming, and they will come—let me just say in bunches or bundles. They will come in bundles.

This is not one that we want to carry out.

Mr. President, I thank you for the opportunity of allowing me to make a few remarks in opposition to this arrangement with the country of Japan and giving me an opportunity to express what I felt in the last few days for my constituents and compliment those who are leading this fight, and I go back to my editorial. You know, people make a living out of, they say, word merchants. Most of them refer to lawyers as word merchants. But this is the first time in my years I have been here that an editorial from my State has been laid on the Senators' desks, and it has already been quoted at least three times this afternoon. I suspect it is going to be quoted some more. It is going to be quoted some more before this vote occurs.

I am sure the college professors of this day will probably find some way to offset it and their wheels are already turning, but I think it was a mighty fine headline anyhow.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I am sure that it is not the headline that our dear colleague from Kentucky likes so much as the first line of the article which says, "U.S. Senator Wendell Ford is right."

Mr. FORD. Mr. President, will the Senator yield for me to acknowledge that?

Mr. GRAMM. I am happy to yield.

Mr. FORD. Mr. President, I say to my friend from Texas, it pleases me, but not often changes my mind.

Mr. GRAMM. Mr. President, if an editorial were written by one of the great papers of Texas saying that I was right, I would be encouraged, and I would distribute it to every desk, and I would refer to it on many occasions.

Mr. President, I rise in opposition to the resolution of disapproval. I want to make it clear that I am not impugning the motives of anybody who supports it. There is not a Member of this body that I have a higher regard for than the distinguished Senator from Illinois [Mr. DIXON]. He is perhaps our most effective Member, and I always look with some degree of unhappiness on a situation where I am opposing him on an issue, be it small or large.

Let me also say, Mr. President, that there is no doubt that if we ran America by opinion polls, this agreement would be soundly rejected. The American people have a clear preference that we should be building this fighter, here in the United States, and I share that preference with them, but that is not an option that we have before us. Our responsibility to our constituency is basically to get the facts, to listen to their opinions, and to use our best judgment, as God gave us the wisdom to use that judgment, to try to do what is right for America and what is right for the things that we stand for around the world.

Mr. President, first of all, the ideal circumstance, from the point of view of the United States and I believe from the point of view of Japanese taxpayers and freedom-loving people all over the world, would have been for the Japanese to have decided to have bought an off-the-shelf F-16 which would have been produced in Fort Worth, TX. That would be a great thing for many, many reasons.

But the cold, hard reality, Mr. President, is that no major industrial nation for the last 10 years has bought an off-the-shelf fighter from any other nation. In fact, Mr. President, if you look at the pattern for the last decade—and it is not an encouraging pattern—you will find that the major industrial nations that have sought a new fighter have built their own. The British, the Germans, the French, the Italians have all developed their own fighter and their own technology. In fact, we are at this compromise because the Japanese proposed to follow the path of the British and the French and the Germans and the Italians and to develop their own technology and to build their own fighter.

Our counterproposal, not surprisingly, was "Don't build your own fighter. Let us build a fighter and sell it to you." In fact, Mr. President, that is the proposal that we made to the British and the French and the Germans and the Italians, and that proposal was rejected by them.

We have before us a compromise. It is a compromise that is somewhere between kissing Sophia Loren in the moonlight and kissing your maiden aunt at the nursing home. But, Mr. President, this compromise is greatly preferable to the alternative. Because the cold, hard alternative is that if, in fact, we should disapprove this sale, the Japanese would do what they initially intended to do, which is to go out and develop their own technology and build their own fighter. And I argue, Mr. President, that that is not

in America's interest, and it is not in America's interest for several reasons.

First of all, 40 percent of $6 billion, which is the projected production costs—and the 40 percent is the ballpark figure that we are using as America's share for dollars and for jobs—is $2.4 billion. That is a lot of money, even in the Federal city.

If the Japanese go it alone, develop their own technology, produce their own plane, then we will get 100 percent of zero, which, unfortunately, is zero. So I prefer $2.4 billion of money spent in the United States creating jobs for America's workers, as opposed to getting nothing out of the building of this new fighter.

Mr. President, there are two other important reasons why I think this sharing arrangement is a good arrangement for the United States.

First of all, we are not indifferent to Japan's ability to defend itself. In fact, I have been on this floor on many occasions and heard my colleagues rant and rave and speak and exhort the Japanese to defend themselves, to do more. Here we have Japan ready to spend $6 billion in its own defense to build a fighter that will give it the capacity to project air power out 1,000 miles from the Japanese homeland. In the process, this would reduce the necessity for the United States to defend its own military bases in Japan and, to some extent, in Korea, thereby lessening the burden on the American taxpayer of defending the free world.

But, more importantly, what is neglected in the argument against this sale is that one of the most important provisions of the sale is that the technology that will be developed and the technology that will be licensed cannot be used by the Japanese to produce a fighter that they can sell to the Koreans, to Singapore, to Taiwan, to the Philippines, and all over the world in direct competiton with the American aerospace industry.

The advantage of the joint production agreement is that it preserves our ability to limit their capacity to compete. As I understand it, Mr. President, that is a principal concern here, and it is one that we should not be indifferent to.

In addition, I have no doubt, given the superiority of the American aerospace industry, that if Japan develops a fighter on its own, not only will it try to sell that fighter all over the world—which it will have to do because it is going to cost them a lot of money to do it—but that fighter will not do the job that an upgraded F-16 will do. And if the day should ever come when we need the help of the Japanese in keeping Ivan back from the gate, I want the Japanese pilots to have the best planes in preserving the lives of the thousands of American servicemen in Asia and protecting American interests in that region.

Mr. President, I hear concern expressed about technological transfer. I think only a fool would not be concerned about that. But this concern is expressed in isolation from the facts. The Japanese, first of all, under a license, built the F-4. The Japanese, under a license, built the F-104. And, Mr. President, a point that is totally neglected in all these arguments is that the Japanese, even as we speak, are building the F-15 under license. That aircraft is in some way technologically superior to the F-16; in other ways it is not. So the plain truth is that many of these concerns exist in the agreement that is currently in force in the joint production of the F-15.

But, Mr. President, if our objective is to maintain technological superiority, is it not wise that we should preserve our control through licenses over technologies that they would use? Is it not wise that we should enter into an agreement where they must share with us new technology that is developed as a result of our joint effort, rather than simply encouraging them, as this resolution would do, to engage in the activity that, after all, we talked them out of doing; namely, going it alone, developing their own technology?

I cannot understand, if your concern is over the Japanese developing this new technology, if your concern is over the Japanese entering the aerospace industry and competing against us, why we ought to pass a resolution that forces them to do what they wanted to do to begin with. It makes absolutely no sense to me.

Let me add, Mr. President, that I am concerned that this debate is occurring, in large part, because we are talking about Japan.

I did not hear this level of debate, Mr. President, when the British tried to sell us the Harrier. My colleagues will remember that we bought this jump-jet that has these nozzles that move and the plane takes off straight up and then turns and flies off. When the British, our great ally, sought to sell us the Harrier, what did we do? Were great objections raised? No. We negotiated a deal. Did we say: Well, of course, we will just buy it right off the shelf, we will buy your technology; send the planes over here?

What did we do, Mr. President? We said: No, we are not going to buy the plane built in Britain. We will only buy it if it is built in the United States of America.

I understand that Japan is protectionist, more protectionist than we are but less protectionist than we claim. We are more protectionist than we claim. I deeply resent the fact that Japan cheats its workers, lowers their living standard, distorts world trade, all in the name of protecting narrow greedy special interest groups that hurt the very people that have created the Japanese miracle.

I believe, Mr. President, that we should do everything in our power to pressure the Japanese to open up their markets, not just for our good, but for theirs.

But, Mr. President, taking action to deny us the ability to coproduce a plane and create $2.4 billion of income for Americans is not wise policy. At a time when we desperately are calling on our allies to shoulder a greater degree of the burden of defending the free world, I do not understand why we are discouraging the Japanese from developing a defense industry and investing their money in helping us preserve world peace and protect our freedom.

So, Mr. President, if the choice were between the F-16 bought off the shelf and produced in the United States of America and this agreement, I would opt for the plane built in the United States. But, Mr. President, no major nation in 10 years has made such a transaction, and we certainly have not.

In fact, of all nations that can complain about protectionism, we are the nation in the Western alliance that has the dirtiest skirts when it comes to trade in defense articles.

In fact, Mr. President, let me just read how absurd American protectionism in defense is. Under section 8010 of the fiscal year 1989 Defense Appropriations Act we have an absolute prohibition on the purchase of any of the following items from any of our allies:

> Any article or item of food, clothing, tents, tarpaulins, covers, cottons and any other natural fiber products, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, canvas products, or wool—

Need I go on and on? In fact, Mr. President, I am willing to assert and would be happy to take it back if anybody could demonstrate it were not true: Of all members of NATO, we are the most protectionist, in terms of defense purchases.

We have hardly set the example in defense procurement that we would like other nations to follow. In fact, we have a larger trade surplus in the defense industry, including the aerospace industry, than in any other major component of our trade relations. Of all areas that we should not be encouraging protection in, this is it.

So, Mr. President, in an ideal world where we could choose between domestic production versus this arrangement whereby we get 40 percent of the pie, I would take 100 percent of $6 billion rather than 40 percent. But that is not our choice. Our choice is between 40 percent of $6 billion and 100 percent of zero.

When I learned arithmetic in the third grade that anything times zero is zero, I decided to try to stay away

from zeros if my objective was to put money in my pocket or in the pocket of our Nation.

I am not jumping up and down, saying this is a wonderful agreement. But there is one thing that is certainly worse than this agreement. The one thing that is certainly worse than this agreement is to reject it and to encourage the Japanese to build their own fighter so that we get none of the jobs, growth, and opportunity that come with the FSX proposal. We would then have a competitor on the world market that has invested heavily in technology and that therefore finds the need, and clearly it possesses the desire, to go out and sell that technology.

I hope my colleagues will reject this resolution, as well intended as it is. As good as the rhetoric is, the reality is that to reject this proposal and pass this resolution would be contrary to the interests of the United States. It would work against peace and democracy. This resolution is a bad idea, and it ought to be rejected.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I want to very briefly comment on an earlier remark made by the senior Senator from North Carolina when he was on the floor, that I believe merits further expansion for the record and for my colleagues in the Senate who may be paying attention to this discussion.

The administration is trying to create a belief in the country, a feel-good belief, that the F-16 technology we are selling is old technology.

Earlier, the Senator from North Carolina correctly pointed out that the agreement calls for the United States to send F-16C technology on the plane. This technology is recent technology. While the Japanese continue to insist the technology is old, they are also insisting upon receipt of the source codes that control the F-16 computers.

Do you hear that language? They are insisting upon receipt of the source codes that control the F-16's computers.

Mr. President, I hold in my hand one of the letters of clarification—the side letters of agreement, I guess they are called, Mr. President—to the FSX memorandum of understanding. Then there has been exchanges of letters, side letters of agreement, concerning the memorandum of understanding.

I want to read what the Secretary of State, James A. Baker III, the Secretary of State, says to His Excellency, Mr. Matsunaga, Ambassador of Japan. This is the Secretary of State, talking to the Ambassador of Japan. He says:

In this regard the Japanese Defense Agency should be assured that, under the terms of the FSX MOU, the memorandum of understanding, Japan will receive access to the source codes necessary to develop the mission control computer.

That is key language. I think that indicates that in reality what the Japanese will be getting is our current best technology in respect to the F-16 airplane.

I want to make one other point. My friend from Kentucky spoke eloquently about public opinion on this question, Mr. President. I would want to carefully couch these remarks because I would not want them misinterpreted. I do not think anybody ought to follow public opinion in cases where, in our own conscience, we believe from time to time that the general opinion in the passion of the moment could be in error. But I think some do not understand the depth of public opinion in its opposition to what the administration wants to do in respect to this agreement.

I want to say again that I have been home as recently as last week doing townhall meetings all over the State of mine in Illinois, and at every meeting, spontaneously, people express their outrage about this. It is almost never the case that one can say as a public person that opinion seems to be almost unanimous.

On almost all the controversial issues of our time, Mr. President, whether it is the question of prolife groups or prochoice groups or the National Rifle Association, as distinguished from those who believe in gun controls, you have differences of opinion. You go home and talk to townhall meetings, and obviously there are differences of opinion. But the sense of outrage about this is a sense of almost unanimous outrage.

Then I began doing radio call-in shows where the people on major radio networks who are communicating daily with the citizens of their communities, big stations in St. Louis and Chicago, and other communities in my State and those bordering on my State. I was struck by the fact that everyone was opposed to this deal, Mr. President. Not 9 in 10, all the calls and the radio personalities handling those calls are tremendously opposed to this situation.

Last night, and I expect the President was at the black-tie dinner last night, I joined my colleagues on this side of the aisle in a black-tie dinner and was asked to leave there at 10 o'clock to do a television call-in show with a representative of the aerospace industry. We did that for 45 minutes. There were innumerable calls on the subject matter. Unbelievably in the end, I found myself trying to defend the person with whom I was debating. The calls were so vitriolic, they were so angry that I felt compelled to defend the person that I was invoved in a debate with: "Wait, this is an honorable man. He is not trying to do harm here. He is expressing his honest opinion. Give him a break."

I really feel compelled to say to my colleagues that there is a depth of feeling and a passion about this in the country that has not yet been measured and I think is not yet understood and it is powerful. I think that the administration will come to know that.
